

ConferenceLink™ CS870-N**PBX Conference Speakerphone****Conference calls sound as if you are in the same room!**

Full duplex audio means no clipped words or one-way conversations

360° coverage

Ideal for desktops or small conference rooms

Also plugs into your PC's sound card for full duplex audio during videoconferencing and Internet voice calls

Plugs directly into a Nortel phone system

The CS870-N is a professional speakerphone designed to plug directly into a Nortel phone system without any complicated or expensive installation procedures. With the CS870-N, you can conduct productive conference calls right from your office or small conference room without missed words, clipped sentences, and one-way conversations. When using the CS870-N, you can choose to use a private handset or the conference speakerphone, and easily switch calls from one to the other during a conversation.

Professional full duplex speakerphone

Upgrade the quality of your hands free calls with a professional full duplex speakerphone. The CS870-N uses the same full duplex technology found in high-end conference room speakerphones, but is compact enough to fit right on your desk or a small conference table. It is ideal for individuals or for groups of 2 to 5 people.

What exactly does full duplex mean? It means you can talk and listen at the same time, as if you and your caller were in the same room. Full duplex sets a conference speakerphone apart from a typical office speakerphone.

360° coverage

A powerful built in microphone provides 360° coverage during hands-free calls. With automatic gain control, everyone in the room will be heard whether they're sitting, standing, or moving around the room.

Plugs into your PC's sound card

The CS870-N handles more than just regular conference calls. It can also turn your PC into a productive audio communication tool. If you need to collaborate with a faraway client using desktop videoconferencing, the CS870-N provides hands free convenience and can replace traditional PC audio. Just plug the CS870-N into your PC's full duplex sound card for high-quality audio during videoconferencing and Internet voice calls.
