PalmPilot 1MB Professional Upgrade

Three great reasons to upgrade your PalmPilot organizer.

Product Information:

Supports PalmPilot Personal Edition, Pilot 1000 and Pilot 5000.

Compatible Platforms:

Windows 95, Windows NT 4.0, Windows 3.1x and Windows for Workgroups.

Compatible E-Mail Applications:

Microsoft Outlook 97, Microsoft Exchange 4.0, Microsoft Mail 3.5, Windows for Workgroups Mail, Lotus cc:Mail versions 7.0, 6.0 and 2.5.

Modem Compatibility:

PalmPilot Modem and other popular modems.

Macintosh Compatibility:

All features supported except Mail and Expense.

For Example, You Can Keep:

- 4000 addresses
- 4 years of appointments
- 750 to do items
- 750 memos
- 100 e-mail messages

Or any combination of these. The storage is flexible.

Installation Process

1. HotSync your PalmPilot to save all your data.
2. Slide open the ROM cover on the back of your PalmPilot and replace the easy-to-identify memory card.
3. HotSync again to restore your data and install the new desktop software.

Now Internet-Ready!

Included with the Palm OS 2.0 in your 1MB Professional Upgrade is TCP/IP software. This enables your PalmPilot to run optional Internet applications like web browsers, news readers and POP3-based e-mail clients. (Also, TCP/IP software is required to take advantage of Network HotSync.)

You already know how much your PalmPilot does for you. But did you know how easy and affordable it is to make it do even more? With the 1MB Professional Upgrade, the PalmPilot you use now will be able to do everything that the most powerful model, the PalmPilot Professional Edition, can do. It's as simple as 1-2-3.

1. One Megabyte Of Storage.

With your busy life, you need more room! When you upgrade to a full megabyte of storage you can save more names, addresses and memos; more appointments, reminders and to do lists. With the additional capacity and functionality, there's plenty of room for e-mail messages and shareware applications to help you be even more productive.

2. Two New Applications: E-Mail and Pocket Expense.

Here are two applications worth upgrading for: new e-mail and pocket expense.

Our e-mail puts e-mail from your desktop right where you need it—on your PalmPilot organizer! Download messages from your desktop computer, read e-mail, write responses, even organize and delete messages when it's convenient for you. The next time you perform a HotSync,™ your computer's mailbox is updated and all your e-mail is routed to its destination, automatically.

Pocket expense makes keeping tabs on your expenses simple and convenient. Just enter them into your PalmPilot, then press the HotSync button to export them into your Excel expense form.

For Pilot 1000 and Pilot 5000 users, your 1MB Professional Upgrade also lets you take advantage of the new features we've added to the Palm OS version 2.0. We've improved the Date Book to let you view your schedule a month at a time, we've improved the Memo and To Do list applications with new sorting features, and we've created new links between the Address Book and other applications, just to name a few.

3. Three Easy Steps to Install.

In just a few short minutes, you can have all the power of our PalmPilot Professional Edition. With the 1MB Professional Upgrade, no tools or special skills are required, just three easy steps.

Get More From Your PalmPilot Than Ever Before! Visit your local computer, electronics or office supply store to find the 1MB Professional Upgrade.

[Network HotSync]

[Modem]

[MacPac]

Look for these and other PalmPilot accessories at your local PalmPilot reseller.

Expand Your Storage.	Extend Your Reach.	Enhance Your Productivity.
Store more names, addresses and memos—double the capacity of PalmPilot Personal Edition and Pilot 5000. Get 10X more storage for your Pilot 1000.	Add e-mail, pocket expense, plus other new enhancements to Date Book, Address Book, To Do List and more. It makes your PalmPilot even more convenient.	Just pop in this affordable upgrade and get all the power and features of the PalmPilot Professional Edition, instantly.
