INTERFAZE V:4.75 <WINDOWS, WIN 95 & MAC>

* PC COMPUTING - RECOMENDED DOWNLOAD

Professional multimedia publishing, presentation and distribution system made easy. Combine sound, text, VGA or S-VGA graphics, animation, video, graphing, printing, slideshows, hypertext, Lotus ScreenCam movies, running up to 140 other programs, and more into a powerful and distributable multimedia publication, presentation and/or promotion. No programming, No coding, No scripting (you'll be creating programs in a couple of hours) and no royalties! Multi-Language enabled. Used by PC WORLD Germany for their CD ROM and the Navy's Department of Intelligence. Ideal for CD-ROM and/or diskette delivery. Mac version available for cross platform development.

CBT NET V:2.1 <WINDOWS, WIN 95 - NETWORK ENABLED>

CBT NET is a multi-language, Windows and Windows '95 network test development and delivery application. It is designed to help a training administrator create and deliver multiple tests (even in multiple languages) to students operating numerous networked PC's. Multiple students can take the same tests at the same time, and CBT NET will track each individuals progress and score simultaneously. Students may select from several different tests and each student determines their own logon name and password. CBT NET will allow the administrator to create tests comprised of 6 different question types: True / False, True / False with a picture, Yes / No , Yes / No with a picture, Multiple Choice and Multiple Choice with a picture. All questions additionally support .WAV audio playback. A variety of settings allow for total customization of how the test(s) operate including: Error Threshold (maximum number of allowable errors), Time Limit, UNSURE option, Display Score at conclusion, Print Score on conclusion, Overwrite Score and more. All questions and answers are encrypted to maintain integrity of the tests and answers. CBT NET requires no programming or scripting - it is an easy and flexible test development environment.

SuperCAT V:3.4 <WINDOWS, WIN 95>

SuperCAT allows you to quickly and easily create interactive, electronic CATALOGS. Diskette or CD-ROM based, these catalogs feature a boolean search engine, very long product descriptions, super large "thumbnail" preview images with optional full screen product images, virtually unlimited number of products supported, optional audio descriptions, integrated ordering system (with printout) and more. Very rapid catalog creation with no programming or scripting.

E-MEDIA V5.0 <WINDOWS, WIN 95 & MAC>

Interactive Document Presentation, Authoring & Delivery Software" E-Media is a Windows based text and image delivery system for creating and distributing "Books on Disk", "Catalogs", "Training Programs" etc. Unlimited pages of text and images! Prints and displays both text and images. E-MEDIA is small (when compressed) allowing over 1 meg of compressed information to be added to it for delivery on a single floppy disk. Also ideal for a CD-ROM. No programming, No coding, No scripting.

KIOSKPRO V:2.1 <WINDOWS, WIN>

Create a professional multimedia kiosk in no time flat and without any programming! Add up to 14 user defined "click/touch" areas to your own full screen graphic (16 color - 5 million color). Have these "click/touch" areas play sound, show text, display huge VGA or S-VGA graphic slideshows, run animations, play video (Quicktime or AVI), graphing, do printing, display hypertext, run Lotus

2

ScreenCam movies, or up to 140 other programs. No coding, No scripting and No royalties! Multi-Language enabled.

SoftMAG V:2.35 <WINDOWS, WIN 95>

* MULTIMEDIA WORLD - TOP 50 SHAREWARE PROGRAMS

SoftMAG allows you to quickly and easily create interactive, electronic Magazines. Diskette or CD-ROM based, these magazines feature an index and page view menu, large easy to read scrollable text fields, 3 different page layouts, large images with text, optional full screen images, optional audio descriptions, printing of any page and/or printing of graphics. No programming or scripting.

HYPERSHOW V2.5C <WINDOWS, WIN 95>

* MULTIMEDIA WORLD - TOP 50 SHAREWARE PROGRAMS

HYPERSHOW allows you to link text to multimedia and distribute the final presentation quickly and easily. Uses a point and shoot interface that lets you create 'HOT WORDS' at the touch of a button and link them to video, animation, pictures, text, sound or even run other programs. Supports virtually unlimited numbers of pages of scrollable text. NO PROGRAMMING. Links text to: Animation (FLI/FLC), Video (AVI), Graphics (VGA / S-VGA), Sound (WAV) Text (.TXT) and other executables - DOS or Windows (.EXE).

eSURVEY V:1.6 <WINDOWS, WIN 95>

eSURVEY is designed to help you quickly and easily create a variety of surveys for distribution on diskette. Add your own intro screens with sound, optional printout setting, add unlimited numbers of questions (multiple choice or text based responses). Keeps track of every response and combines all responses into a single ANSWER form. Supports very long responses. Allows you to add your own questions and answers. No programming or scripting. Very fast and easy to use.

RoboDIAL V2.1 <Windows, Win'95>

Send a FAX or modem a text FILE automatically, at a predefined time and without making ANY settings! Data and Fax transfers are possible with unprecedented ease of use. Include RoboDial with your own program and extend capability and functionality. An optional .INI file can further automate the transfer process. When the program is run it can automatically configure itself to the users PC and transfer a file or fax with NO user intervention. No setting COM Ports, Init strings, Baud rates etc... In short, the program provides Automated File Transfer easier than ever possible before.

RoboRUN V2.1 <Windows, Win'95>

RoboRun is a Windows and Windows '95 compatible program designed to allow you to automatically launch or start up to four different programs (Windows or DOS) at any pre-set time of day. RoboRun can be placed in the Windows StartUp directory, causing it to run whenever Windows is started. RoboRun can be programmed to start another program when it is launched and optionally QUIT itself after running. RoboRun can be operated from its menu interface or controlled from an .INI file which can be quickly and easily edited in Windows Notepad. RoboRun can launch 4 different applications all typically within 5 seconds of each other.

RoboSCAN V2.1 <Windows, Win'95>

RoboSCAN provides Windows controls for the DOS (version 6.0 and higher) program SCANDISK. Failure to run SCANDISK regularly is one of the leading causes of data loss on hard drives. RoboSCAN simplifies the setting of various Scandisk options from Windows. You can automatically scan several different drives one right after another without intervention, optionally perform a surface scan and then automatically return to Windows all quickly and easily and without doing any programming or scripting. Automatically fix errors, run multiple times if needed, perform surface scans on multiple or a single drive and more. RoboSCAN is the control center for one of the most important utilities on your hard drive - take control and protect your data BEFORE it's too late.

CBT2 V:2.3 <WINDOWS, WIN 95>

CBT2 allows even the novice computer user to quickly and easily create distributable Computer Based Tests without the need to do any programming, scripting or coding - just push a couple of buttons, enter your questions and you're finished. The final TEST will be small enough to fit on and be distributed on diskette or over the INTERNET. Virtually unlimited numbers of TRUE / FALSE questions can be included. All questions and answers (that you add) are carefully encrypted making it virtually impossible for the recipient to "hack" the solutions. The final results are double stored to further guard against tampering or modification. All in all, CBT2 is unparalleled in its ease of use, security and speed of creation.

eCARD V:2.5 <WINDOWS, WIN 95>

* MULTIMEDIA WORLD - TOP 50 SHAREWARE PROGRAMS

eCARD is easy to use software for creating electronic greeting cards that can be distributed on diskette, over the Internet or via email. Intended for "ALL OCCASSIONS", the system is neutral in style and allows the creator to add their own pictures and sound to set the appropriate mood. VGA

or S-VGA graphics are supported allowing the creator to add their own graphics. Automatic image scalling covert's all non 320x240 images to the required size. The creator can modify the electronic envelope text, the cover text and the inside text. Automatic date stamping is applied to the stamp on the envelope. The entire system supports creating endless numbers of greeting cards and even compresses them into a single self-extracting .EXE file. No programming, coding or scripting - just press a few buttons, type in your own words and voila, your done!

RESUMAKER V3.0 <WINDOWS, WIN 95 & MAC>

Resumaker is a packaging and delivery system that allows you to easily create a professional Windows based electronic resume without the need to do any programming or scripting. It is designed for the novice and professional alike. Simple menu choices allow you to configure the program in minutes. The integrated packaging capability transforms your finished resume into a distributable, compressed application complete with a Windows installer.

ELEMENTALS V2.1 <WINDOWS, WIN 95>

Elementals in a collection of over 100 high quality, Ray Traced images for creating professional Web pages. Over 50 dynamic horizontal line designs and 50 carefully designed, texture mapped balls (in 3 different sizes) are also provided. The entire library is packaged as .GIF files and can be easily incorporated into your own home page. Balls feature transparent background settings.

IMAGE SHOW V2.6:<WINDOWS, WIN 95>

Windows presentation system with multi-graphics file format support and sound support. It is ideally suited for creating slide shows and graphics presentations. Sound (WAV) may be added to each picture, individual delay times set for each image, and the entire presentation will auto loop. VGA or S-VGA capability. Great for tradeshows, Kiosks, computer shows. Supports the following file formats:.ART,.BMP,.CUT,.GIF,.IFF,.IMG,.MAC,.MSP,.PCX,.PIC,.RAS,.TGA,.TIF.

OTHER SOFTWARE:**ACCUCOST V2.5 <WIN & MAC>**

Interactive, multi-project/account billing and time tracking system. Designed to keep accurate records of time in projects or account time, this system is easy to use, flexible and professional. Tracks up to 10 different projects at the same time, tracks cost per hour, and prints summary of all time for each and/or all projects.

AVI PRO V3.5:<WIN>

Hi-tech video (AVI) player for use in Windows *Record and Play .AVI video *10 bank memory

5

mode recalls your favorite files *Looping play mode for continuous playing *Full screen play option
*Slo-Mo and double speed playback option *Step mode for playing every 1,2,5,10 frames *NTSC
RS-170A Color Bar generator *Dynamic MCI status display for current mode *Ability to launch
ANY Sound Mixer * Zoom X2 function

MIDI-PRO V: 2.1:<WIN>

High tech midi music player for use in Windows in either of two interface modes with the following features: * Up to 25 different music selections REMEMBERED * Dual design: Optional thin menu bar * 4 different user selected panel designs * Ability to launch ANY Sound Mixer * Optional keyboard hotkey operation * Mouse or keyboard interface

PRO CD V5.5:<WIN>

A 25 track hi-tech music CD player for use in Windows in either of two interface modes with the following features:* Up to 25 individual track selections * Dual design: Optional thin menu bar mode * Random track play mode with indicator * 4 different user selected panel designs * Ability to launch ANY Sound Mixer * VGA and S-VGA operation.

PROSAVER V2.1:<WIN>

Create your own screen saver! Display your graphics in an unlimited length slideshow -VGA and S-VGA support. Also includes the following modules: A Subliminal Reinforcer with positive messages * Random Corporate Funnies Generator * Digital Clock Display * Random Famous Quotes Generator * Personalization * Password protection * Turn on/off any of the above * Set duration times for any of the above.

SHOW BUSINESS PRO V:2.5:<WIN>

Show Business Pro is a high speed multi-media presentation creation tool designed to quickly create, high impact presentations. NO SCRIPTING, you press a couple of buttons and presto, you're done! Ideal for business, trade shows, sales presentations in store displays, kiosks and more. Add your voice or music to text and photographs, combine animation and video, set the program for continuous play or one time only. Quickly edit it and change any element. It's fast, fun and truly EASY!

SpeakUp V:2.1<WIN>

Interactive database with search system to help you rapidly locate phone and fax numbers to the 104th. U.S.Congress. Also included are the phone number for the President, Vice President, Justices, Governors, Directors and more. Windows interface coupled with a fast search engine.

WAV PRO V:2.01:<WIN>

WAV Pro provides a hi-tech music WAV file player for use in Windows in either of two interface modes with the following features: * Up to 25 programmable WAV file pre-sets * Dual design: Optional thin menu bar mode * Random WAV file (up to 25) play mode * Position counter * Ability to launch ANY Sound Mixer * Optional keyboard hotkey operation * Mouse or keyboard interface * Integrated Windows Applications Launcher.

UTILITIES**ANIM PRO V2.1:<WIN>**

Windows does not ship with Animation drivers installed. This is a problem if you distribute animations or anything that requires the drivers to play the animations. ANIM PRO checks a PC in Windows and if the animation drivers are not installed in the system, ANIM PRO installs them without the need to reboot the machine. Supports the playback of .FLI and .FLC animations.

FMPrint V1.0:<WIN>

If you've ever needed to print a list a files or directories on your hard drive, FM Print simplifies this task. The user can also build a list of FILES in one directory and then join (concatenate) it with a list of FILES in a different directory and finally print out all of them as one document. The same can be done with DIRECTORIES themselves. Generates standrad ASCII text files.

MCI Pro V:3.5:<WIN>

Analyze your Multimedia/MCI setup and evaluate what drivers you have and do not have. Great trouble shooter! * Analyzes MS multi-media support * Analysis of Windows INI files * Reports status of animation support * Video support * Digital audio support * CD-ROM support * MIDI support * MMmovie support * QuickTime support * DAT support * Videodisc support * Scanner support.

NTSC Pro V:2.01:<WIN>

An elegant yet simple way of generating RS-170A NTSC color bars for reference and monitor calibration. The applications are endless and particularly useful if you output computer images, animation or AVI to video. Much care has gone into providing reliable and accurate NTSC color bars.

FlexText V:2.1<WIN>

FlexText is a text program designed to process text files. The program supports all standard ASCII files as well as email, Notepad, many database files, Windows/System .INI files and more. If you need to process data/text files, strip out characters, remove control codes, perform global search & replace, remove extra spaces, remove extended characters, remove CR or end of lines, change margins and much more, this program is for you.

A host of additional intelligent features are provided including an integrated spell checker with a 5,000 word dictionary, encryption/de-encryption (password encoded files) capability should you need to send or receive sensitive information that others can't read via standard email and more.

WHAT IT IS V:2.01:<WIN>

WHAT IT IS provides a fast and quick way of analyzing your PC's hardware and software capabilities. The program creates a standard Windows .INI file which can be easily and quickly read by your own application. WHAT IT IS is designed to operate transparently, so your application can call it invisibly and use the data it reports. Analysis of over 30 critical Windows settings, Operating Systems, Memory, Multimedia capabilities, etc...

WIN TWEAK V:2.01:<WIN>

WinTweak provides control and setting of a variety of undocumented Windows settings. Fully interactive, with complete explanations. Features include: Interactive design, Backup of original files (for undo), Increase Windows speed settings, Reboot settings control, Mouse shadows control, Font menu display options, Warnings display control, Icon display control, Windows Time synchronizer, Windows TSR setting controls, Numerous DOS optimization controls, DOS help display switching, VGA and S-VGA operation boards.

MISC.**CODE RED V:2.01:<WIN>**

Code Red will help you to decode police codes often heard over police scanners. CODE RED will instantly decode police codes and provide you with a method of logging exactly when they occurred. Review, delete or add to the log at the touch of a button. CODE RED is a simple to use application that can help you to organize, track, analyze and review police activities in your area
