Installation

This file is more than a simple Word for Windows document. All the *Directory Jump Plus™* program libraries are stored inside this file. Double clicking the **Install** button above will install the various *Directory Jump Plus™* components to *your* copy of Word for Windows.

Make sure that this document is the *only* document window open. To verify that installation will proceed properly, click the **Window** menu. If more than one document window is listed, please close all others before trying to install.

Please Note *If you received **Directory Jump Plus™** electronically, you **don't** need to copy any files to a floppy for proper installation. This installation program only requires that **this document** be in the **same directory** as the included DLL's — then just double click above.*

Double click the **Install** button above to begin. Installation will do the following:

* Copy the included support files (DLL's), to the WINDOWS\SYSTEM sub-directory
* Copy all the macro program libraries to the global context (NORMAL.DOT)
* Assign the *Directory Jump Plus*™ command to the "File" menu.

If you are unable to complete installation successfully, please call our Technical Support line at 718-375-1261 for assistance. Alternatively, you can send us your questions via electronic mail. Send your messages to either our CompuServe address 70154,2463, or dial directly into our product support BBS at 718-375-6261.
