

A displaylines with an eqdef: text mre more more more more more more more more more more more more more more more text.

$$x = 1 \tag{1}$$

And a indented normal equation:

$$y = 2 \tag{2}$$

An indented displaylines with an eqdef:

$$x = 1 \tag{3}$$

Now the same two with hangindent nonzero. And a indented normal equation:

$$y = 2 \tag{4}$$

An indented displaylines with an eqdef:

$$x = 1 \tag{5}$$

Well?
