

defining “foo bar”: .

and also a ‘sect’ (make that word ‘Section’) label ‘s’ to be ‘3.1’: .

Let’s also define two labels with a numbers, “label1” and “label2”:

defining “foo baz”.

Define something with all the other characters, including unprintable ones: .
using everything (these should be page 1 and page 2): p. 1 and p. 2.
And now the ones with numbers (page 1): p. 1 and p. 1.
And now the weird one (page 3): p. 3.
ref, refn, and refs on s: Section 3.1, 3.1, Sections 3.1.
And an undefined one: p. `'undefined'`.
