

TPUG Chapter Co-ordinators: Donald Dalley 416-742-3790 Victor Gough 416-742-8840

TPUG Chapter Librarian: Victor Gough

Over ten years ago, Borge Christensen started development of a programming language to replace BASIC. The result is known today as COMAL, a modern, powerful, modular and structured way of controlling a computer! COMAL was developed on the PET/CBM series of Commodore computers but, the two versions for the C-64 have put COMAL "on the map". The disk version (0.14) is freely copyable and has spread around the world through most user groups. Hardware versions (2.0) are more powerful and complete.

If you want to manipulate your computer successfully, consider using a language which has the ability to do so using built-in controls and helpful features. In ONE package COMAL has AUTO-numbering, AUTO-indenting, IMMEDIATE syntax checking, LONG variable names, SMART error reporting, and MERGING to make your efforts more enjoyable (FUN, not a headache!).

More efficient and complete structures like the CASE-WHEN-OTHERWISE or IF-THEN-ELIF-ELSE give you control you've never dreamed of, if BASIC has its grip on you. Program blocks (PROCs, FUNCS), proper beginning-ending indicators, indentation (one statement per line), and upper-lower case listings make for very readable, understandable programs. C-64 owners now have full control of sprites and sound using COMMANDS (not PEEKs and POKEs)! Turtle graphics rivalling LOGO's are included!

The TPUG COMAL Chapter was formed to get COMAL users together as a self-help group. TPUG has printed its first book, the "COMAL Reference Guide" by Borge Christensen (a hot seller!). The COMAL Users Group's library has been donated to TPUG with WELL over one thousand programs, and it grows continually! This set of program listings was compiled by Len Lindsay (CUG-USA), and the disks renamed with TPUG designations by your COMAL librarian.

TPUG COMAL Library Disk Documentation

COMAL disks in the library are designated by a specifically coloured label, currently pale yellow. The disks covered in this documentation are (K)T1 to (K)T4, (K)U1 to (K)U5, (K)B1 to (K)B6 and (K)Z1 to (K)Z4.

(K)Tx

COMAL Today disk series

- (K)T1 COMAL Today #1
- (K)T2 COMAL Today #2
- (K)T3 COMAL Today #3
- (K)T4 COMAL Today #4

(K)Ux

User Group disk series

- (K)U1 User Group #1
- (K)U2 User Group #2
- (K)U3 User Group #3
- (K)U4 User Group #4
- (K)U5 User Group #5

(K)Bx

COMAL Book disk series

- (K)B1 COMAL Handbook (1st. ed.)
- (K)B2 Beginning COMAL Handbook
- (K)B3 Foundations in Computer Studies with COMAL
- (K)B4 Structured Programming with COMAL
- (K)B5 Captain COMAL Gets Organized
- (K)B6 The COMAL Library of Functions & Procedures

(K)Zx

Miscellaneous series

- (K)Z1 COMAL Tutorial (best first COMAL disk)
- (K)Z2 COMAL Sample
- (K)Z3 Auto Run Demo
- (K)Z4 Utilities disk #1

The old language series, (C)Lx, in the TPUG C-64 library is now defunct.

- (C)L1 gone
- (C)L2 now (K)Z2
- (C)L3 now (K)B6
- (C)L4 now (K)T1
- (C)L5 now (K)T2
- (C)L6 now (K)Z1
- (C)L7 now (K)T4
- (C)L8 gone
- (C)L9 now (K)T3

FILE NAME CONVENTIONS

- COMAL program saved to disk
- COMAL.L program listed to disk
- COMAL.LST program listed to disk
- COMAL.B BASIC program (saved)
- COMAL.BAS BASIC program (saved)
- COMAL.DAT data file
- COMAL.FUNC function listed to disk
- COMAL.HRG high resolution graphic screen
- COMAL.W wordprocessor text file
- COMAL.TWT wordprocessor text file
- COMAL.OBJ object file (machine language)
- COMAL.PROC procedure listed to disk
- COMAL.SRC assembler source code

DISK HEADER CONVENTIONS

A V0.14 in the header of a COMAL disk indicates that all programs on that disk with the exception of BASIC programs run under version 0.14 or disk COMAL.

A V2.00 in the header of a COMAL disk indicates that all programs on that disk with the exception of BASIC programs run under version 2.00 or cartridge COMAL.

A MIXED in the header indicates that there are both V0.14 and V2.00 COMAL programs on that disk.

ALPHABETICAL LISTING OF DISKS IN THIS PACKAGE

- Auto Run Demo disk (K)Z3
- Beginning COMAL Handbook (K)B2
- Captain COMAL Gets Organized book (K)B5
- COMAL Handbook (1st ed.) (K)B1
- COMAL Sample (K)Z2
- COMAL Today #x (K)Tx
- COMAL Tutorial disk (K)Z1
- Foundations in Comp. Studies with COMAL (K)B3
- Procedures and Functions (K)B6
- Structured Programming with COMAL (K)B4
- User Group #x (K)Ux
- Utilities disk #1 (K)Z4

- link prg
- control.1
- new'prg

Notes:

Big'letter is a slow program that prints characters on the high-res screen from 1x to 8x the normal size in the direction which the turtle is heading. Color'combo allows the testing of combinations of text and background colours. The microscribble, paddletest, light'pen & koala programs demonstrate respectively the use of the joystick, paddles, light pen and koala pad under COMAL. Val/demo demonstrates the conversion of a string to it's floating point value. See COMAL TODAY #1 for further information.

(K)T2 V0.14 edited disk listing

auto boot comal	note97.1
c64 comal 0.14	page15samle.1
error file	page.1
hl	pens'color.1
help-comal	pentagram.1

8023p'options4	proc2.1
background.1	proc2.1
benchmark64.bas	reverse.1
benchmark64.coma	screen.char.1
benchmark64.1	set'screen.1
border'color.1	siname
clear'collisn.1	front'page
convert	sprite'editor21
disk'get2.1	stars1.1
func3.1	stars1.1
inside.1	string
meeting	vt-52.v4
note76.1	plexpac.1
note79.1	vecpac.1
note80.1	matpac.1
note80-2.1	testisf.1
note81-1.1	tset'clog.1
note82-2.1	test'cp'r.1
note96.1	rotpac

Notes:

Sprite'editor21 is the first attempt at editing sprites. Use a later version! vt-52 emulates a vt-52 terminal. Benchmark 64.bas and benchmark 64.coma can be used to compare the speed of BASIC and COMAL for certain types of programming. Vecpac, matpac, rotpac and plexpac are packages for manipulating matrices mathematically. See COMAL TODAY #2 for further information.

(K)T3 V0.14 edited disk listing

autoboot	getbackground.1

random'file/demo	spritexc.1
randomize1.1	spritexsize.1
randomizer2.1	spriteycor.1
save'demo	spriteysize.1
save'screen.1	turtlstate.1

Notes:

Many of the programs on this disk are 0.14 versions of commands that exist in the cartridge COMAL. But not the disk COMAL. Save'screen saves the high-res screen to disk and load'screen loads the file back into the high-res screen. Plot'char.1 allows the use of any character on the high-res screen. See COMAL TODAY #3 for further information.

(K)T4 V0.14 edited disk listing

auto boot	joystick.proc
c64comal 0.14	lock'lower.proc
error files	lock'upper.proc
hl	logical'ops.func
abc.sprite	m1'string/demo
alpha'gen	music'all/demo
alpha.dat	opt'triangle

dynam'data	unlock'case.proc
find'string/demo	wall'clock
gutenberg'shell	wandering
gutenberg'Ademo	
gutenberg'bdemo	1541 backup.bas
hex'to'dec/demo	

Notes:

Disk'protect allows a disk to be made 'read only'. Two'drive copier allows two 1541 drives to copy from one to the other. Seq'print lists all of the programs on a disk to the printer. 'Gutenberg' programs demonstrate the ability to print characters to the high-res screen in a variety of styles and size. See COMAL TODAY #4 for further information.

COMAL is a structured language with turtle graphics and automatic syntax checking on entry. TRUG has one of the largest public domain collections of COMAL in North America with over 80 disks. There are two versions for the Commodore 64 in the library; a disk based version, 0.14, and a cartridge version, 2.00. The disk version has about 10K free memory and is on many of the early 0.14 disks. The cartridge version has about 32K free memory and the cartridge can be bought from the COMAL Users Group, USA for about \$80(US).

DISK HEADER CONVENTIONS

A V0.14 in the header of a comal disk indicates that all programs on that disk with the exception of basic programs run under version 0.14 or disk comal.

A V2.00 in the header of a comal disk indicates that all programs on that disk with the exception of basic programs run under the version 2.00 or cartridge comal.

A MIXED in the header of a comal disk indicates that there are both V0.14 and V2.00 comal programs on that disk.

FILE NAME CONVENTIONS

<u>suffixed</u>	<u>prefixed</u>	<u>meaning</u>	<u>suffixed</u>	<u>prefixed</u>	<u>meaning</u>
NAME	NAME	COMAL program file	SNG.NAME		Song file
