

TPUG
CD/M
Library
Catalog

Updated March 1992
John Milligan
C128 Librarian

T P U G CP/M Library Catalog

The TPUG CP/M library started in January 1986 and was maintained by Adam Herst until December 1986 when Ray Whidden took over as the CP/M librarian. The library now contains about 85 disks.

The disk based version of the library is contained in four text files:

ZAA-F	covering disks (Z)AA to (Z)AF
ZAAA-Z	covering disks (Z)AAA to (Z)AAZ
ZABA-Z	covering disks (Z)ABA to (Z)ABZ
ZACA-DB	covering disks (Z)ACA to (Z)ADB

These files were compiled from the TYPE.ME files on the original disks, and contain a listing of the files on each disk, as well as a short description (in most cases) of each file. The format of the text files has varied a little over the years; I have tried to, retroactively, standardize it to some extent.

Many of the files are .LBR (LiBRary) files, which is the standard way of keeping files together in the CP/M world. To access the files contained within these library files, you MUST have some utility program to extract them from the library, and in some cases they have to be UNCRUNCHED or UNSQUEEZED. If you do not have such a program, don't worry! One of the best utilities is included on this disk. If you are unfamiliar with CP/M you may find this a little confusing at first, but, later on you will realize that it is an easier way to organize a group of files. It is useful, for example, to have the documentation file included with the main program, the library file keeps them together, along with any other related files.

The early tools to deal with .LBR files were LU (Library Utility) and other related utilities such as LDIR (Library Directory) LRUN (which would RUN a file within a library). These files (and others) were on TPUG CP/M disks (Z)AC and (Z)AAD. Later, programs such as NULU (New Library Utility) offered more options and easier operation (available on (Z)AAV). QL (Quick Look) is one of the easiest and best ways to deal with CP/M libraries as it offers ways to examine or extract files from libraries from a simple menu. (QL is the one included on this disk).

Squeezing and Crunching.....

Reducing the size of files has several advantages by saving transmission times in telecommunications and disk space for archival copies. Squeezing was a method used in the early days of CP/M to reduce file sizes, though it is not used much anymore. A Squeezed file can be identified by the 'Q' in the file extension. eg if you Squeeze THIS.COM it becomes THIS.CQM, while THAT.TXT would become THAT.TQT. Utilities to deal with these files, USQ and SQ are on (Z)AB and (Z)AC. NULU will also unsqueeze files.

Squeezing gave way to crunching (the difference being more efficient reduction techniques) and the CRUNCH and UNCRUNCH utilities - on (Z)AAM - are used to handle the conversions. Crunched files are recognizable by the letter 'Z' in the file extension eg. THIS.CZM or THAT.TZT NULU will NOT uncrunch files.

Crunched text files within a library can be typed to the screen using a utility such as TYPELZ.COM (which can be found on (Z)AAM) with the syntax:

```
TYPELZ NEWFILES NEW.TZT
```

This example would type to the screen the file NEW.TXT which has previously been crunched and stored in NEWFILES.LBR. Most CP/M people would soon rename the TYPELZ.COM file to TZ.COM to save typing (and to reduce the possibility of mis-typing)

Using QL (again, note the short name) you would simply type :

QL (and optionally a drive letter if the disk you wish to look at is not the default drive, eg. if the CP/M prompt is A> and you type QL B: then you will see a directory of the files on drive B: Each directory entry will be numbered, so you type the number of the file. If the file is a library file (.LBR extension) then another menu will appear with all the files in the library and numbers. When you select the number of a text file, the file will be displayed to the screen, stopping after the screen is full, until you press a key. You can go back and forth throughout the file, there are many other options (including a FIND utility) - press the '?' key for details and help.

ARC and ARK

Not as common, in CP/M, as .LBR files, there are ARCHive files that are, in concept, similar to libraries. The .ARC file extension is quite common in other operating systems (including C 64 and C128 native mode) - in CP/M the extension is often .ARK and there IS a CP/M UNARC utility available (Z)ABR.

Printing the Catalog Files

Included on this disk is LIST.COM, which will print any text file, with no formatting and no page breaks. Quick and dirty... just type

```
LIST filename.ext      (using, of course, the filename you want printed)
```

and that's it.

If you want a paged printout, you have to work a little harder, but you can use PR.COM, like this

```
PR -o5 filename.ext >lst:
```

if you leave out the '>lst:' at the end, the file will be printed to the screen and the -o5, which stands for Offset 5 spaces, will leave a 5 column margin on the left (naturally, you can use a number other than 5, too) this is very handy if you can set your printer to 12 pitch from the front panel - if not you might want to leave out the -o5 or you could have some strange results.

The PR program also will put a heading on each page, with the filename and page number.

What's New?

Obviously, in the CP/M world, not a lot. There have not been any new disks added to the library since December 1990 and it seems unlikely that there will be many more, however, I do plan to add one or two more, in the near future, that will include an updated 'boot' disk (with 1581 support) and a selection of new, and updated utilities.

John Milligan
C128 Librarian

March 1992

***** TPUG March 1986 ** (Z)AA
 Title: Systems Upgrade Disk

NEWSYS.COM This is the file that will upgrade your CPM+.SYS file so that it will support the RS-232 port among other things.
 C-128.DOC This is the instructions for creating an upgraded CPM+.SYS file.

CONF.COM This file allows you to configure various aspects of the 128 system while in CP/M mode. This includes shutting off the 40 column screen to increase system speed, changing output to printer to ASCII plus much more.
 CONF.HLP This is the documentation file for CONF.COM

C1571.COM This utility doubles the write speed of the 1571 in CP/M mode. This is accomplished by disabling the verify. Use at your own risk.

SWP.COM This not an upgrade file but it is a very useful, very popular file copy utility. It is menu driven and fairly intuitive. Copy all or part of a disk in one sweep.

***** TPUG March 1986 ** (Z)AB
 Title: Telecommunication
 Utility Disk

IMP-C128 THIS is a very good telecommunications program that supports XMODEM communications protocols, batch file transfer, 1200 baud plus more.
 IMP.DOC This is the very complete documentation file for the above. READ IT BEFORE USING IMP-C128!

LU310.COM Many of the files available on bulletin boards are crunched together in a .LIBRARY file. This utility lets you extract and restore files from a library file.
 LU310.UPD This file contains update information about the Library Utility file. It is not a documentation file but will do till one comes along.

LDIR22.COM This utility lets you look into a .LIBRARY file so that you can see which files to extract.
 LDIR22.MSG Again , not a documentation file but it will do for now.

TYPL35.COM This utility lets you type out to screen or printer the contents of a .LIBRARY file.
 TYPL35.DOC Finally a documentation file. It is always a good idea to read these things!

USQ20.COM This utility will unsqueeze files that have been squeezed to save space. This will usually have a filetype of .xqx .
 SQ17.COM This utility will squeeze files.
 SQUEEZ.DOC This is the documentation for the squeeze/unsqueeze utilities.

***** TPUG April 1986 ** (Z)AC
 Title: Ora Flaningam
 Utility Disk

This disk was made possible by the generous donations of Ora Flaningam.

D.COM These are three alternative directory
 SD.COM programs.
 ZX.COM

DU.COM Disk edit utility - beware; may not be completely compatible
 with the C128/1571
 DU-V83.DOC. Documentation for Disk Utility

LDIR This group of files comprises the Library Utility system
 LRUN It is common practice in the CP/M world to store files
 LU in "Libraries" to keep related files together and to
 LUX save disk space.
 LUXDIR
 LUXTYP

LU300.DOC. Documentation for Library Utility
 MFT.COM Multi-File Transfer utility.
 NSWP.COM Major utility for multi-disk (two or More) file transfer
 NSWP142.DOC Docs for New Sweep
 SQ and USQ are 'squeeze' and 'unsqueeze' utilities used to make smaller
 files for phone transmission or to crowd more files on a library
 disk.

SQ/USQ.DOC Documentation for SQ/USQ. A 'squeezed' file can be recognized
 by 'Q' in the middle of the file type for example:
 '.DQC' for a squeezed '.DOC' file.

SZP.COM Super-zap. It will let you look at and change any byte or
 sector on a disk. Use it with care. It has a help menu, so it
 is fairly easy to use. See SZP.DOC for documentation.

VDO Little word processor. It uses commands similar to Wordstar.
 It has a help menu. Type control k to see it.

VDO.DOC Documentation for VDO

ZX.LBR is the original way that ZX came to me. It contains ZX.OBJ
 and ZX.DOC. If you use LU to extract ZX.OBJ and rename it to
 ZX.COM you have a working copy of ZX.

LIBRARY.LBR is an empty library you can use to store other programs.

***** TPUG May 1986 ** (Z)AD
 Title: Utilities

C1571/2 COM - This is version two C1571.COM. It speeds up the write speed of a 1571 in CP/M mode by disabling some redundant verifying. Version one did not support MFM formats. Type C1571 for more info.

CPM3UTIL LBR - This is a library of CP/M Plus utility programs including a disk editor, directory lister, text editor and more. See the included documentation for more info.

SD LBR - This is a small library of the SD.COM (Super Directory) files. The name says it all. Docs included.

CPM2PLUS LBR - This is a library of files that will let you run CP/M 2.2 specific programs under CP/M Plus.

D COM - This program keeps a chronological record of file access.
 D DOC See D.DOC for instructions.

HISHOW COM - Types a file to screen. Lets you scroll backwards and forwards through the file.

PRINTER LBR - This library contains files to set the options on some Epson and Okidata printers.

FCOPY COM - This is a file copy program written for the C-128.

ERAQ COM - An erase with query program.

ERASE COM - Another erase file program.

SCAN COM - Locates bad sectors on a disk. Written for CP/M Plus.

WIPE COM - Wipes .BAK etc. files from a disk.

XTYPE COM - This program will type out squeezed (.xqx) files.

DELBR COM - This will remove files from a library file. Type DELBR <filename>. Make sure output is directed to a disk with sufficient space free.

INDEX LBR - This library contains a program that will generate an index to a WordStar style document. See the included documentation.

CPM3-CAT LBR - This is a CP/M Plus program to generate and maintain a catalog of disks.

SQ/USQ LBR - This is a library of yet another version of the squeeze/unsqueeze files.

QS-CPM3 LBR - This one sets disk file attributes. Shorter and easier than SET.COM

UNERAPL LBR - Like a Commodore DOS unscratch, this will recover erased files.

REGIONS SQG - Some of the programs on this disk came from a SIG-M C-128 sampler disk. This is a list of the distribution points for the SIG-M library. Remember to share those wonderful programs you may acquire with your fellow TPUG members!

***** TPUG May 1986 ** (Z)AE
Title: BASIC-E

- E-BASIC LBR - This library contains a number of versions of Gordon Eubanks public domain EBASIC, a BASIC interpreter. See EBASIC.DOC for elementary instructions.
- EKGAMES LBR - This library contains a number of games that will run under EBASIC as supplied on this disk. Only the .INT files are included, no source code. Follow the directions in EBASIC.DOC to run them. As you may expect they are text based games.
- OTHELLO LBR - This is the game of othello designed to run under EBASIC as supplied on this disk. Source code (.BAS), .INT and .DOC files are included. See EBASIC.DOC for instructions on how to run.

***** TPUG May 1986 ** (Z)AF
Title: Telecommunications

- MEX LBR - This contains the MEX.COM, MEX.HLP files (a full featured, professional style, telecommunications package) as well as a number of documentation files. MEX110.WS is a WordStar-style manual. It can be printed using VDO.COM on TPUG disk (Z)AC.
- KERMIT LBR - This terminal has fewer features than MEX.COM but it does support the KERMIT protocol for file transfers, widely used for micro to mainframe communications. Documentation is included.

***** TPUG June 1986 ** (Z)AAA
 Title: Languages

- SMALC1 LBR - This is a version of the Small-C C compiler. This is a large library of many small and a few not so small files. Most of the files have accompanying documentation files. Only .COM files are included. While the source files are available, no one has made them available to me. The documentation files that are included detail the specifics of this compiler, they are not a tutorial in C.
- LLLBASIC LBR - This library contains all of the relevant files for this BASIC interpreter, source code, runtime interpreter and documentation file.
- FORTH123 COM - Unlike the previous file, this implementation of the FORTH language comes with nothing but the .COM file. If you can figure it out and put together a documentation file, please send it in.

***** TPUG June 1986 ** (Z)AAB
 Title: Utilities

- CPM3LIB LBR - This library contains a number of CP/M Plus ML subroutines Documentation included.
- DIR+ COM - This is a file handling program. Enter a ? for the command menu.
- Z80ASM LBR - As the name suggests this is a Z80 assembler package.
- FIND COM - This program searches disk/files for a specified string. Enter FIND with no arguments for usage instructions.
- XREF LBR - This is an ML cross-reference utility program. Documentation is included.
- LISTT COM - Produces formatted output to the screen or printer. Enter LISTT with no arguments for usage instructions
- UNERASE COM - Searches and recovers 'lost' files.
- VDE COM - This is a very good text editor. Enter ESC ? for instruction menu.
- XDIR COM - Produces an extended directory listing.
- CALC LBR - Simulates an HP calculator while exhibiting internal logic on the screen. Documentation is included. The TERM files let you customize installation.
- NEAT LBR - These programs tidy up assembly language program listings. Documentation is included.
- BACKGA COM - This is a version of the popular board game.
- SARGON COM - This is a version of chess.

***** TPUG Sept 1986 ** (Z)AAC
 Title: Utilities

COMPARE COMPARE	COM DOC	-	Compares two textfiles and reports differences.
WCOUNT WCOUNT	COM DOC	-	Counts the number of words in a file.
DISPLAY DISPLAY	COM DOC	-	Displays files; allows forward/backward movement.
SORTV SORTV	COM DOC	-	Sorts fields in a file in ascending order.
DU-V87 DU-V87	COM DOC	-	A full-featured disk utility.
FBAD58X FBAD58X	COM DOC	-	CP/M Plus version; finds bad disk sectors.
FORMAT2	COM	-	Program to let the 1571 format MFM formats.
EDFILE EDFILE	COM DOC	-	Allows editing of hex or ASCII files.
NSWP207 NSWEEP	COM DOC	-	Very versatile file manipulation utility. A must.
SPELLING	LBR	-	A library of programs comprising a spelling checker. Documentation is included.

***** TPUG Sept 1986 ** (Z)AAD
 Title: Starter Disk

C1571/2	COM	-	Speeds up 1571 write times for MFM as well as GCR formats.
CONF CONF	COM HLP	-	Allows configuration of C-128 CP/M system attributes.
FORMAT2	COM	-	Allows 1571 to format MFM disk formats.
LSWEEP13 LSWEEP10	COM DOC	-	A sweep like utility to extract files from libraries.
LU310 LU300 LU310	COM DOC UPD	-	Utility to create and dissolve libraries.
NEWSYS	COM	-	A program to upgrade the C-128 CP/M system. Type newsys for
NSWP207 NSWEEP	COM DOC	-	A very versatile file manipulation utility.
VDE VDE	COM DOC	-	A WordStar like wordprocessor.
UNERASE UNERASE	COM DOC	-	Recovers scratched files from a disk.

Title: Eliza & Snoopy

ELIZA.COM - a Basic version of the famous "Doctor Is In" program originally written in Lisp.

SNOOPY87.CAL - The famous calendar, updated for 1987. Read README.CAL to get printing instructions. TYPE SNOOPY86.CAL for screen display.

%.LBR - An expression evaluator to give you BASIC2.0/7.0 direct mode capability under CP/M. Extract both files, rename %.OBJ to %.COM. Enter %<Return> and follow the instructions.

CPM-BEST.106 - A list of the most popular CP/M programs compiled by one of RCMP BBS. Included comments could point you to some gems you haven't seen before.

***** TPUG January 1987 ** (Z)AAJ
 Title: Micro Tools (1 of 2)

Micro Tools are a unique way of approaching computing - a package of general-purpose programs with a great deal of flexibility designed to be linked together to perform a multitude of computer tasks. Be sure to look through the documentation in the MTLSDOC.LBR. Then try the program PR.COM to get some interesting options for your printouts. Note that the command permits chained options, ie -xyz rather than -x -y -z as you may be used to with NULU. Pipes, tees & input/output redirection are available, ala UNIX, so you can try some of the features you've only heard about, so far. For example, to print using PR.COM, enter:

```
pr [options] [file(s)] >lst:
to print on the printer or :
pr [options] [file(s)] >lstfile
to 'print' to a disk file named lstfile.
```

NOTE: > is the shift/period key combination

***** TPUG January 1987 ** (Z)AAK
 Title: Micro Tools (2 of 2)

Micro Tools are a unique way of approaching computing - a package of general-purpose programs with a great deal of flexibility designed to be linked together to perform a multitude of computer tasks. Be sure to look through the documentation in the MTLSDOC.LBR. Then try the program PR.COM to get some interesting options for your printouts. Note that the command permits chained options, ie -xyz rather than -x -y -z as you may be used to with NULU. Pipes, tees & input/output redirection are available, ala UNIX, so you can try some of the features you've only heard about, so far. For example, to print using PR.COM, enter:

to print on the printer or :
pr [options] [file(s)] >lstfile
to 'print' to a disk file named lstfile.
```

NOTE: > is the shift/period key combination

Also included are a couple of other goodies:

Sideways to print on an Epson printer - not tested, so performance reports would be appreciated. Source is included so if it needs fixing and you can, submit the revised version so we can update our library.
 Cookies is a file of 'proverbs', some specifically for computerists, to ponder while you print that long report or sort that file.

***** TPUG February 1987 ** (Z)AAL
 Title: PC-File & Catalog

Included on this diskette are:

```
PCFILEZ.LBR
PCFILE.CZM - Jim Button's database program, popular on MS/PC-DOS
PCFILE.DZC systems, for CP/M. 'User-Supported Software'
PCSORT.CZM - Sort that works with PC-FILE
PCEXPORT.COM - Create *.NS files to use with MailMerge, etc

CATALOGZ.LBR
CATALOG.DZC - Document file for disk file catalog programs in this
READTHIS.DZC LBR. Read the three .DZC files after you uncrunch
SIMPLCAT.DZC them. These are based on Ward Christensen's disk
CAT.COM catalog programs and do not have the capability
UCAT.COM of including the contents of .LBR files in the
NEWCAT.COM resulting catalog.
FIND.COM - Search resulting file
PUTCAT.COM - Send catalog to screen/printer
FMAP.COM - Main catalog program
CROSSREF.COM - Find same file on multi- disks
MAST.CAT - Initial catalog, copy this to disk to start
CROSSREF.DOC - Info on program to print variation of catalog

UNCR20.COM - UNIX compress/ARC type unsqueeze program.
Enter command:
UNCR20 PCFILE.CZM
```

***** TPUG March 1987 ** (Z)AAM
 Title: Bradford, Crunch & Help

Included on this diskette are:

- BRADFORD.LBR
 - C128.DOC - Note from a C128 user
 - BRADFORD.CZM - FancyFont program for dot matrix printers
 - BRADFORD.IZF - INFORMATION file with instruction manual offer
 - AD-A&D.WZ - Sample file to print using BRADFORD printers A/D
 - AD-B&C.WZ - Sample file to print using BRADFORD printers B/C
 - PONT1 to 8.BZN- FONT files used by BRADFORD

- CRUNCH20.LBR
 - CRUNCH20.COM - Compress utility that results in smaller files
 - CRUNCH20.DOC - DOCUMENTation on CRUNCH
 - LZDEF20.DZC - CRunched file format definition
 - NOTE.DOC - Last minute note
 - TYPELZ20.COM - TYPE CRUNCHed files in a .LBR without UNCRUNCHing
 - TYPELZ20.DZC - DOC on TYPELZ20.COM
 - TYPELZ20.ZZ0 - Z80 source for TYPELZ20.COM
 - UNCR20.COM - UNCRunch program
 - UNCREL.DZC - DOC on .REL files used with CRUNCH
 - UNCREL.REL - File used with CRUNCH/TYPELZ20/user programs
 - USAGE20.DZC - Usage documentation
 - USQREL.REL - File used with CRUNCH/TYPELZ20/user programs

- HELP.LBR
 - ASM2.HZP - ASM help, original assembler with CP/M2.2
 - CBASIC.HZP - CBASIC help, CBASIC from E(ubanks)-BASIC author
 - CPM.HZP - CP/M help
 - HELP.HZP - HELP help
 - MAC.HZP - MACro assembler help
 - MASM.HZP - MACRO-80/LINK-80/LIB-80/CRUF-80 help
 - HELP.COM - HELP command

- LBR/1541.DOC - DOCUMENTation for single 1541 disk users with CP/M faced with a full-disk LIBRARY or 'how to use the Commodore virtual (E:) drive to get at all the goodies'

***** TPUG March 1987 ** (Z)AAM
 Title: Fatcat (1 of 2)

FATCAT.LBR

- FATCAT.CZM FATTER but faster CATALOG program configured for C-128
- FATCATIN.CZM Fatcat install program, run & PIP for new version
- OUTCAT.CZM Output program, used by Fatcat O/X, also at command line
- FATCATIN.DZA Data file used by install
- FATCAT2.CZM Used by Fatcat
- FATCAT3.0Zx Overlays used by Fatcat
- OUTCAT.0Zx Overlays used by Outcat
- STANDARD.CFG ConFiGuration file, default used by Fatcat
- STD-ONE.CFG Config for one 1571 disk
- STD-RAM.CFG Config for Ram Expansion
- UNCR.COM UNCR program for xZx files
- Z3INSTP.CZM Install program for ZCPR3
- FATCATA.SUB Submit for Fatcat & Ram Expansion, load & run

PACMAN.LBR

- PACMAN.CZM PACMAN on the C-128 with CP/M, typewriter keyboard
- PACMAN2.CZM graphic, it's slow, it doesn't use a joystick but it works. Gobble those monsters!!
- PACMAN.DZT File used by PACMAN
- SCREEN.CNT

SUPERSUB.LBR

- SUPERSUB.CZM An improved SUBMIT program, not fully tested on C-128
- SUPERSUB.AZM Source code, if it needs fixing; submit any changes

 Title: ECF / Freebase / Filt7

ECF.LBR - Rolodex card file a desk top accessory.
 FREEBASE.LBR - Freeform data base management system.
 FILT7.COM - Removes misc. commands from certain word processors such as
 dot commands in wordstar text. See FILT.DOC for info..
 WASH.COM - CP/M utility.
 ARTICLES,6,7.TQT- Articles on CP/M from earlier issues of Input Magazine,
 a lot of information is enclosed in these articles.
 HEXDUMP.COM - Transfers files in HEX.

***** TPUG July 1987 ** (Z)AAR
 Title: Read Disk Utilities/Outliner

This is a landmark disk in the TPUG CP/M series because it extends the C128 capabilities by a quantum leap. Also included is an outliner program to augment VDE/VDO & GTXT, a good utility.

DISK1581.LBR	Two utilities by Miklos Garamszeghy 1) patch CP/M3.0 to read 1581 disks 2) format 1581 in CP/M 800K+ bytes
RDCBM.LBR	Add the capability to read native C64/C128 disks while in CP/M
RDMSDOS.LBR	RDMS233 written in 'C', modified to read MS/PC-DOS formatted disks in CP/M
UNIDRIVE.LBR	Read additional CP/M formats including Radio Shack CP/M. NOTE: no comparable capability to FORMAT exists. This simply gives you the ability to read additional 'foreign' CP/M disks. I wouldn't recommend writing if compatibility problems are a consideration so be sure to test by writing on a copy of the disk.
OUTLINER.LBR	Submitted by Chris McCormack - an outline program.
GTXT.LBR	A neat program with a .SUB file to combine GTXT with a text file so running the resulting .COM file results in the text being printed to the screen. When ECHO doesn't do the job.

***** TPUG August 1987 ** (Z)AAS
 Title: MicroPROLOG/TOUR/NSWP208

EPRO.LBR	MicroPROLOG as reported in Scientific American, BYTE and the book, "Learning Micro PROLOG", by Tom Conlon. Includes source, example programs & VALGOL
TOUR20.LBR	A outline/notepad/datebook type program. Submitted by Chris McCormack
NSWP208.LBR	The latest version from Dave Rand, originally from Edmonton, now from California

***** TPUG September 87 ** (Z)AAT
 Title: KEY128/VDE/COBOL

KEY128.LBR	Two programs to save/load KEYFIG key definitions Includes source code
VDE25.LBR	Latest version, with many enhancements
COBOL.LBR	The main frame programming language on a micro Includes several .CBL source programs

***** TPUG October 1987 ** (Z)AAU
 Title: Chicken/Snoopy/MEX114

CHICKEN.LBR	A video game in CP/M. No hi res graphics but fun just the same. Two players & keyboard entry.
CHICKEN.CZM	Documentation
CHICKEN.DZC	Pascal source
CHICKEN.PZS	
MEX114/C.LBR	Version 114 of Modem Executive
MEX.CZM	Overlays for PULSE phone dialing
MEX.HZP	Online HELP file
MEX10.DZC	DOCumentation, print it or use MEX TYPE command
MX1-C128.AZM	User port overlay source listing
MX0-SM14.AZM	Smart Modem overlay source listing
MEX-C128.INF	INformation on MEX on C128
SNOOPY88.CAL	Snoopy calendar for 1988, print using TAB expansion
TPUGOC87.CZT	File listing of FATCAT catalog of TPUG CP/M library to October, 1987
CPMVIDEO.LZR	Using color on the C128 with CP/M 3.0. A submit file and several demos. Put CPMVIDEO.LZR, CPMVIDEO.SUB, SUBMIT.COM from your system disk, LU.COM and UNCR.COM all on a work disk, enter SUBMIT CPMVIDEO to automatically uncrunch, extract and run all the programs to see CP/M3.0 show its colors.

***** TPUG November 1987 ** (Z)AAV
 Title: NULU151/ALIENS/CCP/HIST/FRONT

It's system upgrade time, folks!! In addition to a new game and the latest version of NULU, we have two significant enhancements to CP/M itself. One allows several good features including command history as found on UNIX and the capability to execute from COMMAND.LBR merely by typing commandname<RET>. The other gives you a menu interface to execute programs. Be sure to test if you choose to combine the two as they may not operate together. Report any problems to either TPUG or the author. When using CCP.COM from CRNBERRY library, also use SETDEF *,B:(ORDER=(SUB,COM)] (see DRI CP/M Plus User's Guide for details) to set up a PATH for .SUB/.COM file searches and the ability to execute .SUB files as if they were .COM files, without having to type SUBMIT filename. For example, WORDSTAR.SUB could be executed by simply typing WORDSTAR<RET>, as if it were a .COM file. Simple? you say. WS.COM is simpler by typing WS, right? True before a history capability was available. Now you type the longer command, but the next time you need it, you cursor back to it, either in the history or using FRONT50 and re-execute by <RET>. Be sure to read the documentation. Better yet, print it out. Remember, no matter how powerful the C128 with CP/M 3.0 gets, it's not an Amiga or UNIX machine so you have get your multitasking by having files printed out BEFORE you need them.

NULU151.LBR	The latest version of NULU
ALIENS	A 'video' game in CP/M, use the keyboard, no hi-res graphics/color but challenging. Character control does not work in all games; to change direction, stop (.) then left (,) or right (/)
CRNBERRY.LBR	Several PD programs obtained from Cranberry Software
CCP.COM	Version 104, time added to prompt,
CCP+.DOC	user zero .COM files all SYS status,
CCP104.NOT	named directories
CMDRUN.COM	Like LRUN, execute .COM, .SUB & .PRL from COMMAND.LBR, just specify commandname<RET>
DIRNAME.COM } SETDIR.COM } ROOT.DIR }	----- Set up named directories
HIST.COM } HISTCL.COM }	----- Setup command history facility, toggle Clear command history buffer
VFILER.COM	Video FILER, like NSWP but files shown onscreen, cursor controlled, Log, Status, Tag, Untag, Copy, Delete, View, Print, etc
FRONT50.LBR	Menu front-end for CP/M
FRC128.DZC	Note about FRONT50 with CCP104/VFILER
FRNSTL50.CZM	Install program
FRNT50PT.AZM	Set options in user patch area, assemble
FRONT50.CZM	Menu FRONTend for CP/M
FRONT50.DZC	Documentation file
FRONTSUB.DZC	Repeat FRONT50 when menu selectin ended
READ.MZ	Info
CPMSOURC.IZF	Four sources of public domain AND commercial CP/M software, three in Toronto

 Title: JUGGDEMO/*.B?S/Kalendar

The feature addition to the TPUG CP/M library, this month, is a fantastic utility by Miklos Garamszeghy for users with friends using CP/M on another (130+ types) computer, ie Toshiba 100. This is the demo version with restrictions, but it supports the addition of one disk format to the standard ones supported by CP/M3.0 on the C-128. For two additional formats and the full choice plus additional features described in the program, ordering instructions are also provided. The price will be the biggest surprise. Commercial programs like this sell for \$100.00

CAL.* and KAL*.* are two calender utilities. If you can fix the bug in CAL.BAS that shows up when you enter May, 1917, resubmit the corrected file and get the usual free disk. KALENDAR is a Pascal program written in German with the .COM file hard coded to write a calendar file to disk B:.. However, for those who don't have a second disk drive, CONF permits the reassignment of read/writes to B: to be redirected to 8-0. Change the KAL.SUB file to reflect this situation and you experience the flexibility of CP/M3.0 - redirection; no need to give up or run out and borrow/buy another disk unit. Try that with an assembled or compiled program on a C-64 or native C-128.

The remaining *.B?S files are Basic programs that you may find interesting. They originate from the Kaypro Users Group and may be written for Kaypros and Basic-K. They may be adaptable to CBasic, MBasic or E-Basic. If you get one to work, resubmit the upgraded code and get a free disk of your choice.

ATOMIC	.BQS	List/search atomic table
BAR	.BQS	Bartender program
BAR	.DOT	
CAL	.SUB	Run CALENDAR.BAS
CALENDAR	.BAS	Screen display of calendar month requested, year, month input
CASH	.BQS	Cash flow analysis, income statement, balance sheet
CHECK	.BQS	Check book program
DC10	.BQS	Fly a DC10 on Kaypro
FIREMAN	.BQS	Rescue victims of hi-rise fire
JUGGDEMO	.COM	Disk format/read/write CP/M disks from other CP/M computers
KAL	.SUB	Redirect B: to device 8-0 if only one disk device, change .SUB
KALENDAR	.COM	Create disk file of calendar for year requested
KALENDER	.DOC	Documentation
KALENDER	.POS	Pascal source
TERM	.DEF	
MATH	.BQS	Improve add/subtract/multiply/divide/fractions skills
RENTAL	.BQS	Manage rental property program
TEACHER	.BQS	Setup tests on disk/print:true or false/multiple choice/fill in blanks
VOCAB	.BAS	Test your vocabulary
XMAS	.BQS	Quizz about Bible

***** TPUG June 1988 ** (2)ABE
 Title: SMALL 'C' Run Time Programs (1 of 2)

This disk is a reissue, with additions, of (2)AAA's Small 'C' compiler. A TPUG user from Australia, Alan Hughes ordered the disk and reported problems with the copy he received. Upon investigation, several files were noted missing and because so much work is required with the basic system, just to compile a program, several .OBJ (required for ZLINK) are included in the compiler run time package, even though the 'C' source files are available. Also included is TEST.COM, as compiled from TEST.C, so you can see what it does before you use it or any of the modules. The result is a package that is almost 400KB of source code, e documentation that could be operated on a single disk system. However, a 1581 3.5" disk or 1750 model ram expansion module would be preferable. Be sure to print the source and documentation files.

ACOPY.COM	Copy utility with options, enter ACOPY <RETURN>

 Title: CPM3FIX/BAWK/TAIL/UNPIT & Weird
 People

BAWK .LBR A text processing program that searches files for
 specific patterns and performs "actions" for every
 occurrence of these patterns. The pattern can be
 a "regular expression" as used in the UNIX "ex"
 editor. The actions are expressed using a subset of
 "c" language. Source for standard "C".
 CPMCONF .TZX Brief account of CPM guru conference
 CPM3FIX .LBR Fixes for problems to CPM3/utilities from DRI including
 submit files. Note: one fix has a warning. TPUG not
 liable for any damages due to use of this file.
 FILES .TZX File handling in CPM & MS/PC-DOS
 TAIL21 .LBR The UNIX TAIL utility to look at the end of an ASCII
 file.
 UNPIT .LBR UNPackIT Macintosh files - especially those picture
 files from MacPaint.
 WEIRDPP.LBR A Macintosh picture file of some strange people. You
 may need to delete part of the beginning of the file.
 ZCPR3 .TZX A brief description of ZCPR3. Advanced CPM3 users will
 recognize most of the features. Flow control is not
 readily available, yet but PD solutions address that
 area, much of the rest mentioned here, except the
 Z3INV option; have some counterpart in CPM3.

***** TPUG JAN 1989 ** (Z)ABM
 Title: WADE & Z8E Debuggers 1/3

The next three disks present a pair of debugging tools for program development in the CP/M environment. To complement the DRI debuggers, DDT for CP/M 2.2 and SID for CP/M 3.0, the WADE debugger comes complete with source code and submit files. Z8E has been around for a few years but is included to complete our CP/M library.

This disk contains 235,136 bytes of data/documentation in the archive file.

 Title: Quick Look V 4.0

Quick Look is the ultimate file display utility. It provides ASCII or HEX display (no need for two separate utilities), it operates in paged or scroll mode (glass TTY), has built in help, find feature and this new version has a menu structure that provides a pick-a-number approach to selecting the disired filename PLUS .LBR file support with the same menu support for the .LBR directory and extract capability. All together, one of the best utilities on any make of computer - here, today, for CP/M.

 Title: Computer Expo Show Disk

This is a fully automated disk. Copy the files to a 1571/1581, double sided disk, add CPM+.SYS and SUBMIT.COM from your own boot disk and you have a completely automatic disk. Just put the new disk in your A: drive and reboot your system (C=128: CONTROL & ENTER on numeric keypad). If you have trouble with LOAD ERROR messages, exit to CP/M and use QL40 to extract the troublesome file from COMMAND.LBR.

CCP.COM CCP104 replacement for CCP.COM . From disk (Z)AAV.
 CMDRUN.COM Permit .COM files to execute when stored in .LBR. (Z)AAV.

COMMAND.LBR

 BOOZ.COM Bare bones ZOO list/extract utility. BOOZ<return> for help.
 From an upcoming disk.

 ECHO.COM Echo argument to screen. (Z)AAJ.
 HIST.COM Command history facility, store latest commands, recall with ^W
 or ^V. List with ^L. (Z)AAV. DO NOT USE WITH MENU.COM.

 LOADKEY.COM Utility to load redefined key files. (Z)AAT.
 MENU.COM Operate CP/M with menus. (Z)ABG. DO NOT USE WITH HIST.COM.
 QL40.COM Quick Look file/RAM view utility, supports .LBR, squeezed
 and crunched files, select by number. (Z)ABP.

 RSXMAP.COM Display Resident System eXtension modules, addresses, more.
 (Z)ABG.

 VAX.TZT Article on Digital Equipment VAX user experience in Big
 Blue country. NEW.

 VDE.COM Video Display Editor, a good editor for ASCII files. (Z)AAT.
 VDE.HZP VDE help file, use ESC then ? in VDE. If you don't under-
 stand the display, view this with QL40. NEW.

 VFILER.COM A indispensable file handling utility. Copy, rename, view,
 print, tag/untag, mass copy or delete, help screen.
 (Z)AAV.

LOGO.COM Print C= logo. NEW.
 MAIN.MNU Operate this disk from a menu. NEW.

MATHEMAT.ZOO File to test BOOZ on. NEW
 MATHEMAT.ANN Announcement of Mathematica for other computers, perhaps
 Amiga.

 ZZENDPAD.FOO File to protect 'archive' when XMODEM transfer.

MENU.COM Operate CP/M in menu mode. (Z)AAV.

PIPMAG1.LBR CP/M electronic newsletter. NEW.
 C128FILE.LZB GENie LIB's 1-10, files for C=128
 COMPRESS.TZT Tutorial on file compression: .LBR, .xQx, .xZx files.

***** TPUG MAY 1989 ** (Z)ABR
 Title: Transfer, Zoo, Ark, VLU

This disk brings a new IBM & compatible disk utility that increases the utility of the C=128 in a mixed machine environment. Better features than the commercial utility that handles IBM & compatible disks (ie. ERA & REN options); still does not support sub-directory feature.

Also included, an update to the CP/M archive utility and CP/M version of the new archive utility, ZOO, widely available in the PC and Amiga world. Coming next month: ZIPDIR, view directories of *.ZIP files.

Also, VLU, a ZCPR3 utility.

 Title: Z3Plus: Utilities & Games

Z3Plus? What is it? Why does the TPUG library have programs that I can't even run on my C=128?

Z3Plus is the CP/M Plus (otherwise, CP/M 3.0) version of an automatic install program for Z3CPR3.4 (Z-80 Command Processor Replacement). Prior to NZCOM (for CP/M 2.2) & Z3Plus, installation of ZCPR was a comprehensive process, not for the faint of heart. In the case of CP/M Plus it was not possible.

ZCPR is a replacement for CCP.COM that provides features usually associated with MS/PC-DOS and/or UNIX such as shell programs, submit/batch file flow control (IF, ELSE, more), command history file, named directories, search paths, the complete ZCPR toolkit, Z-utilities and much more. Some of these features are available in the TPUG library: named directories, flow control, command history, etc. With Z3Plus, the features are usually enhanced: for example, HIST197 provides a limited, RAM-based command history where Z3Plus/EASE provides a command history file. That may seem like a trivial improvement. And Z3Plus may seem expensive but the list of enhancements is impressive, once you have used the features. Imagine a copy/delete/rename/view/print utility that works on single/groups of files that permits you to pause to run another CP/M or Z3 utility such as SHOW or DIR. When the second program has run, the display pauses for a keypress, then you are returned to the file utility. Such is the facility of the Z3Plus shell feature. EASE, ZFILER & VMENU are three of many shell programs. Other utilities, such as ZPATCH provide full screen capabilities, previously unavailable. Many of the recent 8-bit utilities have been written with ZCPR in mind. Some few have been made available in CP/M 2.2/3.0 versions as well. Some of these programs are already in the TPUG library. In most cases, reading the documentation has given no real indication of the benefits of having ZCPR. However, have a look at the documentation in those files and these. Perhaps you too will decide to order Z3PLUS. You will be pleasantly surprised.

Z3PLUS
 \$69.95
 Z Systems Associates
 1435 Centre Street,
 Newton Centre, MA USA 02159-2469
 (617) 965-3552

Turbo Pascal 3.0 is available for \$60.00

Occasionally, future TPUG disks will add Z-system utilities/programs for those who want to read more of the documentation before ordering Z3Plus or have purchased it. Also, dBaseII utilities will be included in order to complete another facet of the library.

EASE20	.LBR	51k	Error And Shell Editor: command history file, more

ZPUZL11	.LBR	6k	Seven square puzzle

***** TPUG OCT 1989 ** (Z)ACQ
 Title: dBase II information and
 utilities

The following are provided for users of dBase II, the excellent relational database program from Ashton-Tate. Most have not been tested on the C-128 but those that have (including DB2SHL21) work fine. Be sure you are using a work copy and NOT THE ORIGINAL DISK when using the patches. TPUG or the TPUG CP/M librarian cannot be held responsible for damage or loss resulting from the use of patches and/or pokes to dBase II. It is entirely up to the user to verify that patches/pokes perform as expected so test should be performed to assure yourself no adverse affects have been introduced. TPUG does not have the technical/manpower resources to assist with troubles resulting from patches/pokes. However, we would appreciate reports to share with the user community of problems or experience with any of these files. Hopefully, this has not dampened your enthusiasm for CP/M, dBase II or TPUG.

A historical note: There is no dBase I. The program was developed out of a personal need to keep track of football pools (so one story goes) and was developed commercially for NASA. Original name for the program was Vulcan.

 SD138B .LBR 78k Super Directory with source only, all the features you'll
 want, assembled for Z3Plus on ZACV
 SNOOPY90.CZL 2k Snoopy calendar for 1990
 ZACU .CRC 1k Compare results of CHEK12 with the values in this file to be
 sure your copy of the disk is error free

***** TPUG WOC 1989 ** (Z)ACV
 Title: World of Commodore Show 1989
 Z3Plus Goodies
 Logging Shell, Z-Error Handler
 Super Directory & Z80 EXecute

LSH10P .LBR 35k Logging SHell, size definable window or line mode, saves to
 DU: named ROOT, works with ZERRLSH
 SD138BZ3.LBR 7k Super Directory, assembled for Z3Plus
 ZACV .CRC 1k Use CHEK12 to see if your files have same CRC, if not,
 expect problems if those are executable files, CHEK12<CR>
 for brief help
 ZERR13 .LBR 11k Z80 ERROR handler, works with LSH, docs included
 ZERR13S .LBR 36k ZERR, different capabilities
 ZEX50 .LBR 26k Z80 EXecute in-memory SUBMIT replacement. We've long heard
 about EX in the CP/M 2.2 world and one of the original
 disappointments about getting Z3Plus was to find this
 program on a 'doesn't work here' list. Take it off that
 list. Docs included.

 Title: LZH Utilities
 TwoCol printer for text

CRLZH11 .LBR 113k I know, all right, I'll stop!!! Not another compression technique!!! Seems like war out, doesn't it? Well, as long as they write 'em, we'll have to include 'em. This one lets you manage those LZH files you see in the MS-DOS world. Here, they have the form .?Y?. We'll continue to use .LBR and ?Z? because of the range of utilities that support them. Meanwhile, we'll continue to keep the windows open to the rest of the computing world. (I take it back, I won't stop)

TWOCOL .LBR 8k A little goodie to print two columns from text files
 ZACW .CRC 1k Run CHECK12 on this disk and match the results to those in this file. If they're the same, great, your disk is an exact copy. If not, expect problems.

***** TPUG JAN 1990 ** (Z)ACX
 Title: DIFSSD, VREN, ZERR
 JETPRIME & ASTRO-PC

ASTRO-PC.LBR 61k Astronomy programs in BASIC, from Julian date conversions, to finding the circumstances of solar/lunar eclipse when finished checking these out, call Canadian Space Society BBS at (416) 458 - 5907

DIFSSD2.LBR 21k From UNIX, create a difference file from a shared/common file to a newer file, transmit only changes to generate updated file, documentation included.

JETPRIME.LBR 3k Source/executable for Byte prime number speed test, rename *.OBJ file to *.COM

LZED .IQF 5k info on LZED Z3 editor
 PC-ZUPD3.DZC 10k PC-Z update info, Z80 upgrade compatible with PC box
 VREN .LBR 10k Video RENAME, works both with CP/M & Z3Plus but if CP/M, print out the documentation because you don't get the nifty help display.

ZACXTYPE.ME 2k This file
 ZACX .CRC 1k File with Cyclic Redundancy Check values.
 ZERR12 .LBR 11k Oops time, again. On a recent disk, when I included ZERR, I hadn't noticed that ZERRLSH wasn't included, although that file was the main reason for including ZERR. Here is the file that includes it. You'll notice it is an older revision.

 Title: Graphic Script Tools (GST)
 SCAN files, VDCDEMO &
 Extended Z3TCAP

GST02 .LBR 43k Graphics utilities for CP/M, source included, requires extended TCAP from Z3TCAPX.LBR. Z3 only.
 SCAN21 .LBR 45k Scan a file, doesn't have paging like QL but handles large files, has search mode, help, jump to beginning or end of file. Recommended. CP/M AND Z3.
 VDCDEMO .LBR 11k Video Display Controller for C=128: hi-res graphics, no source, very slow and requires a re-boot when done but here it is, folks!! Source in C. CP/M.
 Z3TCAPX .LBR 25k Z3 enhancement. Use JetLDR [libname.LBR] yourterm.Z3<ret> after you extract your terminal definition from *.TCP with TCMKAKE. We have demos for next month that do pull-down menus and windows. I don't use the C=128 extended TCAP all the time because I prefer light green with dark green used as highlight and the extended TCAP results in mostly dark green with a bit of light green. No matter how I have patched the TCAP, I couldn't return to the way the old TCAP restored the screen, so I only use the extended version for the demos. Perhaps this will be fixed in the future as these are highly experimental modules.

***** TPUG MAR 1990 ** (Z)ACZ
 Title: Quattris, Double print,
 Fog Index Generator,
 Z3 Graphics Libraries/demo and
 CP/M VDC Graphics Libraries/source

DBL401 .LBR 24k CP/M, Z3: for printers with condensed mode, print text documents formatted in 65 columns or less, two per page, many options; wider documents are truncated
 FIG14 .LBR 30k CP/M, Z3: Fog Index Generator for text documents, tells number of words, paragraphs, number of long, medium and short words, also expressed as percentages of total words
 QUATRIS2.LBR 26k CP/M, Z3: Tetris(C)-like game, instructions on screen, ten levels of difficulty, keyboard operated, keeps score. Written in Turbo Pascal, source is available for \$10.00 from the author, address included.
 TCAP-HB4.LBR 15k Z3: Graphic libraries, includes a demo program for pull down menus.
 VDCLIB13.LBR 24k CP/M: C128-specific graphic routines for VDC/8563 80-column chip written in Software Toolworks C/80, source code, see Feb. 1990 (Z)ACY for demo program.
 ZACZ .CRC Use CHEK12 (ZACU) to check your copy of this disk, if the CRC values don't match those in this file, you may have problems, especially in .COM files. If so, ask for a replacement disk.

***** TPUG World of Commodore 1990 ** (Z)ADA (renamed)

Note: This is a floppy/1541 compatible disk (double-sided)

Title: WOC/90 CP/M & Z3
 CPM: Life in Turbo Pascal
 Genealogy text files,
 Genealogy Tiny Tafel
 Generator

Z3: NoteTaker, Directory Utility,
 Z-Grep, Z-WordCount, Find
 Utility, Why Z3Plus & @

**NOTE: This disk was originally issued as (Z)ADJ, but has been renamed.

CP/M files:

GENEALGY.LBR 44k Several text files about genealogy, TMS, PAF, Kintracers
 LIFE-PAS.LBR 23k Conway's game of Life, Turbo Pascal, source
 TTGEN10C.LBR 57k Tiny Tafel GENERator for TMS

Z3Plus files:

@10 .LBR 7k Use with aliases, allow cursor positioning on screen
 D17 .LBR 34k Directory utility, different options than the others
 WHY .Z3+ 6k Why buy Z3Plus, where
 NT46 .LBR 19k Note Taker with time/date stamp
 ZEN&CPM .LBR 12k Musings of a CP/M user
 ZFINDU .LBR 9k Find string in compressed files
 ZGREP11 .LBR 19k Z-system version of GREP from UNIX
 ZWC .LBR 6k Word Count for Z-system

***** TPUG December 1990 ** (Z)ADB (renamed)

Title: ZP-Patch Utility
 Video Compare, Z DataBase

**NOTE: This disk was originally issued as (Z)ADK, but has been re-named.

VCOMP21 .LBR 12k Video COMPare text files, can use eXtended TCAP (ZACY)
 requires 79 column X 24 line display, Z3CPR33+, can be
 configured with VINST (included)
 ZOB09 .LBR 37k Z DataBase name/address/phone labelmaker, source provided
 written in assembler, uses eXtended TCAP, time/date
 stamping, in-RAM index of file for rapid access, four
 key index for labels
 ZP10 .LBR 56k : Z Patch disk/file/RAM with HP RPN calculator hex/dec/bin
 requires eXtended TCAP (ZACY), companion to ZPATCH (ZACP)
