Welcome to Variety 2700 CD!

Variety 2700 CD is a comprehensive collection of clip art containing over 2700 images in 60 categories from businesses to seasons. The clip art is in TIF (Tagged Image Format) which insures that the broadest number of applications are supported. The Variety 2700 CD can be used on PC's, MAC's and UNIX systems and you are assured that the same high quality is obtained on all systems. Variety 2700 CD lets you work with graphic, word processing and page layout applications across platforms: Windows 3.x, Windows 95, Windows NT, DOS, Macintosh®, and UNIX (SUN & Silicon Graphics).

Software Installation

This CD-ROM contains only the TIF clip art files and requires no software installation. The clip art files work with your favorite word processor such as WordPerfect or MS Word, desk top publishing software such as CorelDraw, Print Artist, or PrintShop, and professional publishing tools such as PageMaker and Quark XPress.

System Requirements for Macintosh, DOS, Windows (3.1, 96 or NT), and UNIX

The only system requirements is a CD-ROM drive and your favorite software.

Technical Support

If you encounter any difficulties using Variety 2700 CD, contact Printers Shopper Person-to-Person technical support hot line at (619) 523-3866 during business hours. You may also FAX your questions or comments to the same number 24 hours a day, 7 days a week.

How The Variety 2700 CD is Organized

The clip art is organized in eleven major alphabetic categories which are further separated into over 60 additional categories designed for ease of use.

Guidelines for using Variety 2700 CD with major software packages

PageMaker - Using the FILE pull down menu select PLACE. Locate the desired clip art by selecting the CD-ROM drive, the directory containing the category of clip art and highlight the desired clip art file name. Select OK (Macintosh) or OPEN (Windows) and place the cursor at the location in your document.

MS Word - Using the INSERT pull down menu select PICTURE. Locate the desired clip art by selecting the CD-ROM drive, the directory containing the category of clip art and highlight the desired clip art file name, select OK or OPEN.

WordPerfect - Using the Graphics pull down menu select FIGURE. Select FILE TYPE as "Tagged Image Format (*.TIF) then locate the desired clip art by selecting the CD-ROM drive, the directory containing the category of clip art and highlight the desired clip art file name, select OK or OPEN.

General Guidelines for using Variety 2700 CD with Various Software Packages

As a rule all the TIF files within Variety 2700 CD can be opened within an application by choosing either OPEN, INSERT, or IMPORT commands. These commands are normally found under the FILE or INSERT pull-down menu in most Windows 3.x/95/NT, DOS and Macintosh applications. Usually within the document a region must be defined for a picture and the TIF file must be IMPORTed or INSERTed.
