FOR THE TI-99/4A HOME COMPUTER

This is our 5th year as a retailer of TI-99/4a Hardware and software. Due to the nature of the TI-99/4a market, prices may be higher or lower depending on supply. We are always looking for NEW ITEMS to add to our inventory, if you see or hear of a new product for the TI-99/4a, please write or call Us. We want to have a full line of Hardware, Software and peripherals for your Texas Instruments Computer.

We are adding new items daily, so we may well have the item you do not see in our Catalog. Please remember to CALL about Hardware or Software you need, and We will try to stock those items.

TO Order: Please Call or Write, please have your Visa or M/C ready if using a credit card, and state Disk, Cassette or cartridge software.

Shipping charges Via U.P.S are very low and if your order is placed before 1:30 p.m. EST We will ship the same day. Average cost is $3 plus $2.75 COD save COD by using M/C or Visa., or by prepaid orders.

Personal checks require two weeks to clear and your order will be delayed, so please send Money orders to speed up your order.

Prices are subject to change without notice.

When ordering please let Us know what peripherals you have i.e. Memory expansion, disk drives or cassette recorder. This will help Us give you the best service and there by YOU will get the most out of your new hardware or software.

Call or write to:

TURBO-PASC'99

No longer will you need to use the awkward, expensive, and sluggish PASCAL system Texas Instruments introduced years ago. Turbo-Pasc'99, an integrated software package, offers you a complete programming environment that includes a command processor, full featured editor, lightning-fast single pass compiler, and a linker. Both the editor and compiler reside in memory during the entire programming session; programs can be compiled in memory without code generation, or with code generation directed to disk in the popular Display Variable 80 format. The full screen editor (22 rows by 80 columns) automatically detects and converts keywords into upper-case, auto indents, and supports all common editing functions. The compiler efficiently generates TMS9900 source code (which can be interfaced with your own assembler programs) in a single pass at a rate of up to 80 lines per second. Compiled programs run up to 50% faster than C99 programs, and countless times faster than interpreted BASIC. And with the Turbo-Pasc'99 Linker program modules can be linked together and freestanding executable RUN PROGRAM FILES (Editor/Assembler option #5) can be generated. Included is the Turbo-Pasc'99 system disk and reference manual. Requires: 32K, disk system, and E/A. **Only $59.95**

COMING SOON!

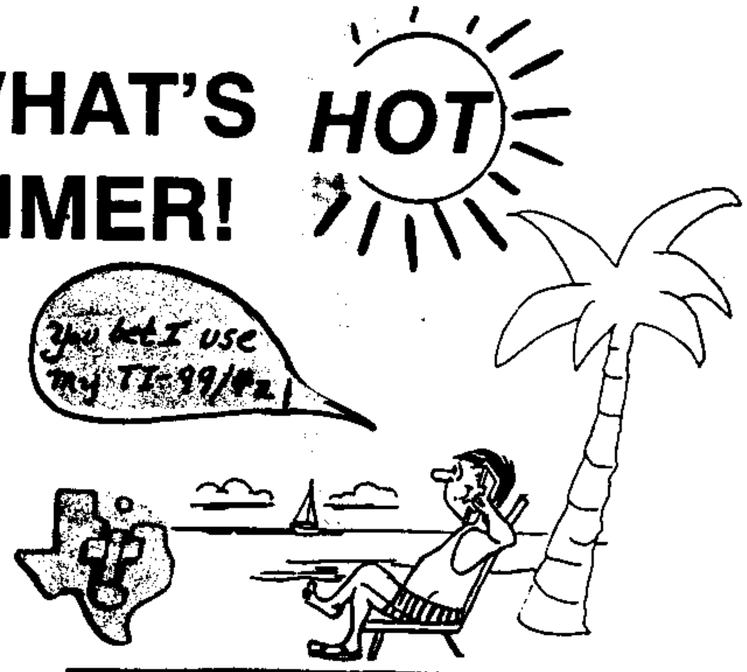
WINDOWS'99

A supplementary library disk of object code routines that allows windows to be used with Turbo-Pasc'99. Programs using Windows'99 can be made more user friendly, easily managed, and given that "professional look". Up to 20 windows can be displayed concurrently and up to two full screens can be simultaneously processed. Requires: Turbo-Pasc'99. **Only $19.95**

TURBO-PASC'99 TOOLBOX

A supplementary library disk of object code routines that allows graphic, sprite, sound, and speech commands (like those found in BASIC and Extended BASIC) to be used with Turbo-Pasc'99. This Toolbox will increase the overall capabilities of Turbo-Pasc'99 and exploit the graphics and sound features usually associated with the TI-99/4a. Requires: Turbo-Pasc'99. **Only $19.95**

HERE'S WHAT'S HOT THIS SUMMER!



TI Artist Plus!

The makers of TI Artist are proud to introduce the most powerful and comprehensive graphics development system available for the TI-99/4a Home Computer...

More than just an ordinary drawing package, TI Artist PLUS! is a complete drawing system that consists of six dynamic graphics development modules. With these modules, virtually anyone can create, edit, transform, and present the most dazzling of graphics. And with its innovative point-and-shoot menu system, TI Artist PLUS! is extremely user friendly.

Special ExTender Cables

Move the black box,Speech and cable out of your way, with this 20 in. Side Port ExTender Cable for:

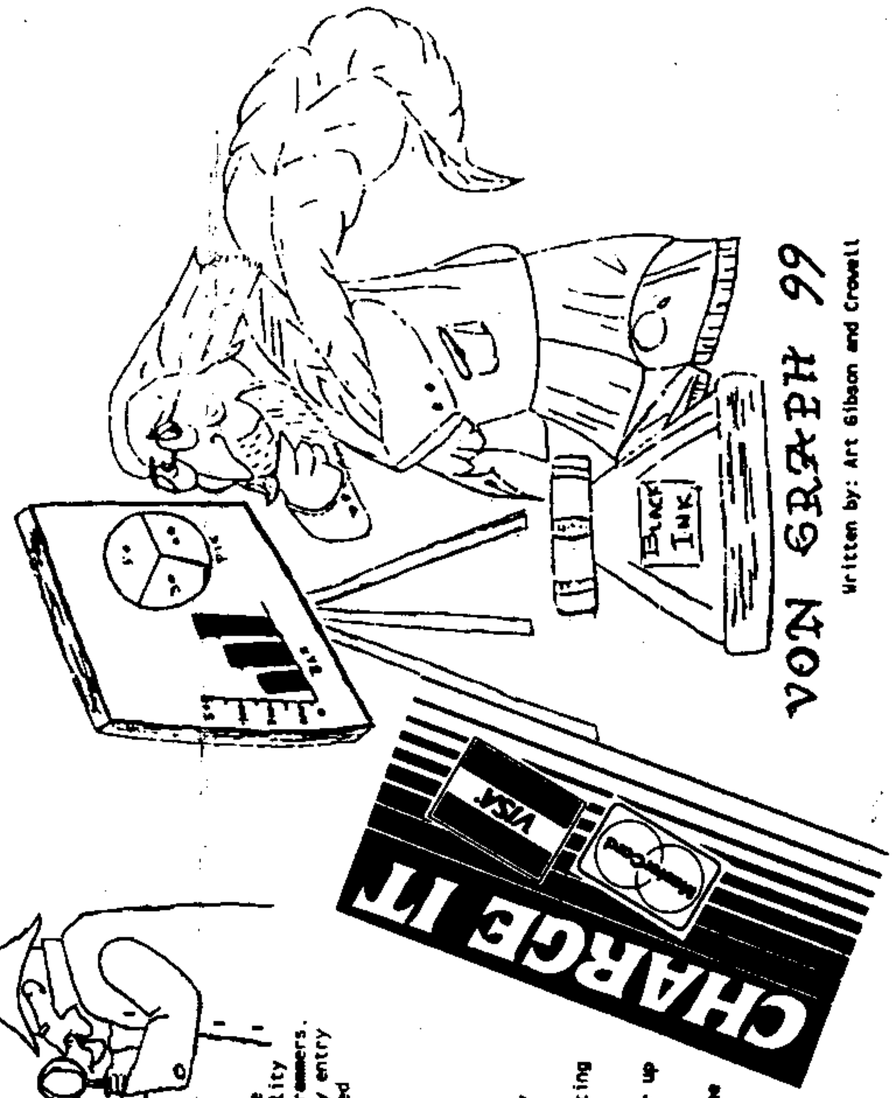
TI-99/4a Console	25.00
Cartridge Port Extender	25.00

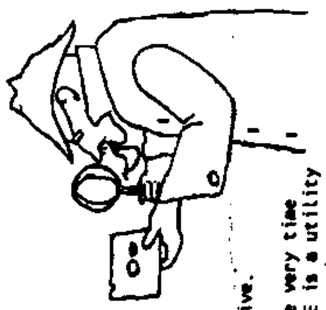
Move your Cartridge port expander out of the way to better access your Keyboard, with this new cable.

Take a look at the TI Peripheral System, on the front of this catalog. Please note the Black Box and cable are not shown, that is because the Extention Cable has moved them out of the way. Thus giving you more room on your computer desk for other items The Speech Synthesizer can also be moved and too be out of the way. We have found that this cable cuts down on lock-ups by 90 percent.

FOR THE TI-99/4A HOME COMPUTER

UTILITEE SOFTWARE





XB DETECTIVE 99
Written by: Art Gibson and Crowell

Minimum System Requirements:
TI console, Extended Basic, 32K Memory, and Disk Drive.

Editing and debugging EXTENDED BASIC programs can be very time consuming and sometimes very difficult, XB DETECTIVE is a utility that will aid the novice as well as the most experienced programmers. It is easy to use as it is to load. Menu driven and single key entry lets you toggle between EXTENDED BASIC mode and this high speed assembly language program.

Features

1. LIST VARIABLES
Gives a listing of the variables in a EXTENDED BASIC program.
2. FIND VARIABLES
Lists all line numbers in which the specified variable occurs, starting with the line number given.
3. FIND RESERVED WORDS
Lists all line numbers in which the selected word occurs starting with the line number given.
4.DELETE LINES
Will delete a block of lines starting with a given line number up to and including the last line given.
5. STRING SEARCH
Lists all line numbers that contain a given string. these three options are given for finding strings:
   1. ENCLOSED IN QUOTES:
      (i.e. PRINT "this is a test")
   2. IN A DATA STATEMENT:
      (i.e. (DATA name) or DATA "name")
   3. IN A CALL STATEMENT:
      (i.e. CALL CLEAR or CALL SUBPRO)

GREAT GAMES FOR YOUR TI-99/4a

PRINCESS and FROG

The object of this game is to gain points by moving your frog past a field of jousting knights, across a moat filled with aligators and snakes *(watch out for the alligators they sometimes submerge and take your frog with them)*, and unite with the princess of the castle. Jumping into one of the castle gates gives you another frog and extra points. If your timing is good and luck is on your side, your frog will kiss the lips of the princess and turn into a prince. Price only $10

ROTOR RAIDERS

You explore the vast uncharted regions of enhanced reality beneath your very home. Through pipes and drains you wind your way to remove those nasty sewer rats, and clear their foot prints from the plumbing. You enter from above; but just when all is going well, the rats show up. First there is one, then two, and more. Every few seconds another rat comes into the pipes while your remote controlled routor tries to clean the system. To remove them you must trap them in dead end pipes. There you can force them into the maze. But still, just when you think you have it made, that duracent battery flashlight of yours goes out leaving you in darkness. But, with a *tap or two* comes back on and away you go. As you scrap your way through the sewers of your home town, your rotors get very dull and wear down. In fact, each rotor will only last about 30 seconds, so make it quick. Price $10

HEN PICKED

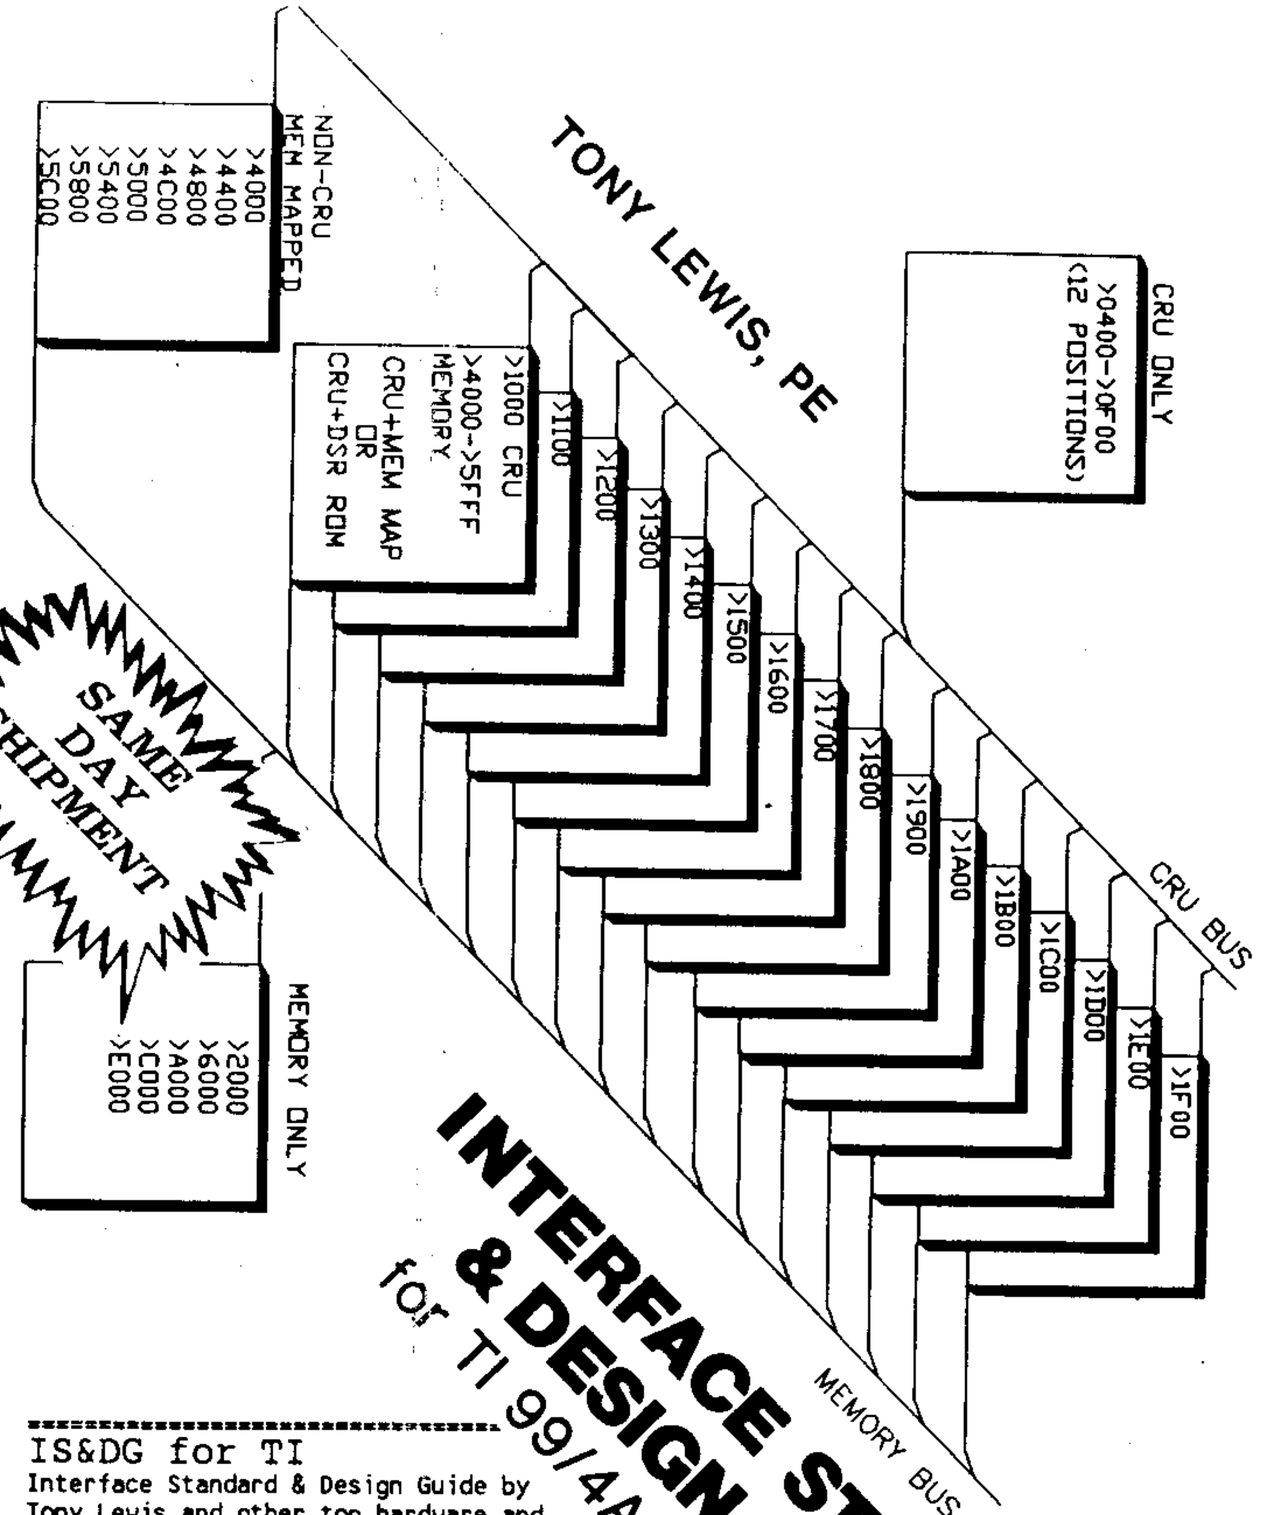
In Hen Picked, territorial tactics faithfully recreate the best of barnyard banter! You as the rooster have a *choice: to rule the roost or become a totally HEN PICKED*. However, be warned: the hens are not just sitting there laying eggs! Great fun and can be played by two players. Price $10.00

ANTEATER

The object of the game is survival. You gain points by moving the *ANT* from the colony to the food on the surface and back to the colony. However, when the ANT breaks through the surface, he exposes himself to the deadly anteater. the ANT is armed with five deadly eggs that explodes seconds after the fire button is pressed or the ant may maneuver the anteater under a falling rock. Price $10.00

All four games are *CARTRIDGES*.

Joysticks are recommended.



IS&DG for TI
