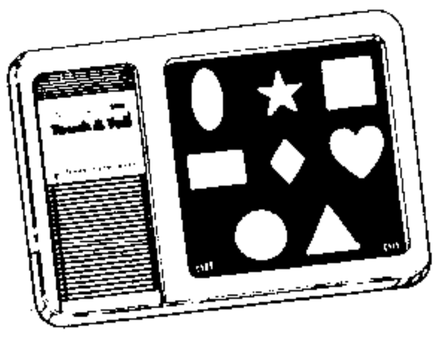
TI Touch & Tell

Bright, colorful pictures and a friendly voice make preschoolers love to learn

Your Cost
$39.95



Basic Vocabulary Building for Ages 2 to 5

Using changeable picture panels on a touch-sensitive surface, Touch & Tell gives preschoolers the kind of challenge they can enjoy. It teaches recognition of colors, shapes, letters, numbers and familiar animals and objects.
When a child touches a picture a friendly voice identifies each object, asking the child to find (and identify) other pictures. Uses musical tones and special sound effects to add excitement — and involvement — to the learning process.
Includes 2 double sided picture panels and a storage library for additional learning modules and picture sets. Requires 2 D cells.

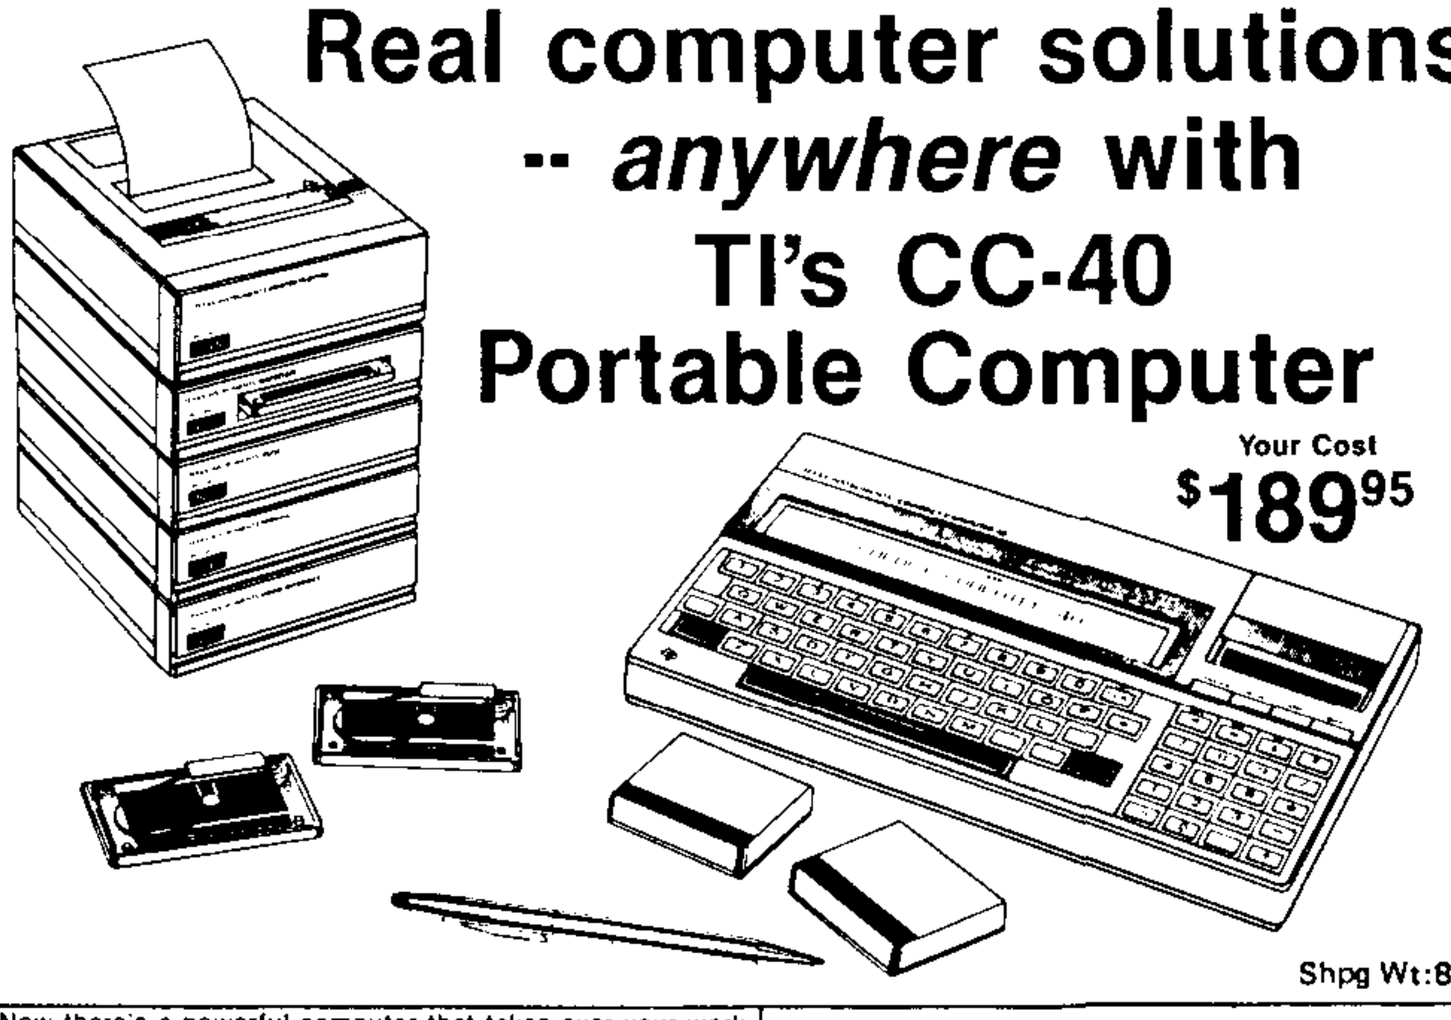
High speed buffered keyboard for convenient touch operation.
Power on, memory in use, overflow and error indicators.
Automatic paper advance and alignment with standard 2 1/4" tape.
Selko impact printing head.

Real computer solutions -- *anywhere* with TI's CC-40 Portable Computer



Your Cost
$189.95

Shpg Wt:8 lbs

Now there's a powerful computer that takes over your work without taking over your desk.
The Texas Instruments Compact Computer 40.
It puts much of the problem-solving power of Apple or IBM personal computers within your reach, wherever you go. Like them, it's big on computing power, but is completely cordless and takes up less than 1/4 the desk space.
The Compact Computer combines a 6K Random Access Memory with a built-in 34K Read Only Memory containing TI Enhanced BASIC. Plug-in Solid State Software cartridges, containing up to 128K of ROM, provide powerful, easy-to-use applications programs. This gives you an effective memory of up to 168K. That's very impressive for any computer, especially one that costs less than 1/3 as much as an Apple or IBM.

Solid State Software

TI Solid State Software cartridges plug into the applications port of your Compact Computer, effectively adding up to 128K of additional memory. These programs run directly from the cartridge. Conventional software programs take time to load and consume precious internal memory.
This is the most convenient form of software on the market. Solid State Software cartridges contain one or more programs, and all are fully documented in the accompanying instruction manual.

Wafertape Software

TI also offers Wafertape Software cartridges (optional Wafertape drive required) that provide many more useful programs, all fully documented.

TI gives you more than a computer

To help Compact Computer owners get all the utility and enjoyment possible, on a regular basis, Compact Computer Advantage Club courses will be held in cities across the country, covering most major metropolitan areas.
They'll feature hands-on training with a TI Compact Computer system. Beginner courses will develop computer literacy and advanced courses will concentrate on more sophisticated programming.

Video Interface

The new Video Interface gives Compact Computer owners access to a full 40 character by 24 line screen display on any TV or TI video monitor.
The Video Interface attaches to the Compact Computer through the HEX-BUS intelligent peripheral port.
Two display modes are available — the scrolling mode in which the user can move text line-by-line from top to bottom and vice versa, and a paging mode which allows the user to recall blocks of 24 lines (one complete screen display) at a time. Both the scrolling and paging modes have a top and bottom (first and last) line-protect function to protect tabular and columnar information in headers and footers.
Although the video interface provides a 40 character display, it also provides a "windowing" function for viewing up to 80 characters. A line-wrap function provides for viewing lines longer than 40 characters on multiple lines of the display.
The device generates white text on a dark green background for a color TV or monitor. Alternately, the interface can be instructed to generate screen displays in any two of 15 available colors. For a B&W TV, the interface generates a white-on-black display (or can be instructed to generate the reverse).
The Video Interface unit operates on AC power only.

TI's Revolutionary New HEX-BUS Peripherals

Compact, stylish accessories for both the CC-40 Portable Computer and the 99/4 & 99/8 Personal Computers

Four-Color Printer/Plotter — Shpg Wt:9 lbs

The Texas Instruments Printer/Plotter gives you hard copies of all your work: Words, Numbers and Plots. Graphics can be reproduced in up to four colors. Make pie charts, bar graphs, line charts and even create original pictures.
You can select 4 different print angles, 10 different type sizes, print up to 36 characters per line at speeds up to 11 cps all in red, blue, green and black. Uses standard 2 ¼" plain paper rolls. The Printer/Plotter has its own rechargeable power supply using a detachable recharger (Included).

HX-1000 HEX-BUS 4 Color Printer/Plotter
Retail: $199.95 ..... **Your Cost: $179.95**

RS-232 Communications Interface

The RS-232 Interface will let you connect your Compact Computer or 99 Series Personal Computer to the myriad of equipment that follows the RS-233 communications standard. The list of peripheral equipment includes full page dot matrix printers, large X-Y plotters, letter quality printers and more. It has data transmission rates up to 19,200 baud, making it capable of transmitting over a page of information in less than a second.
Available with additional parallel cable for centronics type interfaces.

HX-3000 HEX-BUS RS-232 Interface
Retail: $99.95 ..... **Your Cost: $89.95**
HX-3000/P HEX-BUS RS-232 Interface with Parallel Interface Option
Retail: $124.95 ..... **Your Cost: $112.95**

Wafertape Drive — Shpg Wt:8 lbs

TI Wafertape cardridges offer a convenient, low-cost way to store data or programs. Continuous loop tape cartridges are available with a variety of storage capacities (up to 48K) allowing optimization of response time during use.
Tapes are completely computer controlled, and require no rewinding.
The Wafertape system is much faster and more accurate than start/stop audiocassette drive systems. A 4K program can be loaded in less than 10 seconds, and built-in file management allows you to access files by name rather than having to remember position numbers. The TI drive is powered by four AA alkaline batteries (not included) or an AC adapter (included).

HX-2000 Wafertape Drive
Retail: $139.93 ..... **Your Cost: $127.95**

Telephone Modem — Shpg Wt:11 lbs

The new low cost Telephone Modem is a 300 BAUD, full-duplex, direct-connect device that is Bell 103 compatible and operates in answer or originate modes. The modem plugs directly into the Compact Computer or 99 Series Personal Computer through the built-in HEX-BUS intelligent peripheral port, so no RS-232 interface is required.
The battery-operated unit is able to send and receive data simultaneously. The manual-dial modem plugs directly into both the phone line and the telephone using standard modular plugs.
Used with the new TI "Memo Processor with Data Communications" Solid State Software cartridge available for the CC-40, the new modem and the CC-40 provide a truly low cost system for data communications.
This configuration provides TI Compact Computer owners access to the TEXNET Information Service, which includes THE SOURCE computer software service for business, education, and education and home entertainment; as well as access to Texas Instruments news and information.
Powered by four AA alkaline batteries (not included).

HX-3100 Telephone Modem
Retail: $99.95 ..... **Your Cost: $89.95**

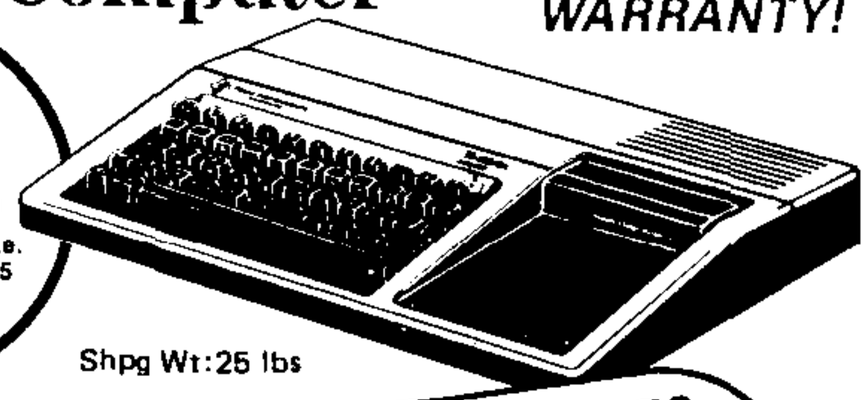
Texas Instruments TI-99/4A Home Computer

ONE FULL YEAR WARRANTY!

Get a great computer and a great deal. The TI Home Computer and a $50.00 rebate

More power than any other computer in its price range

Your Cost
$99.95
Retail $225.00
After $50.00 TI rebate.
You Pay OSC 149.95



Shpg Wt:25 lbs

Dollar for dollar, feature for feature, the TI-99/4A delivers more. • It's a true home computer. • Plenty of memory for powerful programs. • Everything about the TI-99/4A has been designed to make it easy to use. • Wide selection of Solid State Software available. • TI BASIC — a rich, versatile programming language. • Other, more advanced languages available.

The TI-99/4A has a powerful 16K Random Access Memory — and with the addition of the Peripheral Expansion System's 32K Memory Expansion Card, total RAM may be increased to 48K. Internal Read Only Memory supplied is 26K — and Solid State Software cartridges can add programs of up to 36K, each. So total ROM can be as much as 62K.

More than 2000 programs are available, from both TI and independent producers — including more than 100 easy-to-use Solid State Software cartridges.

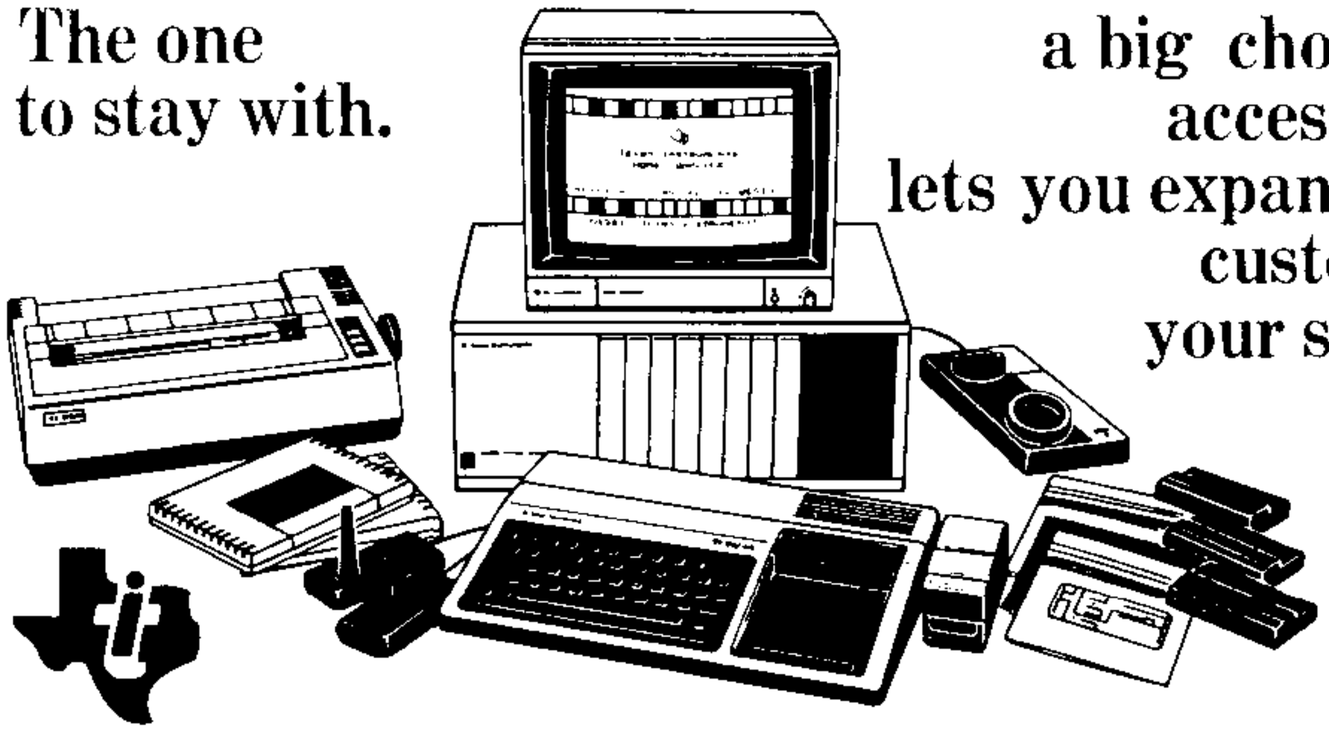
Many more features you would expect to find only on much more costly computers. • 16 color graphics. • Sound effects. • Five musical octaves with 3-part harmony. • Typewriter-style keyboard with full-travel sculptured keys.

Powerful. Easy to use. Affordable. The TI-99/4A is the best way to introduce your family to the fascinating world of home *computing.*

- **16 bit TMS9900 series CPU**
- **RF Modulator Included for use with Television**
- **16K RAM — expandable to 48K**
- **TI BASIC built-in**
- **Peripheral Expansion System lets you add many exciting accessories**
- **Now Available: TI's New HEX-BUS Interface**
- **Broad choice of software**

Just to prove TI-CARES
When you purchase a TI-99/4A Home Computer, TI will give you 2 and one-half hours of free lessons at one of their 12 centrally located educational facilities.
And if that isn't enough just call:
1-800-TI-CARES

The one to stay with.



a big choice of accessories lets you expand and customize your system

TEXAS INSTRUMENTS

The HEX-BUS Interface

All you need to make the TI-99/4A compatible with TI's new, compact HEX-BUS peripherals.

Your Cost
$54.95
Shpg Wt:2 lbs

Peripheral Expansion System

An Easy and Convenient Way To Expand Your TI Home Computer

Measuring just 7 1/2 x 12 x 18 inches, the system is designed to house plug-in peripheral cards and a TI Disk Drive. It provides simple, centralized expansion without additional cable or clutter. Just plug in a peripheral card and all the functions you want.
Shpg Wt:25 lbs

PHP-1200 Peripheral Expansion System
Retail: $249.95 . . . . . **Your Cost: $189.95**

RS-232 Interface
Shpg Wt:2 lbs

Your Link To The Outside

Lets you connect a wide range of accessories to your Home Computer. Communicate over ordinary telephone lines with other home computers, terminals, office computers, data bases, time sharing networks and more with optional modem. Use with TI's Impact Printer for hard copies of your programs or with a Letter Quality printer for office perfect letters. Connect a plotter and get charts, graphs and transparencies. This is probably the most useful accessory you'll have.

PHP-1220 RS-232 Serial Interface Card
Retail: $174.95 . . . . . **Your Cost: $84.95**

Disk Memory System

Store up to 100 programs of 50 lines each on one diskette

Controller card works with up to three drives, first one mounts inside the Expansion System. Second and third units stack next to box. Allows you to store and retrieve data on 5 1/4" single or double-sided diskettes. Store your own programs or purchase prewritten programs on efficient, large-capacity diskettes. Over 2000 programs now available from TI and other sources. Diskettes permit efficient, high-volume data storage, up to 92,000 characters on a single side. Handles variable or fixed length records, sequential or relative files. Dynamic space allocation automatically uses all space as it becomes available.

PHP-1240 Controller Card and Disk Manager Cartridge (Drive not included) Shpg Wt:5 lbs
Retail: $249.95 . . . . . **Your Cost: $124.95**

PHP-1250 Disk Drive to mount inside Expansion Box (use as first drive) Shpg Wt: 15 lbs
Retail: $399.95 . . . . . **Your Cost: $199.95**

PHP-1850 Disk Drive for use as drive 2 or 3
Retail: $499.95 . . . . . **Your Cost: $399.95**

Memory Expansion Card

Adds 32K RAM for a total of 48K
- **41K available — more than most 64K machines!**

Designed for use with TI Extended BASIC, Editor/Assembler, TI LOGO, or any other Solid State Software cartridge requiring expanded memory. Also for use with Diskette programs such as UCSD Pascal and TI PILOT.
Shpg Wt:3 lbs

PHP-1260 32K RAM Expansion Card
Retail: $299.95 . . . . . **Your Cost: $124.95**

P-Code Card

Allows access to a variety of high-level languages

Develope your own programs or use existing ones. Allows access to UCSD Pascal, TI PILOT and more. Requires Memory Expansion and Disk Memory or Cassette Recorder.

PHP-1270 P-Code Card
Retail: $249.95 . . . . . **Your Cost: $84.95**

Solid State Speech Synthesizer
Shpg Wt:11 lbs

Reproduces human speech electronically

For children too young to read the screen, the Speech Synthesizer is ideal since it allows the computer to "talk" to the children. When used with one of TI's Solid State Software cartridges designed for speech, the Home Computer can give voice instructions and ask — and answer — questions. When used with the Speech Editor cartridge, it allows you to add speech to your own programs, drawing from a vocabulary of 370 words. When used with the Terminal Emulator II cartridge, it provides virtually unlimited text-to-speech capability. Plugs directly into the Home Computer's built-in connectors.

PHP-1500 Solid State Speech Synthesizer
Retail: $99.95 . . . . . **Your Cost: $84.95**

TI Impact Printer

Quiet, High-Performance, Versatile Printer

Prints at a fast 80 characters per second, bidirectionally. Select from three type sizes and four printing densities. Features long life 9 x 9 dot-matrix printhead, adjustable for 40, 66, 80 or 132 character column widths and prints both text and graphic data. Requires RS-232 interface.

PHP-2500 TI Impact Printer Shpg wt:20 lbs
Retail: $750.00 . . . . . **Your Cost: $389.95**

Program Recorder

Designed specifically for use with the TI Home Computer

The recorder is controlled by the computer, providing reliable loading, storage and retrieval of data on regular audio cassette tapes. A computer interface cable is included.

PHP-2700 Program Recorder Shpg Wt:8 lbs
Includes PHA-2622 Cable . **Your Cost: $64.95**

. . . MORE PERIPHERALS

Video Monitor

Excellent color resolution with 192 x 256 dot density

With the TI Home Computer you can use your TV or take advantage of special features of the Video Monitor. This 10" Color Monitor was designed to handle the Home Computer's wide range of graphic and musical capabilities with a sharp, bright color picture and clear, clean sound.

PHA-4100 10" Color Monitor Shpg Wt: 22 lbs
Retail: $399.95 . . . . . **Your Cost: $339.95**

TEXAS INSTRUMENTS

Remote Controllers

Strictly Fun and Games! Shpg Wt: 3 lbs

They let you maneuver objects on the screen. Each unit features an eight-position remote control with an action button. An important accessory for TI's fast action games.

PHP-1100 Wired Remote Controllers
Pair . . . . . **Your Cost: $39.95**

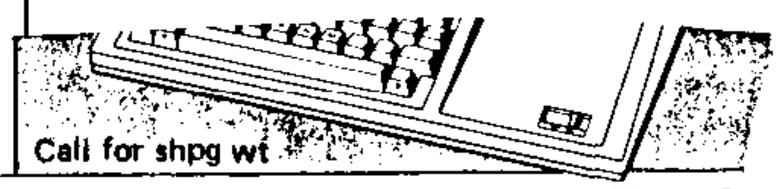
Milton Bradley **MBX** Expansion System

For use with Texas Instruments Home Computers and Milton Bradley SSS cartridges

Now YOU can talk back

The **MICROPHONE** lets you control the action. It recognizes your voice. You talk and the graphics on the screen do what you tell them to do.
The **KEYPAD** has 64 positions with overlays which enable you to interact with the video screen.
The **JOYSTICK** is like nothing you've used before. It's precision engineered with a pistol-grip and analog control that allows 360° rotation and front-to-back and left-to-right proportional movements.
The **SPEECH SYNTHESISER** speaks to you in a realistic, well modulated voice.

You talk to the computer, and the computer talks to you!



Includes: Microphone and Keypad
