T.M.

T.M.

The big company with personal service!

Dear TI Owner:

Welcome to the newest Everything Book for the Texas Instruments Home Computer! As usual, we have added lots of exciting new products to our already great selection of items for your computer. We're dedicated to helping you get the most out of your computer investment!

OUR INCREASING COMMITMENT

YOU made us do it! To better serve our growing family of satisfied customers, we have recently increased the capacity of all areas of our business. We've added more toll-free order lines, a faster CPU and more disk space for our minicomputer, more warehouse space, more inventory (over 50,000 items in stock) and of course, additional friendly, helpful personnel to aid you in ordering and speed your shipment on its way.

NEW SERVICE CAPABILITY

We've heard that some computer owners are concerned about the availability of technical service when ordering computer products by mail. Since TENEX Computer Express was founded in 1982, we have always stood behind our products and even long after the sale have assisted our customers in obtaining

warranty or non-warranty service. We have now added an important new capability: **In-house service** and repair. We are now an authorized service center for Star Micronics and other key lines, so that our customers can shop with confidence, knowing that regardless of where they live, service is never far away.

WHY SHOP ANYWHERE ELSE?

Great service, low discount prices, and friendly people . . . TENEX Computer Express has it all. We really want your business, and we **work hard** to get it and keep it. Feel free to drop us a note and tell us how we're doing.

Roger B. Dooley
President

NEW!

Great Educational Videos

NEW!

SPINNAKER
We make learning fun.

READERS OF THE LOST ALPHABET. Letters of the alphabet are disappearing. Words lose their meaning and sentences lose their sense. Children help "Alphabet" Smith find the letters (while learning to read). For ages 5-8. Workbook included.

67527 VHS Tape \$14.95

THE SEARCH FOR THE STOLEN SENTENCE. Rescue the kidnapped Professor Mindbender and his amazing "word processor" while learning the parts of speech. For ages 7-10. Workbook included.

67547 VHS Tape \$14.95

Be prepared for the most important test of your life! Guaranteed to increase your total score by 100 points or your money back. Both videos include information about the format and structure of the exam itself and a 32 page workbook.

BEAT THE SAT: VERBAL. Includes a substantive review of important vocabulary words, grammar rules, antonyms, analogies, and sentence completion and reading comprehension.

67564 VHS Tape \$19.95

ADD VENTURES OF THE TIME TAXI. A thrilling ride through time and space while learning addition, subtraction, counting, and geometric shapes. For ages 5-8. Workbook included.

67542 VHS Tape \$14.95

CLOSE ENCOUNTERS OF THE MATH KIND. Help the professor on an exciting mathematical rescue mission involving fractions, multiplication, division, and probability. For ages 7-10. Workbook included.

67561 VHS Tape \$14.95

BEAT THE SAT: MATH. Includes quantitative comparison and problem solving, along with important math concepts and review.

67572 VHS Tape \$19.95

Use your VCR for more than a movie machine... **IMAGINATION TREE EDUCATIONAL VIDEO KITS**

For children ages 8 and up

These are videos the kids will love to watch over and over... while they have fun and learn a new skill! Each tape comes with appropriate accessories and instructions (see descriptions below). A great way to learn! From Mid-Com, Inc.

BE A JUGGLER

Start by juggling scarves to learn basic techniques, then move on to bean bags, balls, and rings! Improve motor skills, reflexes and timing. Taught by Mike Vondruska, a professional juggler and experienced juggling instructor. Kit includes 40 minute videocassette, scarves and Jugaloons.

Sug. Retail \$29.95

56946 VHS Tape **Only \$19.95**

BE A MAGICIAN

Watch Master Magician Martin Preston perform a magic show... then follow him back stage where he'll explain the "trick of the trick." The 50 minute video presents each trick step-by-step. Stop the tape and practice as often as you want! The videocassette comes with the equipment needed to perform the tricks... a sparkling magic wand, two magic balls, a magic scarf, metal rings, two lengths of rope and two magic cords.

Sug. Retail \$29.95

56925 VHS Tape **Only \$19.95**

ONLY \$2.99 EACH

Blank VCR Tapes At Special Savings!

T-120 PREMIUM VHS TAPE. We couldn't be more pleased with the quality and reliability of these premium grade T-120 (VHS) blank video recording tapes from Calibron. Featuring U.S. made recording media, these are all first quality tapes (no seconds, no rejects) with a 100% quality control rating. You can count on reliable performance and long tape life. Standard T-120 size allows up to 6 hours of recording (SLP). Each tape has a 90-day manufacturer's warranty. But the best news is the price... a money-saving \$2.99 per tape! Just in case you think there is some kind of catch to this low price, we are backing them with our own **GUARANTEE OF SATISFACTION** — if for any reason you aren't happy with your tapes, return them within 30 days for a full refund of their purchase price! You can't go wrong! Tapes are sold in convenient 5-packs. Sug. Retail \$29.95

55920 T-120 Premium VHS Tape (5-pack) **\$14.95... (\$2.99 each)**

Suncom

Don't tie up your VCR rewinding tapes...

SPEEDWINDER VHS. Now rewinding and fast-forwarding video tapes can be quick and convenient when you let Speedwinder do the job for you. Let your VCR's delicate motors do what they were designed for — record and playback — and leave the wear and tear jobs to Speedwinder. It's barely larger than the tape itself, battery operated (4 "C" cells not included), and can be placed where it's convenient for you. Sug. Retail \$29.95

55890 Speedwinder **\$19.95**

Optional AC Adapter for Speedwinder.

55900 Adapter **\$9.95**

Keep your VCR viewing crisp and clear...

VCR HEAD CLEANER. Our VCR Head Cleaning Kit gives you everything you need to keep your VCR in peak condition. The cleaning tape and solution glide easily across the tape path, lifting away contaminants from the video and audio heads, capstans, pinch rollers and tape guides. Kit includes VHS video recorder cleaner tape, 18cc. bottle of video cleaning solution, handy storage case, and complete instructions. From KEH Enterprises.

Sug. Retail \$11.95

55919 VCR Head Cleaner

ONLY \$4.95

Make Your Own Video Titles

VIDEO TITLES I.™ Now produce custom titles for video recordings using your TI 99/4A! Three unique character styles — Bold, Computer, and Miniature are proportionally spaced and automatically centered for truly professional appearing titles. Twenty-six color combinations and multiple screen division with scrolling. Suitable both for commercial and home use. Runs in TI BASIC. From J & KH Software.

21518 Cassette

Sug. Retail \$29.95 **\$19.95**

21522 Disk

Sug. Retail \$19.95 **\$17.95**

VIDEO TITLES II.™ Use this program to produce **automated sequences** of custom titles for in-store advertising or for video recordings. Features include three proportionally spaced character styles (Bold, Computer, and Miniature), choice of centering or justification for each title, variable spacing, four frame styles, overlay of custom designs (logos, for instance), and storage for forty titles, forty sprite patterns, and ten title sequences. Requires Extended BASIC. From J & KH Software.

21537 Disk

Sug. Retail \$34.95 **\$29.95**

VIDEO TITLES II ACCELERATOR.™ Now display titles instantaneously! Because Accelerator is written in Assembly Language, it loads the entire VIDEO TITLES II Database into Memory Expansion — then allows title sequences to be displayed at lightning fast speed. Accelerator also adds many fine tuning controls to existing VIDEO TITLES II capabilities plus new ones including linking sequences. From J & KH Software.

EXPANDING YOUR TI WITH

Go From A Bare TI 99/4A Console To A Full System For Only \$499.00!

SAVE
OVER
\$300

- **CorComp 9900 Micro-Expansion System:**
RS-232 Interface, 32K, DS DD Disk
Controller Card
- **Half-Height Disk Drive**
- **External Box with Power Supply**
- **Filler Plate**
- **Disk Drive Y Cable Package**

9900 MICRO-EXPANSION SYSTEM. Have you ever been jealous of your friends who spent thousands of dollars on "full-blown" computer systems while you remained loyal to your TI 99/4A console and cassette recorder?

Now you can move up to the "big league" for only \$499! This high performance expansion system package offers you a powerful, flexible, **affordable** way to expand your TI 99/4A!

The compact CorComp 9900 Micro-Expansion System unit plugs into the side port of your console and contains an RS-232 interface (allowing hook-up of printer and/or modem); a 32K memory expansion; and a disk controller card with Disk Manager on diskette capable of formatting **double-sided, double-density** diskettes (this card earned straight "A's" in a review by *Micropendium*). Add a half-height disk drive that offers up to 360K of storage when used to its full double-sided, double-density potential, a box and power supply containing room for a second half-height disk drive (our package includes a filler plate to cover this extra opening until you expand to a second drive), and the disk drive Y cable package (pin-type) to hook your drive up properly... and you have a complete computer system that will rival systems costing much, much more!

CorComp Expansion Components

- **Compact**
- **Quiet**
- **Powerful**

CORCOMP EXPANSION COMPONENTS. An economical way to expand the versatility of your TI 99/4A home computer. This unit (about the size of two Speech Synthesizers) plugs directly into the side port of the computer and eliminates the need for a large expansion box.

The system is available in the following configurations:

• **STAND-ALONE RS-232 INTERFACE.** Get started! Provides two serial ports and one parallel port for connecting printers, plotters and modems.

29784 Stand-Alone RS-232 Interface **\$127.00**

• **UPGRADE KIT.** The 32K memory expansion and disk controller card may be purchased separately as an upgrade kit and are easily installed into the RS-232 Stand-Alone Interface.

29799 Upgrade Kit **\$239.95**

• **MICRO-EXPANSION SYSTEM — Complete!** SAVE! The RS-232 interface with 32K memory and disk controller card (supporting double-sided, double-density) installed. Up to 360K of storage per disk!

29802 Micro-Expansion System **\$329.00**

All configurations offer 120 day manufacturer's warranty.

• **9900 32K MICRO-MEMORY.** This 32K add-on stand alone memory from CorComp simply plugs into the side of your 99/4A and gives you all the convenience and power of additional memory. Other stand-alone units can be easily daisy-chained to the memory unit (such as the Speech Synthesizer, etc.) No extra power supply needed as the unit draws power from the computer.

34396 32K Micro-Memory **\$99.95**

512K Memory Plus

- **Use with TI PE-Box!**
- **Super-size RAM disk for lightning quick program and data retrieval!**
- **Power supply keeps data in memory even if computer is turned off!**

512K MEMORY PLUS CARD. If you want to install more memory in your TI Peripheral Expansion Box, use the powerful 512K Memory Plus card from CorComp. The Memory Plus card has its own power supply so that your data and programs stay there even if you turn the computer off. The RAM disk, which acts exactly like a floppy disk except that it allows nearly instantaneous retrieval of data and programs (great for TI-Writer or Multiplan), can be selected as DISK 1, 2, 3, 4, or 5. Your existing 32K card must be removed to install your new Memory Plus card. Total memory on line will be 512K (with 480K available for RAM disk, etc.). Solve your memory problems today! Sug. Retail \$265.00

41065 512K Memory Plus Card with Power Supply **\$253.00**

256K MEMORY PLUS CARD. Don't need quite as much memory as offered by the 512K card? Save some money by purchasing the 256K Memory Plus card (with 224K available for RAM disk, etc.), works the same as above.

41051 256K Memory Plus Card with Power Supply **\$196.00**

NOTE: Order Now! Prices may increase due to rising chip prices.

EXPANDING YOUR TI WITH

To maintain low user prices, CorComp is now shipping most expansion cards as "IBM-style" bare boards for direct insertion in your expansion box.

Cards For Your Expansion System

**Double-Sided,
Double-Density Disk Controller**

9900 DISK CONTROLLER CARD. Fits in the TI Peripheral Expansion Box. Controls up to **FOUR double-sided, double-density** disk drives and allows mixing any combination of drives; half-height or full-height, single-sided, single-density, double-sided, double-density. Loads files 2-4 times faster than with the TI disk controller. The Disk Manager program is **included** on diskette and provides many enhancements such as allowing you to Load and Run assembly language programs without using the Editor/Assembler module. Other additional commands: CALL PEEK, CALL POKE, CALL PEEKV, CALL POKEV, CALL MGR, CALL EXEC, CALL MOVEM. The card also has a provision for setting the head seek times for all four drives, allowing use of some of the faster disk drives on the market. Allows sophisticated features, yet is very simple to use. 120 day manufacturer's warranty. Requires cable assembly #30751 listed below for hooking up to one internal drive (inside peripheral expansion box), #31045 for two drives. Requires 32K to use disk manager software.

- 29770 Disk Controller Card \$149.95
- 30751 One Drive Cable-Pin Type (see page 32) \$16.95
- 31045 Y Cable Package-Pin Type (see page 32) \$29.95

Sug. Retail \$219.95

**Serial and
Parallel Interfaces**

RS-232 CARD. Fits perfectly in your TI Expansion Box to provide printer, modem, or other communications capabilities. Like the original from TI, this CorComp RS-232 card offers both parallel (1) and serial (2) interfaces. The serial port may be split into two ports by using a "Y" cable (#10069 on page 40) allowing simultaneous use of two serial devices. 120 day manufacturer's warranty.

13300 RS-232 Card

Sug. Retail \$117.95
Only \$89.95

**32K Memory
Expansion**

32K MEMORY EXPANSION. Expand your 9914A's memory to a full 48K with this high quality memory expansion from CorComp! Now you can use word processing or spreadsheet software that won't run in the console's 16K, as well as write your own software to tap the greater potential of the expanded memory. Like CorComp's RS-232 card, this 32K memory fits perfectly in the TI Expansion Box and features heavy duty metal housing. Totally compatible with TI and independent software requiring 32K. 120 day manufacturer's warranty.

13315 32K Memory Expansion

Sug. Retail \$139.95

Only \$119.95

Triple Tech

- **Clock/Calendar!** • **Printer Buffer!**
- **"Hidden" Speech!**

TRIPLE TECH. An exciting multifunction board from CorComp that plugs into your expansion box! The **Clock/Calendar** lets you access YEAR, MONTH, DATE, DAY, HOURS, MINUTES, and SECONDS easily from BASIC or Extended BASIC. A great feature for bulletin board systems, time management, and hobby applications. The **Printer Buffer** is compatible with almost all printers and requires **no** user modification of software. It holds up to 64K of output and features a copy function for immediate duplication or print-out. "Clear" function also included.

The **Speech Synthesizer Connection** lets you remove your TI speech synthesizer from the side of the computer and hide it in your expansion box! All speech functions are unchanged, but your computer is now neater and narrower!

Any of these functions would be valuable — to get all three in one economical package is the best deal of the year! Order now.

EXPANDING YOUR TI WITH

**SHIPPING
IN JULY!**

THE GENEVE COMPUTER. Here's the good news . . . the new Myarc Geneve Computer you've been hearing about and waiting for is shipping in July! Imagine a computer that is 99/4A compatible but has the speed and incredible graphics capabilities that even IBM, Amiga, and Atari ST owners would envy!

The Geneve computer motherboard is in card form, and plugs into your existing TI Expansion Box. Once your TI 99/4A software is converted to the new machine's format (instructions included), you can remove the 99/4A console and its bulky "firehose" cable. Since your modules can be converted to disk format, you can set them aside, too. The Geneve's IBM style keyboard with separate function and cursor control keys connects directly to the card in the Expansion Box with a convenient "phone" type cord.

The Geneve features an 80 column display, and supports high resolution monochrome or RGB analog monitors and composite color monitors. [See page 39.] 640K RAM plus 128K VDP RAM is standard. Instructions on how to con-

your TI-Writer and Multiplan for use with 80 column display and 640K RAM are included. The Geneve uses a TI9995 processor chip operating at 12 MHz, and runs 2-3 times faster than the 99/4A. It also features a joystick port, mouse port, built-in speech capabilities and BASIC 3.0.

The Geneve is truly a breakthrough . . . since it's offered on a card, and is compatible with your existing Expansion Box, disk controller, and RS-232 cards, its advanced features can be offered at a cost much lower than you would expect to pay for a system of this power and versatility!

We expect demand for the Myarc Geneve computer to be high, and initially the computers will be in short supply . . . so place your order soon to avoid disappointment.

**SHIPPING
IN JULY!**

**20
MEGABYTES**

Hard Disk Storage!

MYARC HARD DISK CONTROLLER CARD. When the TI 99/4A was designed, hard disk drives were bulky, expensive, and offered relatively little storage; they certainly weren't anything that a home user would want, TI thought. As a result, TI owners have had to gaze in envy as owners of IBM and other systems took advantage of falling drive prices to increase the data capacity of their systems to unheard of sizes. Data that previously resided on dozens or even hundreds of floppy disks could now be stored on one quick access drive. Cumbersome database and word processing files that would require multiple disks could now be efficiently stored in one large file.

TI owners will be delighted to know that Myarc has introduced a new hard disk controller card that installs in a TI expansion box and controls up to **three hard disk drives with up to 240 megabytes each!** Now you can consolidate your files in one logical file structure, and eliminate a lot of the time-wasting swapping of floppy disks that you do now. The controller uses a Unix-like directory tree structure, so that organizing and locating files is easy. A built-in date and time clock marks files with the time of their last update. A disk manager (requires 32K and Extended BASIC) is included with the controller.

Don't wait — be the first on your block to have a super-powerful TI. Great for bulletin boards, database users, business users, or anybody with large or numerous data files.

65341 Myarc Hard Disk Controller Card

\$259.00

20 MEGABYTE DRIVE FOR EXPANSION BOX. This 20 megabyte drive can be installed in the TI Peripheral Expansion Box in the same space as a 1/2 height drive. Its design features low power consumption and fast access. Includes cables for connecting to Myarc controller card.

65352 20 Meg. Hard disk — Internal

\$379.95

20 MEGABYTE DRIVE FOR EXTERNAL USE. Use this drive if you have one or more floppy disk drives in your expansion box and you wish to connect an external hard disk. This drive will increase your storage to more than **200 times** the amount of an original TI floppy disk. Requires External Hard Disk Box and Power Supply and Cables for External Hard Disk (below).

65363 20 Meg. Hard Disk — External

\$359.95

HARD DISK BOX & POWER SUPPLY. For using a hard disk drive outside the expansion box.

65364 Hard Disk Box and Power Supply

\$159.95

EXTERNAL CABLES FOR HARD DISK. For connecting a hard disk (external) to the Myarc Disk Controller Card.

65374 External Cables for Hard Disk

\$24.95

EXPANDING YOUR TI WITH

To maintain low user prices, Myarc is now shipping most expansion cards as "IBM-style" bare boards for direct insertion in your expansion box.

Supercharge Your TI With 512K Of RAM Plus Extended Basic Level IV!

• RAM disk • Print Spooler • Dozens of New Commands • Actually Makes Your TI Much Faster!

Special Package: 256K And 512K Cards.

Step up to big-time personal computing with these powerful new cards for your expansion box! In addition to giving you bank-switched access to 32K blocks of memory, this exciting card **includes** (at no extra charge!) RAM disk and print spooler routines built-in! Imagine storing your programs or files in memory and being able to load them instantly! A fantastic productivity aid for users of TI-Writer or similar programs where one must switch programs or files frequently! The print spooler lets you "print" at high speed directly to memory — great for downloading files or text.

Extended BASIC Level IV **REDUCED!**
Rated "A" by *Micropendium*

Executes up to three times faster than TI Extended BASIC — makes your 99/4A as fast as an IBM PC. Features include 40 character display mode, windowing,

high resolution graphics, many new commands including DRAW, FILL, CIRCLE, etc. Requires Myarc 256K or 512K card, and disk drive.

- 38395** Myarc 256K Card with Ext. BASIC Level IV **\$229.00**
- 42231** Myarc 512K Card with Ext. BASIC Level IV **\$289.00**
- 34324** Myarc 256K Card **Low Price \$179.00**
- 42245** Myarc 512K Card **Low Price \$239.00**
- 38179** Myarc Extended BASIC Level IV **Low Price \$59.95**

512K UPGRADE KIT. Kit contains the chips and instructions needed to transform the Myarc 128K card into a super-powered 512K memory unit.

- 38198** 512K Upgrade Kit **\$109.95**

POWER PAK. Want to keep the memory in your 128K card there when you turn off your expansion system and computer? Just connect this handy power pack to the jack provided on the card. (Caution: Not for archival data storage).

- 38107** Power Pak **\$17.95**

EXPANDING YOUR TI WITH

Powerful New Extended BASIC

Incorporates All TI Extended BASIC Commands Plus New Graphics Commands

EXTENDED BASIC II PLUS from Mechatronic starts off just like TI Extended BASIC — all of the same commands, functions, etc. It will run all of your software that requires TI Extended BASIC. So where does the "Plus" part of the name come from? The innovators at Mechatronic have built in both an extended statement set and a novel graphics mode. The extended statement set includes handy functions like a screen dump command, a delay command, a function that

disables the QUIT key, and many others. The graphics mode adds **40 powerful routines** to let you do almost anything you want using high resolution graphics. Functions include WINDOW, MOVE, TURN, RECTANGLE, CIRCLE, ARC, ELLIPSE, AXIS (for graphs), WRITE (for TEXT), and dozens more. A powerful and versatile package. Use of graphics functions requires 32K.

- 41488** TI, Cartridge* **\$79.95**

*Not recommended for use with 32K stand-alone memory units.

80 Columns For Your TI!
Works with TI Writer!

80 COLUMN CARD. One of the biggest limitations of the TI 99/4A is its 40 column screen. For applications like word processing and spreadsheets, this limitation is serious, as it makes it impossible to see an entire letter at once, and the number of spreadsheet columns that can be displayed is too small. Now, Mechatronic is finally shipping their 80 column device. It is a box that attaches to your computer's expansion port and actually replaces the original video processor chip. The 80 column device comes with a disk that lets you use your TI-Writer and Editor

Assembler in 80 column mode!

To install the unit, you just open up your computer, follow the instructions to remove the video chip, plug the 80 column connector into the same socket, and close it back up. Use your existing composite monitor, or for extra sharpness attach an RGB monitor — the 80 column unit has an RGB port built in. Imagine seeing a whole letter on the screen at once! Order one today and find out what you've been missing!

- 41505** 80 Column Card **\$219.95**

Special \$20 Trade-In/Rebate!

If you own a TI, MicroPal®, or other Extended BASIC cartridge, but would like to upgrade to Extended BASIC II Plus, you can take advantage of our special \$20 Trade-in Rebate Offer! Shown with optional amber monitor.

Blast Into The IBM Universe

With The **TENEX Turbo PC/XT**
Introductory Price **\$499!!!**

TURBO PC/XT. We are really proud of this one! You simply **cannot** beat the quality, performance, and price of our TENEX designed IBM® PC and XT® compatible! Comes to you fully assembled and configured with all these features:

- Proven IBM compatibility!
- Switchable standard speed (4.77 MHz) and turbo speed (8 MHz)!
- 256K RAM installed, expandable to 640K on motherboard!
- One 360K half-height disk drive and controller installed!
- Controller for a second 360K floppy drive installed!
- Parallel printer port installed!
- Color graphic driver installed for RGB and composite monitor!
- OR Monochrome Graphics port installed for monochrome monitor!

As Advertised In
The Wall Street
Journal!

- Guaranteed Lotus 1-2-3 graphics compatibility!
- Terrific new IBM AT® style keyboard!
- Big **150 watt** power supply installed!
- FCC certified and legal BIOS!
- Operating manuals included!
- Sturdy metal frame and case with speaker!
- Full 90 day warranty plus the TENEX satisfaction guarantee!

For this breakthrough price, you have a complete system with **more** computing power than the IBM PC or XT! Take your system out of the box, plug it in, connect your monitor and printer . . . and off you go. Run Lotus 1-2-3, dBASE III, Wordstar, Flight Simulator, and the thousands of other PC software products. Full-size metal chassis gives you eight expansion card slots and room and power cables for four half-height disk drives.

You choose the speed of calculation: standard 4.77 MHz or **turbo** 8 MHz. Zoom through programs 1.6 times faster than the IBM PC or XT (Norton benchmark). For games and other speed-dependent software, simply switch to the slower clock rate.

The detachable keyboard mirrors the famous IBM AT in looks, quality, and feel! Features ten function keys, numeric keypad, extra large shift and return keys, and lighted indicators for scroll, caps, and number lock.

Your TENEX Turbo PC/XT will accept IBM compatible components, giving you flexibility in expanding

your system and security in the event repair is needed. And remember your TENEX technical staff is there when you need them!

No corners have been cut in producing this incredible system for this amazing price . . . we just used our same purchasing power and Ph.D. technical staff we use to bring you the other terrific products found in our catalogs. Note: an IBM compatible disk operating system (DOS) is required. Use your own or choose one listed on opposite page.

- 67219** Turbo PC/XT, Monochrome System
Introductory Price \$499.00
- 68027** Turbo PC/XT, Color System
Introductory Price \$499.00

(Please include an additional \$10.00 to our regular shipping charges.)

Now is the time to **design your dream system** . . . order the following components together with the TENEX Turbo PC/XT above and we will install them and test your system **for no extra charge!** All components are backed by a full 90 day warranty.

TURBO PLUS CARD. Adds serial port for modem or serial printer, real-time calendar/clock with quality lithium battery (never enter time and date again), joystick port, and light pen port.

- 67294** Turbo Plus Card with system **\$49.00**
67736 Turbo Plus Card without system **\$69.95**

RAM MEMORY EXPANSION. Upgrade to a full 640K that will provide you with more than enough memory to run memory intensive programs. Completely installed on motherboard. No chips for you to install.

- 67298** RAM Memory Expansion **\$49.00**

20 MEGABYTE HARD DISK. Go for the gold! For this incredible price you can enjoy the speed and convenience of our best quality **Internal** Seagate hard disk system. End the floppy shuffle by storing software and data on your hard disk. Complete with controller card.

- 67345** 20 Megabyte Hard Disk **\$399.00**

30 MEGABYTE HARD DISK. Internally mounted 30 megabyte Seagate hard disk with advanced technology controller card (68 ms access time).

- 67898** 30 Megabyte Hard Disk **\$499.00**

AT Compatibility!

With the **Turbo 286**
Introductory Price **\$999!**

TURBO 286. Completely compatible with IBM's AT, but can operate at either 8 or 10 MHz! Comes complete with all this: 256K RAM (expandable to 1 Meg on motherboard), clock/calendar with lithium battery, one 1.2 Meg 1/2 height floppy drive, parallel printer port, color graphic OR monochrome graphic monitor adapter, and AT style keyboard. Full-sized metal AT style case with key lock and indicator lights, and 200 watt power supply. You have to try our machines to truly believe the quality, performance and true compatibility.

Color card is compatible with RGB and composite color monitors (IBM's CGA standard). Monochrome card is compatible with TTL monochrome monitors. All support Lotus graphics. For the ultimate in color resolution, consider the great enhanced graphics adapter (EGA) system described on opposite page.

- 67699** Turbo 286 Monochrome System
Introductory Price \$999.00

- 68059** Turbo 286, Color System
Introductory Price \$999.00

(Please include an additional \$15.00 to our regular shipping charges.)

640K RAM EXPANSION FOR TURBO 286. Increase the random access memory of your system to a full 640K. Enough for major application software projects.

- 68005** 640K RAM Expansion **\$59.00**

HARD DISK CONTROLLER (with hard disk systems only)

- 67879** Hard Disk Controller **\$110.00**

20 MEGABYTE HARD DISK. Internally mounted 20 Megabyte Seagate hard disk for the AT. Requires hard disk controller.

Easy Conversion: TI FILES TO IBM FORMAT — and back! No cables — No baud rates — No complex settings No unusual hardware needed

THE REAL TI/IBM CONNECTION. At last there is an easy way to convert data from TI format to IBM format and vice versa. This elegant new program from CorComp actually lets your TI **read and write IBM formatted disks** using just your **existing TI system**. Sounds like magic? It really works! Unlike other conversion products that require you to physically connect a TI and IBM computer, the "Real" TI/IBM Connection lets you save and retrieve IBM files as easily as you would save and retrieve TI files.

Imagine the benefits: convert large databases or word processing documents to IBM format without time consuming and error prone retyping... use your TI at home in the evening to work on IBM documents for use in the office... the possibilities are endless.

What's unique about this program? First, it's cart-

ridge based — just plug it into your TI computer, and you are ready to go. Second, it does not require you to attach your IBM computer, because it turns your **TI drive into an IBM compatible drive**. That's right — this software actually lets your TI system **read and write IBM disks** without any hardware modifications. You select the files you want transferred from TI to IBM format or vice versa, and the software does the rest!

IBM files will be read and written in ASCII format. Most IBM word processors either store their files in this format or can convert files to it. The TI files are also read and written in ASCII format, which means they can be edited with any TI word processor.

What you need: A TI system with two double-sided, double-density drives, and a CorComp disk con-

troller card. (Note that while this program can be used to convert a TI BASIC program stored in ASCII format to an IBM compatible format, due to software differences, modifications will be necessary in most cases. Also, some editing may be required when converting word processing or database files to make the converted files fully compatible with the software on the other computer.)

This is the best new utility we've seen, because it is so simple you can actually switch files between your TI and an IBM compatible computer on a regular basis; other utilities are better suited to a one-time conversion process.

68452 Cartridge \$59.95

TENEX TURBO PC/XT: True IBM compatibility at an unbeatable price — see page 6.

Other Great IBM Compatible Products

(For Both PC/XT and Turbo 286)

3.5" DISK DRIVE. That's right. A 3.5" floppy disk drive in a half height 5/4" footprint. Fits perfectly in your computer in the place of a standard 5/4" drive. Great for trading files with your laptop or IBM Personal System 2 machines. Capacity is 720K on each disk.

67789 3.5" Disk Drive \$168.00

SECOND DISK DRIVE. Top quality half-height 360K disk drive. Add it to the TENEX Turbo PC/XT or TENEX Turbo 286 on opposite page and you will have a complete two disk drive system for only an additional \$99.00. Uses double-sided, double-density diskettes.

\$119.00

(Special only \$99.00 when purchased with Turbo PC/XT or 286.)

38604 Second Disk Drive \$99.00

MS-DOS VERSION 3.1. Standard operating system for IBM PC compatibles. Compatible with all IBM PC software for MS-DOS 3.1 and earlier versions. Compatible with floppy and hard disks. Includes one disk and manual.

67355 MS-DOS 3.1 \$24.95

MICROSOFT MS-DOS VERSION 3.2. Microsoft's newest and most advanced operating system. Compatible with floppies and hard disks. Also included at no extra cost is **GW-BASIC**, a super extended instruction set of the standard BASIC language, including User's Guide and Reference. Includes print spooler, other supplemental programs, and utilities such as Link and Debug. Two disks and complete documentation in 3-ring binders.

67369 MS-DOS 3.2 \$84.95

AMBER MONOCHROME MONITOR. For the intensive computer user, the resolution of even good color monitors may be fatiguing. Monochrome to the rescue! Have clear text and graphics with this superb 12" diagonal amber monitor with pinpoint resolution and an equally sharp price. Cable included! Specify monochrome graphics card.

67313 Amber Monitor \$99.00

ENHANCED GRAPHICS MONITOR. A top quality Mitsubishi EGA monitor for an incredible price! Requires EGA board to utilize full resolution.

67724 Enhanced Graphics Monitor \$469.00

ENHANCED GRAPHICS BOARD. Emulates Hercules EGA board. Fully IBM compatible. Requires enhanced graphics monitor to utilize full resolution.

67711 Enhanced Graphics Board \$219.00

RGB COLOR GRAPHICS MONITORS. Please refer to page 39 of your catalog for our selection of quality monitors.

1200 BAUD MODEM. Great quality in a 1200 BAUD modem card. A smart modem that occupies a half length slot *inside* your computer and fully Hayes compatible at a breakthrough price!

67964 1200 Baud Modem \$119.00

PRINTER CABLE. Connects your IBM compatible computer's 25 pin parallel port to any "Centronics" standard parallel printer (36 pin input). Six foot length.

13009 Printer Cable Only \$19.95

ANALOG JOYSTICK. Great for graphics and games! Features independent X and Y axis controls, fire button, and auto centering mechanism in a sleek, professional design. Connects directly to your Turbo Plus Card.

67335 Analog Joystick \$16.95

(Almost) Free Software!

You can save a lot of money by buying our Turbo PC/XT computer, and you may not want to spend those savings right away by buying hundreds or thousands of dollars worth of applications software. Here are some very high quality user-supported programs that will get you going in all the important areas. These are self-documenting programs that have been released for public distribution by their authors, some of whom hope that users who like and use them will send them a contribution. These disks are not copy protected and may be duplicated for personal use.

PC-WRITE. Super word processor... some say it's better than WordStar.

41436 IBM, 2 Disks \$10.00

PC-FILE EXPRESS. Easy to use database. Very good review by PC Magazine.

41440 IBM, 2 Disks \$10.00

AS EASY AS SPREADSHEET. Has almost all the functions of Lotus 123, including range names and macros. Even creates and can use Lotus 123 compatible worksheets. Makes line, bar, pie, and log graphs. Full math functions.

68618 IBM, Disk \$5.00

pBASE. Heavy duty, programmable relational database system.

41469 IBM, Disk \$5.00

PRO-COMM. Easy but powerful communications software... many say better than PC-TALK and QMODEM. Supports any baud rate and all modem features. Includes list of hundreds of bulletin boards.

41474 IBM, Disk \$5.00

We have dozens more of these "almost free" programs, including utilities, games, business programs, and education software. We also sell hundreds of popular commercial programs at substantial discounts. Call or write our customer service department for a current listing.

Full IBM Compatibility In a Laptop!

Imagine a computer that is small enough to take anywhere yet runs all popular IBM software. Imagine how useful it could be for business people who travel but need access to word processing, spreadsheets, databases, or other application programs that are compatible with the same programs at the home office! Well, it's here now! The Bondwell 8 is a rechargeable battery-powered laptop computer that features IBM compatibility plus an almost incredible number of standard features. Included in the basic unit are **512K of RAM** (enough to run any commercial program), a **built-in 3 1/2" floppy disk drive**, a **built-in modem**, an **LCD display with backlight**, both **parallel and serial ports** (for a printer or other peripherals), an **AC adapter**, and a **monitor connection** for use with a monochrome monitor if desired.

Transferring data files and software is unbelievably simple using the optional external 5/4" drive. Just copy them back and forth as needed, or use your application software to "save" the file to the desired format. Since each 3 1/2" disk holds 720K of data (twice the normal 5/4" capacity), there's lots of room on a single disk for both your program and files!

Fantastic Cave Adventure

"If you are interested in adventure games, you'll enjoy this one. With its colorful animation and unexpected dangers, all ages of adventurers should find it interesting."

— *Micropendium*

**Over 100K Bytes
of EXCITEMENT!**

OLD DARK CAVES. This adventure is a programming feat never equalled for the TI 99/4A. Consisting of over 100K bytes of program and data, it incorporates 60 Assembly Language subroutines developed specifically for this game. So what does this mean for the adventurer or Dungeons and Dragons enthusiast? Old Dark Caves features **28 multicolored, animated monsters** and **over 240 locations**. Many of the monsters are intelligent and can make decisions based on how they evaluate your player's strength and character. Due to the

sophisticated programming, moves from one cave to another take less than one second.

Since random elements are incorporated in the program, no two games will be exactly alike. It is actually possible to play this game for weeks without encountering all the inhabitants! Our evaluators really liked this one. Try your hand with spells, swords, and armor and see if you can defy the hazards of Old Dark Caves! Requires Extended BASIC and 32K.

King of the Castle

**One of the Best Games on the Market!
Fast Action ...**

KING OF THE CASTLE. This challenging game requires some quick reflexes and planning to master, but we've found it to be one of the best games on the market! Our resident game master rates this one "excellent."

You'll be amazed at the speed of play and fast screen changes. This machine language program allows lightning-quick response. You are a Norman King asleep in your castle — when suddenly the Vikings attack and invade your fortress. Your guards and servants have fled in fear. You are outnumbered ... but unabashed. Your Ninja training in making gunpowder and wielding Oriental weapons gives you a fighting chance. You defend yourself by throwing spinning stars at the Vikings ... and laying land mines to stop their advance on the stairways or throughout the various rooms. If all else fails, use the secret passageway for a quick exit and time to regroup and attack again. All configurations require joystick. Cassette requires Mini-Memory. Disk requires Mini-Memory, OR 32K and Editor/Assembler, OR 32K and Extended BASIC. From Cydex Software.

Lost Hits "Rediscovered"!

COMPUTER WAR/SUBMARINE COMMANDER/RIVER RESCUE. Some of you may remember that Thorn EMI, the British entertainment giant, had committed to developing several super games for the TI including a dynamite game based on the hit movie "War Games" and one of the best submarine simulations ever created for a home computer. Just before the games were released, TI pulled the plug on the

99/4A and Thorn decided to drop the introductions.

These programs gathered dust for a while as Thorn EMI turned their attention to more pressing matters. Finally, by special arrangement with a U.K. computer firm who convinced Thorn to make the program rights available, TENEX brings you these "lost hits" — in one convenient disk!

COMPUTER WAR

The disk includes:

COMPUTER WAR. The alarm bells are ringing at NORAD! Can you crack the code and destroy the simulated enemy missiles before the world is engulfed in a thermonuclear holocaust?

SUBMARINE COMMANDER

SUBMARINE COMMANDER. This realistic simulation takes you on a submarine patrol mission to hunt down and destroy enemy shipping. Use your sonar when submerged; rise to periscope level and attack. Hazards include enemy destroyers, depth charges, water pressure, and an uneven sea floor. Full instrumentation display.

RIVER RESCUE

RIVER RESCUE. Save a group of helpless refugees who are trapped between a fierce battle and a raging river. Rescue as many as possible in your powerful boat. But you must contend with hostile troops, electric eels, and other hazards. High speed action.

Originally these programs were designed to sell for \$39.95 each! Our special package disk costs only \$29.95 — an incredible price for some of the best and most original TI software we've seen! Requires 32K and Extended BASIC.

40856 Disk **ONLY \$29.95**

ANTEATER. Some people say it's like Dig-Dug... with lots of action and just as much fun! The object is to retrieve a pile of sugar cubes from the surface and carry them safely to the nest while avoiding the deadly Anteaters. You can also lay deadly exploding eggs to slow them down.

42104 Cartridge **\$13.95**

FROG STICKERS. Guide your frog across the moat filled with diving alligators, swimming snakes, and deadly Frog Stickers. If the frog reaches the castle and kisses the waiting princess, he'll turn into a handsome prince!

42119 Cartridge **\$13.95**

Game Cartridges From

TOPPER. Fast, exciting play for one or two players. Topper is a turtle who must travel around the screen on special tiles that change color as Topper lands on them. Change all the tiles and you win! But watch out for the rabbits.

42123 Cartridge **\$13.95**

CHICKEN COOP. You are the rooster in charge of the hen house. Flapping your wings will set you flying and it's up to you to keep the hens from straying out of the coop. You have to catch the flying hens to get points but be sure to catch their eggs, too, before they hatch and become new hens.

INFOCOM™

WHILE
SUPPLIES
LAST!

Infocom fantasy adventure games have been among the most popular software titles we've ever carried . . . and for good reason. Enter one of Infocom's worlds and you're stepping into a world filled with personalities, sensations and realtime interaction. Programmed fiction is like reading a novel, only you're part of the story — interacting with the computer, giving commands to keep the story rolling! And Infocom adventures have the most imaginative and exciting packaging in the industry, providing you with accessories

and clues to make your forays into Infocom's fantasies more enjoyable. Whether you are venturing into the vast underground empire of the Zork series, or the magical fantasy realm of Sorcerer, you'll find Infocom adventures totally absorbing. TAKE ADVANTAGE OF OUR LOW SALE PRICES WHILE SUPPLIES LAST!

PLEASE NOTE: All programs require a Disk Drive, 32K, and Extended BASIC, OR Editor/Assembler, OR Mini-Memory.

SORCERER™

Further adventure in the mystic arts.

SORCERER. A cryptic diary is all that remains in the sanctum of Belboz, The Necromancer, grand and powerful leader of the Guild of Enchanters. It is feared that he is in thrall to evil sorcery. If so, the freedom of the land and the very existence of the Circle of Enchanters could be forfeited. To rescue the kingdom and locate your mentor in the treacherous mists of time, you must gain the powers and cunning of a true SORCERER!

Sale Price \$14.95

Quality 99 Software Midnight Oil Burner

Rated "A+" by Micropendium

QS-SOLITAIRE. Leave it to Quality 99 Software to create a dynamite game from any ordinary sounding concept. When we first received our review copy of **QS-Solitaire**, we weren't very excited. We've seen a lot of computerized card games before, and they all tend to be pretty much the same... slow, and not very exciting. Well, we were still "testing" when the clock rolled past midnight that night. What makes QS-Solitaire different? For one thing, it's programmed in Assembly Language for great graphics and high speed movement. When you move a column of cards to another position, there's no wait... the whole thing is moved instantaneously. The second engaging thing about the game is the dual input mode. You can use the keyboard to move cards around, flip over the next three from the deck, etc., or you can use the joystick (almost like mouse control on a Mac) to do the same things. The two styles of play are Standard (the solitaire you learned as a kid) and Las Vegas (similar, but you play for money with slightly different rules). Requires Extended BASIC and 32K.

42176 Disk **Sug. Retail \$24.95**
Sale Price \$14.95

MAZE MAKER. This newest program from Quality 99 Software is a real mind-challenger... it prints fiendish mazes for you to solve! Always has only one entry and one exit, with a guaranteed path between them. You control how simple or complex the maze is. Every maze is different. Works on any printer. Great fun! Requires 32K and Extended BASIC.

TI Strategy &
Board Games

not
POLYOPTICS
SPAD XIII
Aerial Combat Game!
100% Assembly Language!

"I think this is the best flight simulation available for the TI." — *Micropendium*

SPAD XIII is the newest and best game from Not-Polyoptics. In addition to taking off, landing, and all the other aerial maneuvers common in flight simulators, Spad XIII offers much more. After taking off from a French airfield, you pilot your World War I biplane toward the front lines to engage German aircraft. See if you can shoot down their observation balloons protected by flak. Continue on toward the German airfield, where you can try to bomb their hangars and planes. Take a victory spin around the Eiffel Tower before returning safely to your base.

When flying SPAD XIII, you can choose from any of six views — front, left, right, back, up, and down. Instrument panel includes Altimeter, Compass, Air Speed, and Fuel. Relive the days of open cockpit flying! Requires 32K and Extended BASIC. From NOT-POLYOPTICS.

KHE SANH is a game about guerilla warfare in South Vietnam during the Tet offensive in 1968. The elusive North Vietnamese and Viet Cong units could remain hidden in the jungle and attack when conditions were right. The American forces could only conduct often futile searches for the guerillas in hopes of preempting these attacks. This baiting game ended in 1972 when the American forces withdrew. In this tactical skill game you command a military base in Vietnam. You have five platoons of troops and four helicopters at your disposal to search out and destroy two companies of North Vietnamese regulars (who are controlled by the computer). To win you must accumulate more points than the computer. From NOT-POLYOPTICS.

The Genealogy Workshop

A FULL FEATURED
GENEALOGICAL RECORD KEEPING
SYSTEM FOR THE TEXAS INSTRUMENTS
99/4A HOME COMPUTER

- A FULL-FEATURED GENEALOGICAL RECORD-KEEPING SYSTEM
- ORGANIZE YOUR FAMILY DATA
- CATALOG YOUR SOURCES

THE GENEALOGY WORKSHOP. This program allows you to automate many aspects of keeping your genealogical records. This program is easy enough for a beginner, but will also prove useful to more experienced genealogists. "Family Data" function stores all of the vital information on each individual. Searches can be made to find common birth and death locations; you may also search for a name. "Overview" function stores the names and vital dates for each family including up to 20 children; this provides a more distant, less detailed view of the family. "Sources" function stores the details of where specific

data was obtained; source record numbers correspond to citations in Family Data. Program also prints sequentially numbered Cross Reference Forms, Family Group Sheets and Source Sheets. All programs include revision capability and give you the option of hard copy or screen display. Requires 32K, Extended BASIC, and eighty column printer or screen display. Package includes handsome three ring binder with ample room for storing additional notes, data, etc.

AT THE ZOO

Includes World Map Display

By: D. Loertscher and T. Rednour

from

micro fal.

AT THE ZOO. This fun and educational program for ages 4 and up offers exceptional graphics and makes the most extensive use of the TI Speech Synthesizer we've ever seen. Studies concentrate on spelling, geography and general knowledge about animals. A great way for children to learn how to operate the computer! The first section, "A World of Animals," displays a detailed map of the world, highlighting and identifying 12 major areas. The child may select an animal or area of the world; or let the computer proceed automatically. Homelands of the animals are highlighted on the map while the computer describes (through the

Speech Synthesizer) their natural habitat. In the next section, "At The Zoo," the emphasis is on spelling the animal names. A colorful zoo scene is drawn and the name of an animal is spoken and, if desired, printed on the screen. The child then types the name to match. If the spelling is correct, the program says an approving phrase, draws the animal in the zoo, and some information about the animal is spoke. The child has three tries to correctly spell the word. Requires TI Speech Synthesizer and Terminal Emulator II.

The computer scores and stores the result of each test for the teacher's information. Each test can be stored on tape for later use. Flash card practice in basic math with any factor you choose.

21345 Cassette \$8.95

ADDITION II/SUBTRACTION II. Practice basic adding and subtracting in columns.

37936 Cassette \$8.95

FRACTIONS I/FRACTIONS II. Displays fractions pictorially; simple exercises in adding, subtracting, multiplying, and dividing fractions.

37940 Cassette \$8.95

DELIVERIES/MATH RACE. Drive a delivery truck through the neighborhood grid to study graphs. Four players can race their cars by answering math questions.

68466 Cassette \$8.95

HANGMAN/MEMORY. Over 400 words built-in for individual play or two player game. Concentration-type game matching pairs of letters.

21203 Cassette \$8.95

SHOOT THE MOON/SPELLMAN. Spelling competition for up to four players. Three different games let you use your personal spelling list.

21331 Cassette \$8.95

NEW! **CALENDAR I/CALENDAR II.** Teaches the parts of a year, order of the days of the week, number of days in the months, other information about the months.

68470 Cassette \$8.95

CLOCK/DICE. An excellent game for learning to tell time plus addition practice using dice.

30727 Cassette \$8.95

NEW! **WEIGHTS/MEASURES.** Practice reading scales, determining weights, converting from pounds and ounces to grams and kilograms, reading rulers, converting inches and feet to centimeters and meters.

68484 Cassette \$8.95

HANGMATH/THREE FUN GAMES. Four great number guessing games with varying difficulty levels.

68495 Cassette \$8.95

SPELLING TUTOR/MATH TUTOR. Get help with spelling and math. Use your own levels and lessons.

30732 Cassette \$8.95

WORD PROBLEMS I/WORD PROBLEMS II. Practice basic math with fun word problems, also give problem explanation.

37955 Cassette \$8.95

SOLAR SYSTEM/TEMPERATURE. Learn about the planets with colorful graphics. Also includes how to read a thermometer and how to convert Fahrenheit to Celsius.

37969 Cassette \$8.95

Secondary Education

TYPING I/TYPING II. Teaches you first how to position your hands and which finger to use to press each key, and then progresses to actual practice.

37993 Cassette \$8.95

CIVIL WAR/IKING. Command the confederate Army in trying to rewrite history or rule your own country with all the problems sovereigns face.

37988 Cassette \$8.95

LEMONADE/CODE BREAKER. A fun lesson in economics with buying, selling, and advertising. Then use deductive reasoning to break the code from clues given by the computer.

38003 Cassette \$8.95

U.S. CAPITAL/U.S. GEOGRAPHY. Provides a rounded lesson in states, capitals, regions, and other geographical items.

38037 Cassette \$8.95

NEW! **U.S. PRESIDENTS I/U.S. PRESIDENTS II.** A tutorial for learning and reviewing material, or for being tested on it. Great for self-study.

68510 Cassette \$8.95

QUIZMAKER/TRUE FALSE. For teachers or parents to create "customized" tests over your own subject matter.

37974 Cassette \$8.95

Entertainment

GLOW WORM/HUMPTY DUMPTY. Two fun games. Help your worm get food and keep him from danger, and a computer jigsaw puzzle — put Humpty Dumpty together again.

21326 Cassette \$8.95

NEW! **BURIED TREASURE/EGG HUNT.** Search for riches or Easter eggs in these two fun-for-the-family games

21364 Cassette \$8.95

XYLOPHONE/SQUARE PUZZLE. A computer music maker to play built-in songs or make your own. Also popular 1950's letter game.

21379 Cassette \$8.95

GO FISH/SLEDDING. Cast your line and haul in the big ones — watch out for the bait stealers! Then try to guide your sled down the hill, avoid the trees!

21398 Cassette \$8.95

DOODLE/MAZE. Combine a colorful, computerized "Etch-A-Sketch" with an infinite number of mazes.

37917 Cassette \$8.95

EDUCATORS

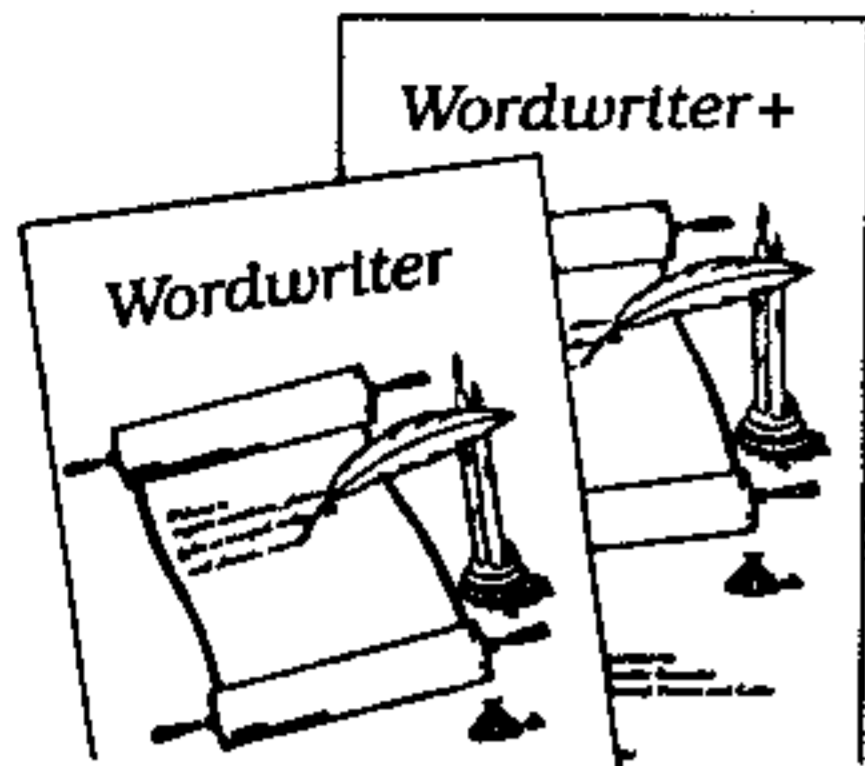

Did you know that we have a catalog just for you? It's chock-full of software, hardware, and accessories designed for use in schools at all levels. Products are for Apple, IBM, Commodore, Atari, TRS and other computers used in schools across the country. And here's the best part: whether your budget is large or small, our low, low prices will stretch your budget farther and let you accomplish more!

If you are a teacher, administrator, computer coordinator, or other educator, call 1-800-348-2778 now and request our Teacher Tech Catalog.

DataBioTics

Wordwriter

- Cartridge Based Word Processor
- Does NOT require 32K or Disk System

WORDWRITER. Whether you are a beginner or an experienced word processor, WORDWRITER is an efficient and powerful tool for all your writing needs. It includes full-screen editing and such powerful functions as insert/delete characters or lines, text move, text copy, search/replace, reformat, margins, tabs, indentation, and more. Using just the console, it can handle documents of over 12,000 characters — over

36,000 if you have a 32K memory expansion. Saves and retrieves files from either cassette or disk. Whether you are looking for a powerful, easy to use word processor, or a way to start word processing without a big hardware investment, WORDWRITER is your ideal choice. From DataBioTics.

65551 Cartridge Sug. Retail \$44.95
\$39.95

Wordwriter Plus

- Includes a Printer Hookup

WORDWRITER PLUS. Same great features as described above, but with an exciting PLUS... this cartridge includes a cable hookup for any standard parallel printer, including Star, Epson, Axiom, and many more. That's right — you can attach your printer directly to the WORDWRITER PLUS cartridge using the included cable and start printing your word

processing documents immediately — no other interface required! Includes printer cable. From DataBioTics.

65564 Cartridge & Cable Sug. Retail \$74.95
\$59.95

Console Calc

- Spreadsheet for TI!
- Does NOT require memory expansion

CONSOLE CALC. If you've wanted a spreadsheet program for your TI but have been put off by the hardware requirements of Microsoft Multiplan, your answer is here! Console Calc lets you simplify your household and business record keeping. Track expenses, forecast sales, or build tables and charts for

business or school easily and quickly. The 32K memory expansion is not required, although if you have it you can make even larger spreadsheets. Saves to and retrieves from either cassette or disk. From DataBioTics.

65523 Cartridge Sug. Retail \$39.95
\$29.95

CONSOLE CALC PLUS. Same great features as above, plus built-in printer interface that lets you start printing your spreadsheet data right away — no other interface needed! Works with any standard

parallel printer, including Star, Epson, Axiom, and many others. Includes printer cable. From DataBioTics.

65533 Cartridge & Cable Sug. Retail \$69.95

WRITEREASE

Word Processor and Spell Checker

from CorComp Inc.

WriterEASE. CorComp offers an easy way to process letters, documents, newsletters, business or school presentations. Designed especially to take advantage of the CorComp Memory Plus products (see page 2), the complete WriterEASE can be loaded into the RAM disk for lightning quick access! All TI formatting commands are supported, along with word wrap. A set-up screen allows you to set defaults, color of screen and drive for the Spell Checker. The Spell Checker can be accessed, word-by-word, while you are typing! Loading and saving files to disk is up to 2 times faster than TI-Writer, and the FIND string is up to 10 times faster. WriterEASE's "manual" is contained in an on-screen HELP section, available with a single key stroke. Requires 32K; Memory Plus products optional.

56907 Two Disk Set Sug. Retail \$49.95

Database Management

Rated "A" by *Micropendium*
"... a database program that stands out from the pack."

ACORN 99. The database system from Oak Tree Systems provides both comprehensive database functions and access to other databases from Extended BASIC.

All database parameters are user defined and limited only by the capacity of the disk being used. Two-level record hierarchy allows the creation of "logical" records of unlimited size by using repeating groups of data. Acorn 99 handles one first-level record format, and three second-level record formats per database for a total of 56 different data items per database. Search criteria includes equal, less than, greater than or not equal to fields in first-level records, including "and" and "or". A logical copy utility allows you to duplicate a database and add, delete or relocate data items at the same time. Also allows copying a subset or sorted subset. The report generator utilizes any 80-column or wider printer.

An Extended BASIC interface allows the user to write his own programs to access any database he has created. This allows the user to extend the functionality of Acorn 99 to perform many tasks. You are aided by a "program pre-processor" that expands easy-to-write commands into the required Extended BASIC statements and inserts them and required subroutines into the user-written program.

Comes with complete, detailed instruction manual with application examples included. Requires 32K and Extended BASIC.

34587 Disk Sug. Retail \$59.95

Word Processing & Database Without Memory Expansion!

TYPWRITER from Extended Software runs in Extended BASIC and does not require the 32K memory expansion. While this limits a few of the features, you'll be surprised at the versatility and power of this economical word processing package. Use any devices for Input/Output text storage: disk, cassette, or combination. Features complete text editing by cursor control — insert/delete lines, partial print, page forward or backward, and more. Software controls the printer; depending on its capabilities, one can enhance print, underline, format, use 28 to 254 characters per print line, etc. 20 page instruction booklet included. Requires Extended BASIC.

11752 Cassette **\$27.95**
11766 Disk **\$29.95**

NAME-IT. Extended Software has created a versatile data management system for mailing lists, catalogs, files, labels, and many other useful applications. Name-It works with any printer, or will display data on the screen only. Complete editing under cursor control is allowed; an entire record is displayed on the screen at one time. Form letter program (included) will coordinate data stored by Name-It with a form letter in Extended's Typewriter program (sold separately). Name-It data can also be easily converted for use with TI-Writer form letters. Will search by any record item; search for a specific name or for a class of data. 20 page instruction booklet, 2 sample record files, and one sample form letter are included. Disk version stores 250 records of up to nine 28-character items per record. Disk version sorts 100 records in 30 seconds, 250 records in 100 seconds. Cassette version allows input of up to 2500 characters in nine 28-character record items; cassette output is condensed for minimum access time. Requires Extended BASIC.

11978 Cassette **\$27.95**
11982 Disk **\$29.95**

Small Business Accounting Software.

TI-COUNT
The Business System Selected by TI

Use your TI 99/4A to its full capacity in your small business! This software makes it possible. Originally selected for publication by TI, but now released by its original developers, Pike Creek Computer Co. TI-Count is a powerful, fully integrated accounting, inventory management, and mailing system for small and/or entrepreneurial businesses. TI-Count stores and instantly retrieves needed data, produces appropriate forms and reports. Easy enough for anyone to use. System requirements: disk system, Extended BASIC, and printer system. (Second disk drive and 32K recommended.)

GENERAL LEDGER. The General Ledger program system is the central module of the TI-Count software. It is programmed as a debit and credit double entry bookkeeping system. 22 special characters in each ledger account are programmed to define the financial statements, automatic journal entries and the closing procedure. Up to 650 ledger accounts can be entered. Operates up to 5 journals separating business transactions into purchases, sales, cash receipts, cash payments and general entries. Interfaces with all other accounting modules.

16129 Disk **\$74.95** Sug. Retail \$79.95

ACCOUNTS PAYABLE. Up to 200 vendor accounts per disk contain same information as Receivables. Automatic check printing with full control over parameters. Projects cash needs. Prints vendor list, check register and more. Requires General Ledger.

16134 Disk **\$74.95** Sug. Retail \$79.95

INVENTORY. Can be operated independently, or as an extension of the General Ledger system. Stores up to 700 items per disk. Each item's record contains "Current," "Period to Date", and "Vendor" information. Prints purchase orders, inventory reports and item labels. Keeps track of backlog and returns.

16167 Disk **\$74.95** Sug. Retail \$79.95

PAYROLL. Can be operated independently, or as an extension of the General Ledger system. Up to 100 employees per disk. Calculates pay and withholding, prints checks and annual W-2 forms. Works with all common pay periods. Provides information needed for government reporting.

16153 Disk **\$74.95** Sug. Retail \$79.95

MAIL SYSTEM. Can be operated independently, or as an extension of the Accounts Payable and Receivable systems. Add, change, delete names; move and merge files; print letters, labels, cards and reports.

16172 Disk **\$44.95** Sug. Retail \$49.95

ACCOUNTS RECEIVABLE. Up to 200 customer accounts per disk. Each account contains the customer's name, address, telephone number, terms of sale, amount paid during the year plus a list of the open invoices and checks received. Reports by customer, prints invoices and statements, produces aging summary. Requires General Ledger.

16148 Disk **\$74.95** Sug. Retail \$79.95

Home Inventory

HOME INVENTORY. This program is designed to keep track of your valuables. Each item can be assigned a name, code, room or category, date purchased, original cost and estimated life. You can add and delete items as well as edit existing information. The computer will calculate the depreciated value of your items. Each inventory file can contain as many as 600 items. This program is a valuable asset. Requires Extended BASIC. From American Software.

11344 Disk **\$14.95**

Auto Maintenance

AUTO MAINTENANCE. This program keeps a maintenance record on every car you own. That's just the beginning! There are over 20 preset maintenance categories that you can change or add to, for a total of 50 maintenance categories available. You personalize a separate disk for each auto by setting up maintenance categories including each auto's own maintenance frequency schedule in miles and months. Once your set-up is complete you simply input the current mileage and the date, and the computer will tell you which maintenance items are "overdue", "due shortly", or "o.k.". Cost information is also available in several forms from the maintenance record to help your planning. This program is invaluable as a management tool for your auto investment. Requires 32K and Extended BASIC. From American Software.

Wycove FORTH

In comparing Wycove FORTH to TI FORTH, *Micropendium* states, "Overall, I prefer the Wycove version . . . it is consistent, well documented, and has many features not found in the TI version. Best of all, it is designed to be learned by the beginner."

— *Micropendium*

WYCOVE FORTH. Wycove System has brought the power and versatility of the FORTH language to the TI 99/4A! FORTH is a powerful, flexible programming language — some of the features include:

- high speed graphics execution
- easier to learn than Assembly Language
- user may define changes to the language and special commands, allowing incredible versatility

180 page manual (included) fully documents TI implementation of Wycove FORTH, but presumes familiarity with FORTH language. Each package includes both cassette and disk, and programs that will run using the 32K Memory Expansion and any of the following: Editor/Assembler, Extended BASIC or Mini-Memory.

Desktop Publishing For Your TI!

Create great looking documents!
Combine text and graphics!
16 type fonts!

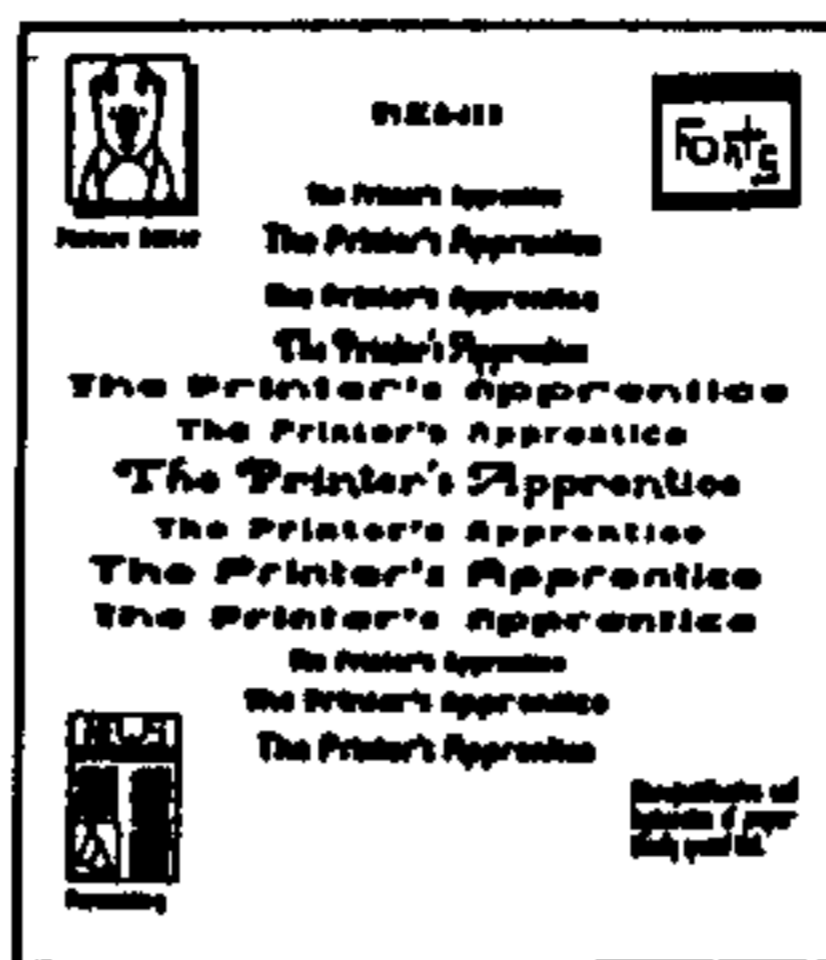

THE PRINTER'S APPRENTICE. If you have been waiting for a desktop publishing program for the TI — one that lets you combine text and graphics and use a great selection of exciting type fonts — your wait is over. The Printer's Apprentice from McCann Software does all that and more!

First, there are great type faces to choose from — the basic disk comes with six, and our bonus font disk adds 10 more. You can vary the size of these fonts when printing, of course, to get the look you want on your document — big, attractive headlines, high quality text, etc. All TPA type fonts include **all 96 ASCII characters** — not just the alphabet. And if the fonts that come with the package aren't exactly what you are looking for, you can even use the **Font Editor** to edit them or create your own!

The Picture Editor lets you crop, size, edit, or create original artwork; or, load your artwork from artist program. A great way to make any kind of document more interesting and readable!

Your text can be input either in your favorite TI word processor or using TPA's own simple text editor, **The Jotter**. Then, **The Formatter** lets you take your text and convert it to micro-justified font print.

The Scheduler lets you do your electronic cut-and-paste job. You can actually mix graphics and high quality text on the same page — no manual cutting or pasting!

System requirements are 32K Memory, disk system, and either Extended BASIC OR Editor/Assembler. TPA works with Star, Epson, TI, Panasonic, and compatible printers. Sug. Retail \$34.00

68523 TPA Disk plus bonus Fonts Disk I **\$29.95**

JOY PAINT '99

"Joy Paint '99 is a truly great graphics program . . . It is programs like this that will help keep the TI alive." — *Micropendium*

Rated "A" by Micropendium

92% More Graphics Space Than Previous TI Graphics Programs! The Screen Acts Like A Window!

JOY PAINT '99 is a powerful but easy to use graphics program that is completely joystick controlled. Creating pictures is easy, because there are no complicated instructions or cryptic keyboard commands to remember. And look at the features: TEXT, PENCIL, SPRAY PAINT, PAINT BRUSH, LINE, CIRCLE, RECTANGLE, ERASE, FATPIXEL, FILL, FLIP, ROTATE, INVERT, MAGNIFY, REDUCE, CUT, PASTE, MOVE, COPY, COLOR, VIEW, SHOW PAGE, and more! These are all easily selected by icon with your joystick. **JOY PAINT '99** also allows almost twice the graphics

space of many other programs by using the screen as a window to work on a larger drawing area. A useful UNDO feature helps correct mistakes. **JOY PAINT '99** even conserves disk space by not saving blank areas in your graphic designs. Printouts can be made in normal or double size, and in single or double-density. Works with Star, Epson, and compatible printers. From Great Lakes Software. Requires 32K and either Extended BASIC, OR Editor/Assembler, OR Mini-Memory.

65459 Disk **\$34.95**

JOY PAINT'S PAL. A handy utility disk that lets you do even more with Joy Paint '99. Lets you load and save pictures in other formats, including TI-Artist and Graphx; create and edit new patterns for use in Joy Paint '99; print to Axiom 100 and Epson compatible printers; and the ability to reduce the size of objects by one-half (the opposite of MAGNIFY).

65472 Disk **\$9.95**

JOY PAINT CLIP ART DISK #1. Five type fonts and over 50 pieces of clip art to use with your Joy Paint program including flowers, cup of coffee, camera, no smoking symbol, various people, animals, skull and crossbones and dozens more!

65484 Disk **\$9.95**

JOY PAINT CLIP ART DISK #2. More clip art for Joy Paint . . . map of the U.S., Snoopy, buildings, train, trumpet, dice, piano, and two more type fonts.

65489 Disk **\$9.95**

Graphics and Printing Section!

One of the most exciting areas of TI 99/4A product development in the last year has been in new and powerful graphics programs and printing tools. In the past, TI users have envied owners of Print Shop (not available for TI) and other similar programs. Well, the time for envy has passed! TI software developers have responded to this need, and created new programs for every purpose. To make your shopping easy, we have combined both old favorites and new hits into one spectacular section!

FONT WRITER II. The most significant development in TI graphics in four years! Brings text and graphics together!

Font Writer II is one of the major developments in TI software history! For the first time users can combine both text and graphics in a dynamic and

effective way. Imagine using both TI-Writer text files, TI-Artist or CSGD fonts (typefaces), and TI-Artist illustrations to make your reports, letters, articles, or other documents come alive!

Font Writer II is actually more than one program. Font Editor, the first program, lets you edit existing TI-Artist or CSGD fonts, or even create completely new ones from scratch. The program features an innovative editing window, dozens of menu selectable utilities, and supports user-defined drawing commands for fast, efficient work. Despite its power, Font Editor is designed to be friendly and easy to use.

The real power of Font Writer II is in its Text Formatter program. This program accepts TI-Writer files with virtually every imbedded text-formatting command supported by TI-Writer, plus many new commands for graphics support, to allow you to integrate text with graphics completely and easily. Text Formatter accepts new commands for printing text in different fonts, plus pictures and other graphics. This program is as easy to use as TI-Writer, but does so much more.

Font Writer II also includes a program that lets you organize your graphics files. Great for keeping track of TI-Artist fonts, slides, instances, and pictures!

Font Writer II is compatible with the Myarc Geneve Computer (see page 4), and the following printers: Epson, TI Printer, Gemini 10X, Panasonic and Okidata. J. Peter Hoddie created Font Writer II for Asgard. It requires 32K and Extended BASIC. TI-Writer and TI-Artist recommended.

65398 Disk

\$24.95

BETTER BANNERS. It's called **Better Banners**, but this is the **best** banner program for the TI we've seen yet! TI owners are justifiably envious of owners of **Print Shop**, which only runs on other computers; now, at last, there is a super quality banner program for the 99/4A. **Better Banners** features fully formed characters in two sizes plus a full 15 resident graphics, including flag, dog, floppy disk, star, heart, smiley face, car, and many more. A big plus is that you can modify or even replace these graphics with your own designs. You can even use punctuation marks in your banners. Banner length is limited only by the length

of your paper! Compatible with virtually all printers. Requires 32K. A TENEX Computer Express exclusive! From TICOMP Programming Service.

42495 Disk

\$19.95

BANNER GRAPHICS. Expand the capabilities of your **BETTER BANNERS** program with this enhancement disk. Features 45 new graphics and a utility for storing user-designed graphics providing unlimited graphics capabilities! Also provides a back-up of the **BANNER GRAPHICS**.

If You Have Questions About Your Order. . .

For questions about your order, call (219) 259-7051 between 8 am and 5 pm Eastern Standard Time, Monday through Friday. No collect calls, please.

For faster service, provide us with the date of order, your customer number, order number, items in question, how order was placed, and name as it appeared on the order.

Our Shipping & Return Policy

Your charge card is never billed until your order is shipped! If we must send you partial shipments, your charge card is only billed for the items shipped.

SHIPMENT. Most items are shipped via UPS. Other modes of shipment include Parcel Post and, for certain heavy items, common truck carrier. TENEX maintains an extensive warehouse with over 50,000 items in stock, and automated systems are in place to speed your order to you. Rapid shipment benefits both you and us. Items not in stock may require 2 to 6 weeks.

DAMAGE. We inspect each item before shipment. Please examine your packages carefully when you receive them, and REPORT ANY DAMAGE TO THE CARRIER. No replacement merchandise can be issued unless a damage claim has been filed with the shipper.

RETURNS. Defective products may be returned for replacement within 30 days of receiving them. Items returned for replacement MUST include original packaging materials and any manuals, cables, warranty cards, etc. included in the original package. (For your convenience and protection, do not discard packaging materials or mail in warranty cards until you are certain the product is working properly.) Please write or call our Customer Service Department for a Return Authorization number prior to returning any items to TENEX. All returns must be shipped to TENEX freight prepaid. All items are subject to inspection by TENEX prior to issuance of replacement merchandise. Please do not ask us to accept return of items in working order, or to provide items other than exact replacements for defective products.

APO, FPO, ALASKAN, HAWAIIAN, CANADIAN AND FOREIGN ORDERS. All payment must be in U.S. Dollars. Checks drawn on Canadian or foreign banks cannot be accepted. Canadian Postal Money Orders payable in U.S. funds are acceptable. VISA, Mastercard or American Express are the preferred methods of payment. **APO, FPO, Alaskan, Hawaiian, Canadian, Puerto Rican, Virgin Islands, Guam orders:** add \$4.00 to shipping and handling charge to cover postage and insurance cost. Contact us about charges for bulky and/or heavy items. **Foreign orders other than above:** add \$8.00 to shipping and handling charge. If ordering large or heavy items, consult desired carrier for estimated freight charges and include with order, or contact us prior to ordering for a freight estimate. If funds included with order are inadequate to cover shipping costs, we will notify you by airmail. Postage or freight and insurance charges will be billed at actual cost on credit card orders.

PRICES. All prices are subject to change without notice. You will be notified of any change at the time of order placement, or prior to shipment on a non-stock item.

SPECIFICATIONS AND PRODUCT AVAILABILITY. Specifications and product availability are subject to change without notice. We have made every effort to be accurate in the specifications and descriptions included in this catalog, but cannot guarantee accuracy or completeness of said specifications and descriptions.

PAYMENT METHODS: For fastest shipment, VISA, MASTERCARD, AMERICAN EXPRESS, a cashier's check, certified check, or money order may be used. Personal checks are also welcome — please allow about 10 extra days for shipment. Purchase orders will be accepted from qualified institutions and firms; please inquire.

IF ORDER FORM HAS ALREADY BEEN USED, please write your order on a plain sheet of paper or order by telephone using our convenient toll-free number. If you send your order on plain paper, be sure you include your name and address, the catalog number of each item ordered, and the appropriate shipping charge. If you would like us to send you additional order forms, please write or telephone us.

WARRANTIES. All of the products offered by TENEX feature a manufacturer's warranty or guarantee. Information about the type or length of coverage of any item is available by calling or writing our Customer Service Department. Generally, warranty service on equipment can be obtained by either shipping or taking the unit to the nearest service location for that manufacturer, along with your receipt and/or other information required by the manufacturer.

Fast Delivery To Your Home

Use Your Charge Card At No Extra Charge

4/A TALK. Telecomputing, or using your modem to talk to other computers, databases, bulletin boards, etc. is a lot of fun. Unfortunately, many "terminal emulator" programs are confusing and hard to use. At last we've found a full feature communications package that is significantly easier to use than the others we have evaluated. Baud rate is adjustable from 300 to 9600, so this program will work with any

SUPERSPACE II

Is it an Editor/Assembler or a Giant Mini-Memory?

SUPERSPACE II. When we first reviewed Superspace II, an interesting new utility cartridge, we couldn't figure out what to call it. The problem was, it combined features of a number of kinds of products and offered some new ones, too. We finally decided to just describe some of the things it does and let **you** decide what you want to call it. Superspace II, first of all, incorporates an Editor/Assembler GROM, so you can do anything with it that you could do with an E/A cartridge, such as load and run Assembly Language programs. This is great if something happened to your E/A cartridge or if you have not been able to find one. (You'll have to provide your own E/A manual, see page 48, and utility disks, of course. Second, Superspace II contains a whopping 32K of battery backed-up RAM — twice the amount that the old TI Mini-Memory did. You can store your Assembly Language programs in it, and they'll stay there for as long as you want — take the cartridge out of your computer, carry it around — your program will still be there. Third, you can use the 8K of RAM as additional memory either for Assembly Language or TI BASIC programs. Superspace II comes with its own utility diskette which includes a menu loader (to create cartridge menus that display on the start-up screen), a

cartridge vacuum loader that lets you transfer non-GROM cartridges like Atarisoft and Funware to disk, Editor/Assembler utilities, and more. Requires disk system and 32K to use most functions, although once a program is stored in Superspace II it can be used on a bare console like any other cartridge. From DataBioTics. Sug. Retail \$89.95

42320 Superspace II, Cartridge & Disk **\$69.95**

SUPERSPACE. All the great features of SUPERSPACE II listed above, but with 8K of memory.

Troubleshoot Your TI 99/4A System! Peripheral Diagnostic Module

from  CorComp Inc.

PERIPHERAL DIAGNOSTIC MODULE. Until now, the TI 99/4A owner's only recourse when attempting to pinpoint a system malfunction was to find a willing friend with a similar TI system and swap out pieces . . . or send the system off, piece by piece, to various manufacturer's service centers. Not viable options for many 99/4A owners!

Now, thanks to the Peripheral Diagnostic Module from CorComp, you can do troubleshooting at home! Saves lots of time and money!

The module plugs into the cartridge slot of the 99/4A and tests the operations of the expansion cards or stand-alone units.*

The module will check the following peripherals and functions:

Disk Controller and Drive System

- Test SS, SD; SS, DD; DS, SD; DS, DD.
- Select each drive for format and test.
- Display head step settings with CorComp card.

32K Memory

—Perform bit check and data retention test on 32K memory.

RS-232 Interface

- Check Port 1 loop to Port 2 without a printer. (Requires Loop-Back Plug-included with module.)
- Check Port 1 or 2 out to printer with selectable baud rate.
- Check PIO out to parallel printer.

If you're serious about maintaining your TI 99/4A system in top-notch working condition, you'd be wise to invest in this module. 120 day manufacturer's warranty.

38412 Peripheral Diagnostic Module

ONLY \$25.95

PLEASE NOTE — If you have a 1983 version 2.2 TI 99/4A console, you'll need the CorComp '83 module adapter (see page 30) to be able to use this module.

*Compatible with TI and CorComp cards and peripherals.

Transfer Files To IBM PC With PEP

PEP. Printer Emulator Program is a utility that runs on your IBM PC and turns it into a "printer" for other computers. The PC accepts the input through its RS-232 port, and can display it on the screen, print it on a printer, and/or save it to disk. PEP will accept data at a very high rate of speed — 960 characters per second or about 50K per minute. Even lengthy lists or documents can be "printed" to the IBM PC in a snap. The new file created by the IBM PC is an ASCII file for easy manipulation by commercial or user-written software.

The uses for PEP are many. Users who have created lengthy mailing lists, word processing documents, or spreadsheets on the TI or other computers may want to transfer them to an IBM PC for use in sophisticated programs like 1-2-3, Wordstar, etc. The time saved by using PEP instead of retyping documents or data could pay for the program in just a few days, not to mention the prevention of keying errors.

Here's what you need: a computer (TI or other) with an RS-232 output, an IBM PC with at least 128K of memory (256 preferred), and an RS-232 output, DOS 2.0 or 2.1 (or higher) for the IBM, and a connecting cable. The documentation describes the cabling requirements so you may make your own or provide specifications to a cable maker. The cable listed below fits most configurations for connecting the TI 99/4A RS-232 output to the IBM PC; check with our Customer Service Department to confirm that it is the right one for your setup.

Package includes TI and IBM PC software plus complete and easy-to-use documentation. Runs on IBM PC and many compatibles. From Intelpro.

Works With Any Computer, Including TI 99/4A

From
A Happy Customer . . .

Re: "PEP" (Printer Emulation Package)
I have just transferred all my word processing files from my Texas Instruments TI 99/4A (which were done with "TI Writer") to my new AT&T 6300 Personal Computer (on which I am using "Word Perfect") using "PEP". Everything went without a single hitch, which, based upon my experience with computers, is a miracle. However, I really think it is due to the product and the manual, which is clear (amazingly so) and definitive.
This product has saved months of retyping of forms that I use daily in my law practice, for which saving of time and work both my secretary and I thank you profusely.
—Illinois

Organize Your Disks!

When you first got your disk drive, things were simple . . . you had a few program disks, maybe some data files, and you knew where everything was. Now, it's different — you have lots of disks, lots of programs, lots of files, and sometimes finding the file you haven't used in a few months takes a lengthy search. Well, the answer to your problem is at hand . . . and it's amazingly inexpensive, too!

MASTER DISK FILE. Catalog up to 1100 programs or files from up to 120 disks with this utility from Extended Software. Functions allow you to list files on screen or printer alphabetically by disk name or program name; search for disks or programs by name; update disks that have been changed — automatically replaces and updates old information; display or print total disks, total programs, individual and total sectors used and available, plus data for each diskette and each file. Supports single and double-sided disks, single and multiple disk drives, and all serial and parallel printers.

20642 Disk

\$14.95

Advanced Utility From Millers Graphics

ADVANCED DIAGNOSTICS. The ultimate disk dissector. Advanced Diagnostics does all the things you would expect a disk utility to do — read, print, or change — individual sectors, format and/or copy disks, show directories . . . and much more. Now you can look "in between" the sectors for hidden information, partially format disks, create and crack protection schemes, even check the speed of rotation of your disk drive. Compatible with TI and CorComp disk controllers plus Myarc's 256K RAM disk. Package includes comprehensive 40 page manual. Requires 32K and Extended BASIC OR Editor/Assembler OR Mini-Memory.

Tandon CORPORATION

The Greatest Disk Drive Values

All Fully TI Compatible! Best Quality!

Tandon is the world's largest manufacturer of disk drives for microcomputers. Famous for quality, their drives are designed into many of the best known business and personal computer systems. The following drive is compatible with the Texas Instruments Home Computer system.

Double-Sided, Double-Density Disk Drive — Up to 360K of Storage!

Full-height for a perfect fit! Two-sided drive offers double capacity!

This drive uses both sides of a diskette simultaneously to offer twice the capacity of a single-sided drive, offering a substantial reduction in memory cost. This drive is as simple to use as single-sided and can read programs stored on single-sided diskettes. Use double-sided diskettes for maximum capacity. (Some users use a double and a single to increase their system flexibility while minimizing total cost. For instance, when using TI-Writer or Microsoft Multi-plan, the program disk is kept in the single drive while the double drive is used for the file disk, maximizing available file space).

TANDON DOUBLE-SIDED DISK DRIVE. Bare, for installation in Peripheral Expansion Box or in box with power supply. Dimensions are identical to single-sided drive, allowing a perfect fit in the expansion box or case. Will function in double-density when used with CorComp's 9900 disk controller card, or the Myarc disk controller card.

10159 Double-Sided Disk Drive

Hardware

Cassette Recorder

CASSETTE ADAPTER. If your present cassette recorder does not operate when the cassette cable is attached, simply plug in this adapter to your recorder. It reverses the polarity of the remote control to be TI compatible. You save the cost of a new recorder.

10074 Cassette Adapter \$5.95

DUAL CASSETTE CABLE. Will connect your TI 99/4A to either one or two cassette recorders.

21186 Dual Cassette Cable \$9.95

SINGLE CASSETTE CABLE. Connects your TI 99/4A to one cassette recorder. Suitable for most needs.

15592 Single Cassette Cable \$5.95

Our Customers Speak:

"I would like to say at the very outset that I very seldom have the opportunity to write about the service that I have gotten from a mail-order company. Most are slow and the service is usually atrocious. I am, however, taking this opportunity to write about the truly outstanding service that your company has provided."

— Greensboro, N.C.

Our Customers Speak:

"Your 'Everything Book' is terrific. I found even more than I was expecting to. Your catalog deserves an A+ rating. Good job!!"

— Huron, S.D.

MICRONICS • INC

NP-10

Unmatched Performance & Price

- Draft Printing and NLO
- Great for School or Home
- One Year Warranty

NP-10. Ideal for school and home use, one of the newest printers in the Star line promises to be a best-seller due to its great features and unbeatable price! You get superb draft printing at 100 cps and it's easy to switch to crisp, precise near-letter-quality at 25 cps. Easy front panel operation allows you to change modes at the simple touch of a button. Tractor and friction feeds standard. Printing is bidirectional in draft mode and unidirectional in bit image and NLO modes. Five character sets are available in draft mode including italic and international characters, with three sets available in NLO. 2K buffer. Standard parallel interface. Full one-year warranty.

NX-10

- Faster, quieter
- 5K Buffer
- Push Tractor and Friction Feed

NX-10. The NX-10 features easy front panel operation . . . no more fumbling with dip switches to change modes and functions! With the NX-10, you simply touch a button on the control panel to select the typeface and print pitch, or to switch from draft to near-letter-quality mode. You can even set margins and align forms! Draft printing is bi-directional at 120 cps. Near-letter-quality mode prints at 30 cps with letters so crisp it's a shame to call it only "near" letter quality. The nine wire print head assures dense, readable characters, even in draft mode.

Another new feature is the Auto Paper Feed . . . it only takes a flip of the paper release level to automatically feed single sheets into the NX-10. They'll be in position and ready for printing! The big 5K buffer means your computer is free sooner for other tasks. Of course the NX-10 has that famous Star quality and state-of-the-art features such as the descenders, international character sets, IBM special and block graphic characters, and a full range of print size, column size, and character fonts.

The NX-10 has both push tractor and friction feed as well as the convenience of a clean, long-life ribbon cassette, forward and reverse paper feed and a nationwide service network. The interface is standard parallel so you can use one of the interfaces listed on opposite page.

SUPER FEATURES!
160 CPS!

FX-86E. The new FX-86E printer is an improved version of the famous FX-80. High speed operation at 160 characters per second is further enhanced by a huge **8K buffer** which greatly reduces computer "waiting time." Near-letter-quality print at 32 cps is switch selectable and features beautiful serif characters — must be seen to be appreciated. Built-in centering and justification are handy, too. New low-noise lid helps contain sound problems. The FX-86E handles 9½" paper. This printer is ideal for office use due both to its rugged construction and its outstanding performance. Use parallel interface to connect a TI 99/4A.

Suncom
Space Saving
PRINTER
STAND

PAPER TRAY

PRINTER STAND. At last a printer stand priced for homes and small offices! We've always liked the convenience and organization of an elevated printer stand — you can put your paper underneath the stand to save valuable table space and make feeding easier. The problem, up until now, has been price. Stands sold to the office market often cost \$40, \$50, \$60 or even more! These great stands from Suncom, a leader in microcomputer accessories, solve the price problem and offer features not found on models costing more than twice as much.

The stands feature **heavy-duty welded steel wire construction** and have a vinyl coating to reduce noise and vibration and provide an attractive appearance that will blend

with your computer decor. Another plus that the designers of many more expensive stands left out: our Suncom stand holds the printer at an angle that makes it much easier to see your output as it is being printed.

We use one in our office and agree that this much convenience at such a low price is real value. Available in two widths: 12" for most 80 column printers (Gemini 10X, SG-10, NX-10, etc.), and 18" for most 132 column printers (Gemini 15X, SG-15, FX-100, etc.).

33232 12" Printer Stand **Now Only \$6.95 ~~\$17.95~~**

33246 18" Printer Stand **Now Only \$12.95 ~~\$22.95~~**

(Also, see Printer Stand on page 31.)

PAPER TRAY. Once Suncom gave us an efficient, economical printer stand, they went to work on another problem... what to do with the printout that comes out of the printer and tends to spill all over the table and floor and get into a real mess? They developed the Suncom Paper Tray! The tray is of the same solid construction as the printer stand and attaches to the rear of all Suncom stands. It receives the printed paper as it comes out of the printer and helps to neatly fold and stack it. A real labor saver! **Sug. Retail \$14.95**

42091 Paper Tray **\$11.95**

Paper Tractor™

PAPER TRACTOR. Carries ordinary sheet paper through your tractor-feed printer! Simply place your letterhead, checks, invoices, forms, even legal-sized sheets into the durable flexible plastic carrier and feed into your adjustable tractor-drive printer. Works with most printers.

22084 Paper Tractor **\$11.95**

SAVE \$90!

TIED UP BY PRINT TIME?

Cut Output Time to Seconds Instead of Minutes

We were astonished when we tried out the new 64K printer buffer. We connected it between our computer and a daisywheel printer and cataloged a disk to the printer. To our amazement, the printer had just banged out the first few characters when the computer completed the task and asked for our next command. While the printer continued merrily on its way, we were able to use the computer totally independently. This was so much fun we tried it on word processing, mail lists, and other printing tasks — and were thoroughly impressed by the printer buffer's speed and versatility. Imagine printing a lengthy document in seconds instead of minutes! Think of the increase in personal productivity — while the printer is still working on one

document, you can be loading and editing the next! The printer buffer will receive print data at rates up to 8000 cps and then send it to your printer at the printer's own print rate, freeing the computer for your next job. With 64K of usable RAM, the buffer has enough memory to hold approximately 45 pages of double spaced text or numerous pages of detailed graphics. Because the printer buffer has its own power supply, it will continue to hold data even if the computer or printer is turned off, or is off line. Start saving time now! Order your 64K printer buffer today at our low price of \$59.95. The buffer works with most parallel compatible computers and printers, plotters or modems. It's easy to install... just plug it in and it goes to work!

64K Printer Buffer

ACTUAL TIME COMPARISON

	WITHOUT PRINTER BUFFER	WITH PRINTER BUFFER		
	Gemini 10X direct connect to parallel output	Computer-to-Printer Buffer	Print Time Gemini 10X (120 CPS)	Print Time SCM TP-1 (12 CPS)
1 Page Business Letter	40 sec.	4.5 sec.	28 sec.	2 min. 50 sec.
8 Page Text Document	8 min. 10 sec.	46 sec.	5 min. 43 sec.	(not tested)

Not only does the printer buffer allow the computer to become available for other use within seconds, it can even result in substantially lower print times! (All tests were run on a TI 99/4A with parallel output; results will be generally similar for other computers and printers.)

REMOTE CONTROL MONITOR/TV. If you're like many computer enthusiasts, you've got more electronic equipment than you have room for! Any piece that can do double-duty is a lifesaver. Well, take a look at our Remote Control Monitor/TV! The 13" color TV features 139 cable-ready channels, soft-touch controls, auto scan, LED display, 5-function wireless remote, audio/video input, and black matrix picture tube. It's also a composite color monitor! Hook it into your computer and you've got a super color display. Use with your computer, your VCR, or as a TV... your choice! So much versatility at this price is a real bargain. From Samsung.

Give The "Foot" The Boot!
Peripheral Extension Cable.

Have you ever knocked the heavy black peripheral box cable out of the computer at a crucial moment? Are you frustrated trying to arrange your equipment on a too-small computer table because the cumbersome "foot" sticks out too far? You'll find our Peripheral Extension Cable to be a lifesaver! One end of this highly flexible 30 inch cable plugs snugly into the expansion port on the right side of the 99/4A console; the other end connects to the 44 contact slot of the P E Box cable, or any stand-alone peripheral (such as the speech synthesizer, memory expansion, etc.). Allows you to place peripherals conveniently according to your individual set-up, and hide ugly cables, too. Customize your system set-up today!

22633 Peripheral Extension Cable **\$24.95**

PERIPHERAL EXPANDER CABLE. Similar to above, but with **two** peripheral connectors on one cable. Allows attachment of up to two separate peripheral branches.

22647 Peripheral Expander Cable **\$32.95**

Parallel Printer Cables

Guaranteed to work with the appropriate printer! Simply plug one end into the 16 pin parallel connector on TI's RS-232 Interface Card and the other end to the 36 pin "Centronics" type connector on most parallel printers. Then print away! All lengths are five feet unless noted.

PARALLEL CABLE — STANDARD. For all of the following printers with parallel inputs: Epson (all models), Star-Micronics (all models), TI, Prowriter, Gorilla, TP-II, L1000, Mannesman Talley, and many more!

10021 Five foot length **\$24.95**
22243 Ten foot length **\$34.95**

micro fal®

PARALLEL CABLE — OKIDATA. Contains interface electronics within the connector housing to adapt the 99/4A to Okidata Microline printers. Five foot length

10036 Parallel Cable **\$37.95**

IBM PC to PARALLEL CABLE. Connects the 25 pin parallel output on the Bondwell, IBM PC, TI-Pro, Compaq and most compatibles to the 36 pin input connector of any printer using the "Centronics" standard parallel input.

13009 IBM PC to Parallel Cable **\$19.95**

TI MODEM CABLE — Connects a standard modem to your TI 99/4A RS-232 interface.

34287 TI Modem Cable **\$24.95**

TI MODEM MALE/MALE CABLE.

40697 TI Modem Male/Male Cable **\$24.95**

RS-232 CABLE. For connecting the 25 pin female serial (or RS-232) port on the RS-232 Expansion Card to any RS-232 standard devices; printers with serial inputs, modems, etc. Cable is standard at a five-foot length, 25 conductors, and terminated at each end with 25 pin, male "D" connectors.

10055 RS-232 Cable **\$24.95**

PARALLEL CABLE — TP-1. Contains interface electronics within the connector housing to adapt the 99/4A to Smith Corona TP-1 printer.

10040 Parallel Cable-TP-1 **\$37.95**

"Y" CABLE. Allows use of both serial ports from the serial connector on the RS-232 Interface Card. The cable has a single 25 pin male connector going to the RS-232 Card and two 25 pin female connectors for up to two serial peripherals. Standard length is one foot for one branch of the "Y" and five feet for the other.

10069 "Y" Cable **\$49.95**

CASSETTE CABLE — DOUBLE. Connects a standard type cassette recorder with three inputs for microphone, external speaker, and remote control to your TI 99/4A. Also allows a second cassette recorder to be connected — useful when data files are to be manipulated.

21186 Double Cassette Cable **\$9.95**

CASSETTE CABLE — SINGLE. Connect your TI 99/4A to one cassette recorder. Suitable for most needs.

15592 Single Cassette Cable **\$5.95**

MONITOR CABLE-COMPOSITE. Interface your TI 99/4A to any composite monitor. DIN connector plugs into computer, and RCA type plugs connect to monitor. Includes earphone plug adapter to connect to monitors with earphone-type audio plug.

37424 Composite Monitor Cable **\$7.95**

Cassette Adapter

If your present cassette recorder's tape drive isn't turned on and off when connected to your 99/4A, it's probably because the polarity of the remote control is wrong. Simply plug in our adapter to your recorder's remote jack and then plug in your cassette cable. It's a lot cheaper than a new cassette recorder — guaranteed.

10074 Cassette Adapter **\$5.95**

X-10 POWERHOUSE™
NUMBER ONE IN HOME CONTROL

SAVE
OVER \$85!

HOME AUTOMATION IS HERE!

- SECURITY • ENERGY SAVINGS • CONVENIENCE
- DOESN'T TIE UP THE COMPUTER!

X-10 POWERHOUSE. The world's leading maker of home control devices has just introduced a revolutionary new product line called X-10 POWERHOUSE. With your TI 99/4A computer, you can program lights and appliances to turn on and off, control your thermostat, and much more. The POWERHOUSE can wake you to stereo music or TV news, light up your bedroom, hallway, and bathroom; start the coffee, turn up the heat, warm up the curlers . . . all before you are even out of bed! But it is smart enough not to wake you up on weekends.

At night, it can lower the heat, turn off the Tonight Show, and first dim and later turn out the lights. The user-friendly POWERHOUSE software lets you first "set up" your house. You move "icons" (pictures of lights and appliances) into each room. The on-screen software shows you how to set a module for each light and appliance to be controlled.

After you have set up your house, you can enter the operating mode to actually set the times for individual lights or appliances to turn on or off. You can also set the days of week for the action to take place.

You can even program the brightness level of a light.

Once you have established the program, you can disconnect the computer — POWERHOUSE system will control your home independently. It even has a battery backup (9V battery not included) that will keep the system from forgetting your program if the power fails. (Battery life is approximately 100 hours.) Up to 128 timer events can be set and 256 icons can be placed in your software "house." Up to 256 lamps and appliances can be controlled using X-10 type modules. Start putting your computer to work to improve your lifestyle — invest in an X-10 POWERHOUSE and enter the age of electronic living!

HEAVY DUTY 220V 20A APPLIANCE MODULE. Similar to above item, but for use where 20 Amp capacity is needed.

43711 HD 220V, 20A Appliance Module

\$24.95

X-10 Modules and Devices

X-10 offers a wide selection of plug-in modules and wiring devices to make connecting any kind of lamp or appliance easy. Standard lamp and appliance modules plug into the wall between the existing outlet and the lamp or appliance. Wall switch modules are used for switch controlled lights (incandescent only) and replace the existing wall switch. Wall receptacle replaces standard outlet. The best news is that they are economical enough to let you set up your whole house without getting a new mortgage! **These modules are compatible with X-10, BSR, General Electric, Sears, Radio Shack, Heath, Leviton, Genesis, and any other controller that calls for BSR or X-10 modules.**

LAMP MODULE. Plug-in module lets you turn lamp on, off, or "dim" the lamp. Responds to DIM, BRIGHT, and ALL LIGHTS ON signals. Due to dimming capability, do not use for appliances or fluorescent lights. 400-500 Watt capability.

37001 Lamp Module Sug. Retail \$20.00

\$13.95

2-PIN APPLIANCE MODULE. Plug-in module lets you turn appliances or fluorescent lights with standard two pin plug on and off. 400-500 Watt capability.

37016 2-Pin Appliance Module Sug. Retail \$20.00

\$13.95

3-PIN APPLIANCE MODULE. Plug-in module for appliances or fluorescent lights with three prong grounded plug. 400-500 Watt capacity.

29605 3-Pin Appliance Module Sug. Retail \$22.50

\$19.95

WALL SWITCH MODULE. Installs in place of a standard wall switch to let you control ceiling or other incandescent lamps. Use push-button control on the switch module for manual operation, or control using X-10 system. Responds to DIM, BRIGHT, and ALL LIGHTS ON signals. Do not use for appliances or fluorescent lights. 500 Watt capability.

37020 Wall Switch Module Sug. Retail \$20.00

\$13.95

THREE-WAY WALL SWITCH MODULE SET. Similar to regular wall switch module, but for use where two or more switches operate one fixture. Set includes one three-way wall switch module plus one push-button companion switch — enough for a normal two-switch installation. 500 Watt capability.

43689 3-Way Wall Switch Set Sug. Retail \$24.99

\$19.95

COMPANION SWITCH. For use with Three-Way Wall Switch Set when three or more switches control a single lamp. Push-button style switch replaces regular wall switch. 500 Watt capability.

43694 Companion Switch Sug. Retail \$8.00

\$6.95

WALL RECEPTACLE MODULE. Replaces a standard two-outlet wall receptacle for control of incandescent lamps, fluorescent lights, or appliances. One outlet is controlled, one is normal. Includes custom wall plate. 400-500 Watt capability.

37035 Wall Receptacle with Custom Wall Plate Sug. Retail \$24.99

\$19.95

X-10 POWERHOUSE™

NUMBER ONE IN HOME CONTROL

Use these controllers either by themselves or with your POWERHOUSE to maximize your control over your environment. Since there is no permanent wiring connecting the controllers and the control modules, you can mix and match multiple control devices. For instance, if you were using a POWERHOUSE or Timer Console as your main controller, you could also install Mini Controllers in several rooms as well as have a pocketable RF remote controller to carry around.

TIMER CONSOLE. If you don't have a computer, this unit can be the centerpiece of your X-10 home control system. It automatically turns lights and appliances on and off at the time you want. Special feature keys include: DAILY, ONCE, SECURITY, SLEEP, NOW, ALL LIGHTS ON, ALL LIGHTS OFF, and CLEAR. Battery backup prevents memory loss. (4 AA batteries not included.)

43622 X-10 Timer Console \$29.95

MINI CONTROLLER. A super-handy add-on for your X-10 control system. Instantly control up to four lights and appliances throughout the house with the push of a button. Great by the side of your bed — if you hear a noise, turn on your outside and hall lights without getting up. Or use it to control room lighting from the comfort of your easy chair. Features include DIM, BRIGHT, ALL LIGHTS ON, and ALL UNITS OFF buttons.

43637 X-10 Mini Controller \$9.95

MAXI CONTROLLER. If you like the idea of instant control but the Mini Controller's four devices aren't enough, try the new X-10 Maxi Controller! It lets you control up to **sixteen** lamps and appliances. Dim the bedside lamp, turn on the TV from bed, start the coffee from your bedroom before you take your morning shower... think of your own little luxuries. Includes DIM, BRIGHT, ALL LIGHTS ON and ALL UNITS OFF buttons. If you have a Thermostat Set-back Controller, you can even use the Maxi Controller to turn down central heating or air conditioning when you go to bed and turn it back up in the morning.

43641 X-10 Maxi Controller \$19.95
Sug. Retail \$24.95

RADIO HOME CONTROL SYSTEM. If you hate to be tied down by wires or cords, try the latest in X-10 technology — a wireless remote that lets you control up to eight lamps or appliances from anywhere in your house, or even from outside. Put the transmitter in your car and you'll never enter a dark house again! Set includes wireless remote plus transceiver/module unit. Add up to seven additional X-10 modules to control eight total devices with fingertip ease. Add a second transmitter so you can keep one in the house and one in the car. Sug. Retail \$49.95

43656 X-10 Radio Home Control System \$39.95

RADIO TRANSMITTER. Add any number of additional transmitters to your X-10 Radio Home Control System. Sug. Retail \$19.99

43660 X-10 Radio Transmitter \$15.95

BURGLAR ALARM INTERFACE/CONTROLLER. While most X-10 controllers do not offer the option of automatic input or monitoring, the X-10 Burglar Alarm Interface Controller is the exception; it is activated when your burglar alarm system (not included) is set off. It will respond in one of three ways. The first mode turns all lights on plus a selected appliance module on. You could activate a siren with this, turn a stereo or TV on to confuse or frighten an intruder, or even start a recorder with a taped message. The second mode **flashes** all lights — this will really attract the attention of your neighbors and will make it easy for the police or fire department to locate your house. The third mode simply turns all lights on. We haven't tried this, but it would seem possible to set up a crude security system with just this device. By using the on/off input, you might be able to wire up one or several on/off sensors — say, a motion detector or smoke detector. Let us know if you try this and it works.

43675 X-10 Burglar Alarm Interface/Controller \$32.95

Cartridge Expander

SAVE YOUR COMPUTER!

- Don't Wear Out Your Console and Cartridges!
- Avoid Overheating!
- Includes Instant Reset Button!

CARTRIDGE EXPANDER. Are you constantly plugging in and pulling out cartridges? The constant wiping action on the contacts can eventually wear them out. The Navarone Cartridge Expander, featuring **three** cartridge slots, helps you avoid costly repair bills in two ways. First, you will **immediately** stop wearing out the contacts in your computer; you'll never have to insert a cartridge directly into the computer again! Second, you can keep your most commonly used cartridges (say, Extended BASIC and TI-Writer, or your favorite games) parked permanently in the expander — this will reduce wear on the cartridges by 90 percent or more.

Also very useful is the reset button that lets you initialize the computer without the console on/off switch. Do you use your computer frequently? Do your kids switch cartridges numerous times in a single play or learning session? If so, invest in this inexpensive protection for your computer and software. Great for schools and other high use locations, too. This small investment can save big dollars in hardware and software! Orig. Sug. Retail \$39.95
13329 Cartridge Expander **Now Only \$24.95**

Outlet Strips/Surge Suppressors

PROGRAMS FOR THE TI HOME COMPUTER. At last, here is a book of programs written especially for users of the popular Texas Instruments 99/4 and 99/4A Home Computers. Fifty unique programs in TI BASIC and Extended BASIC are presented in an easy-to-read format, ready for you to type into your computer and use. Most of the programs are listed in TI BASIC and may be used with just the console and a cassette recorder, while others take advantage of the special capabilities of optional modules and peripheral equipment, such as Extended BASIC, Mini-Memory, Terminal Emulator II, and TI Speech Synthesizer, a printer or the disk system. A wide variety of programs for home applications are featured, including games and entertainment, educational programs, programming aids, and more. Best of all, this volume offers programs that highlight the many unique features of the TI Home Computer, such as color graphics, music, sound or speech. Whether you are a beginner or an experienced TI Home Computer user, you will find this collection to be an entertaining and useful addition to your program library. 128 pages, soft cover. From Steve Davis Publishing.

THE HACKER'S HANDBOOK: AN INSIDER'S GUIDE TO MODEMS AND TELECOMPUTING. Have you always wondered how the "hackers" do it? This book will satisfy your curiosity. Filled with the How-To's of passwords protocols, access codes, operating systems, phones, programming, and identifying and analyzing signals. Famous "Salami," "Trap Door," and "Trojan Horse" techniques are explained. The 169 jam-packed pages include charts, tables, lists of Hacker Bulletin Boards ... plus much more! If you run a bulletin board or have an interest in telecomputing security, you'll find THE HACKER'S HANDBOOK to be a treasure-trove of information. From E. Arthur Brown Company.

42419 Book \$12.95

33 PROGRAMS FOR THE TI 99/4A. Contains something for everyone: chapters on games ("Rings and Poles"), money management ("IRA Planner"), business ("Internal Rate of Return"), simple statistics ("Mean, Variance, and Standard Deviation"), and more. A wide variety of applications software, plus games. Thirty-three ready-to-type-in programs at a low cost. 199 pages, split wire bound. Requires Extended BASIC.

32929 Book \$11.50

EXTENDED BASIC MANUAL. This is the same manual included with the MicroPal Extended BASIC cartridge. Explains all Extended BASIC functions and commands. Softbound, 240 pages. Book only.

33177 Book \$8.95

TI INTERN. This book became an instant best-seller when released in Germany in spite of its forbidding title: **TI99/4A INTERN: THE OPERATING SYSTEM OF THE TI 99/4A ROM AND GROM LISTING WITH COMMENTARY AND DIRECTIONS FOR GPL.** This book's line by line listing and commentary is a delight for any hacker and a must for serious Assembly Language programmers. The most detailed, explicit, and informative document ever written about the secrets of the ROM and GROM chips in the TI 99/4A. Available in English from TENEX Computer Express! Softbound.

41510 Book \$17.95

CREATING ARCADE GAMES ON THE TI 99/4A. Use this step-by-step guide to design and write your own action games. Covers creating custom characters and moving them around the screen, vertical and horizontal scrolling of the screen, color, animation, sound effects, and how to test and debug a game. Includes eight complete games for you to type in and play. A valuable resource for writing action-packed video games. 200 pages, spiral bound. From Computer!

31519 Book \$11.50

TI 99/4A TECHNICAL DATA MANUAL. A useful aid for the technically inclined user or tinkerer.

15905 Book \$14.95

PERIPHERAL EXPANSION BOX MANUAL. Learn about the inner workings of your Peripheral Expansion Box. This is a great manual for technically inclined hackers who enjoy knowing how equipment operates. Includes all text in Tech Data Manual listed above. From TI Staff.

"The book is written in a friendly style and is a pleasure to read . . . I would recommend this one over all the other Assembly Language books to the novice programmer or hobbyist. Rated 'AAAAA.'"

— *Micropendium*

INTRODUCTION TO ASSEMBLY LANGUAGE FOR THE TI HOME COMPUTER. This introductory text offers step-by-step instruction in getting started with the powerful TMS9900 Assembly Language for the Texas Instruments Home Computer. It is written to meet the needs of the beginner with knowledge of TI BASIC who wishes to unlock the vast potential and speed of this popular 16-bit computer. This is an easy-to-read tutorial presenting simple-to-follow progressive steps from Assembly Language basics to the design and coding of useful programs and sub-routines. Comparisons to TI BASIC statements help to teach you TMS9900 Assembly by building on your BASIC programming skills. Sample programs that can be entered with the TI Editor/Assembler or Mini-Memory modules are included and explained in detail. Charts, tables, and diagrams aid you in understanding and are useful for future reference. Whether you wish to learn to write complete programs in TMS9900 Assembly Language or if you want to incorporate Assembly routines into your TI BASIC and Extended BASIC programs, or even if you just wish to acquire a better understanding of how your TI Home Computer works, this book will help you. By Ralph Molesworth.

THE 39¢ DISKETTE

MicroPal Diskettes are one of the best-selling items in our catalogs (we've sold literally hundreds of thousands of these diskettes!). They are an excellent buy in our quantities of 50, and their reliability, lifetime warranty and risk-free trial mean you are sure you get your money's worth!

Here's What You Get

Diskettes are packaged in boxes of 50. Each box includes diskettes in sleeves, labels and write-protect tabs. All diskettes have hub reinforcement ring and write-protect notch.

Certified Quality

MicroPal Diskettes are first quality, prime diskettes (no seconds). Each one is individually certified to be 100 percent error free at levels equal to or above ANSI, ECMA and ISO standards.

Lifetime Warranty Plus Risk Free Trial!

We offer a double guarantee of satisfaction:

- 1) All diskettes are backed by a lifetime warranty. If you ever have a problem, we'll replace the diskette.
- 2) To let you discover what a great value these diskettes really are we'll let you try them risk free. Buy a box. If within 30 days you aren't happy with the diskettes for any reason, return them to us for a prompt refund. No questions asked!

Part No.	Description	Box Of 50

Happy customers are our business.

"How can one use 105 keys? Very easily..." *MICROpendium*, December 86

RAVE 99 Introduces:

MODEL 99/105 KEYBOARD ENHANCEMENT

First Keyboard Upgrade For TI 99/4A! Streamlines Operation!

If you could change just one thing about your TI 99/4A, what would it be? The keyboard, right? While the 4A is truly a great machine, its small and awkward keyboard is enough to drive both frequent and occasional users to distraction. You have to depress the function key, for instance, to use such common features as the cursor arrows and frequently used punctuation marks.

Now, five years after the TI 99/4A burst onto the computer scene, there is a solution to its keyboard limitations.

Your new Rave 99 Keyboard Enhancement will let you do everything you ever did on your TI 99/4A, only much easier! Get full-featured key layout with 105 keys and separate number pad PLUS these additional great features:

- Four separate CURSOR keys allow cursor control with a single key press.
- An ALPHA LOCK key, which does not interfere with joystick operations, makes graphics programs much friendlier.
- 4 distinct modes of operation means one key inputs for TI-Writer, Multi-plan, and Editor/Assembler commands.

Your word processing and spreadsheets never had it so good. Treat your fingers to the pleasures which until now were only available on those "other" computers. Install your new 99/105 with just a screwdriver and the easy-to-follow instructions, no soldering necessary.

68425 Model 99/105 Keyboard Enhancement \$199.95
