

The makers of TI Artist are proud to introduce the most powerful and comprehensive graphics development system available for the TI-99/4a Home Computer...

TI Artist Plus!

More than just an ordinary drawing package, TI Artist PLUS! is a complete drawing system that consists of six dynamic graphics development modules. With these modules, virtually anyone can create, edit, transform, and present the most dazzling of graphics. And with its innovative point-and-shoot menu system, TI Artist PLUS! is extremely user friendly.

Drawing Module

With 8 different brushes, 10 fill patterns, and 16 available colors, almost any picture can be created using TI Artist's drawing tools. Freehand drawing, automatic point-to-point lines, shooting rays, boxing, circling, filling, mirroring, zooming, and spray painting are all a snap! Variable arcs and ellipses can also be drawn with ease. Any picture you design may be saved to disk and later recalled for viewing and modification.

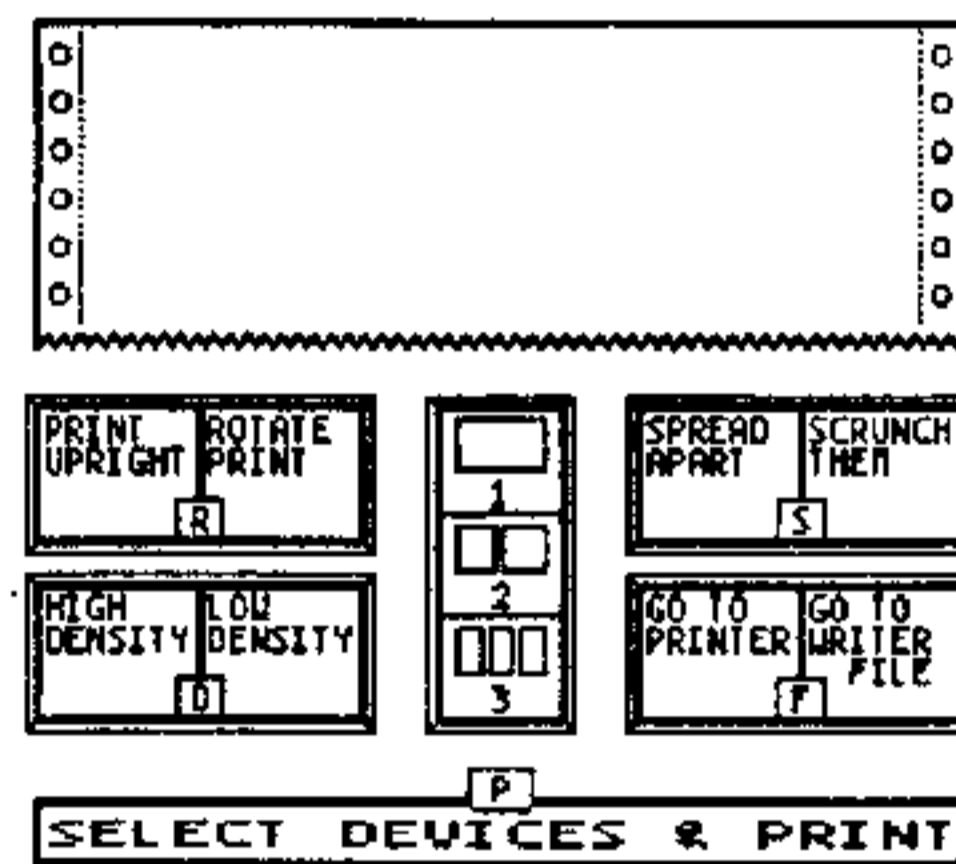

Enhancement Module

Cutting, pasting, copying, importing and exporting graphics is easy with TI Artist PLUS!. Small images, called instances, and collections of small images, called slides, may be used to enhance your artwork. Instances and slides can be created, saved to disk, and used over and over again in all of your drawings. And if you wish, you could also purchase small collections of various (pre-drawn) graphics artwork to use.

Only \$24.95

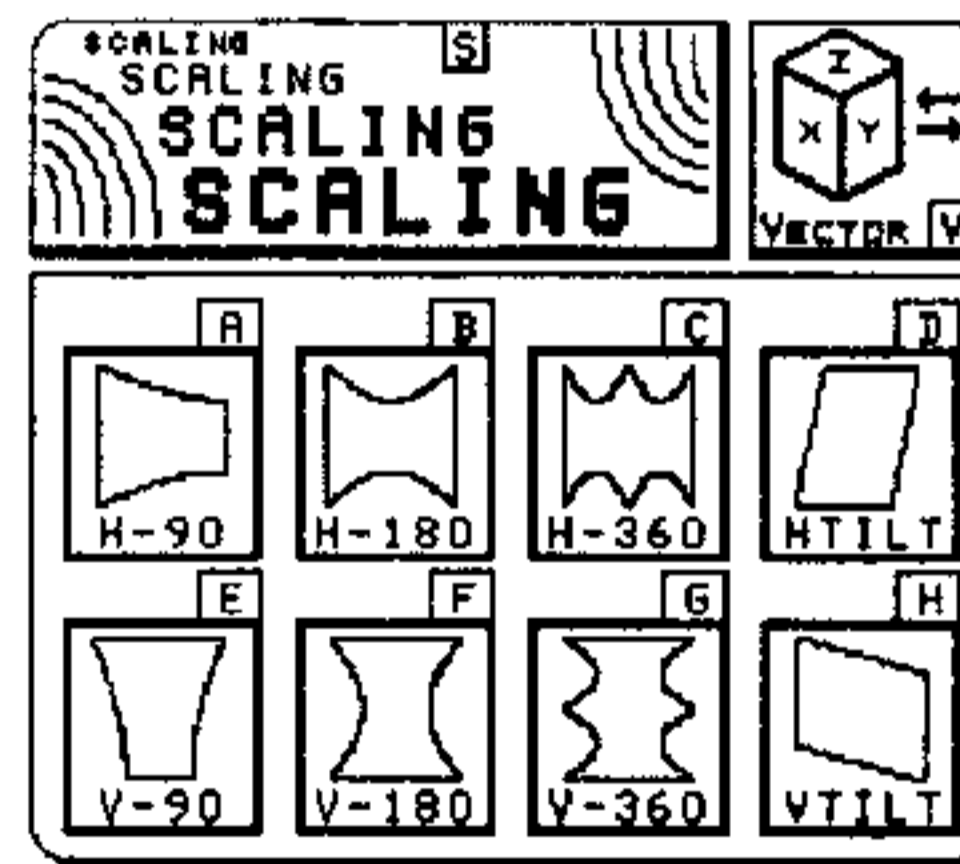

Print Module

With TI Artist PLUS! 1 to 3 pictures can be simultaneously printed together (or separated) across a standard 8.5" x 11" sheet of paper. Print options include: printing in portrait or landscape mode, printing in high or low density, redirecting output to a disk file, printing an outline around a picture, and printing a reverse image of a picture. TI Artist PLUS! supports most popular printers and a limited number of color printers.

Vector Module

Selected areas of a picture can be scaled using TI Artist PLUS!. With scaling, a section of your picture can be made larger or smaller; the height and width of an object can be varied independently. Special effects can also be used to enhance selected areas of a picture. They allow the horizontal and vertical parts of an image to be scaled along a range. Objects can be tilted and shifted using various pre-defined special effects.

Font Module

The font module is used to place alphanumeric data anywhere within a picture. Detailed bit-mapped fonts (available in numerous Artist Companion products) may be used to label a drawing, create a sign, and so on. Features available in the font module include: multiline text editing, automatic outlining of fonts, automatic shadowing of fonts, and automatic left, right and center text positioning.

Movie Module

Animated movie sequences can be produced with TI Artist PLUS!. A small interpreted command language allows you to design an animated sequence using your own pictures and artwork. The command language consists of 8 simple instructions, including a handy Indexing command that will display a directory of all your TI Artist files. Movies may be saved to and later played from disk.

Upgrade to TI Artist PLUS!

Owners of the original TI Artist may obtain TI Artist PLUS! for only \$14.95 (plus shipping). To be eligible for the reduced rate, return your original TI Artist disk and the front page of your existing TI Artist manual along with the upgrade fee.

And here's the best feature of TI Artist PLUS! ... its low price! For only \$24.95 (plus shipping) you get both TI Artist PLUS! program disks and a comprehensive 43 page users guide. TI Artist PLUS! requires a disk system, 32K, and either an Extended Basic, Editor/Assembler, or Mini Memory cartridge. TI Artist PLUS! is compatible with the Geneve 9640 (in GPL mode), and the Myarc hard disk controller. TI Artist PLUS! supports the following printers: Epson, Prowriter, IBM Graphics Printer, Seikosha GP-100/100TI/550/700, Okidata 92/93, Star NX-1000 Rainbow, Canon PJ1080A, and Tandy CGP220. TI Artist may also be configured by the user to operate with most printers that support 8-bit graphics.

Artist's Companions

TI Artist is by far the #1 selling and supported graphics drawing package available for the TI-99/4a and Geneve 9640. The Artist's Companion Series, a growing collection of fonts, clip-art, pictures, borders, scenes, and vectors, help users exploit the full potential of TI Artist without being a true artist. Each Artist's Companion contains a unique collection of graphics that will appeal to almost everyone. All Artist's Companions require either TI Artist (V2.0 or later), TI Artist PLUS!, or another compatible graphics package.

ARTIST'S COMPANION #1

The original Artist's Companion that started it all! A huge 5 disk set, Artist's Companion #1 is the perfect "starter companion" for all TI Artist users. It consists of 25 fonts, 160 small instances (pictures), and 30 large instances. Each graphic can be added to your existing pictures and altered to suit your needs. **Only \$17.95 PLUS! Extensions are available for \$1.95**

ARTIST'S COMPANION #2

The second in the Artist's Companion Series, this package includes 13 fonts and 60 small instances (pictures). Also included is Artist's Connection, a powerful program generator that allows TI Artist instances to be used in Basic and Extended Basic programs. Fantastic graphics and a powerful program, what more could you ask for? Two disk set. **Only \$9.95 PLUS! Extensions are available for \$1.95**

ARTIST'S COMPANION #3

In the continuing series, this Artist's Companion keeps the spirit alive. This 2 disk set is packed with 16 fonts and 66 small instances. Several of the fonts are extraordinary... combining type and graphics, Film, Banner, and Fast are some of the best fonts you'll ever see. **Only \$9.95 PLUS! extensions are available for \$1.95**

ARTIST'S COMPANION #4

A spectacular two disk package, Artist's Companion #4 is the perfect addition to any graphics library. It includes 15 outrageous fonts and 15 small instances. Alexia, Ardeco, Ornament, and Cameo are truly fantastic fonts. There's even a great drawing of the famous TI-99/4a console. **Only \$9.95 PLUS! Extensions are available for \$3.75**

ARTIST'S COMPANION #5

A two disk set loaded with fantastic artwork! Several of the fonts included with this companion are exceptional... Barcode, Bloc, Pudgley, Super, and Western. There's even a font made up of assorted small pictures. Some logos, a Goofy Pilot, and small shuttle are among the instances included. Artist's Companion #5 consists of 16 fonts, 8 small instances, and 3 large instances. **Only \$9.95 PLUS! Extensions are available for \$2.95**

ARTIST'S COMPANION #6

Many exciting fonts and instances are packed into this popular two disk set. Of the instances, you'll love the UK Cat, peripheral expansion box, biplanes, TI color monitor and mouse. Gatsby, Music, Orient, Stacked, and Times are some of the fonts included that go beyond the imagination. This companion consists of 14 fonts, 17 small instances, and 6 large instances. **Only \$9.95 PLUS! Extensions are available for \$2.95**

Super Companion Savers!

Order any two Companions for only \$17.90

Any three for \$26.00! Any five for \$40.00!

(Artist's Companion #1 excluded)

ARTIST'S COMPANION #7

Artwork you always dreamed about... in a big two disk package. This companion sports 10 fonts, 13 large instances, and 46 small ones. Of the fonts, Haf-n-Haf, Rounded, and 3D Slant are sure to catch your eye. Scroll is one of those extraordinary fonts, composed of both text and graphics. Bears, stars, phones, and tools are among the many instances. **Only \$9.95**

ARTIST'S COMPANION #8

Two disks loaded with 12 fonts, 38 instances, and 5 borders. Billboard, Diamond, and Candy Cane are among the borders included in this companion. The fonts are sensational, and include scripted Bombay, strong Moon, Christmas wreath, festive July. Instances range from lovable animals to evil Klingon warships. **Only \$9.95**

Artist Companion Borders

New to the Artist's Companion Series is the addition of predefined and versatile "font" borders. Using these borders, you can enclosed or showcase graphics and text within your drawings. The borders are fun, easy-to-use, and can be "built" to fit in and around almost anything. Borders are only available in certain Artist's Companion packages (see listings).

Rapid Copy

Are you tired of waiting for your disk manager to copy or format disks? If so, try Rapid Copy, the only turbo copier designed to take full advantage of the Myarc, CorComp and TI disk controller cards. Rapid Copy is lightning fast; it will copy a full double-sided double-density disk in only 1 minute and 17 seconds... and that includes formatting the target disk! On average, Rapid Copy is six times faster than the disk copy and format functions of the Myarc, CorComp, and DM1000 disk managers. Rapid Copy is simple to use and fully menu driven. Requires: 32K, disk system, and either and Extended Basic, Editor/Assembler, or TI Writer command module. *Rapid Copy is not compatible with the Geneve 9640.* Only \$14.95

XB DETECTIVE

If you develop, alter, or debug Basic or Extended Basic programs, XB Detective is for you! This powerful utility works transparently in the Extended Basic environment, and is instantly accessed by a "hot key" without disrupting your program in memory. Fully menu driven, XB Detective lets you:

- **list variables:** complete list of program variables
- **find reserved words:** locates line positions
- **find variables:** locates variable positions
- **delete blocks of lines:** in a single sweep!
- **find strings:** find any text string in your program

Requires: 32K, disk system, and Extended Basic. Only \$7.95

CSGD User Disks

Each CSGD User Disk contains a unique collection of fonts and graphics which can be used with any CSGD program. Other graphics programs may have the ability to use these CSGD fonts and graphics (check with your program's documentation). Please specify printer type (Epson or Prowriter) when ordering any CSGD software.

CSGD USER DISK #1

A single disk package, and the first of the User Disk Series, contains 7 fonts, 3 small graphics, and 1 large graphic. Only \$4.95

CSGD USER DISK #2

A two disk package containing 22 fonts, 86 small graphics, and 26 large graphics (remember, large graphics are only for CSGD I). Only \$10.95

CSGD USER DISK #4

A two disk package containing 16 fonts, 9 small graphics, 26 large graphics, and 52 monograms (small graphics). Only \$10.95

Super User Disk Savers!

Order any two CSGD User Disks for only \$19.50! Any three for \$28.00!
(CSGD User Disk #1 excluded from this offer)

CSGD USER DISK #5

A two disk package containing 18 fonts, 8 small fonts for CSGD III, 24 small graphics, and 15 large graphics. Only \$10.95

CSGD USER DISK #6

A two disk package containing 17 fonts, 18 small graphics, 13 large graphics, and 26 monograms (small graphics). Only \$10.95

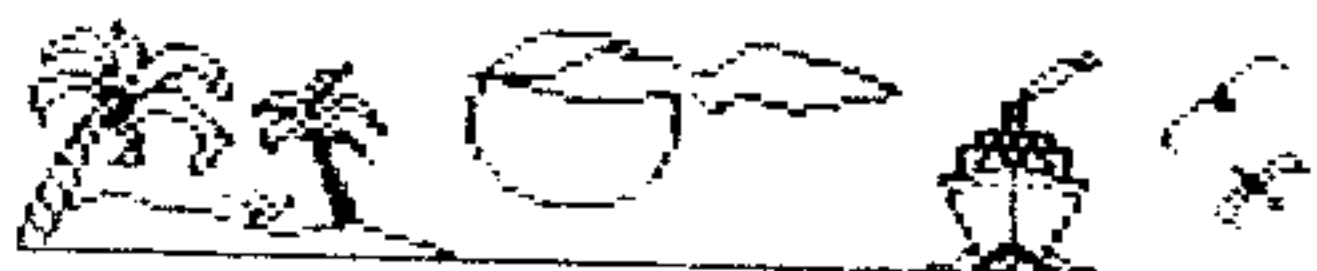

FONTS - AND -

GRAPHICS

CSGD USER DISK #3

A two disk package containing 12 fonts, 127 small graphics, and 27 large graphics. Only \$10.95

CSGD USER DISK #7

A two disk package containing 11 fonts, 108 small graphics, and 34 large graphics. *Epson only.* Only \$10.95

ORDERING INFORMATION

Placing Your Order

Orders may be placed by mail or by phone. When placing an order by mail, please be sure to include the following:

- A brief description and price of the items being ordered.
- The address where the order is to be shipped.
- Payment including proper shipping charges (foreign orders must be paid in U.S. funds drawn on a U.S. bank; International and Postal Money Orders are preferred forms of payment for foreign orders). Sorry, credit card orders are not accepted at this time.

Send Your Order Directly To:

Texaments

53 Center Street, Patchogue NY 11772

Office: (516)475-3480 BBS: (516)475-6463

Since we do not accept credit cards, all phone orders will be shipped on a C.O.D. basis only. C.O.D. orders will be shipped via UPS, and a \$3.00 service charge will be added to your order.

Return Policy

Returns. Defective merchandise may be returned for replacement within 15 days of receipt. Items returned for replacement must include original packing materials and any manuals, cables, warranty cards, etc. included in the original package. Please call or write our customer service department for a Return Authorization number prior to returning any items to Texaments. All returns must be shipped freight prepaid. All items are subject to inspection and acceptance by Texaments prior to issuance of replacement merchandise.

Warranties. All items in this catalog not manufactured by Texaments are only covered by their respective manufacturers' warranties. Please contact those manufacturers for both warranty and non-warranty repair service.

Shipping Charges

For domestic and Canadian delivery, please add the following shipping charges to your order (an additional \$5.00 per non-software item must be added to orders shipped to a Canadian destination):

- Software: add \$2.50 per order.
- Hardware: add \$4.50 per item.
- Myarc HFDC: add \$6.50 per unit.
- Myarc Geneve 9640: add \$10.00 per unit.

All orders delivered within the United States will be shipped by First Class Mail or UPS Ground Service. Orders delivered to Canada will be shipped by Air Mail. Overnight and second day delivery service is available, please contact our office for details. All shipments are insured for your protection.

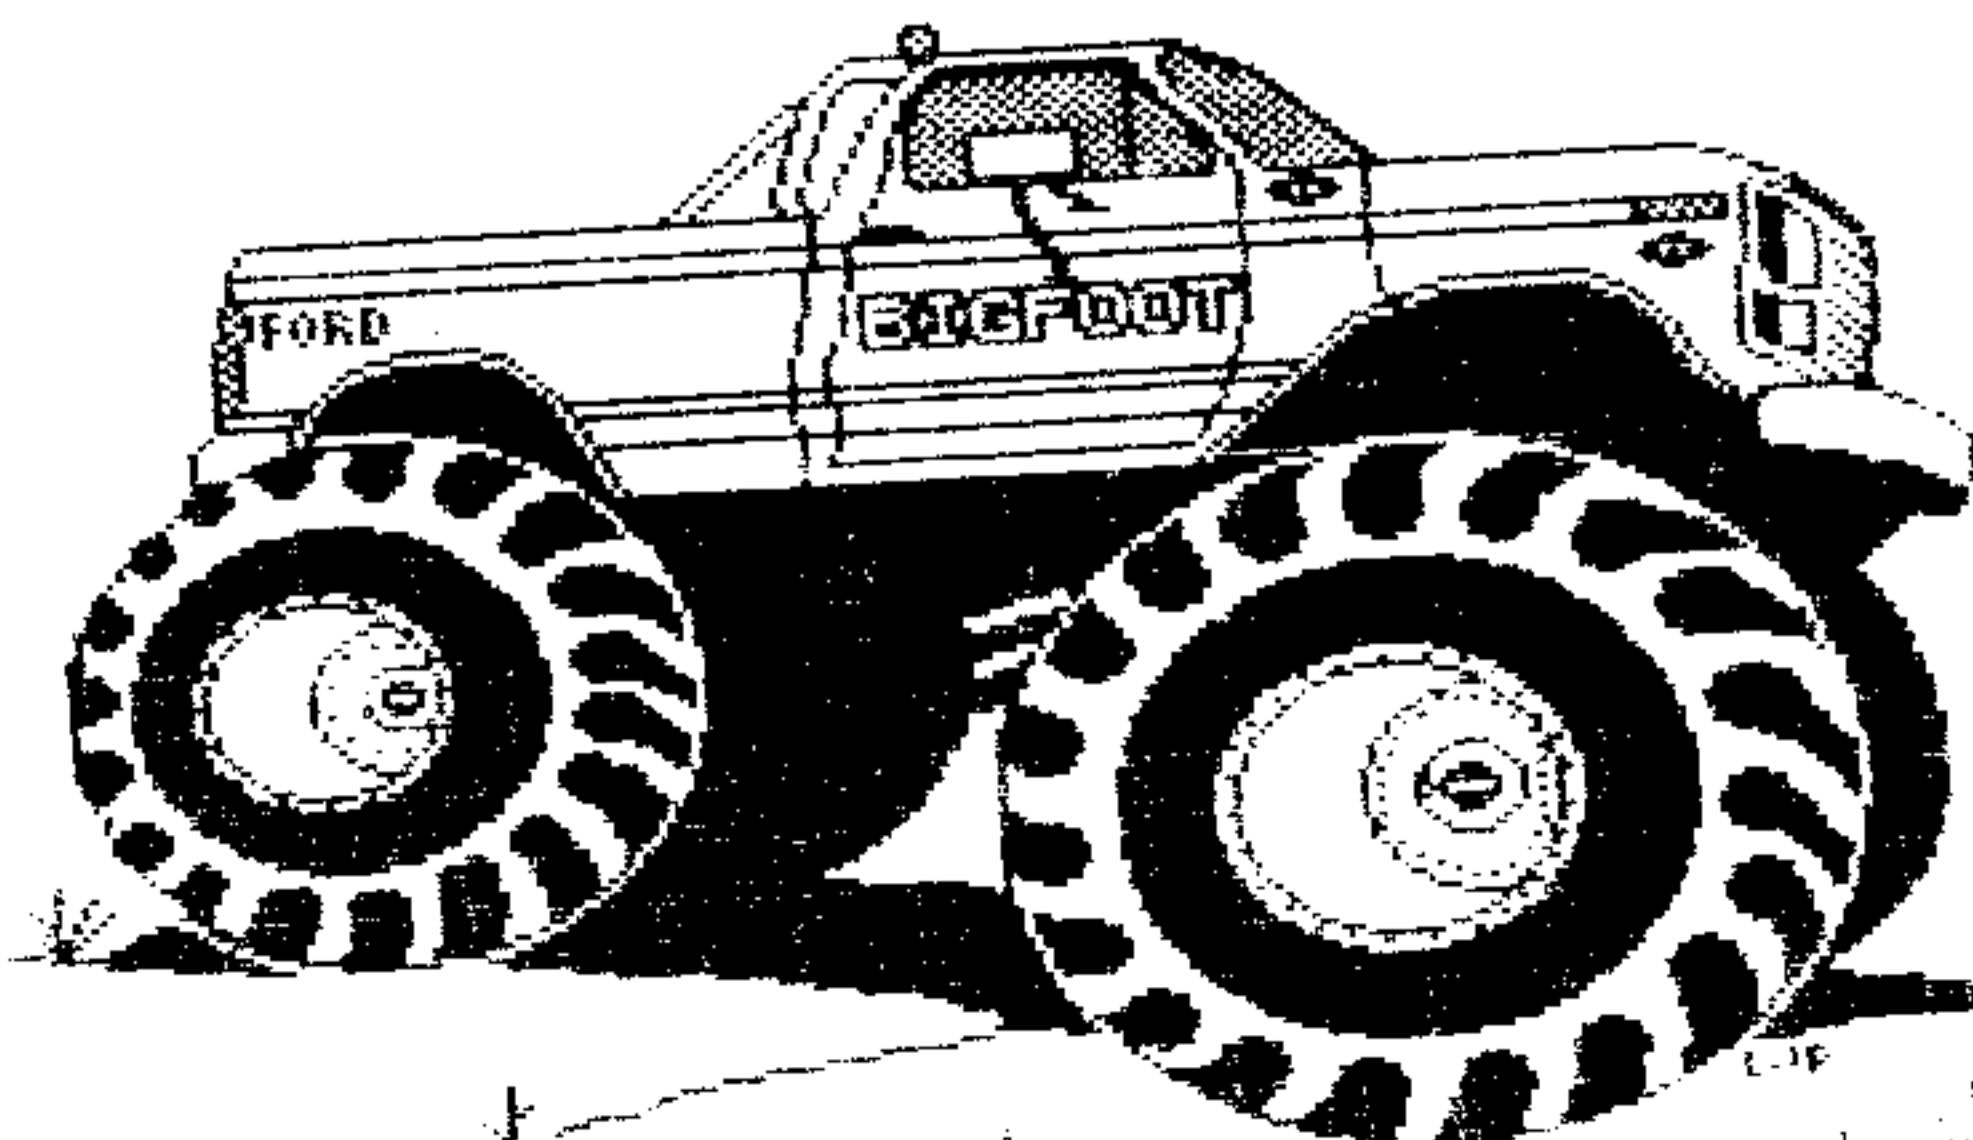

For orders shipped outside of the United States (excluding Canada), please add the following delivery charges to your order:

- Software: add \$8.00 per order.
- Hardware: add \$18.00 per item.
- Myarc HFDC: add \$30.00 per unit.
- Myarc Geneve 9640: add \$70.00 per unit.

All orders delivered outside of the United States will be shipped via International Air Mail. Unless otherwise requested in writing, all shipments to foreign destinations will be insured for their full value. Other methods of shipment may be available, please contact our office for details.

Prices, specifications, and availability of all products listed in this catalog are subject to change without notice.

New Software Inside!

TI Artist PLUS!
New Artist's Companions
TI Base Version 2.0
TI Sort
MICROdex for TI Base
Plus More!

Artist Software

There are a wide range of products that support and enhance the versatility of TI Artist. Designer Labels, Display Master, The Starfleet Technical Drawings, and the Designer Labels Companions are just a few of them. And as more TI Artist related software becomes available (and we're always looking for more!), you'll see it here first. *If you have designed artwork for TI Artist, or developed any utilities to be used in conjunction with TI Artist, we want to hear from you! Call or write our office for information on how Texaments can help market your software.*

ARTIST'S COMPANION #9

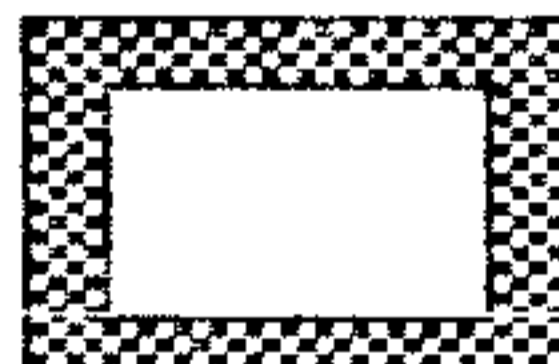

An outstanding package filled with 14 fonts, 25 small instances, and 5 large instances. The instances are an even mix of different drawings that will appeal to everyone. Fonts range from Cubes to Christmas Balls! Some of the fancy borders included are Chain, Framed, and Boxed. Quite an array of artwork neatly arranged in one package. **Only \$9.95**

PLUS! Companion Extensions

Due to the memory limitations of earlier versions of TI Artist, many of the fonts included in various Artist's Companions do not include lower case letters, numbers, or punctuation. New PLUS! Extensions are now available that add some of these missing characters to their original fonts. Please note that PLUS! Extensions do not complete every font, nor every font in its entirety, included with each Artist's Companion.

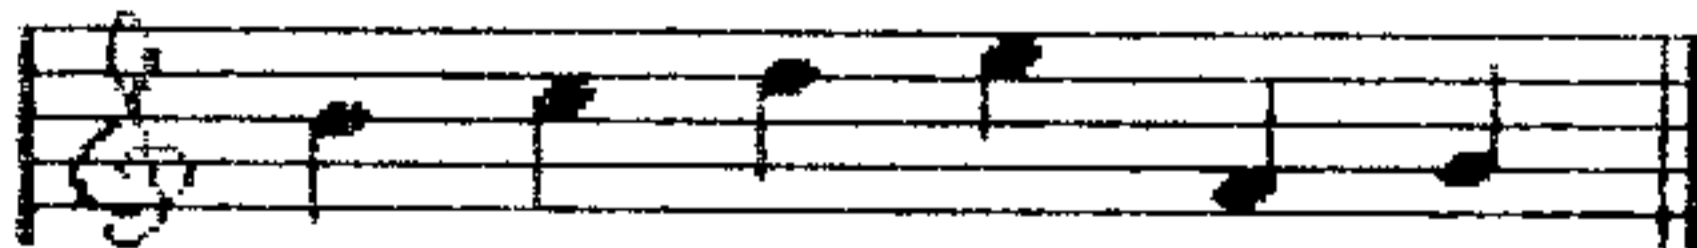

ARTIST'S COMPANION #10

New fonts, new graphics, new borders... and the first Artist's Companion to contain scenes! This Companion features 6 fonts, 7 small instances, 13 large detailed pictures, 9 exciting borders, and 5 complete scenes. An assortment of fences, mountains, and desert scenes are included. Two disk set. **Only \$9.95 PLUS! Extensions are available for \$1.95**

ARTIST'S COMPANION #11

Packed with 6 fonts, 10 borders, 5 scenes, 7 small instances, and 13 detailed pictures, this Artist's Companion is ready for action! Fonts include Stamp, Stripe2, and Hebrew. The borders are wonderful, and the scenes are ready and waiting to be built. Two disk set. **Only \$9.95 PLUS! Extensions are available for \$1.95**

ARTIST'S COMPANION #12

A fantastic two disk package with 6 fonts, 14 borders, 4 scenes, 10 small instances, and 9 detailed pictures. City skylines and tropical settings are among the beautiful scenes to create with. Plus, the fonts, including Shadow2, Nboat, and Typewriter, are sensational. **Only \$9.95 PLUS! Extensions are available for \$1.95**

ARTIST'S COMPANION #13

This two disk is loaded -- 3 fonts, 11 small instances, 8 detailed large pictures, and (hold your onto hat) 25 borders. Pencils, treads, targets, ribbons, and tennis balls are just some of the items used in the borders. And don't forget about the detailed pictures, including the best T-Bird ever drawn! **Only \$9.95 PLUS! Extensions are available for \$1.95**

STARFLEET TECHNICAL DRAWINGS

Starfleet Technical Drawings I - a collection of precision drawings focusing on the various starships that appear in the popular Star Trek television series and motion pictures. The drawings include warships and freighters from both the United Federation of Planets and the Klingon Empire. Each of the starship drawings in this three disk package may be used, altered, and printed with the TI Artist drawing system. Also included are detailed drawings of the Starship Enterprise as it has appeared throughout its entire 20 year film history. In addition, each disk contains a file that allows each drawing to be automatically viewed in slide show format using Display Master (sold separately). Requires: TI Artist and/or Display Master, or another compatible graphics package. **Only \$9.95**

Starfleet Technical Drawings II - Three more disks with highly detailed drawings of the various spacecraft that have appeared in Star Trek. Numerous drawings of the United Federation of Planets and Romulan spacecraft are included. Starfleet Technical Drawings II also features an outstanding drawing of the Ferengi starship, the only known vessel of the Ferengi. A must for all Star Trek fans! **Only \$9.95**

Special Offer: Order either Starfleet Technical Drawings and Display Master for only \$22.90!

Artist Companion Scenes

New to the Artist's Companion Series are scenes. Scenes consist of small "building blocks" of associated graphics that may be arranged in any manner on a horizontal plane. For example, you can build your own custom fences using a scene that is made up of different chain-link fence parts. Scenes are only available in certain Artist's Companion packages (see listings).

Designer Labels

...and Companions

DESIGNER LABELS

Did you ever wish you could print fancy labels using your TI Artist artwork? Now you can! With Designer Labels, you can design and print ordinary instances in a number of standard mailing label sizes, and on 3x5" and 4x6" index cards. Labels may be printed only once, or as many times as you want! Designer Labels is the perfect choice for creating personalized return mailing labels, warning labels, holiday greeting labels, and the like. Also included in this package are two complete sets of monogram instances. Requires: 32K, disk system, and either an Extended Basic or Editor/Assembler command module. TI Artist is recommended. **Only \$9.95**

DESIGNER LABELS COMPANIONS

With these new companions for Designer Labels, you can add some "spice" to your labels, and help eliminate most of the guesswork involved in creating them with TI Artist.

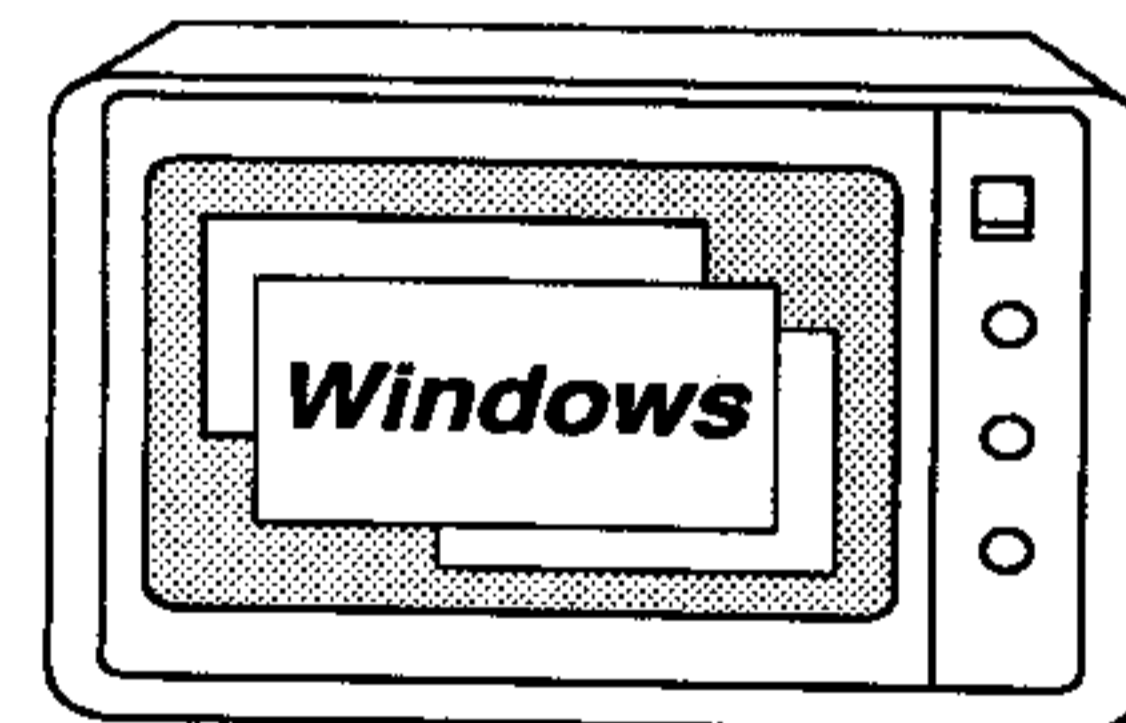

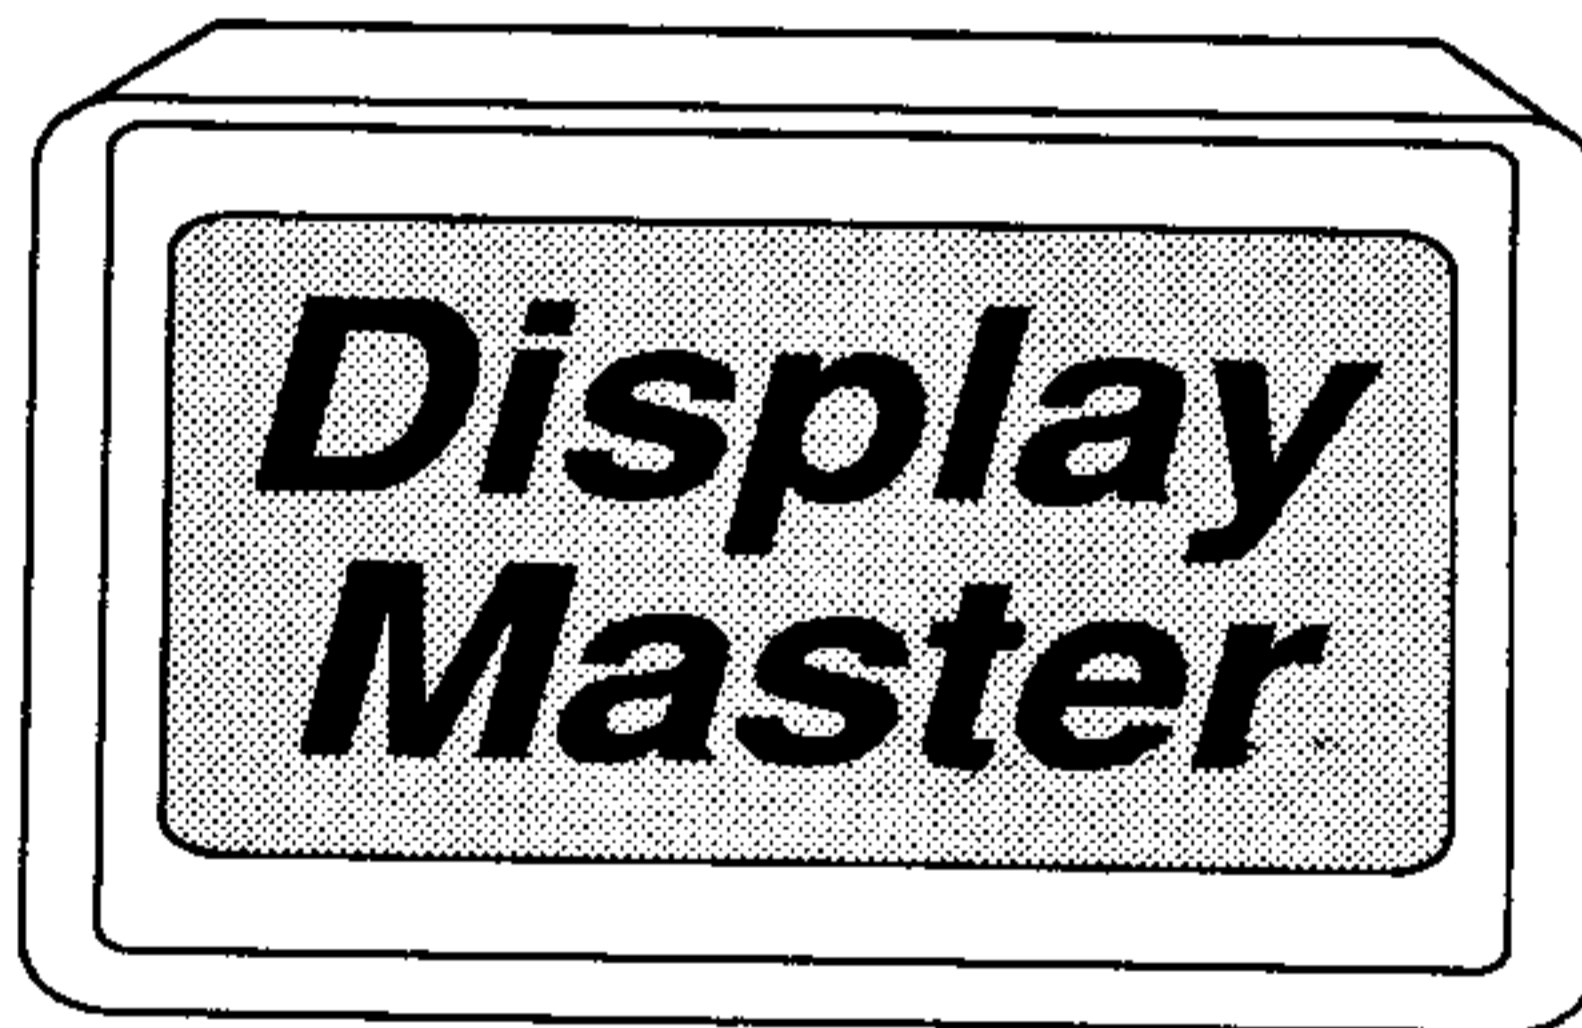

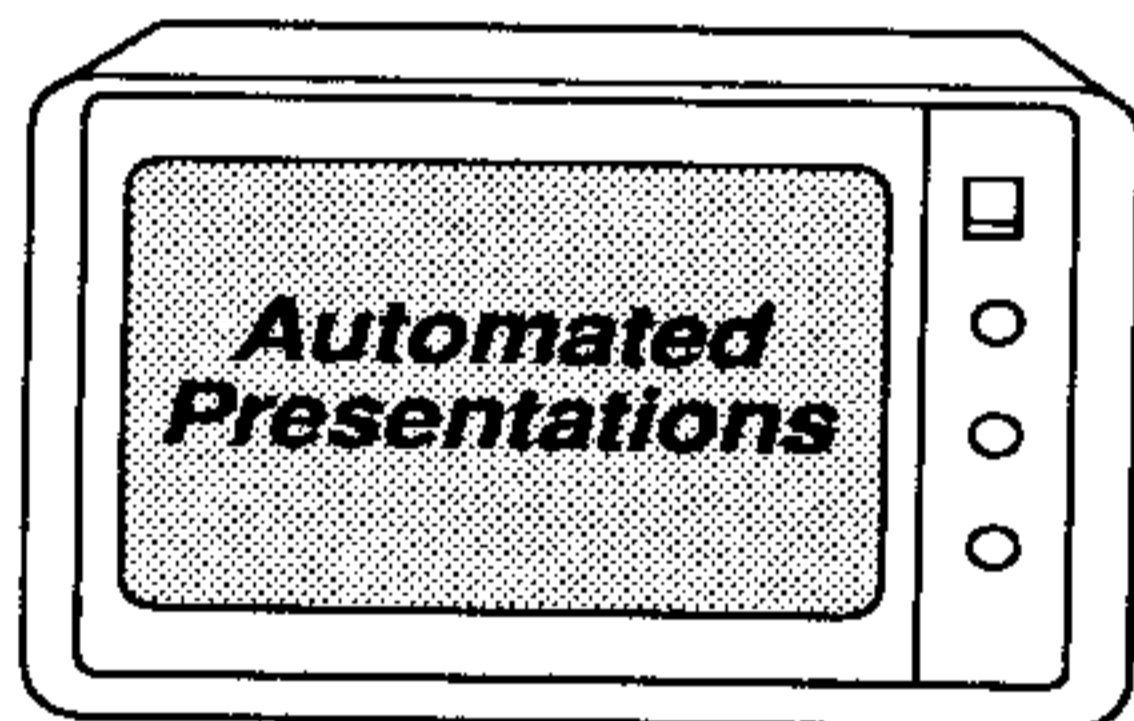

Both Designer Labels Companions include a series of pre-defined frames that "dress up" your labels, and act as a guide for creating labels that conform to standard mailing label sizes. There are even "blank" frames that can be used to design other frames, or for creating labels without a frame. Each frame style comes ready-to-go in three label formats: 15/16", 1-7/16", and 1-15/16".

Designer Labels Companion #1 is a three disk set that consists of 12 different frame styles, one blank frame set, and a few label examples. **Only \$9.95**

Designer Labels Companion #2 is a two disk set that includes 7 different frame styles, one blank frame set, and some label examples. **Only \$7.95**

Super Saver Packages!

**Get both DL Companions for only \$15.90
or with Designer Labels for \$23.90!**

Create your own custom screen displays using TI Artist pictures!

Imagine being able to create automated slide shows using your TI Artist pictures... now, with Display Master, you can! Using Display Masters powerful command set, you can load and display pictures, superimpose windows with your own special captions, control screen and window colors, turn the computer's video display on and off, plus much more! In short, Display Master gives you the ability for create your own custom screen presentations, such as show demonstrations, in-store displays, teaching aides, and video clips. Command files can be created using any text editor that generates TI Writer compatible (Display Variable 80) files. Requires: 32K, disk system, and either an XB, E/A, or MM command module. TI Artist is recommended. **Only \$14.95**

"The Texaments Seal of Approval"

For your protection, look for this emblem before purchasing any TI Artist add-on software. It's your official compatibility guarantee.

Geneve 9640

COMPUTER SYSTEM

If you're a serious TI-99/4a user who needs more computing power and speed, the Geneve 9640 is for you! It's compatible with most existing programs available for the TI-99/4a (including modules), and supports many advanced features that, if purchased separately, would cost much more.

The entire computer sits on a single peripheral expansion card and eliminates the need for your TI console and bulky peripheral expansion box interface and cable. It features a 12 MHz Texas Instruments TMS9995 microprocessor that is capable of running your existing software 3-4 times faster, 640K of system memory (512K of for conventional computer processing, and 128K for video display processing), a V9938 video display processor from Yamaha and Microsoft that supports resolutions up to 512 by 412 pixels and an 80 column text mode, real-time clock, mouse port, joystick port, and an IBM PC/XT compatible keyboard port. Analog RGB and composite monitors are supported (composite monitors will have limited display capabilities).

Included with the Geneve 9640 is an enhanced 101-key keyboard with separate numeric keypad, function keys, and cursor keys, Myarc DOS (similar to MS-DOS), Advanced Basic (upward compatible with TI and Myarc Extended Basic), My-Word (an enhanced 80 column TI Writer), Microsoft Multiplan (in 80 columns), and a cartridge conversion utility to transfer most of your existing command modules to disk.

Geneve 9640 with Mouse and My-Art: \$419.95

Please call or write for the availability of Geneve 512K memory expansion cards.

MYARC MOUSE with MY-ART

Add a mouse to your present Geneve 9640! Included with the mouse is My-Art, a powerful high-resolution drawing program designed to take advantage of the Geneve's outstanding graphics capabilities. **Our Price: \$117.95**

Cables, Drives, and Accessories

Cables

We carry almost every cable available for the TI-99/4a. If you can't find what you're looking for, just ask! Standard lengths are indicated in [square brackets] and are measured in feet. Custom lengths are available for all cables (call for price).

Expansion (side) port extension cable [2] \$24.95
Expansion (side) port "Y" extension cable [2] \$32.95
Cartridge port extension cable [2] \$24.95
Joystick port extension cable [6] \$12.95
Cassette port extension cable [6] \$12.95

Parallel printer cable [5.5] \$21.95
Serial printer cable [6] \$22.95
RS232 "Y" cable [1] \$24.95

TI monitor cable [5] \$14.95
Composite monitor cable (2 RCA plugs) [5] \$14.95
Geneve 9640 monitor cables - *please call*

Single internal or external floppy drive cable \$15.95
Dual internal or external floppy drive cable \$22.95
Disk drive "Y" power adapter (splitter) \$9.95
External hard drive cables (complete set) \$22.95

Floppy Disk Drives

Double-sided double-density 1/2 floppy disk drive. Provides 360K of storage when used with Myarc or CorComp disk controllers, 180K of storage when used with the original TI disk controller. May be used inside the peripheral expansion box, or externally with an external power supply. **Only \$89.95**

Hard Disk Drives

Low power, 5.25" form-factor hard disk drives, with automatic head parking, for use with the Myarc hard and floppy disk controller. Each drive is individually tested prior to shipment.

20mb - \$279.00 40mb - \$429.00 70mb - \$749.00

Floppy Drive Power Supply

External regulated power supply accommodates one full- or two half-height floppy drives. Vertical mount. Can be used with some low power hard disk drives that draw less than 20 watts of power. **Only \$69.95**

Hard Drive Power Supply

External regulated power supply accommodates one full-height or two half-height hard drives. Horizontal mount with cooling fan, power-on LED, and line cord. **Only \$129.95**

Character Sets and Graphics Design

The idea of "printer graphics" was born when the first Character Sets and Graphics Design (CSGD) software package was released years ago. Before its introduction, TI-99/4a users could do very little in the area of producing custom designed and printed graphics. The CSGD Software Series continues to grow, and has been the most influential software in the area of TI printer graphics to date.

CSGD I (The Beginning)

CSGD I literally introduced printer graphics to the TI-99/4a. Its a powerful printing package that may be used to create letterheads, greeting cards, and signs using the various fonts and graphics included. New fonts and pictures can even be created to suit your own taste using the powerful graphic editors found within the software. 10 fonts, 10 small pictures, and 3 large pictures are included. Three disk set. Requires: 32K, disk system, Extended Basic, and either an Epson or Prowriter graphics compatible printer. **Only \$14.95**

CSGD II (The Border Master)

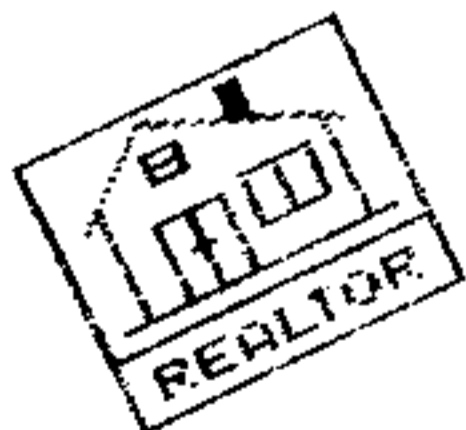

CSGD II, the second program package in the CSGD Software Series, is a direct compliment to both CSGD I and III. The primary feature of this package is its powerful banner maker. With it, you can create true graphics banners using any of the CSGD fonts and small graphics found in the CSGD series (no ugly letter banners here!). Included are 8 fonts and 65 small pictures. Two disk set. Requires: 32K, disk system, Extended Basic, and either an Epson or Prowriter graphics compatible printer. **Only \$12.95**

CSGD III (The Continuation)

CSGD III offers four new, powerful, and advanced graphic printing capabilities to the TI-99/4a user... in one neat, and complete package (with its own set of 25 outstanding fonts, 40 small graphics, and an assortment of borders).

- Letterheads and stationery can be designed for business and personal correspondence. Each can have that neat and professional look using the top and/or bottom of the page with a mixture any of different fonts and graphics. Letterheads and stationery can be printed continuously, and even saved to disk!
- Labels of your own custom design can be created for almost any purpose, such as return address labels, name tags, warning labels, holiday greeting labels, and the like. Using different CSGD fonts, small graphics, and borders, you can produce labels in various sizes, up to 1 15/16" high and 5" wide.
- Signs, T-Shirt transfers, and other message oriented items can be designed and printed using any CSGD font and small graphic.
- For the first time ever, documents written in TI Writer can be printed in any one of six bit-mapped graphics character sets. No longer will you be limited to using your printers standard resident character set! Adjustments such as lines per inch, tab settings, margin settings, and column settings can be made. You can even print short notes without even preparing a TI Writer file!

Three disk set. Requires: 32K, disk system, Extended Basic, and either an Epson or Prowriter compatible printer. **Only \$17.95**

CSGD CATALOGER

Did you ever want a full printed graphics listing of all your CSGD fonts and small graphics? With the CSGD Cataloger, now you can! Not only will the CSGD Cataloger print such graphics catalog listings, it will also allow you to create cross reference sheets of all your CSGD and TI Artist fonts and graphics. Requires: 32K, disk system, Extended Basic, and either an Epson or Prowriter graphics compatible printer. **Only \$6.95**

MICROdex

FOR TI BASE

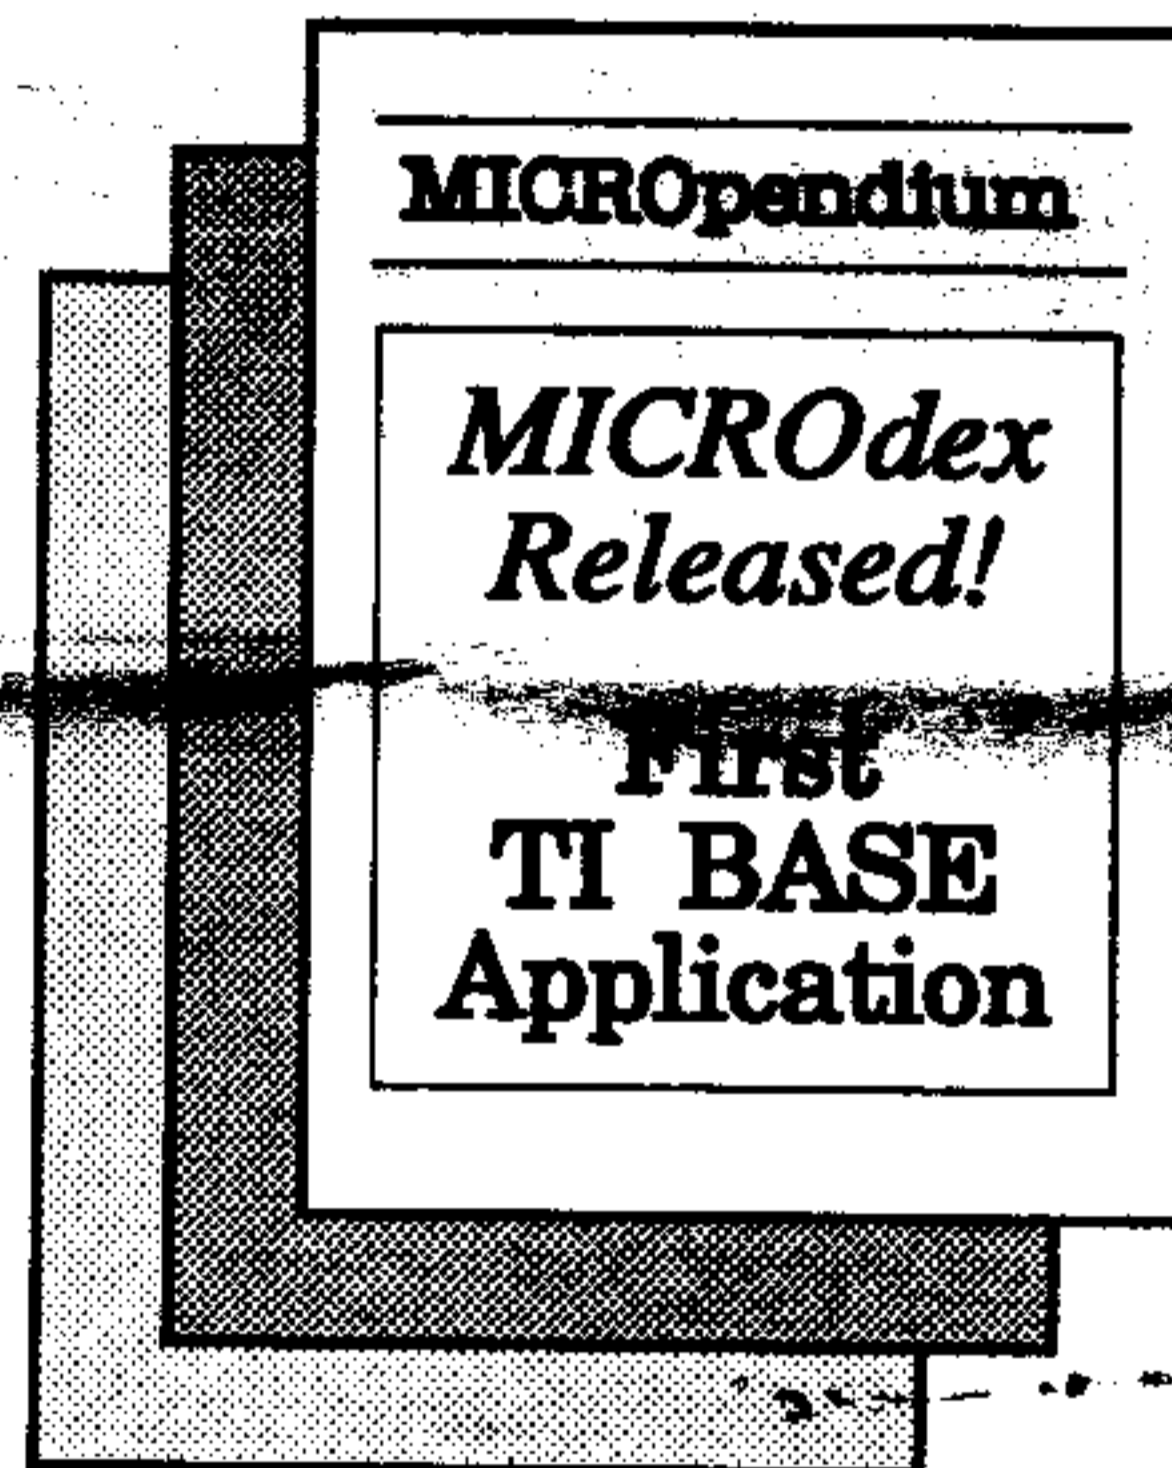

Your Window to Information

MICROdex is a fast, easy to use, publication indexing system that places an enormous amount of information at your fingertips. Frantically searching through all your magazines for a particular article, program, or review, is a thing of the past. MICROdex can even help you better understand the powers of TI Base.

With MICROdex, you can locate the source of various information printed about the TI-99/4a, and in some cases, the Geneve 9640. Any article, program, review, or editorial, that has appeared in many TI-related publications can be quickly located by subject, source, or type. Printed reports can also be prepared based on different search criteria, including a comprehensive listing of all references. On-line help is even available.

Written in TI Base for TI Base

Although MICROdex is a complete database application, it can also be used to show how TI Base applications operate. The entire MICROdex indexing system was developed using TI Base, and its data files are stored in the standard TI Base format. The command (program) files included can be viewed using the TI Base editor, and altered to suit your own needs.

Thousands of References

Due to its large size, MICROdex is divided into two distinct volumes. Thousands of references about the TI-99/4a and Geneve 9640 are recorded, categorized, and stored in those volumes... all in the popular TI Base file format.

TI Base Version 2.0 or higher (sold separately) is required to use either MICROdex volume.

MICROdex Volume I

MICROdex I, a four disk set, indexes information from the following publications:

- MICROpendium
- Computer Magazine
- 99er Magazine
- Home Computer Magazine

Only \$14.95

THE INCREDIBLE SOFTWARE

TI SORT

Imagine the incredible. The ability to sort an unlimited amount of data, stored in virtually any type of file, in record time. Imagination just became reality, the incredible is TI Sort.

Based on the "Quick Sort" method developed by C.A.R. Hoare, TI Sort is the only universal sorting utility available for the TI-99/4a. Its fast, powerful, and easy-to-use. TI Sort can handle an unlimited amount of data (records), stored in almost any file format. TI Base files, delimited files, fixed length files, and Basic or Extended Basic files -- TI Sort does them all.

So how fast is TI Sort? You decide...

Sample Time Trial

Program	Device		
	Floppy	RAMdisk	Hard Disk
TI Sort	8:59	1:59	2:20
TI Base	3:47:26	13:26	13:47

Sort Type: 2 field nested sort. (TI Sort can sort up to 8 fields)
File Type: Standard TI Base file.
File Size: 843 records; 80 characters per record in five fields.
Equipment Used: Standard TI-99/4a console attached to a peripheral expansion box containing a Myarc hard/floppy controller, two 5ms DS/DD floppy drives, 20 megabyte hard disk, and a Myarc 512K memory expansion card.

The table speaks for itself -- no hype, no miraculous claims. Period.

Only \$14.95

TI Sort requires a disk system, 32K memory expansion, and either an Extended Basic, Editor/Assembler, or Mini Memory cartridge. TI Sort is fully compatible with all storage devices and the Geneve 9640 (in GPL mode).

We Buy and Sell Used Equipment

Looking to sell your old TI-99/4a equipment? Need some extra cash? Interested in picking up a second system for the kids, the office, or as a backup for your existing equipment?

If you answered yes to any of these questions, you need to contact Texaments! We buy, sell, and even trade used TI-99/4a hardware, command modules, and accessories. We buy working and nonworking equipment. And we guarantee that anything you buy from us is in perfect working order... or your money back! (unless noted otherwise) No gimmicks, no surprises!

Call our office at (516)475-3480 for more information. If you want an up-to-the-minute listing of all the used equipment we currently have in stock, call TI SOURCE(tm), our 24 hour multiuser bulletin board system, at (516)475-6463. Sorry, we do not publish (in print) a listing of used equipment.

TI BASE

Version 2.0

The Best Just Got Better!

TI Base is unlike any other database system for the TI-99/4a. With its file handling capabilities, extensive command programming language, and unmatched information processing facilities, TI Base is the most flexible data management system available.

Overwhelming File Handling

TI Base supports up to five active databases. Each database can consist of 16129 records, with 17 fields per record, and 255 characters per field. Summed up, that's almost 70 megabytes of information! And using the generic conversion facility included, you can convert your present data files, from another database or TI Writer, for use with TI Base.

Extensive Command Language

TI Base employs a database "engine" that is controlled by a procedural command language similar to the one used by Ashton-Tate in dBASE. It consists of 45 different commands that allows you to access your databases on-the-fly, and create powerful program command files for automatic and complex data processing. You can even produce your own applications!

Unsurpassed Features

TI Base offers database capabilities beyond what most 99/4a users ever imagined possible... and the reviews in various TI publications have been nothing but positive. Some even say that TI Base is quickly becoming the new standard in TI database management.

- Database creation and deletion; adding, editing, deleting, searching, and sorting records.
- Free interchange of data; numerical, character, date, and local variables may be freely interchanged.
- Complete mathematical functions; arithmetic, logical, trigonometric, and Boolean functions.
- Formatted display and printing capabilities; character manipulations, screen scrolling, color changing, and more.
- Structured command language; over 45 different commands, local variable creation, ability to nest command files.
- Disk management functions; catalog and format disks, copy and delete files from within TI Base.
- 40 column file editor to create and edit your own command (program) files from within TI Base.
- Global processing of records using simple commands or complex command (program) files.
- System setup; allows the definition of disk locations, printer configuration, data stamping, and other miscellaneous functions.
- System status bar; "in use" indicators inform the user of the database in use, disk functions being performed, records being accessed, and available dynamic memory.
- Eight level nested sort capability; sort records on multiple fields.
- Detailed 66 page instruction manual with examples.

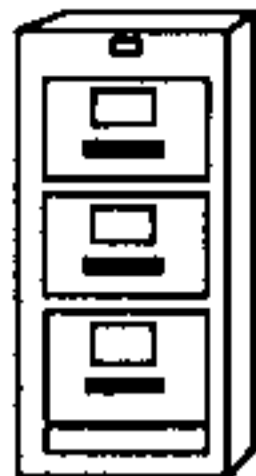

TI Base is not only powerful, but it is affordable as well. For only \$24.95 (plus shipping) you get the TI Base system and tutor disks, a keyboard overlay, and a comprehensive 66 page instruction manual. It requires a disk system, 32K, and either an Extended Basic, Editor/Assembler, or Mini Memory cartridge. TI Base is fully compatible with the Geneve 9640 (in GPL mode).

Upgrade to Version 2.0

Previous TI Base owners may obtain version 2.0 by returning their original disks (both the system and tutor disks) and a \$7.95 upgrade fee. Don't forget to include your original disks with your upgrade fee. A new and expanded 66 page manual and quick reference card will be sent with your upgrade.

The Organizer!

For TI Base

The filing cabinet is one of the most powerful tools used today to store and organize information. Although computers are also used for this purpose, they are generally much more difficult to use than the good old filing cabinet. Not anymore.

The Organizer! is a complete information management system that stores and organizes information electronically... and it works just like a standard filing cabinet does. Each electronic cabinet consists of four drawers that can store up to 16,129 folders each (limited by actual disk size). Each folder contains a subject line to identify the folder by and six text lines for storage of virtually any kind of data.

The folders stored in each drawer may be searched for, displayed, changed, printed, deleted and sorted by subject. The drawers can even be labeled anything you wish. All operations are fully menu driven, which makes The Organizer! as easy to use as an ordinary filing cabinet!

Only \$14.95

TEXAMENTS

53 Center Street, Patchogue, New York 11772

Please add \$2.50 for domestic first class (and Canadian) delivery, \$8.00 for foreign air mail delivery. Sorry, no credit card orders accepted.

TI Base is required to operate The Organizer!. TI Base may be purchased from Texaments for only \$24.95 plus shipping.

Publication Index

For TI Base

Did you forget where you read something? Can't remember what magazine issue contained the article you're looking for? Not sure who wrote a particular book? If so, Publications Index is for you!

With the Publications Index system, anyone, a novice or expert, can develop, organize, and maintain their own personal index of publication references in a single centralized database. Indexes can be created for any type of publication, including magazines, newspapers, books, and newsletters. Publication references can be entered into the database and later searched for, displayed, changed and printed... all with very little effort.

Publications Index can even help you better understand the powers of TI Base; all of the command files included with Publications Index can be viewed using the TI Base editor and altered to suit your own needs.

Only \$14.95

TEXAMENTS

53 Center Street, Patchogue, New York 11772

Please add \$2.50 for domestic first class (and Canadian) delivery, \$8.00 for foreign air mail delivery. Sorry, no credit card orders accepted.

TI Base is required to operate Publication Index. TI Base may be purchased from Texaments for only \$24.95 plus shipping.

Mailing List Manager

For TI Base

Keeping track of names, addresses, and telephone numbers can be a real bore. Most people use address books for this... and most people know all about the horrors associated with them. They're never around when you need them, always a mess, and difficult to maintain. Enter Mailing List Manager.

With the MLM system, any user, a novice or expert, can easily add, change, display address entries in their own personal address database. MLM supports two forms of address entry, simple editing functions, multiple address reports and prints mailing labels. Various maintenance functions are also supported, such as file sorting and disk cataloging. MLM will even autodial your telephone! (A Hayes compatible modem is required for autodialing features).

Mailing List Manager is written in TI Base for TI Base; all of the command files included with MLM can be viewed using the TI Base editor and altered to suit your own needs.

Only \$14.95

A utility every Geneve owner should have...

A> EXEC

How do you run TI-99/4a Option 5 Editor/Assembler programs? Most people load up GPL, then some option 5 loader, and then finally their program. With Exec, you can now run most E/A Option 5 programs directly from MDOS using one simple command! A dream come true.

Included with Exec are GETKEY and GETSTR, two short external MDOS batch file commands. With these two powerful commands you can create interactive batch files. GETKEY captures single key input, while GETSTR handles string input.

But that's not all... also included is Archiver III, the standard for file packing and compression. Archiver III saves disk space, and modem transfer time -- and its used by all the major telecommunications networks!

All Four Programs - Only \$17.95

TEXAMENTS

53 Center Street, Patchogue, New York 11772

Please add \$2.50 for domestic first class (and Canadian) delivery, \$8.00 for foreign air mail delivery. Sorry, no credit card orders accepted.

Texaments has been exclusively authorized by Barry Boone to offer and distribute these REGISTERED programs internationally to end users.

Guidelines

For TI Artist Plus!

Banner Borders, Templates, Fonts, Instances and More!

This is the one you asked for. GuideLines. Two disks loaded with new and original graphics artwork for TI Artist PLUS!. Fonts, instances and slides, the standard components of any good TI Artist companion, are all included. What makes GuideLines truly special are the unique banner borders and templates found in this outstanding package.

Although not all too difficult, creating banners with TI Artist PLUS! can be a tedious trial and error process. With banner borders anyone, a novice or expert, can create elegant banners without failure (and all that wasted paper). The 12 different graphic banner styles included with GuideLines will have you producing beautiful banners in no time.

Templates, templates, and more templates. Seven in all. There are templates to assist you in creating fancy calendars, disk sleeves and jackets, standard mailing labels, banner borders, banners and full page drawings. Templates make your work easier and eliminate the guesswork involved in producing these items.

And lets not forget those "standard components"! Included with GuideLines are 15 fonts (with the exception of one, all of which contain upper and lower case letters, numbers, and full punctuation), 17 small instances and two full sets of slides.

GuideLines Complete Only \$9.95

Placing Your Order

Orders may be placed by mail or phone. When placing an order by mail, please include the following:

- A brief description and price of the items being ordered.
- The address where the order is to be shipped.
- Payment including proper shipping charges (foreign orders must be paid in U.S. funds drawn on a U.S. bank; International and Postal Money Orders are preferred forms of payment for foreign orders). Sorry, credit card orders are not accepted.

Shipping Charges

Please add \$2.50 for domestic and Canadian delivery, \$8.00 for foreign air mail delivery.
