HIGH RESOLUTION — LOW PRICE AMBER COMPOSITE MONITOR!

GoldStar
MONITORS

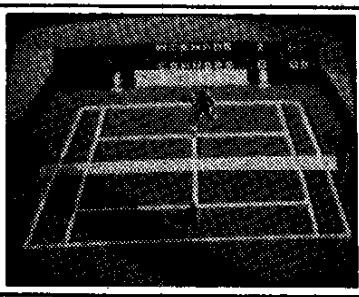

\$99⁹⁵

This 12" amber composite monitor is a sure-to-be-best-seller at this price. Highest quality design means a high resolution monitor of 900 lines at center complimented by a non-glare screen to reduce eyestrain. This monitor is capable of 80 columns (if your system has the 80 column card). Another feature is exceptionally clear display over a wide video bandwidth that assures you of readability and pinpoint accuracy with plotting. Beautiful amber display with full-range of contrast and intensity. Requires TI monitor cable.
GOL 100 \$99⁹⁵

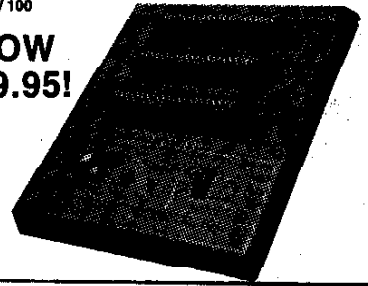

YOU'LL LOVE 'LOVE TENNIS'! AVAILABLE NOW ON DISK!

The absolute greatest graphics we've ever seen on a TI Home Computer. Love Tennis is a one or two player realistic tennis match with graphics and action unsurpassed by any entertainment program available today ... literally, just like the arcade game! We guarantee you'll love this one! Requires Disk System, Memory Expansion, Editor/Assembler module.
STA 117 \$39⁹⁵

NAVARONE CARTRIDGE EXPANDER PREVENT COMPUTER WEAR!

Plug, unplug, plug, unplug. Sound familiar? All that plugging and unplugging is more than a nuisance — it's slowly but surely wearing out the contacts on your computer. There is a way to combat this wear by up to 90 percent or more through a cartridge expander! The Navarone Cartridge Expander holds three of your most used cartridges so that you can switch back and forth between modules with the press of a reset button rather than jerking the entire module out of the computer. Always switching back and forth between Extended BASIC and Disk Manager? Kids play 10 modules 100 times a day? Active computer user? This cartridge expander is the inexpensive answer.

IN STOCK!

CORCOMP 9900 MICRO EXPANSION SYSTEM

THE WAIT WAS LONG, BUT NOW IT'S HERE!!

COR 107 \$324⁹⁵
(Does not include disk drive)

The term MICRO definitely fits the small black box measuring 5" x 5" x 3" which can replace the TI Peripheral Expansion Box measuring 17" x 12" x 7". This amazing box is being credited with making the 99/4A a portable computer! The console, 9900 MICRO EXPANSION SYSTEM and half height drive fits easily into a briefcase or suitcase! Another exciting feature is that there is no longer the constant "hum" of the old P-Box fan!

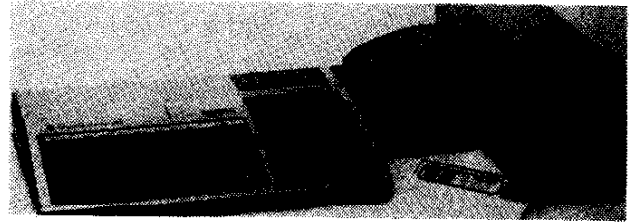

With the additional memory and the new CorComp Double-Sided, Double-Density Disk Controller capability, the user can control up to 4 disk drives. Each Double-Sided Double-Density drive will store 380k bytes of information. With two DS/DD drives hooked up the on line storage is 720k and with four DS/DD drives, it is increased to 1.4 megabytes. Tests to date have shown that the CorComp 9900 MICRO EXPANSION SYSTEM runs even faster than the 9900 Disk Controller for the TI P-Box.

The CorComp 2.3 Disk Manager is supplied on 5 1/4" floppy disk. This program is considerably faster than TI'S. It's the same Disk Manager which met with rave reviews when CorComp introduced the 9900 DS/DD DISK CONTROLLER CARD. One of the many enhancements of this program is that it allows the user to CONFIGURE the manager to his system. He can select his own text and screen colors, set up each of the different drive types attached to the controller for number of sides, density and number of tracks. The printer type can be configured for catalog and disk test printouts. The configuration is saved on the disk and used as the defaults when the disk manager is loaded. (See Page 15 for more great CorComp products.)

The CC-Disk Controller also adds eight new commands and programming statements to BASIC and Extended BASIC.

Revolutionary is the word being used to describe the CC-9900 MICRO EXPANSION SYSTEM. The small black box offers the most compact and practical approach ever available for expanding the 99/4A!

COR 103 RS232 Stand Alone with 1 Serial and 1 Parallel Port \$124⁹⁵

SAVE \$46000

GENERAL LEDGER

Allows you to get a grip on the "Big Picture" of your business. GL gives you a financial overview and complete management capabilities. GL also accepts automatic posting entries from AR, Inv., and ML. Printouts include financial statements, chart of accounts, journal reports, detailed trial balances, balance sheets, journal edit lists, journal posting lists, and others.

INVENTORY

This diverse program provides for both inventory and order entry management. Inventory allows for creation and maintenance of up to 1500 inventory items, including part numbers, descriptions, five different prices, and eight other options. Order entry allows for invoicing, posting to AR and GL, pick tickets, stock-status, sales journals, and others. Of course, printouts of all transactions and journals are available.

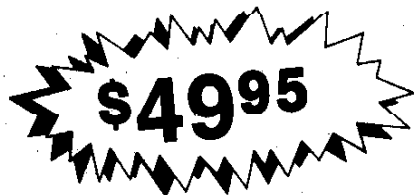

MAIL LIST

Mail List virtually eliminates costly labor expense and the tedium of constantly dealing with a mailing list. ML offers 11 fields of data input relating to each name as defined by User. Mail List employs search function, zip code and alpha sorts, accesses TI Writer, has a 40 column text mode, edits data before entry, and many additional functions. This mail list does just about anything imaginable for data manipulation.

ACCOUNTS RECEIVABLE

Invoicesinvoicesinvoices. If they all seem to run together, AR has the answer. This system allows you to maintain a Customer Master File. Maintains records by invoice number and keeps an invoice on file indefinitely until it is paid. AR is additionally posted to GL at month-end assuring balance or ease of error tracing. Reports include customer list, monthly statements, aging reports, and journal reports.

EXCELTEC LICENSED EXTENDED BASIC

LOWEST PRICE EVER!

NOW \$4995

In conjunction with Exceltec, Inc., Unisource has gone to great lengths to bring you the lowest-cost, fully compatible, fully documented Extended BASIC module on the market today. Exceltec is licensed by Texas Instruments to manufacture its Extended BASIC module.

This module contains the same chip as the original Texas Instruments module at a tremendous savings!

The following feature enhancements are included: IF THEN ELSE statements, direct screen accessing, multi line statements, output formatting with "using" clause, BASIC sub-programs with arguments and local variables, auto booting of disk programs, easy control of up to 28 sprites from BASIC, program chaining, merging of code-protected programs, ON ERROR statements, BOOLEAN functions such as AND, OR NOT, etc.

When 32k Memory Expansion is present in your system, this powerful software will provide access to the additional memory, and allows you to run the many third party programs written in Extended BASIC. Call now! **STA 113**

"Works exactly like the original!" K.R. Ft. Myers, FL

TI WRITER

\$5495

PHM 3111

This is our lowest price ever on this professional quality word processing program for the 954A only! TI Writer provides many of the features found on word processing systems costing thousands of dollars. Users create, define, save, format and print documents. Has both word wrap and fixed abilities. TI Writer is regarded as one of the finest programs ever written for the TI Home Computer.

AUTO ANSWER TE SOFTWARE!

NEW! from DataBioTics!!

This is the only true auto answer/auto dial terminal emulation software on the market today for the Texas Instruments Home Computer. For those with "smart" modems, 4/A Talk has been equipped with an automatic dialing routine which will redial a number until a connection has been established. In addition to redialing, the autodialer will allow display of a directory file on the screen. The telephone number to redial can either be entered from the keyboard or selected from the directory file. 4/A Talk is 110-9600 baud. Uploads & downloads to printer.

Additional features of 4/A Talk include multiple file transfer methods, disk management functions, X-On/X-Off protocol, and an X-Modem file transfer protocol which will transfer any file to any other computer running an X-Modem program.

Requires: CorComp or Myarc disk controller card and either Extended BASIC or Editor/Assembler or Mini Memory.

P R I N T E R S

VERY LIMITED TIME OFFER!

\$11995

AXIOM GP 100TI

DIRECT CONNECT PRINTER

INCLUDES SPECIAL PRINTER ADDENDUM FOR THE TII

"JUST PLUG IT IN AND START PRINTING!"

A serious printer for the budget-minded TI user. For a very limited time only, we are offering this direct connect Seikosha GP 100TI dot matrix printer from Axiom Corporation at unheard-of savings.

Simplicity of operation and Seikosha's famous reliability together with the direct-connect feature makes the GP 100TI the perfect starter printer.

Multiple copies, adjustable tractors, and surprisingly good graphics add to the bargain. Another plus — you can daisy-chain other peripherals such as disk drives and cassette program players with complete compatibility. The GP 100TI allows user defined number of line feeds per line, line lengths, margins, and a self-test. Big printer features for an incredibly low price.

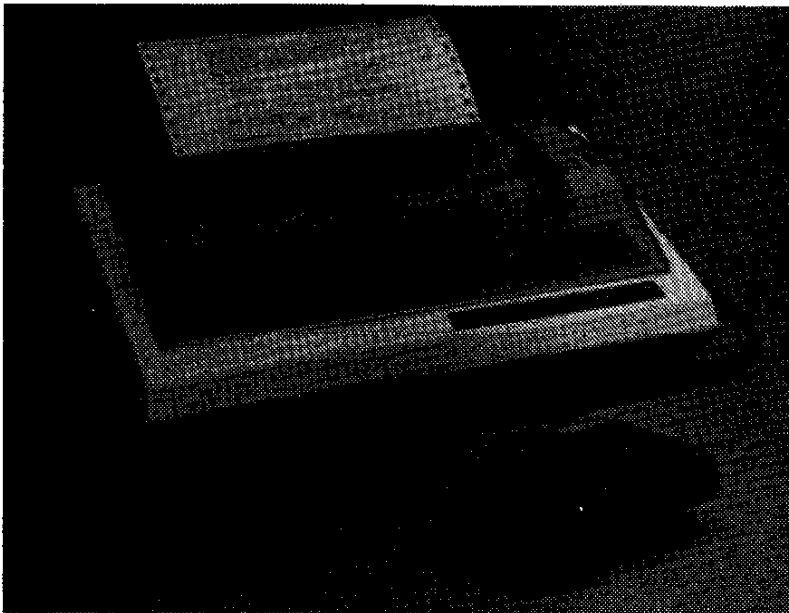

This dot-addressable printer also uses cartridge ribbons and standard fan-fold paper.

But hurry! This is a very limited time offer and quantities are limited.

AXIOM GP 700TI COLOR PRINTER!

"AN AFFORDABLE FULL-COLOR PRINTER"

DIRECT CONNECT

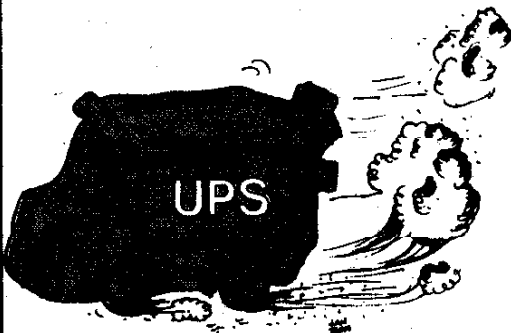

Color Graphics Printer — GP-700TI

A 7 color printer that uses a unique 4 hammer printhead to implement its impact type of dot matrix printing.

Main features of the GP-700TI include:

- Printing speed is 50 chrs./sec. irrespective of the color.
- Tractor feed and friction feed
- Ink ribbon cassette has individual cartridges that can be replaced as a specific color is used up.
- Standard characters, double-width characters and graphics can all be intermixed on the same line in any choice of colors.
- Colors can be specified in 3 ways:
 1. Character units or 8-dot vertical graphic's columns.
 2. Single dot units scanning horizontally corresponding to the the hammers in the print head.

AXI 105 *329**

"HOW TO RECEIVE YOUR ORDER UP TO 4 TIMES AS FAST!"

You can cut the dreaded "waiting game" by up to 4 times the usual length by paying for your order by money order or cashier's check or credit card.

The anxious anticipation of waiting for that special product for your Home Computer sometimes loses its zest while your order is bogged down in a mire of banking bureaucracy. Bank clearance of personal checks is a slow and needless wait. Why not pay by money order or cashier's check? You'll be glad you did.

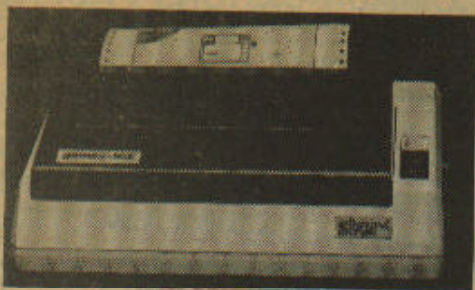

LAST CHANCE TO PURCHASE GEMINI 10X AT THESE PRICES!

Star

GEMINI 10X

\$21995

(When you purchase any one of three interfaces described below)

List price on Star Mironics Gemini 10X is \$399.95. Unisource Electronics slashes retail prices to a never-before-heard-of price with purchase of any one of the three interfaces described below. This is the lowest price ever offered on the Gemini 10X printer.

Call today and reserve one of the best-selling printers and interfaces of all time. Quantities are large, but at this phenomenal price, orders will be accepted on a first-come-first-serve basis.

Look at the Big Features for the Gemini 10X:

- Tractor (pin) and friction feed
- Very fast 120 characters per second print speed
- Bi-directional and logic seeking
- High density 9 x 9 dot matrix pattern for near letter quality printing
- Eight distinctive character fonts
- Standard typewriter ribbon replacement (about \$3.00)
- Standard ASCII characters with special characters, block graphics characters, downloadable and even international characters.
- Centronics parallel

GEMINI 10X

purchased separately UNI 142 \$239.95

"I would like to commend you folks with the expediency of processing my last order. I received it exactly two weeks from when I sent it in. I really hope that you can do this with my next order! I think that's great!"

— Bob S., Bellevue, Washington

UNBEATABLE PRICE!!

PARALLAX INTERFACE

The Parallax interface allows for direct-connect communication between the computer and the printer. Just plug the Parallax in and start printing! This is a low-cost printer interface for the TI 99/4A and is fully compatible with all of the printers featured in this flyer. The expensive peripheral expansion box is not required — nothing else is needed! The Parallax interface has a built-in printer cable.

UNISOURCE PRICED (AXI 110) \$84.95

(Specify AXI 109 when ordering Gemini 10X)

ELITE 5 DAISY-WHEEL PRINTER

Unisource Electronics crashes the expensive letter quality printer barrier with an incredible daisy wheel printer at an even more incredible price!

The ELITE 5 letter quality printer has all of the attributes of an expensive daisy wheel printer at a fraction of usual costs. This versatile printer produces superb LQ print out in standard, bold, subscript, superscript, and underlining. This printer is only \$249.95 with purchase of any one of the three interface devices listed below.

Reserve your Elite 5 printer today! Quantities are large, but as with all of these fine printer values, response will be tremendous.

Here are some of the features of the ELITE 5:

ELITE 5

- 12 Characters per second print speed with quiet operation — 720 words per minute
- Logic seeking, bi-directional
- Tractor feed available
- Centronics parallel interface
- Full word processing compatibility
- Graphics mode
- Superb letter quality printing
- Interchangeable daisy wheels. Various type styles available

COMPLETE 1200 BAUD MODEM & SOFTWARE VOLKSMODEM 12 + AMA-LINK COMMUNICATIONS PACKAGE

MODEM ONLY
\$199⁹⁵

New Volksmodem XII from Anchor Automation finally brings the cost of 1200 baud smart modems down to a cost everyone can afford. This high-speed modem retails for \$299.95. This smart modem is capable of full unattended operation in conjunction with stand-alone terminals and computers which have an RS232 interface. With Volksmodem XII's ability to transmit data quickly and access mainframe computers like the Source and CompuServe, it's truly the affordable way to maximize your personal computer's productivity. Get the Volksmodem XII with TI cable and AMA-Link in a special package deal that makes super fast data transmission and reception affordable.

229⁹⁵ COMPLETE!
FOR MODEM, TI CABLE & AMA LINK

Request part numbers ANC 107, ANC 106, and AMA 120 D.
ANC 107 Volksmodem XII (purchased separately) *199⁹⁵
ANC 106 TI Cable for Volks (purchased separately) *10⁹⁵
AMA 120 D AMA-Link (purchased separately) *33⁹⁵

AMA-Link is a diverse communications package that contains three programs in one and is ideally suited for Volksmodem and many, many other modems on the market today. AMA-Link contains: TERMINAL EMULATION, DISASSEMBLER, and ASSEMBLY LANGUAGE ROUTINES.

The first part of the package is TERMINAL EMULATION and is designed to access the skyrocketing number of TI bulletin boards around the country. TE has many features, including:

- Full or half duplex operation
- Selectable baud rates
- Text buffering for downloading up to 16k of information or programs to printer or disk.
- Simultaneous output to printer as information comes over phone

DISASSEMBLER, the second part of the program, allows dis-assembly of machine code in memory into executable assembly language source code. This part of the package only requires Extended BASIC.

AMA-Link also has ASSEMBLY LANGUAGE routines for Extended BASIC and provides several miscellaneous assembly language routines like 40 column screen utilities, search and insert, and disk file search and merge.

Requires: Extended BASIC, disk system, and memory expansion, but Mini Memory or Editor-Assembler can be used instead of Extended BASIC for the Terminal Emulation portion of the package.

AMA-Link has now been enhanced with the following features:

- Buffer control codes for high-speed operation
- Buffer full signal to indicate text memory is almost full
- ASCII "X-on" and "X-off" protocol
- File Transfer
- Status Display showing status of different features.

AMA-Link is regularly priced at \$39.95, so now is the time to take advantage of this telecommunications package. Call now and request the special package price on part numbers ANC 107, ANC 106, and AMA 120 D!

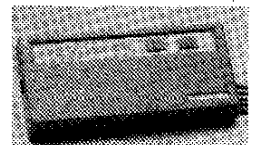

MODEM ONLY
\$67⁹⁵

COMPLETE 300 BAUD MODEM & SOFTWARE VOLKSMODEM + TERMINAL EMULATOR II

A telephone modem, when connected to your computer via an RS232 serial device will allow you to communicate to mainframe computers, data bases like The Source and CompuServe, micro computer electronic bulletin board data bases, and directly to other micro's. (If you don't have an RS232 device, please see page 12.)

Volksmodem represents a low cost alternative to expensive telephone modems of the past. Volksmodem is direct connect to a modular telephone jack and is fully compatible with the 99/4A.

ALSO INCLUDED! SPECIAL SUBSCRIPTION RATE TO THE SOURCE WHEN YOU PURCHASE A VOLKSMODEM FROM UNISOURCE!

ONLY \$87⁹⁵ COMPLETE
FOR MODEM, TI CABLE & TE II

ANC 105, ANC 106, and AMA 120!
ANC 105 Volksmodem (purchased separately) *67⁹⁵
ANC 106 TI Cable for Volksmodem (purchased separately) *10⁹⁵

This 300 baud package is a very cost-efficient method for newcomers to the field of telecommunications to discover the world through their computer. And TEII is the original explorer! This module software links your 99/4A to mainframe computers like the Source and CompuServe as well as numerous bulletin boards around the country. This is a hot package deal to beat the summer heat. Call today and request part numbers ANC 105, ANC 106, and PHM 3035. With Volksmodem and the TI cable and this terminal emulation software, connect this package to any RS 232 device and explore! (If you don't have an RS 232 device, please see page 12.)

MicroManager™

MICROWAVE COOKING AID

Instantly, microwave cooking is simple!

AS SEEN ON GOOD MORNING AMERICA™
Free 15-Day Home Trial*

THOUSANDS SOLD MM 100
AT

~~\$1995~~

~~\$3995~~

*Simply return for refund or credit of purchase price (\$19.95) if dissatisfied for any reason.

With this remarkable new instrument you can now hold microwave cooking in the palm of your hand.

The MicroManager Microwave Cooking Aid eliminates guesswork. Instantly.

It takes the place of complicated cookbook timetables. Simply.

And it does more than even the most sophisticated control panel on the most expensive microwave oven. Easily.

What the MicroManager does is tell you exactly how long to cook, defrost or reheat almost any type of food, based on the exact weight of the food you have. There's nothing for you to calculate or memorize.

The MicroManager also tells you what power level to use on your microwave oven, and indicates when (and how much) standing time is required. Automatically.

And it doesn't just give the right answers. It asks the right questions. Special indicators on the LCD display guide you through the simple operation steps.

The MicroManager Microwave Cooking Aid.

Nothing can put more confidence into your microwave cooking. Because nothing is better equipped to take out the trial and error.

• Designed for kitchen duty.

Also included are an easy reading guidebook, quick reference cards, attractive acrylic holder with magnetic backing for convenient mounting on your oven or any wall surface.

• Limited full year warranty.

★ QUALITY 99 SOFTWARE ★

"TWO NEW GRAPHICS PROGRAMS" QS-CONVERTER

Now convert any text file into a runnable program! You can create or modify a program using the powerful editing capabilities of TI-Writer, QS-Writer, and then quickly convert it back into a runnable program — automatically! Will also convert programs downloaded from a BBS into a runnable program. Requires disk system, 32k, Extended BASIC.

QUA 111 \$39.95

CHART MAKER

The old adage "a picture is worth a thousand words" is certainly true with CHART MAKER. Turn ordinary numbers into impressive graphs and charts! Create pie charts and horizontal or vertical 3D bar graphs on the screen or printer with CHART MAKER and Draw 'N Plot from your input data. Accepts up to 12 items and is menu driven. Requires Draw 'N Plot, disk system, 32k, Extended BASIC, printer recommended.

QUA 112 \$27.95

DD PROGRAM!

NEW! THE ULTIMATE IN USER FRIENDLY! DISK DUPLICATOR USES A SINGLE SCREEN MENU!

AMA Disk Duplicator is the ultimate in user friendly disk copiers! Disk Duplicator uses uninitialized diskettes — a feature not offered by other disk copiers — and thus saves much initialization time. Also, Disk Duplicator copies program disks, back-ups data disks, alerts user if disk error is encountered, makes 1 or 2 copies at a time (depending upon the number of drives) and copies either single or double sided disks. Disk Duplicator even gives a continual audible tone when the copy is complete. Requires: disk system with 1-3 drives, memory expansion, and either Extended BASIC, Editor/Assembler, or Mini-Memory.

AMS 116 29.95

DEALER PROGRAM EXPANDED!

Unisource Electronics is expanding its dealer program to include more products than ever before at better margins than ever before. Write today and we'll send you a dealer kit outlining terms and conditions, products and pricing. At: Unisource Electronics, Inc., 7006 University, P.O. Box 64240, Lubbock, TX 79464. Attention: Dealer Sales Department. If you have any questions, call phone (806) 745-8834.

SHIPMENT & RETURNS

- Most orders shipped within 48 hours on in-stock merchandise.
- Same day shipments available on phone orders received before 1:00 p.m. for \$8.00 expedite charge plus special overnight or 2 day shipping services available at additional actual cost. Most items are shipped via UPS; however, parcel post and truck carrier are occasionally used. Allow approximately 2 weeks for delivery.
- Please check all packages received for damages and report it to the carrier. A damage claim must be filed with the shipper in order for us to issue you a replacement.
- In most cases, warranty service or replacement should be directed to the manufacturer. All our products include a manufacturer's guarantee. Remember to include your purchase receipt and/or information required by the manufacturer in order to ensure prompt service.
- All sales must be considered final. Packages cannot be accepted by Unisource without a return authorization number. Please contact customer service for a return authorization number and information about restocking charges before returning a product to Unisource Products will be inspected before credit is issued.

ORDERING INFORMATION

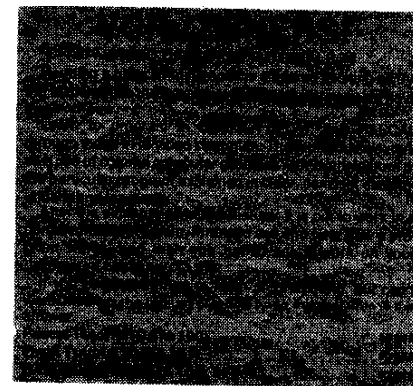

PRICING, SPECS & PRODUCT AVAILABILITY

Specifications, product availability and prices are subject to change without notice. However, you will be notified of any price change at the time you place your order, or prior to shipment on orders not in stock.

PAYMENT

For prompt service, cashier's check, certified check, money order, MasterCard or VISA may be used. If ordering with a personal check, please allow sufficient time for check to clear our bank. For information concerning purchase orders, please contact our Educational Division or Customer Service.

"Pay by money order, cashier's check, certified check or credit card for fastest service!"

NAVARONE INDUSTRIES

(Navarone modules not compatible with Version 2.2)

DISK FIXER

Unlocks the secrets of the disk and lets you access hidden or "lost" information. Disk Fixer is a must for the serious TI 99/4A user who has a "sick disk" which suffers from a damaged directory. This program lets you recover unscathed information by searching your disk by sector rather than file name. Disk Fixer lets you display/print the actual binary contents with a single command. It allows you to change any byte on any sector, even move data from one sector to another.

NAV 101 (Hidden Powers Included) \$39.95

HIDDEN POWERS OF DISK FIXER

A comprehensive 50 page book. Learn how to repair bad disks, recover lost files, and remove disk protection codes. This book contains information TI would never dream of publishing. It quite literally exposes how basic programs are stored in memory and on disk, how to create your own protected disks plus much more. This book is a must for any Disk Fixer owner.

NAV 116 \$14.95

SPEED READING

Improves reading speed and comprehension. Versions for children, teens, and adults. Cartridge Software, no extra equipment required.

Version A for teens and adults: This new program provides extensive practice in taking in more print faster. Frequent tests prove that not only is your rate of reading greatly increased, but you are also improving your level of comprehension. Complete workbook included.

Version B for children: A comprehensive course created especially for children 8 through 13. Practice drills are geared to increasing reading speed and improving comprehension levels. Progress tests and scores add to satisfaction and confidence. Complete workbook included.

NAV 112 Version A \$29.95

NAV 113 Version B \$29.95

HOMEWORK HELPER +

Makes homework fun, develops basic computer skills. This new educational program for children 8 years and older, features a built-in 20,000 word checker dictionary to identify spelling errors. Homework Helper is a simple-to-use tool for improving study habits, written work quality, and planning class assignments. Homework Helper contains a word processor which includes standard format for book reports and class projects. DISK DRIVE REQUIRED.

LOWEST PRICES EVER ON EDUCATIONAL SOFTWARE!

Minus Mission

Minus Mission can help your child increase speed and accuracy in subtraction of numbers from 0 to 9. Minus Mission is learning combined with fun. By playing the game, your child learns and improves essential subtraction skills.

The arcade game format of Minus Mission is a fast-paced, subterranean version of attackers versus defender. Creeping blobs of green slime that contain subtraction problems are the attackers. The defender is a robot, controlled by your child, which fires laser guns to "equalize" the slime blobs with the correct answer. The challenge of different levels of skill and problem difficulty encourages your child to improve his or her speed and accuracy. The colorful graphics and "electronic" sound effects of the Minus Mission enhance the action and add to the excitement.

PHM 3118 Module 4.95

Measurement Formulas (Grades 6-8)

The Measurement Formulas cartridge is divided into 25 levels of difficulty, covering material generally taught in grades six through eight. The program provides practice in a variety of skills related to measurement formulas, including finding the perimeter, area, and volume of several geometric shapes. Where necessary, the appropriate formulas are given when a particular measurement is required. Children are periodically given problems similar to those from earlier levels for review. This program assumes that your child has mastered basic arithmetic and a certain degree of mental computation.

PHM 3101 Module 4.95

Reading Flight (Grades 5-7)

This Module helps your child to learn the versatility and applicability of classifying, summarizing and outlining information.

PHM 3082 Module 9.95

Alien Addition

Alien Addition can help your child increase speed and accuracy in the addition of numbers from 0 to 9. Alien Addition is learning combined with fun. By playing the game, your child learns and improves addition skills.

The arcade game format of Alien Addition is a fast-paced, outer-space version of attackers versus defender. Alien ships that have addition problems on their sides are the attackers. The defender is a laser cannon, controlled by your child, that "equalizes" the alien ships with the correct answer. Different levels of skill and problem difficulty challenge your child to improve his or her speed and accuracy. Alien Addition's colorful graphics and "outer-space" sound effects enhance the action and add to the excitement.

PHM 3115 Module 6.95

Numeration 1 (Grades 1-2)

This program provides your child with a comfortable and rewarding atmosphere which encourages learning mathematics. It evaluates your child's progress by automatically comparing the number of problems your child answered incorrectly. The program either provides a review of the activity or presents a new activity, depending upon the number of problems your child answers correctly. For example, if there are 10 problems in an activity and your child answers 9 correctly, he or she advances to a new activity.

PHM 3050 Module 9.95

Multiplication (Grades 1-8)

Has 75 different problem levels that provide drill and practice for children in grades 1-8. Includes color graphics and reward sound effects for correct responses.

PHM 3092 Module 6.95

Integers (Grades 5-8)

The Integers cartridge is divided into 32 levels of difficulty, covering material generally taught in grades five through eight. The program provides practice using greater than (>) and less than (<) symbols, parentheses within an equation, and, especially, negative numbers. Children add, subtract, multiply, and divide using both positive and negative whole numbers. This program assumes that your child has mastered basic arithmetic and a certain degree of mental computation.

PHM 3094 Module

Fractional Numbers (Grades 4-8)

The Fractional Numbers cartridge is divided into 36 levels of difficulty, covering material generally taught in grades four through eight. The program provides practice with a wide variety of skills related to fractions, including finding common factors, recognizing order of fractions, reducing fractions to lowest terms, working with mixed numbers (whole numbers plus a fractional part), finding least common denominators, finding reciprocals, and changing fractions to decimals.

The program includes adding, subtracting, multiplying, and dividing fractional and mixed numbers. Problems are presented both vertically and horizontally. This program assumes that your child has mastered basic arithmetic and a certain degree of mental computation.

PHM 3095 Module 9.95

Early Learning Fun

There are four categories of activities in the module: Numbers, Shapes, Sorting, and the Alphabet. Within each group the activities are arranged according to difficulty, with the simplest exercises first. This "developmental" arrangement helps your child learn the skills he or she needs to progress through the activities. Fun for children ages 3-6.

PHM 3002 Module 4.95

Division 1 (Grades 3-6)

The Division 1 module stimulates the study of basic division facts with colorful graphics, challenging drills, and encouraging rewards. Division 1 module activities include:

"Divisors 1, 2, 3," "Divisors 4, 5, 6," and Divisors 7, 8, 9," - illustrate division by the divisors 1 through 9.

"Divide Using J" - presents division in the vertical format.

"Divide With a Remainder" - explains division with a remainder.

"How Many Boxes?," "Practice and Paint," and "Make a Picture" - give your child challenging and creative opportunities to practice the skills presented in the module.

PHM 3049 Module 4.95

Left to right: **Bryan O'Neal**, Marketing Manager; **Robin Reynolds**, General Manager; **Larry Ieom** (Standing), President; **Rex Ieom**, Vice President.

DOW FLIGHT SIMULATOR

This is a realistic simulation of flying for the serious pilot and is not recommended for children. Dow Flight Simulator requires responding to the controls once every 15 seconds, demanding intense concentration — as in real flying. This program involves simple maneuvers so turbulent air landing. The aircraft is equipped with a full complement of instruments and eleven indicator lights. Sound effects include engine noise, stall warning horn, crash sounds. Graphics include all instruments updated in real time and a runway for landing.

DOW 100

The entire PLATO® Basic and High School Skills Learning System can now be delivered on the TI Home Computer.

For more than twenty years, PLATO educational courses have set the standard for computer-based education. Until now, PLATO courses were primarily used at terminals connected to a mainframe computer. The kind of computer that typically large organizations could afford. Now, the power of the TI Home Computer makes PLATO courses on disks available to everyone.

The TI Home Computer as a tutor

The TI-99/4A with PLATO courseware now becomes a "special tutor" which

- is available at any hour, during weekends and vacations, never too busy for individual attention.
- lets the student set the pace—never so fast the student gets lost, never so slow it's boring.
- is infinitely patient, willing to repeat and review and retest a hundred times without getting upset or embarrassing the student.

Here's all that's required to use PLATO courseware:

- Disk Drive System
- 32K Memory Expansion
- PLATO Interpreter Solid State Cartridge

Parents interested in Basic Skills programs for their children get additional help when they buy the PLATO Interpreter Solid State Cartridge, because the package includes:

- The Survey Disks, which ask your child questions to determine strengths and weaknesses in reading, grammar, and math.
- The Parent's Questionnaire, which asks you questions that help you assess your child's academic skills.

SOFTWARE

COMPLETE DS/DD DRIVES - READY TO USE!

"Nearly a MB of Storage with Two Slim Line Drives"

These external disk drives are ideally suited for usage with any disk controller card that can control one or more double sided, double density disk drives.

At long last, affordable disk drives are available for your TI 99/4A and are fully compatible with all storage devices — TI, CorComp, Myarc, etc.

Either one or two of these slim disk drives is installed in our power supply cabinet. Each of the drives are double sided, double density — that's 360 KB with one slim drive or nearly 1 MB of storage capacity with two slim line drives!

With computing power so readily available from these quality Teac manufactured drives, now is the time to buy.

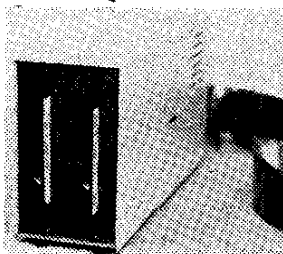

Requires: Console, Disk Controller Card. 32K recommended.

UNI 102X1 - One slim line DS/DD drive with power supply cabinet and cables.

\$199⁹⁵

UNI 102X2 - Two slim line DS/DD drives with power supply cabinet and cables.

\$339⁹⁵

HITACHI COLOR MONITOR

NEW!

This is a hot new version of a proven best-seller. Our Hitachi high resolution 13" composite monitor now features a non-glare screen, On/Off LED and a headphone jack. Features also include resolution of 260 (H) vs. 300 (V) lines, built-in speaker and audio circuit for 2-watt output. Controls are front mounted for easy access. **MONITOR CABLE INCLUDED.**

UNI 180 \$259⁹⁵

SEE PAGE 13 FOR MORE DISK DRIVE INFORMATION

The **FORTI MUSIC SYSTEM** allows a TI 99/4A computer to produce synthetic music that was never before possible. It allows control over the attack, sustain, resonance, and decay characteristic of generated sounds. It also allows generation of very low notes not possible from MUSIC MAKER or TI BASIC. In addition, percussion effects can be generated. To complete the list of new capabilities that the FORTI MUSIC SYSTEM adds to a TI 99/4A, up to 12 separate voices may be generated on either 2 or 4 channels for playing on a stereo system.

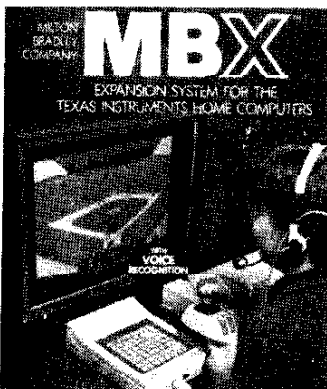

TEX 100 WAS \$299⁹⁵ NOW \$199⁹⁵

MBX SYSTEM: "Talk To Your Computer"

The MBX Expansion System is the only system providing voice recognition available for a home computer. It works with 10 software packages developed by Milton Bradley. Includes control unit, joy stick and microphone headset.

MBX 100 \$699⁹⁵

with purchase of any three MBX Software (\$99⁹⁵ if purchased separately)

SOFTWARE FOR MBX

- Championship Baseball (PHM 3148) \$19⁹⁵

EXPANSION PERIPHERALS!

Disk Drives — All disk drives sold by Unisource are guaranteed to be 100 percent compatible with the 99/4A Home Computer. All of these drives are ideally suited for the Peripheral Expansion system as well. Drives may be purchased either as a single drive "bare"—ready for insertion into the PE box—in single sided, single density or double sided double density if your disk controller card will control DS/DD, or the drives may be purchased "slim line bare"—meaning two drives will fit into the same opening of the box. These slim line drives may also be purchased single sided, single density or double sided, double density, again depending upon your disk controller card and do require an electrical conversion kit.

Requires disk controller, peripheral expansion box or disk drive power supply, cabinet and external drive cable.

UNI 106 Single Sided Single Density (Full Height Drives) \$169⁹⁵
(Please specify if this is a second drive)

UNI 102 Double Sided Double Density (Slim Line Drives) ea. \$179⁹⁵
(Please specify if this is a second drive)

Disk Drive Power Supply Cabinet — This is a complete power supply and cabinet designed to house either one full height disk drive or two slim line drives. Requires: Disk drive, disk controller, external disk drive cable.

UNI 196 \$59⁹⁵

Disk Controller Card — Manufactured by CorComp, this disk controller card will handle up to 4 double sided, double density disk drives and allows for multiple disk drive configurations. Requires: Peripheral expansion box, internal disk drive cable, 1-4 disk drives.

COR 102 \$159⁹⁵

32k Memory Card — Add 32k bytes of additional computing power to the console's 16k random access memory (RAM). This is a must for fully expanding the 99/4A's capabilities to run software like Extended BASIC, Mini Memory, Editor Assembler, TI-Writer and Microsoft Multiplan. Requires: Peripheral Expansion Box.

COR 104 \$109⁹⁵

RS232 Card — Provides necessary interface for either a serial or parallel printer or telecommunications modem. Purchase in conjunction with the printers on pages 4 & 5 for outstanding savings! Requires: Peripheral expansion box and either printer or telephone modem.

COR 101 \$89⁹⁵

Stand Alone RS232 — This is a low cost RS232 device for either a printer or a telephone modem that does not require the expensive Peripheral Expansion Box. Plugs directly into the side port and provides one serial and one parallel port.

COR 103 \$124⁹⁵

Free Standing 32k device — Accesses those programs requiring additional 32k memory without having to purchase the expensive Peripheral Expansion Box! Manufacturer varies, but this device is always compatible, and plugs directly into the side port of the computer.

BOX 100 \$129⁹⁵

Speech Synthesizer — The Solid State Speech Synthesizer reproduces human speech electronically, accurately and realistically with a variety of inflections and appropriate pitch. For children too young to read the screen, the Speech Synthesizer is ideal since it allows the computer to "talk" to the children. The Speech Synthesizer requires either the Speech Editor, Terminal Emulator II command cartridge or other programs designed to use speech. The TEII package provides unlimited text-to-speech capability which allows you to listen to data base information or have the computer say anything within your own program.

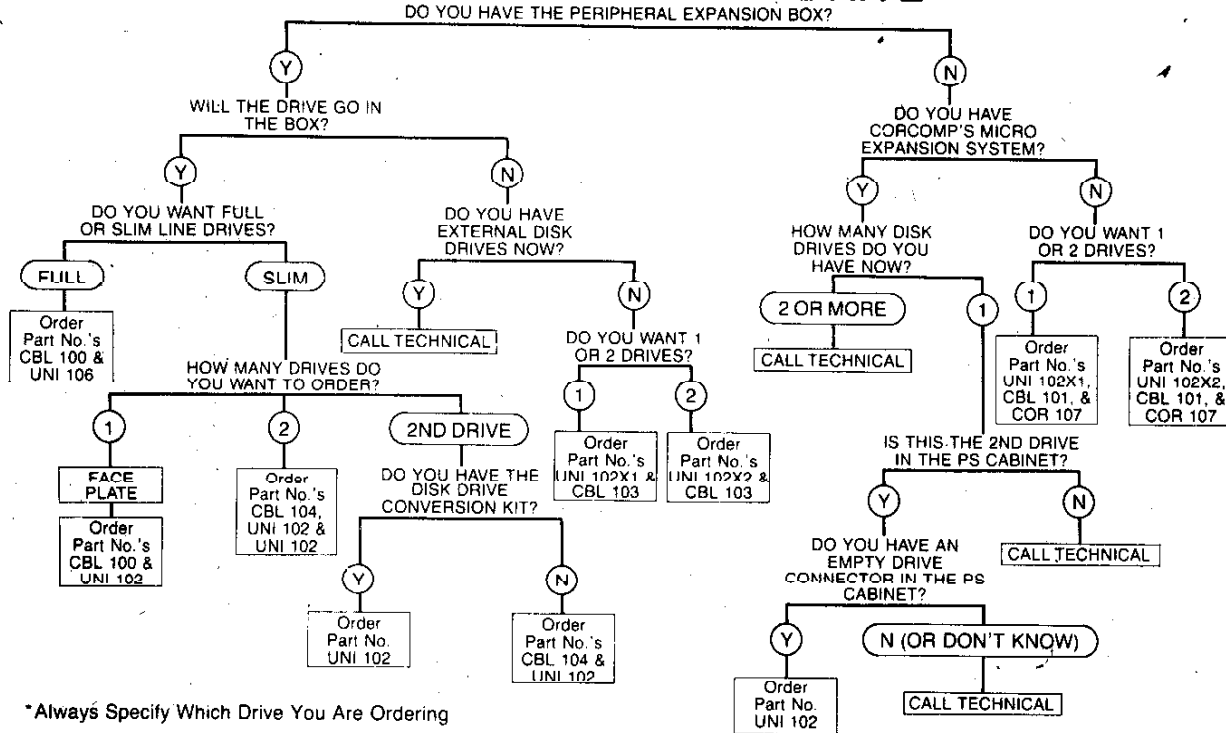

Required: Terminal Emulator II Module, or other software that uses speech.

PERIPHERALS

CHOOSING THE RIGHT DRIVE FOR YOUR TI 99/4A SYSTEM

With the diversity of the TI 99/4A, it is sometimes difficult to determine the best, most cost-efficient disk drive configuration for your system. We've attempted to simplify the whole situation with this easy to read route that is correct for your computer. When you get to a (box) you know which part numbers to order. You will find part numbers and prices below the flow chart. It's that easy! Order today!

"I WANT TO BUY A DISK DRIVE" *

*Always Specify Which Drive You Are Ordering

COMPLETE EXTERNAL DS/DD DRIVES - READY TO USE!

"Nearly a MB of Storage with Two Slim Line Drives"

These external disk drives are ideally suited for usage with any disk controller card that can control one or more double sided, double density disk drives. At long last, affordable disk drives are available for your TI 99/4A and are fully compatible with all storage devices — TI, CorComp, Myarc, etc.

Either one or two of these slim disk drives has been installed in our power supply cabinet. Each of the drives are double sided, double density—that's 360 KB with one slim drive or nearly 1 MB of storage capacity with two slim line drives!

With computing power so readily available from these quality Teac manufactured drives, now is the time to buy.

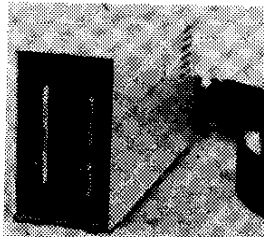

Requires: Console, Disk Controller Card, 32k recommended.

UNI 102X1 - One slim line DS/DD drive with power supply cabinet and cables.

UNI 102X2 - Two slim line DS/DD drives with power supply cabinet and cables.

DRIVES FOR THE PE BOX EXPANSION PERIPHERALS!

Disk Drives All disk drives sold by Unisource are guaranteed to be 100 percent compatible with the 99/4A Home Computer. All of these drives are ideally suited for the Peripheral Expansion system as well. Drives may be purchased either as a single drive "bare"—ready for insertion into the PE box—in single sided, single density or double sided double density if your disk controller card will control DS/DD, or the drives may be purchased "slim line bare"—meaning two drives will fit into the same opening of the box. These slim line drives may also be purchased single sided, single density or double sided, double density, again depending upon your disk controller card and do require an electrical conversion kit.

Requires disk controller, peripheral expansion box or disk drive power supply, cabinet and external drive cable.

UNI 106 Single Sided Single Density (Full

Height Drives) \$16995

(Please specify if this is a second drive)

UNI 102 Double Sided Double Density

(Slim Line Drives) \$17995

(Please specify if this is a second drive) ea.

ADDITIONAL PERIPHERALS FOR THE HOME COMPUTER

Disk Drive Power Supply Cabinet — This is a complete power supply and cabinet designed to house either one full height disk drive or two slim line drives. Requires: Disk drive, disk controller, external disk drive cable.

UNI 196 \$5995

Disk Controller Card — Manufactured by CorComp, this disk controller card will handle up to 4 double sided, double density disk drives and allows for multiple disk drive configurations. Requires: Peripheral expansion box, internal disk drive cable, 1-4 disk drives.

COR 102 \$15995

32k Memory Card — Add 32k bytes of additional computing power to the console's 16k random access memory (RAM). This is a must for fully expanding the 99/4A's capabilities to run software like Extended BASIC, Mini Memory, Editor Assembler, TI-Writer and Microsoft Multiplan. Requires: Peripheral Expansion Box.

COR 104 \$10995

RS232 Card — Provides necessary interface for either a serial or parallel printer or telecommunications modem. Purchase in conjunction with the printers on pages 4 & 5 for outstanding savings! Requires: Peripheral expansion box and either printer or telephone modem.

COR 101 \$8995

Prices, specifications & availability are subject to change. Please call for current price information.

Stand Alone RS232 — This is a low cost RS232 device for either a printer or a telephone modem that does not require the expensive Peripheral Expansion Box. Plugs directly into the side port and provides one serial and one parallel port.

COR 103 \$12995

Free Standing 32k device — Accesses those programs requiring additional 32k memory without having to purchase the expensive Peripheral Expansion Box! Manufacturer varies, but this device is always compatible, and plugs directly into the side port of the computer.

TI COUNT

PROFESSIONAL BUSINESS SOFTWARE FROM PIKE CREEK All require disk system.

TI-Count General Ledger

The General Ledger System instructs the user, step-by-step, through the day's activities. Each journal entry is typed into a form on the monitor, scanned for errors and edited immediately to speed the process. Ledger accounts (up to 650) can be updated on a daily basis so the businessman can control purchases, receivables, and most importantly, cash. Required: Extended BASIC, printer system, memory expansion (over 50 ledger accounts). **\$7495**

PIK 101 Disk

TI-Count—Accounts Receivable

Manage revenues by forecasting cash receipts and by printing billing statements and sales invoices. Required: TI-Count General Ledger, Extended BASIC, printer system, 32k memory. **\$7495**

PIK 102 Disk

TI-Count—Inventory

Maintains inventory records of virtually any number of items. Writes purchase orders and maintains backlogs. Required: TI-Count General Ledger, Extended BASIC, printer system, 32k memory. **\$7495**

PIK 106 Disk

TI-Count—Accounts Payable

Predicts the cash requirements of the business. Prints a check and stub when invoices or groups of invoices are selected for payment (sums up to 14 invoices on one check stub), includes an office filing system for invoices and a complete audit trail. Required: TI-Count General Ledger, Extended BASIC, printer system, 32k memory. **\$7495**

PIK 103 Disk

TI-Count—Payroll

Maintains payroll records for up to 100 employees, calculates appropriate withholding amounts, and writes payroll checks. It provides all information required for monthly, quarterly and annual payroll reporting. It merges with the TI-Count General Ledger for expense and asset recording. Required: TI-Count General Ledger, Extended BASIC, printer system, 32k memory. **\$7495**

PIK 105 Disk

TI-Count—Mailing

For mailing and subscription lists containing between 350 and 100,000 names. This system is designed to meet present requirements for U.S. Second Class Mail. Addresses are printed by zip codes and a zone report is prepared for the Post Office. Required: Extended BASIC, 32k memory, 132-column printer. **\$4995**

PIK 104 Disk

\$36995

ALL 6 FOR

DRAGONSLAYER

NEW AUTO SPELL CHECK!
20,000 WORD VOCABULARY!

This hot new version of a proven product is really exciting. The original Dragonslayer 99/4A Auto Spell Check took about 21 minutes to fully check a 100-sector document. This new version 1.1 will check the same document in 6.5 minutes. The time savings of this little disk will be enormous. The 99/4A Auto Spell Check is designed to work with TI Writer and allows authors, students and businessmen alike to produce perfectly-spelled, error-free documents. Requires TI Writer and a disk system. **\$4995**

DRA 100 D

Yu-Can Software Business Manager Inventory Control • Mail List • Order Entry & Invoicing

This unique collection of programs, including Inventory Control, Order Entry & Invoicing, and Mail List, are designed to work together to offer you tremendous versatility.

Inventory Control — This program will enable you to keep track of up to 1,000 items. Once stored on disk, items can be located by record number, stock number or description, and displayed or printed out for your review.

Order Entry & Invoicing — The Point of Sale subprogram will generate a printed invoice for you immediately after entering all order and customer data, or use the paper entry option

when you require a permanent disk record of your invoices. Either option will work with the Inventory Control program to keep your inventory up to date and automatically print out back-ordered items on your invoices.

Mail List — This program stores up to 1,000 names and addresses. Adding, deleting, or changing listings is a simple task, and you can design your own format for printing labels. You can also search lists and generate labels and/or reports from any one of nine different fields. This program will work with Order Entry & Invoicing to update your list when billing out to new customers. 32k memory and additional driver are optional. Required: Extended BASIC, RS232, printer. **\$4995**

YUW 101 Disk

LOWEST PRICE EVER!!

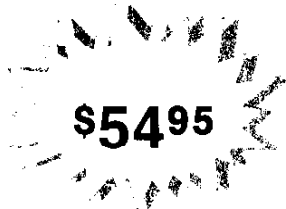

TI WRITER

PROFESSIONAL QUALITY

The TI Writer was designed to provide many of the features of larger, more complex word processing systems. Text editing and formatting features include inserting and deleting text and lines, automatic paragraph indentation, right margin justification, automatic word wrapping, overstriking and underlining, moving and copying text, and document reformatting. Users can create, edit, save, and print documents with the text editor option, in either word wrap or fixed mode (4A only). Required: Memory expansion, disk system, and printer system.

TI WRITER

PHM 3111 Module & Disk

Lowest Price Ever!

CONSOLE WRITER

NOW!
~~\$2995~~

The only word processor that requires no additional software or peripherals.

Console Writer turns your console into a simple word processor without expensive peripherals. With just a printer and the Home Computer, Console Writer affords newcomers to word processing an easy to understand and use program. Console Writer even has some of the features of expensive word processing systems like text editing and insertion/deletion. Documents may be saved to cassette and retrieved at a later time. **NAV 115**

TOP SELLER TYPWRITER

CASSETTE-BASED

A word processing system that grows with your computer system. Start with just Extended BASIC, any storage device and a printer — and you are ready to go. Line length of 28 to 254 characters per print line, holds 3000 characters before storage and 50,000 characters per disk or 60-minute cassette. Complete text editing including insert and delete lines, partial text print, printer halt or abort without text loss, page forward and backward and automatic line centering. Complete software control of printer including underlining, variable cpi, etc. Includes 20-page instruction book. Required: Extended BASIC and printer.

EXT 118 C Cassette \$2795
EXT 118 D Disk \$2995

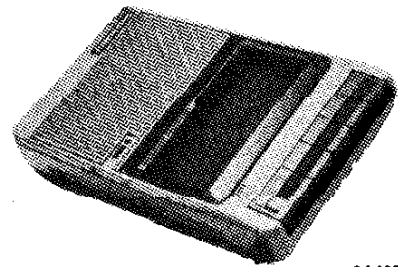

"I am happy to say I've done business with Unisource for years and have always been happy with both the products and service I've received. But I really would like to know what you guys look like!"

— Roger E., Los Angeles

(Just look through this flyer!)

AFFORDABLE DATA/PROGRAM STORAGE CASSETTE RECORDER

The Panasonic Computer Recorder is a low cost method for storing data and/or programs on standard cassette audio tapes. It is guaranteed to be 100% compatible with the TI home computer. It includes tone control, volume control, tape counter, and much more. Designed specially for computer data and program storage.

UNI 137 (requires cassette interface cable) \$4495
UNI 137 CH (includes cassette interface cable) \$5295

HOME MANAGEMENT SOFTWARE

Take Control of your Home!

CHECKBOOK MANAGER

Checkbook Manager makes having a checking account fun! Besides being fun to use, the Checkbook Manager program incorporates features that distinguish AMA Software. It uses routines from Business System Software which is very User Friendly. The routines are fast and efficient; the program is practical and extremely useful.

The program provides routines that allow you to add, change, cancel, and delete checks. Also the program includes a data base of information that records the number, amount, and even a description of all current checks and deposits.

With the Checkbook Manager, you have ready at hand your own careful and up-to-date accounting of your checkbook. Checkbook Manager is an invaluable tool to care for the needs of your personal finance.

AMA 101 C Cassette \$1295
AMA 101 D Disk \$1795

CASH CONTROLLER

Cash Controller is the definitive number cruncher. The program allows you to enter mathematical calculations PLUS a description of each entry. Cash Controller can handle mathematical formulas with up to seventy-five elements! This comprehensive feature, added to the description option and the powerful data manipulation features, makes Cash Controller an outstanding program for teaching mathematical forecasting.

The program has the added capability to load and save data from either cassette or floppy disk, thus providing file records for future reference and use. The versatility of Cash Controller provides the means for you to discover uses which meet your personal needs in cash control.

Cash Controller incorporates convenient editing functions, and you may even change screen color to help control your cash.

AMA 102 C Cassette \$1295
AMA 102 D Disk \$1795

NEW!

**“THREE PRODUCTS ... ONE CARD!”
TRIPLE TECH**

**FILL ONE
SLOT WITH
THE POWER
OF 3 CARDS!**

CLOCK/CALENDAR: Provides real time: YEAR, MONTH, DATE, DAY OF THE WEEK, HOURS, MINUTES AND SECONDS. The Clock/Calendar will feature a crystal controlled oscillator accurate to .002% and battery back-up so that the clock calendar will still operate for over six months even with power turned off.

The Clock/Calendar can easily be accessed through either TI BASIC or TI Extended BASIC. This makes the CorComp Clock/Calendar portion of TRIPLE TECH ideal for bulletin board systems, computerized time management and the computing of the hobbyist.

64K PRINTER BUFFER: The Buffer is virtually compatible with any printer and requires no user modification of software — it installs easily, in seconds.

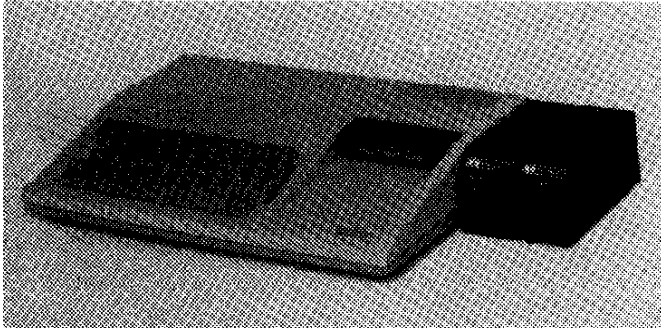

FEATURES:

- 64k Memory
- Copy Function for immediate duplication of print-out
- Clear Function to empty buffer

SPEECH SYNTHESIZER CONNECTION: Now you can place your TI Speech Synthesizer board into your TI Peripheral Box. You simply remove the TI Speech Synthesizer board from its housing and plug on to TRIPLE TECH!

TRIPLE TECH will allow you normal use of your TI Speech Synthesizer while eliminating the need for the external box plugged into the side of your console.

COR 112 \$12995

(9900 Clock Stand Alone Shown with CorComp 32K Stand Alone, Console and 32K Not Included.)

The CorComp Clock/Calendar Stand Alone provides a simple means of accessing in real time the: YEAR, MONTH, DATE, DAY OF THE WEEK, HOURS, MINUTES AND SECONDS. The Clock/Calendar will feature a crystal controlled oscillator accurate to .002% and battery back-up so that the clock calendar will still operate for over six months even with the power turned off.

The Clock/Calendar can easily be accessed through either TI BASIC or TI Extended BASIC. This makes the CorComp Clock/Calendar ideal for bulletin board systems, computerized time management and the hobbyist's programming.

The 9900 CorComp Clock/Calendar will be housed in a small black metal box 5" x 2" x 2 1/2" patterned after the CorComp 9900 Micro Expansion System. It plugs directly into the side of the 99/4A or it can daisy chain with the TI Speech Synthesizer and other CorComp stand alone products.

LOAD INTERRUPT SWITCH: As an additional feature 9900 Clock/Calendar Stand Alone will have a Load Interrupt Switch to allow use of the newest screen dump programs now available for the TI 99/4A.

COR 113 \$7995

IN STOCK!

**CORCOMP 9900 MICRO EXPANSION SYSTEM
SEE PAGE 13 FOR CORRECT DISK DRIVE APPLICATION**

COR 107 \$32495
(Does not include disk drive)

The term MICRO definitely fits the small black box measuring 5" x 5" x 3" which can replace the TI Peripheral Expansion Box measuring 17" x 12" x 7". This amazing box is being credited with making the 99/4A a portable computer! The console, 9900 MICRO EXPANSION SYSTEM and half-height drive fits easily into a briefcase or suitcase! Another exciting feature is that there is no longer the constant "hum" of the old P-Box fan!

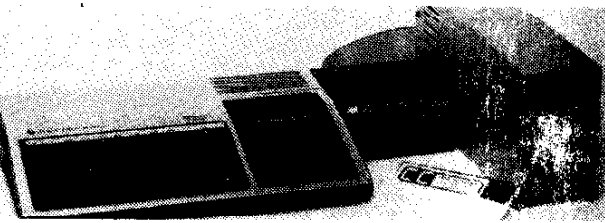

With the additional memory and the new CorComp Double-Sided, Double-Density Disk Controller capability, the user can control up to 4 disk drives. Each Double-Sided Double-Density drive will store 360k bytes of information. With two DS/DD drives hooked up the on line storage is 720k and with four DS/DD drives, it is increased to 1.4 megabytes. Tests to date have shown that the CorComp 9900 MICRO EXPANSION SYSTEM runs even faster than the 9900 Disk Controller for the TI P-Box.

The CorComp 2.3 Disk Manager is supplied on 5 1/4" floppy disk. This program is considerably faster than TI'S. It's the same Disk Manager which met with rave reviews when CorComp introduced the 9900 DS/DD DISK CONTROLLER CARD. One of the many enhancements of this program is that it allows the user to CONFIGURE the manager to his system. He can select his own text and screen colors, set up each of the different drive types attached to the controller for number of sides, density and number of tracks. The printer type can be configured for catalog and disk test printouts. The configuration is saved on the disk and used as the defaults when the disk manager is loaded.

The CC-Disk Controller also adds eight new commands and programming statements to BASIC and Extended BASIC.

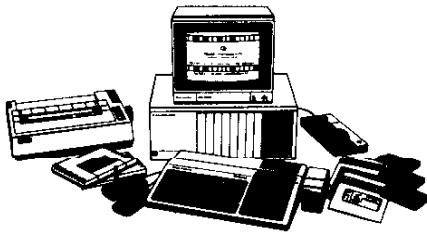

Revolutionary is the word being used to describe the CC-9900 MICRO EXPANSION SYSTEM. The small black box offers the most compact and practical approach ever available for expanding the 99/4A!

COR 103 RS232 Stand Alone with 1 Serial and 1 Parallel Port \$12495
COR 108 Upgrade Kit for 32K Ram and Disk Controller \$25995

"WE'RE UNISOURCE ELECTRONICS."

AN OPEN LETTER TO OUR CUSTOMERS

Since 1981, Unisource Electronics, Inc. has provided the best in products and service for the 99/4A Home Computer.

And we continue to grow and thrive thanks to dedicated loyalists like you. We offer more than 1,000 quality items for the Home Computer, with a full inventory of Texas Instruments software, plus the most complete line of third party hardware, software, peripherals and accessories available.

Our commitment to you also continues to grow as well. Like our new mainframe computer (Texas Instruments manufactured, naturally!) that handles all of our order processing functions instantly, for the fastest, most expedient service possible in getting your order shipped. Like extended customer service hours for your convenience. Like friendly, trained technical service personnel. Like expanded hours and toll-free order lines — **1-800-858-4580** (1-806-745-8834 in Texas). Even with all of this, Unisource Electronics provides the lowest in discount prices.

The prices represented in our catalog represent current prices at press time. Always check our periodic sale flyers for up-to-the-minute pricing. That's why we send out so many sale flyers!

We're Unisource Electronics, your one source for all of your 99/4A computer needs since 1981. Sometimes being the oldest does mean being the best.

Regards,

Larry Isom, President

Happy Computing,

Robin Reynolds, General Manager
