Exchange

**Catalog listing of
fairware programs
for the T199/4A**

FAIRWARE EXCHANGE
c/o Robert Neal
317 Hickory
Romeoville, IL 60441

This is the current catalog listing (catalog #3) of the FAIRWARE EXCHANGE. This listing contains over 150 selections which includes over 200 different programs. Any and all programs contained are available at a cost of \$2.50 (an additional \$1.00 per extra disk) or any user may exchange a program not in the library on a one for one basis.

The fee charged is not as payment for the program but is being accessed as a copying charge to cover the expenses for disk, mailer, postage and other associated costs. You are encouraged to send the author(s) of these programs payments for those that you find of use to you.

The fine thing about fairware is that you can try BEFORE you buy the program. Many of these fine programs are of commercial quality and if these were marketed as a commercial product you could expect to pay at least twice the asking price. Your support of these authors will only further prompt them to continue to produce such fine products. If we 4A users continue to take but never give we shall soon see the pool of quality fairware programs disappear.

The disk number listed for each program contains a letter that indicates the category of the program, such as U001, this would be of the category 'U' which is for utilities. Here is a explanation of the different categories:

G - Games H - Home and Financial M - Miscellaneous
P - Program languages U - Utilities

Please note that I have tried to compile and complete and accurate listing of all the programs contained in the FAIRWARE EXCHANGE library. I do not assume any responsibility for the quality of the programs, nor usefulness of the program, nor do I claim ownership of these programs. The FAIRWARE EXCHANGE is being offered as a service to the TI community and hopefully will aid the authors of these fine programs a chance to further expand their market of their programs and subsequently result in more payments to them.

I hope the authors and users view this as such and not as a money making venture on my part. I feel that the fee being asked is nominal in comparison to what user groups and other parties charge for similar arrangements.

```

Disk #:G001   TI-RUNNER II           Vers: 1.0       Extra:          Added  : 12/20/86
              Author: Michael Salley                                Updated: 12/20/86

```

A completely different set of screens to be used with the TI-Runner program (available commercially). These screens are totally unique, creative and further expand the enjoyment of the TI-Runner program. BOARDMAKER is also included.

```

=====
Disk #:G002   MONOPOLY XB           Vers:          Extra:          Added  : 12/20/86
              Author: Mike Wright                                  Updated: 12/20/86

```

A nicely done version of the popular board game.

```

=====
Disk #:G003   COMPUTER CRAPS       Vers:          Extra:          Added  : 12/20/86
              Author:                                              Updated: 12/20/86

```

Uses graphics and sound effects to simulate a craps game. Written in XBASIC.

```

=====
Disk #:G004   MS ADVENTURES        Vers:          Extra:          Added  : 12/20/86
              Author: Mike Stewart                                Updated: 12/20/86

```

3 different text adventures, each well written. Written in assembly language, giving the program quick response time. Disk also contains the solutions to each adventure if needed.

```

=====
Disk #:G005   TI99-OPOLY           Vers: 1.4       Extra:          Added  : 12/20/86
              Author: Ross Mudie                                  Updated: 12/20/86

```

Another version of the popular board game. This program is an excellent version for the 4A.

```

=====
Disk #:G006   WIT-GAMES            Vers:          Extra: 2        Added  : 12/20/86
              Author: Chris Lang                                  Updated: 12/20/86

```

Included are five different programs, educational word games for ages 6 and up. Programs are: Game of Wit (a scrabble type game), Nit-Wit, Wit or Wit-Out, Wittle Tags and Wit's End.

```

=====
Disk #:G007   S-O-X                Vers:          Extra:          Added  : 12/20/86
              Author: Dave Dalton                                  Updated: 12/20/86

```

Search for Xylose. An adventure game with limited graphics. Find Xylose by defeating partner in 5 events.

Disk #:G015 MAJOR TOM Vers: Extra: Added : 06/01/87
Author: Classic Software Updated: 06/01/87

A great assembly language program. Had originally been released as a commercial program. Nice graphics, very challenging. I bought this as a commercial program and found it very well written, now as fairware, you can't go wrong.

=====
Disk #:G016 THE QUEST Vers: Extra: Added : 09/30/87
Author: Jim Beck Updated: 09/30/87

A D&D type of adventure game, with comments that this is the best D&D type of game for the TI.

=====
Disk #:G017 GAME PAK I Vers: Extra: Added : 09/30/87
Author: Various Updated: 09/30/87

An assortment of games including BATTLESHIP (EA5), BLITZ (EA5-Donkey Kong Style), CHAIN SOLITAIRE (v5/XB with a/l), GUARDIAN (similar to arcade game Rip-off, EA5), FIREBALL (XB pinball construction set), MISSILE (XB Missile Command) and JOKER POKER.

=====
Disk #:G018 TOD/ADVENTURE PAK Vers: Extra: Added : 09/30/87
Author: Various Updated: 09/30/87

Disk contains 2 different files for the Tunnels of Doom module; DOCTOR WHO and SPACE MINE. Also includes 3 different files for the Adventure module; JAMES BONDO, HOUSE ADVENTURE, and TREASURE.

=====
Disk #:G019 GAME PAK II Vers: Extra: Added : 06/01/88
Author: Various Updated: 06/01/88

Includes Breakthru (c99-a classic), Karate (EA5-battle against the computer), OHMUMMY (EA5-very good), TI POKER (XB), and BUZZARD BAIT (EA5-PacMan style of game, interesting).

=====
Disk #:G020 GAME PAK III Vers: Extra: Added : 06/01/88
Author: Various Updated: 06/01/88

Three different games, all assembler with an XB loader included. Cat & Mouse, I'm Lost (great maze game) and Bomber.

=====
Disk #:G021 SARGON Vers: Extra: Added : 06/01/88
Author: Mike Swiridenko Updated: 06/01/88

Chess game for the TI based on the classic Sargon. Won't beat any speed records, but the game is challenging.

```

Disk #:H006  MAILLIST          Vers:          Extra:          Added   : 12/20/86
              Author: Fred Guyton                               Updated: 12/20/86

```

Another maillist program.

```

=====
Disk #:H007  FINANCIAL DECISION A  Vers:          Extra:          Added   : 12/20/86
              Author: Fred Guyton                               Updated: 12/20/86

```

Financial analysis program, allows figuring of annuities, etc.

```

=====
Disk #:H008  PR-BASE              Vers: 2.1      Extra: 1        Added   : 12/20/86
              Author: William Warren                           Updated: 06/01/88

```

Excellent data base program. Custom screen and report layouts. Written in assembler for speed. Selectively sort on a given field, print mailing labels, and quickly search and locate data. 2.1 mod by Mike Dodd. Version 2.0 available on request.

```

=====
Disk #:H009  EE BONDMASTER        Vers:          Extra:          Added   : 12/20/86
              Author: Kent Thompson                            Updated: 12/20/86

```

A database type program which helps to keep track of the present value of your EE bonds. Not a program for everyone, but very useful for those who have several bonds to keep tabs on.

```

=====
Disk #:H010  BOOKKEEPING +        Vers:          Extra:          Added   : 12/20/86
              Author:                                               Updated: 12/20/86

```

A complete ledger package for organizations and small businesses.

```

=====
Disk #:H011  TAXMASTER 87         Vers:          Extra:          Added   : 12/20/86
              Author:                                               Updated: 12/20/86

```

A tax program which let's you play a what if type scenario with your taxes. Will also allow you to print reports directly on IRS form. Update to program not available, may be useful for those wishing to modify.

```

=====
Disk #:H012  MAIL CALL            Vers:          Extra:          Added   : 12/20/86
              Author: WattsWare                                  Updated: 12/20/86

```

Allows users to create, maintain and print mailing lists. Includes a program that allows it to use TI-Writer mailing lists.

Disk #:H013 CREATIVE FILING SYS Vers: 5.0 Extra: 2 Added : 04/01/87
 Author: Mark Beck Updated: 04/01/87

Comprehensive data manager allows user to create up to 16 fields of data with a limit of 28 characters per field. Multiple files may be stored on a single disk. May display records based on criteria, append, search, change and sort files.

=====
 Disk #:H015 P&A MAIL LIST Vers: Extra: Added : 06/01/87
 Author: P&A Software Updated: 06/01/87

The program looks like it offers it all, scan, sort by name, search, sort by zip, 1 or 3 label print option, merge file option and more. Also included is SUPERLOADER and DISKLABEL 99.

=====
 Disk #:H016 MUSIC INVENTORY Vers: Extra: Added : 06/01/87
 Author: Larry D. Duke Updated: 06/01/87

If you're looking for a program to help keep track of your album, tape and CD collection, this is the one. Written in assembler, allows you to enter the artists name, selection name, comments and type (album, tape or CD).

=====
 Disk #:H017 PERSONAL AUDITOR Vers: Extra: Added : 06/01/87
 Author: W. Gaskill Updated: 06/01/87

A well written financial program. Program includes a REPORT GENERATOR and most functions have help screens. Documentation is not included, rather the program is free and documentation may be ordered for \$15 from the author.

=====
 Disk #:H018 TICKLER99 Vers: Extra: Added : 06/01/87
 Author: Tom Moran Updated: 06/01/87

An appointment reminder type of program, used to "tickle" your memory about important appointments. Also included is a database program.

=====
 Disk #:H019 NUTRIGUIDE Vers: Extra: Added : 09/30/87
 Author: Meadows Updated: 09/30/87

A nutrition program designed to aid in calculating various nutritional information in a recipe or a meal.

=====
 Disk #:H020 INVESTOR HELPER Vers: 1.0 Extra: Added : 09/30/87
 Author: Ken Finto Updated: 09/30/87

Program to help keep track of stock purchases and valuation.

```

Disk #:H021   TI LEDGER           Vers: 1.2   Extra:      Added  : 06/01/88
              Author: Don Scott - mods by B. Ga   Updated: 06/01/88

```

General ledger program. Documentation states that this program is just like the Automated Account program available for the IBM.

```

=====
Disk #:H022   FAS-TRAN           Vers: 2.5   Extra: 1    Added  : 10/01/88
              Author: Bill Harms                 Updated: 10/01/88

```

Complete check book reconciling program, budgeting tool. Fast with assembler support, reviews claim this to be the best program of it's type.

```

=====
Disk #:M001   UTILITIES         Vers:      Extra:      Added  : 12/20/86
              Author: Various                   Updated: 12/20/86

```

An assortment of utilities such as 64TERM (terminal emulator written in FORTH), SECTOR (disk sector editing program), SONGS, SUPERTRAN and V/DIALER.

```

=====
Disk #:M002   JET DISK1         Vers:      Extra: 1    Added  : 12/20/86
              Author: John Taylor               Updated: 12/20/86

```

Several different programs for children, mostly of an educational type. Nicely done graphics and sound to keep the childrens attention.

```

=====
Disk #:M003   TIBBS             Vers: 5.0   Extra: 2    Added  : 12/20/86
              Author: Ralph Fowler             Updated: 12/20/86

```

One of the more popular BBS programs for the 4A.

```

=====
Disk #:M004   TECHIE BBS       Vers: 4.0   Extra: 1    Added  : 12/20/86
              Author: Monty Schmidt           Updated: 12/20/86

```

A complete BBS system which is simple to set up and use. Offers xmodem file transfers and online game capabilities.

```

=====
Disk #:M005   CLINIC BBS       Vers: 2.5   Extra: 1    Added  : 12/20/86
              Author: Robert Neal            Updated: 12/20/86

```

Here's another program by me, uses the assembly routines from Techie. Offers many features such as multiple message bases (up to 8) which rotate with rotation counter set by you, e-mail, and other features too much to list. Makes use of Triple Tech.

```

=====
Disk #:M006   DISK COPIERS           Vers:           Extra:         Added  : 04/01/87
              Author: Various                               Updated: 04/01/87

```

Assortment of different disk copy program such as COPYMASTER, MORINCOPY, RETRACK, SUPERCOPY, TRACK-HACK and XB TRACK-HACK v2.0. A copy program for Cor-Comp controller is also included.

```

=====
Disk #:M007   MXT BBS                Vers: 102       Extra: 1        Added  : 05/01/87
              Author: Gary Owens & Stu Olson              Updated: 05/01/87

```

Bulletin Board System, in addition to the standard x/modem protocol, includes MXT protocol (multiple xmodem transfers) for use with Mass Transfer.

```

=====
Disk #:M008   HRD MENU                Vers: 7.3       Extra:          Added  : 05/01/87
              Author: J. Johnson                          Updated: 10/01/88

```

If you have the Horizon Ramdisk and don't have this current version of the ROS/MENULoader, you'll want it. Two seperate pages of loaders, improved ROS.

```

=====
Disk #:M009   SLIDE SHOW              Vers:           Extra:          Added  : 05/01/87
              Author: Bud Wright                          Updated: 05/01/87

```

Similar in design to the commercial program Display Master, but falls a little short in the features and speed of display. Allows you to display various TI-Artist pictures for presentations.

```

=====
Disk #:M010   SORGAN                  Vers:           Extra:          Added  : 06/01/87
              Author: Jerome Trankel                      Updated: 06/01/87

```

A rather unique and interesting program. Transforms your TI Keyboard into that of an organ, complete with notes, chords, etc. Nice program to play with and show your friends as a demonstration.

```

=====
Disk #:M011   ANIMATOR                Vers:           Extra:          Added  : 06/01/87
              Author: Mike McCann                        Updated: 06/01/87

```

Here's a unique program. While it's not one you would use every day, it looks to be interesting. By using sprites, the TI can now animate pictures. Comes with a demo file, shows some interesting applications. Animation is quick and smooth.

```

=====
Disk #:M012   TI-NET BBS              Vers: 3.9       Extra: 1        Added  : 06/01/87
              Author: Erik Olson & Matt Storm             Updated: 06/01/87

```

This program has many fine features, both for sysop and user. This system may not be for everyone, but offers alot of extras, wordwrap, gameroom, multiple bases, more.

Disk #:M020 PRINTER CAPABILITIES Vers: Extra: Added : 10/01/88
Author: Lou Borrelli Updated: 10/01/88

TI-Writer tutorial and printer set-up tutorial. Comes with program to allow you to set your printer from a menu driven program.

=====
Disk #:M021 TEXT LOADER Vers: Extra: Added : 10/01/88
Author: Curtis Provance Updated: 10/01/88

Allows you to 'run' a text file created with TI-Writer (DV80).
Allows easy editing and creation of program using text editor.

=====
Disk #:M022 MAX-RLE Vers: Extra: Added : 10/01/88
Author: Travis Watford Updated: 10/01/88

Display RLE pictures plus print to printer or save off in several other formats such as TI-Artist and Graphx.

=====
Disk #:M023 GENEALOGY DATABASE Vers: Extra: Added : 10/01/88
Author: Hunter Valley 99/4A UG Updated: 10/01/88

Complete, full function, genealogy program. Written in assembler, load via EA opt 5.

=====
Disk #:M024 AFTER HOURS BBS Vers: Extra: 1 Added : 10/01/88
Author: Ed Schaum Updated: 10/01/88

Full featured BBS program, written in assembler. VERY FAST operation. Does not require any special cabling to modem to operate. Looks to be easy to maintain and run. Built in clock, file transfers, multiple message bases, email and more.

=====
Disk #:M025 BIBLE TRIVIA Vers: 2.0 Extra: Added : 10/01/88
Author: Steven Degeare Updated: 10/01/88

A trivia game where you try to figure out the answers relating to questions of the bible.

=====
Disk #:M026 TIMP PRINT Vers: 2.0 Extra: Added : 10/01/88
Author: J&B Mathis Updated: 10/01/88

Allows you to enter printer commands in your Multiplan spreadsheets to give your spreadsheet a nicer appearance with enlarged, bold, compressed fonts, etc.

```

disk #:M027  POP MUSIC          Vers: 1.1      Extra:      Added  : 10/01/88
              Author: Roman Majeur                Updated: 10/01/88

```

A collection of 4 well written E/A music programs. Includes some interesting graphics during the play of the music as well.

```

=====
disk #:M028  DUMPIT            Vers:          Extra:      Added  : 10/01/88
              Author:                                Updated: 10/01/88

```

Allows you to dump your cartridge based programs off to disk. Complete with instructions on 'how-to'.

```

=====
disk #:P001  MACRO ASSEMBLER   Vers:          Extra:      Added  : 12/20/86
              Author: R. A. Green                   Updated: 12/20/86

```

Macro assembler program, allows you to create a library of functions which may be called upon when writing assembler code to shortcut your coding.

```

=====
disk #:P002  PILOT '99'        Vers:          Extra: 1     Added  : 12/20/87
              Author: Tom Weithofer (DECEASED)      Updated: 12/20/87

```

Pilot language for the TI. Written in forth. Many added features over the standard PILOT language.

```

=====
disk #:P003  C99 REL 3         Vers: 2.1     Extra: 1     Added  : 12/20/86
              Author: Clint Pulley                 Updated: 09/30/87

```

C99 program.

```

=====
disk #:P004  SUPER XB SUBROUTINES  Vers:          Extra:      Added  : 06/01/88
              Author: Art Beyer                    Updated: 06/01/88

```

XB mergeable subroutines which emulate the new features found in the Super XB module. No need to buy a new module when these routines can be used right from TI Extended Basic (and compatibles).

```

=====
disk #:U001  DISK MANAGER 1000     Vers: 3.8     Extra: 1     Added  : 12/20/86
              Author: Ottawa Users Group           Updated: 09/30/87

```

A truly excellent disk manager program. Will run from either E/A or X/B with loader program included. Documentation included on disk. Now modified to operate with multiple ramdisks.

Disk #:U002 FUNNLWEB WRITER Vers: 4.1 Extra: 1 Added : 12/20/86
Author: Funnelweb Farms Updated: 11/01/87

A fine fairware program that eliminates the need for TI-Writer module. Loads via X/B or E/A. Comes with many extra features such as running E/A programs from it's loader menu and an improved Show Directory.

=====
Disk #:U003 DISK MANAGER 99 Vers: 2.3 Extra: Added : 12/20/86
Author: Mike Dodd Updated: 09/30/87

A memory resident program that once loaded from X/B, you can call up any of the functions of the Disk Manger II module without leaving the X/B environment. Features include catalog, delete, rename initialize and more. Great utility.

=====
Disk #:U004 SCREEN DUMP Vers: Extra: Added : 12/20/86
Author: Danny Michaels Updated: 12/20/86

An outstanding screen dump package that offers many options including INVERSE, ROTATE and more. Once loaded in X/B, it remains resident until you turn off your system. Program requires a load interrupt switch. Documentation on disk.

=====
Disk #:U005 NEATLIST Vers: Extra: Added : 12/20/86
Author: Danny Michaels Updated: 12/20/86

Another outstanding program from the author of SCREEN DUMP. Program resides in memory once loaded into X/B to produce a truly unique listing of your program and a complete cross reference listing of all variables.

=====
Disk #:U006 SPRITE BUILDER Vers: Extra: 1 Added : 12/20/86
Author: J. Taylor Updated: 12/20/86

A utility program that allows you to design your sprites on screen and once created, the program will produce the code needed to incorporate it into your X/B program.

=====
Disk #:U007 EASY SPRITE Vers: Extra: Added : 12/20/86
Author: Shenango Enterprises Updated: 12/20/86

Another sprite editor program.

=====
Disk #:U008 FORTH SPRITE MAKER Vers: Extra: Added : 12/20/86
Author: Doug Smith Updated: 12/20/86

Another sprite creation program, but written in FORTH.

```

=====
Disk #:U009   JP GRAPHICS           Vers:           Extra:         Added   : 12/20/86
              Author: J.P. Morin                Updated: 12/20/86

```

A drawing program written in FORTH. While it's application are not as diverse as those found in other drawing programs, this version makes use of LOGO type commands to create drawings.

```

=====
Disk #:U010   FORTH VOLK           Vers:           Extra:         Added   : 12/20/86
              Author: J. Volk                   Updated: 12/20/86

```

A collection of FORTH programs. No documentation available, but a menu of programs and how to load is included on screens 2 and 3.

```

=====
Disk #:U011   FORTH DATA I       Vers:           Extra:         Added   : 12/20/86
              Author: Various                   Updated: 12/20/86

```

More FORTH programs, each auto loads from the menu contained on screens 2 and 3. No other documentation is available.

```

=====
Disk #:U012   FORTH DATA II      Vers:           Extra:         Added   : 12/20/86
              Author: Various                   Updated: 12/20/86

```

Still more FORTH programs, same set-up as U011.

```

=====
Disk #:U013   MASS TRANSFER       Vers: 4.3       Extra:         Added   : 12/20/86
              Author: Stu Olson                 Updated: 02/28/87

```

An excellent terminal package, offers x/modem and now y/modem file transfers, auto dial capabilities and a PC-Pursuit autodialer. Other features include 12K text buffer, screen dump catalog listing and more.

```

=====
Disk #:U014   FAST TERM           Vers: 1.16r     Extra:         Added   : 12/20/86
              Author: Paul Charlton            Updated: 09/30/87

```

Nice terminal emulator package which offers many features including x/modem transfers, built in timer, large text buffer and screen dump. This version now adds autodialing capabilities. Includes modified code for autodialer and keyboard macros.

```

=====
Disk #:U015   DIRECTOR '99'       Vers: 1.3       Extra:         Added   : 12/20/86
              Author: Robert Neal / Ed Burt    Updated: 12/20/86

```

Catalog your library collection including cartridges and disks. Includes REPORTER '99' which offer 5 different report choices and UPDATE '99' to edit DIRECTOR '99' data. 700 files SS/SD disk, 1400 DS/SD. A 56 char description for each entry may be added.

```

Disk #:U016   SIDE PRINT           Vers: 3.4   Extra:      Added  : 12/20/86
              Author: Jim Sewdlow                Updated: 09/30/87

```

Program allows you to print a Multiplan file sideways on a page.

```

=====
Disk #:U017   TI-WRITER REWRITE    Vers:      Extra:      Added  : 12/20/86
              Author: Dick Altman                Updated: 12/20/86

```

A helpful file which explains most of the features of TI-Writer.
Great extra for those who are using any of the TI-Writer clones and
don't have the manual.

```

=====
Disk #:U018   HYPHENATOR           Vers: 2.0   Extra:      Added  : 12/20/86
              Author: Wayne Stith                Updated: 12/20/86

```

A utility to be used in conjunction with TI-Writer to aid in placing
hyphens in your DV80 text. Written in assembly for speed.

```

=====
Disk #:U019   UNIVERSAL DISSASMBLR Vers:      Extra:      Added  : 12/20/86
              Author: Renee Lebanc                Updated: 12/20/86

```

Offers capabilities to analyze diskettes and disassemble files
directly from disk as well as from memory. Handles all TI object file
formats.

```

=====
Disk #:U020   RAPID SCROLL          Vers:      Extra:      Added  : 12/20/86
              Author: Jurgen Switlski            Updated: 12/20/86

```

A nice utility that allows you to read a DV80 files on screen in
either 40 or 64 column mode. Movement of characters is a single
character sideways or up/down. Nice utility program written in
assembler. Also includes MAILLIST and LOADMENU.

```

=====
Disk #:U021   VALWRITE             Vers:      Extra:      Added  : 12/20/86
              Author: Steven Tuorto              Updated: 12/20/86

```

Used in conjunction with PRK module to take data files from PRK data
disk and format into a TI-Writer compatible file.

```

=====
Disk #:U022   TI-WRITER HELPER     Vers:      Extra:      Added  : 12/20/86
              Author: Various                    Updated: 12/20/86

```

Information in using the features of TI-Writer.

```

Disk #:U023   TI-SINGS                      Vers:           Extra:         Added   : 12/20/86
              Author: Trio+ Software                Updated: 12/20/86

```

Now your computer can sing the blues, rock, anything you choose to write with the music editor built in. In addition to creating your own music, this disk comes with several sample music files.

```

=====
Disk #:U024   C99 EXTRAS                    Vers:           Extra:         Added   : 12/20/86
              Author: Clint Pulley                 Updated: 12/20/86

```

Collection of files to be used in conjunction with C99 program.

```

=====
Disk #:U025   C99 FILES I                   Vers:           Extra: 1       Added   : 12/20/86
              Author: Various                     Updated: 12/20/86

```

More C99 files.

```

=====
Disk #:U026   C99 FILES II                  Vers:           Extra:         Added   : 12/20/86
              Author: Various                     Updated: 12/20/86

```

More C99 files.

```

=====
Disk #:U027   TI DISK SORT                  Vers:           Extra:         Added   : 12/20/86
              Author: David Romer                 Updated: 12/20/86

```

An excellent utility program that will allow you to create a data file using TI-Writer and sort the data on whatever fields you choose. A primary and secondary field may be selected. Written in assembler, fast sorts.

```

=====
Disk #:U028   TOUCH PRINT                   Vers: 1.1       Extra:         Added   : 12/20/86
              Author: SagerSoft Software          Updated: 12/20/86

```

A utility that allows you to pre-set your printer options with simply the touch of a key. Written for the Gemini printers, may be compatible with most Epson printers as well.

```

=====
Disk #:U029   STAR                          Vers:           Extra:         Added   : 12/20/86
              Author: Com-Link Enterprises        Updated: 12/20/86

```

Another excellent utility program. Loads into X/B and remains memory resident to offer you 53 new commands while in X/B including text, graphics and sound functions.

```

Disk #:U037  NOTEINDEX          Vers:          Extra:          Added   : 12/20/86
              Author:                                     Updated: 12/20/86

```

Written in FORTH. Allows you to enter information on various articles found in publications and quickly locate this data based on subject, title, month, year, etc.

```

=====
Disk #:U038  FORTHWRITE        Vers:          Extra:          Added   : 12/20/86
              Author:                                     Updated: 12/20/86

```

Definitely not a replacement for TI-Writer, but still is unique that the program is written in FORTH and offers some editing features.

```

=====
Disk #:U039  FORTHFONT         Vers:          Extra:          Added   : 12/20/86
              Author:                                     Updated: 12/20/86

```

Another program written in FORTH, allows you to print disk labels with a unique large font. A font editor is also included to allow you to create your own custom font.

```

=====
Disk #:U040  FORTHPLAN         Vers:          Extra:          Added   : 12/20/86
              Author:                                     Updated: 12/20/86

```

Spread sheet program written in FORTH. Data entry and screen scrolling is quick. Recalculation time is better than that found with the Multiplan package. A unique program.

```

=====
Disk #:U041  REDISKIT          Vers:          Extra:          Added   : 12/20/86
              Author: James Schroeder                    Updated: 12/20/86

```

One of the, if not the, fastest disk copiers out for the 4A. Will work with either the TI or Cor-Comp controller. Time to copy and format a SS/SD disk is about 35 seconds.

```

=====
Disk #:U042  CATLUG            Vers:          Extra:          Added   : 01/15/87
              Author: Marty Kroll                        Updated: 01/15/87

```

A disk cataloging program written for the Gram Kracker.

```

=====
Disk #:U043  64 TERM           Vers:          Extra:          Added   : 01/15/87
              Author: Tim MacEchern                      Updated: 01/15/87

```

One of the most original terminal emulators out for the 4A. Written in FORTH, the program makes use of 64 column display. Text display is not the clearest, but it's legible. Features include autodialer with built in menu and margin set.

```

Disk #:U044   TI-KEYS           Vers:           Extra:         Added  : 01/15/87
              Author: Wes Johnston                    Updated: 01/15/87

```

A keyboard macro program for the 4A. Allows a series of key strokes to be executed with the touch of the CTRL key and one other key. Source code is also included.

```

=====
Disk #:U045   TI-RUNNER EDITORS  Vers:           Extra:         Added  : 01/15/87
              Author: C Gusenbarrer / B. Reiss        Updated: 06/01/88

```

One program written in 'C99', another written in XB with assembly support. Allows you to edit TI Runner screens. Programs are fast and easy to use. XB program is BOARD MAKER v6.0. 'C' program includes source code.

```

=====
Disk #:U046   DISK HACKER        Vers:           Extra:         Added  : 01/15/87
              Author: Will McGovern                  Updated: 01/15/87

```

From the authors of Funleweb Writer. Allows you to 'dig' into the information contained on the tracks of the disk. Documentation included on disk.

```

=====
Disk #:U047   SUPERBUG           Vers:           Extra:         Added  : 01/15/87
              Author: Edgar Dohmain                  Updated: 01/15/87

```

An improved version of the Superbugger program released as public domain by TI. Enhancements allow the changing of listing devices, toggling screen colors and addition of many commands from TI Debugger.

```

=====
Disk #:U048   MUSIC COMPILER     Vers:           Extra:         Added  : 01/15/87
              Author:                               Updated: 01/15/87

```

Enter the musical score using an editor, then compile your listing with this program. Will create an E/A option 5 load program. Has several sample musical scores included.

```

=====
Disk #:U049   DISK UTILITIES     Vers: 3.2       Extra:         Added  : 04/01/87
              Author: John Birdwell                  Updated: 04/01/87

```

An excellent sector editing program. Features include a listing of sector information to printer, search functions and you may also include comments for each file within the sector header for each record which can then be printed using this program.

```

=====
Disk #:U050   XB-TOOLS           Vers: 1.2       Extra:         Added  : 06/01/87
              Author: Jim Swedlow                    Updated: 06/01/87

```

A set of useful tools for the X/Basic programmer. Included is a compression program, program which allows you to move lines, cross reference listing and more.

Disk #:U058 USEABLE DISK CATALOG Vers: 2.0 Extra: Added : 09/30/87
Author: Harry Brashear Updated: 09/30/87

A catalog database for keeping track of your disk collection. Allows comments to be added along with other disk information. Has a fast sort routine which the docs claim will sort 400 records in about 1 minute.

=====
Disk #:U059 COLUMNTEXT/MRGNTEXT Vers: 2.2 Extra: Added : 09/30/87
Author: Ron Prewitt Updated: 09/30/87

A program which allows you to print 3 or 4 column text in a single pass, allowing right justification. Also includes MARGINTEXT, this program will take your DV80 file and automatically format it into the 28 column format required, very nice addition.

=====
Disk #:U060 FORTRAN_LOADER Vers: Extra: Added : 09/30/87
Author: Updated: 09/30/87

Stand alone loader program which allows compiled Fortran programs to be used by those without the FORTRAN99 program. Also includes several public domain FORTRAN99 files with source code.

=====
Disk #:U061 PICASSO Vers: 1.1 Extra: Added : 09/30/87
Author: Arto Heino Updated: 09/30/87

A superb program. Similar in functions to JoyPaint 99, including the undo function, this program goes one step further by allowing TEXT (from disk or keyboard) to be used in conjunction with graphics (TI-Artist). Includes several utility programs.

=====
Disk #:U062 CATALOG LIBRARY Vers: 1.4 Extra: Added : 09/30/87
Author: Marty Kroll Updated: 09/30/87

Disk catalog program, allows up to 123 disks and 900 files. Allows multiple files to be stored on a single disk. Use in conjunction with CATLIBCOMP and you can include comments and other info about your files.

=====
Disk #:U063 PRINTOUT Vers: 1.3 Extra: Added : 09/30/87
Author: Mehr Ware Updated: 09/30/87

Prints text and DV80 pictures. Using menus, you select character size, line spacing, etc. Also includes SM-LABELS, a three across label printing program.

=====
Disk #:U064 TI99/4A LINKER Vers: Extra: Added : 09/30/87
Author: RAG Software Updated: 09/30/87

A tool for building assembler language memory image programs from tagged object.

```

Disk #:U065   TASS 2000           Vers:           Extra:           Added   : 09/30/87
              Author: Gary Bowser                                Updated: 09/30/87

```

TI-Artist Slide Show, allows you to step through and display your TI-Artist compatible files on screen. Allows you to also dump picture to printer and supports the Cannon color printer.

```

=====
Disk #:U066   ARCHIVER           Vers: 3.01      Extra:           Added   : 06/01/88
              Author: Barry Boone                                Updated: 10/01/88

```

This version is MUCH easier to use than previous versions. It's also faster. Allows you to pack AND compress your files, resulting in reduced storage size (approx 40%-50%). Excellent for storing old unused/unneeded files to save disk space.

```

=====
Disk #:U067   TELCO              Vers: 2.1       Extra: 1         Added   : 06/01/88
              Author: Charles Earl                               Updated: 10/01/88

```

The best got better. Positively the most unique terminal emulator for the TI. Autodialer directory, ANSI emulation, too many features to list. Well written program. Must have for those who use a Term Program.

```

=====
Disk #:U068   GRAPHIC EDITOR     Vers: 2.0       Extra:           Added   : 06/01/88
              Author: Rejean Felton                             Updated: 06/01/88

```

Great program to create and edit your CSGD style graphics. The CSGD graphics are used in several other programs. Also includes a labeler program which allows you to incorporate these small graphics in your labels. Assembly-very fast.

```

=====
Disk #:U069   DISK INFO MANAGER  Vers:           Extra:           Added   : 06/01/88
              Author:                                           Updated: 06/01/88

```

Disk manager and sector editor all in one.

```

=====
Disk #:U070   GBS                Vers: 3.1e     Extra:           Added   : 06/01/88
              Author:                                           Updated: 06/01/88

```

Another sector editor program. This one though has an added feature over the others, will rebuild sector zero on damaged disk automatically.

```

=====
Disk #:U071   DISKU                Vers: 4.0      Extra:           Added   : 06/01/88
              Author: John Birdwell                             Updated: 06/01/88

```

This one is the cream of the crop. Excellent disk sector editor and much more. Includes a disk manager feature that rivals the popular DM1000 program and in some cases out performs it. Very nice program. Must have for TI users.
