GET THE JUMP ON MATH

With Scott, Foresman Math Action Games

Frog Jump is a great way for your children to learn to work with numbers. Or they can take a Space Journey to learn how to work with percents. Pyramid Puzzler, Star Maze, Picture Parts, and Number Bowling help with multiplication... division... basic facts... decimals and fractions.

Math Action Games get youngsters deeply involved in the excitement of discovering and mastering fundamental mathematics. Children have fun and learn at the same time.

There's a **Math Action Game** for every age group. Exciting formats challenge participants, moving them through three levels of difficulty. Games can be competitive or non-competitive, so children play them again and again. Each game uses color, music, animation, and sound effects to trigger quick thinking and accurate response.

Math Action Games can give your youngster the incentives and the satisfaction he needs to master math. It's an ideal supplement to any school mathematics program. Games are available for most popular microcomputers.

SCOTT, FORESMAN...
Products with tomorrow in mind.

Mathematics Courseware Series
TI-99/4A Keyboard Guide

Press	
ENTER	to have the computer accept an answer or to continue with the program. Once a problem is answered correctly, ENTER can be pressed to speed the appearance of the next problem.
Space bar	to move a designated object or cursor on the screen. The space bar can also be pressed and held down to freeze a screen, allowing students to control the time they spend on any particular problem. The program continues where it left off when the space bar is released.
Period key (.)	to preview, in consecutive order, the beginning of each activity in the module. The period key can be pressed and held instead of selecting an activity from the main activity list at the beginning of the module. This allows a student who has forgotten the last activity worked on, or a student who has difficulty reading the activity names, to *see* the activities and determine where to begin work. When the appropriate activity is located, the period key should be released; the activity will then start from the beginning. This period key feature is also useful for demonstration and previewing purposes.
FCTN 3 (ERASE)	to erase an answer; or, in a multiple-part answer, press to erase the part most recently answered.
FCTN 4 (CLEAR)	to erase all parts of an answer.
FCTN 5 (BEGIN)	to return to the main list of activities at the beginning of the module.
FCTN 6 (PROC'D)	to leave the teaching example and begin the practice exercises.
FCTN 7 (AID)	to view the teaching example appropriate to the practice exercises being done.
FCTN 8 (REDO)	to begin an activity again.
FCTN 9 (BACK)	to go back to the screen that asks which is desired, a teaching example or the practice exercises; or, in activities that don't have a teaching example, press to return to the main list of activities.
FCTN = (QUIT)	to stop work and leave the module.
FCTN S, E, D, or X (← ↑ → ↓)	to move a designated object on the screen in the direction the arrow points.

Your Management System

Texas Instruments 99/4A Microcomputer

Components

The **TI 99/4A Console** allows data entry through its standard keyboard which includes special function and control keys. It uses solid state program modules which provide ease of operation as well as security when dealing with confidential information. This microcomputer, with the powerful, built-in BASIC language, can be easily adapted for classroom instructional use, utilizing 16-color graphics, music, and speech.

The **TI Video Display Monitor,** designed especially to work with the TI 99/4A, provides the best graphic and color resolution possible. (In place of this monitor, you can use almost any television set with an RF Video Modulator.)

The 2 **TI Disk Drives** use 5¼-inch floppy diskettes. Combined with the **Disk Controller,** this mass storage system can hold up to 90K bytes of information per diskette.

The **TI Disk Drive Controller** can support up to 3 Disk Drives, further expanding the system's data storage capacity.

The **TI RS-232 Interface** enables you to use a variety of accessories—such as printers, card readers, plotters, and modems—with the TI microcomputer system.

The **TI 800 Series Printer** is well-suited for school use. Its efficiency and reliability make it ideal for heavy workloads. Printing 75 characters per second using dot matrix type, the TI printer can print on paper from 3 to 15 inches wide, enabling you to produce reports, paychecks, and mailing labels.

The **Scott, Foresman Optical Card Reader** enables data entry using mark sense cards. Student attendance, test scores, and survey data can be easily and efficiently entered using this optional device.

The **TI Peripheral Expansion System** centralizes most of your hardware in one place, eliminating extra cables and clutter. Instead of using all of the components listed above, the system utilizes hardware cards, thus accommodating the disk memory system, RS-232 Interface, and more in a compact configuration.

For efficient data entry, Scott, Foresman provides you with mark sense cards for 3 applications: **Attendance Recorder, Test Scorer,** and **Data Analyzer.** These easy-to-use data-entry cards can accommodate hundreds of students per grade, and up to 100 test or survey items per card. In addition to these cards, your authorized Scott, Foresman dealer can supply you with appropriate paper and mailing labels.

Management
Applications

Accounting Assistant

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed to be used by school accounting or business personnel in conjunction with the administrative, purchasing, and receiving departments.

Capacities

Each pair of diskettes used with the **Accounting Assistant** application module can hold:

400 expenditure accounts
500 vendor records
300 purchase orders
360 payments, up to 300 of which may be purchase order payments

Contents

The **Accounting Assistant** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Accounting Assistant** application maintains expenditure accounts and helps control general fund payments and budgets.

Features and Benefits

Keeps up-to-date records of purchase orders, payments, and vendors.
Keeps track of expenses and monitors expenses against budget.
Interfaces with other **School Management** accounting applications, for added reporting and budget control.
Convenient reproducible forms are provided to aid in data entry of direct and purchase order payments.
End-of-period and end-of-year processing are performed in one easy step, eliminating old payment data and resetting totals to zero in preparation for the new period or year.

Reports (8)

Print detailed and summary check registers indicating which checks to write to vendors.
Show updated balances for all accounts in each accounting period, along with posted payments, purchase orders issued, and vendors used.
Display a comparison of all established accounts, to be used as a worksheet when monitoring payments against the budget for each account.
Provide up-to-date lists of vendors and purchase orders.

Applications

Activity Accountant

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed to be used by school activity advisors, building principals, and district business managers to keep up to date on building-level accounts.

Capacities

Each pair of diskettes used with the **Activity Accountant** application module can hold:

2000 transactions
128 accounts per school
128 different schools

Contents

The **Activity Accountant** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Activity Accountant** application records and stores information on building-level fund transactions.

Features and Benefits

Interfaces with other **School Management** accounting applications for added reporting and budget control.
Can be used to keep track of other accounts than activity funds, such as an athletics budget.
Convenient reproducible forms are provided to make opening and updating of accounts easy and systematic.
Depending on the size of the school district, either central district processing or individual school processing can be performed using one pair of diskettes.

Reports (4)

A complete chart of accounts that can be distributed to both district offices and individual schools in the district.
Up-to-date transaction information for each activity account, along with check and receipt numbers.
Account balances for individual schools as well as for the whole district, permitting easy monitoring of the overall cash flow of the district's activity funds.
An end-of-cycle report that can be sent to appropriate district administrators for review before being filed.

Attendance Recorder

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed to be used by school attendance clerks, homeroom and classroom teachers, counselors, truancy officers, and administrators.

Capacities

Each pair of diskettes used with the **Attendance Recorder** application module can hold:

A school year of up to 12 months and up to 255 school days
Records for up to 1000 students, 600 to a grade
13 grades, kindergarten through 12th
255 attendance records (absences and tardies) per student per year

Contents

The **Attendance Recorder** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Attendance Recorder** application maintains current records on student absences and tardies. It monitors daily and cumulative absences and tardies according to any length attendance reporting period designated by the user.

Features and Benefits

Attendance information may be entered either by using the data keyboard or time-saving **Optical Card Reader** and **Attendance Cards.**
Copies of reports can be used by homeroom and classroom teachers to aid in taking daily attendance.
Cumulative attendance figures can be used to prepare reports for school, district, or government agencies.

Reports (6)

Provide detailed and summary lists of daily absences and tardies, with space for handwritten comments by teachers or counselors.
Display up-to-date student information, such as grade, homeroom, and telephone number, to aid in contacting absent or tardy students.
Show year-to-date attendance information for the entire semester, quarter, or month, which can be presented at faculty/administration meetings.
Print convenient self-adhesive attendance labels which can be affixed to student file folders containing academic or personal records.

Class Data Recorder

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by classroom teachers to record scores, calculate grades, and present progress reports to students, parents, and administrators.

Capacities

Each diskette used with the **Class Data Recorder** application module can hold:

40 student names
4 terms or marking periods
40 assignments per student per term or marking period (total 6400 assignments and scores)

Contents

The **Class Data Recorder** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Class Data Recorder** application stores and analyzes assignment scores. The computer calculates up-to-date individual or classroom scores, displaying them as raw scores, percentages, and letter grades.

Features and Benefits

Assignments can be weighted at the teacher's discretion, increasing the relative importance of one assignment to another.
Less critical assignments can be designated pass/fail, providing a versatile means of grading assignments.
One diskette can hold the records for one class for an entire year, creating a composite record which can be referred to at any time.
All data can be entered and edited easily, allowing for individualized scoring and absences on days when assignments are graded.

Reports (7)

Display summaries of individual student or total class performance on specific assignments.
Produce progress reports which can be used in conferences with parents, students, and administrators.
Provide a student rank list according to the weighted percentage of assignment scores or according to the total points earned.
Give frequency of scores within a designated range, assisting in creating a curve for the purpose of calculating assignment or final grades.

Mathematics

Course Manager

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by teachers who use the **Scott, Foresman Mathematics** program in grades 3 through 8.

Capacities

Each data diskette used with the **Course Manager** application module can hold:

the names of 40 students
the scores of up to 49 chapter, unit, and end-of-book tests for each of 40 students (total 1960 test scores)

Contents

The **Course Manager** application module
6 objectives diskettes, one for each of grades 3 through 8
One package of 6 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Course Manager** application simplifies the management of teaching Books 3 through 8 of the **Scott, Foresman Mathematics** program. The application correlates the objectives of each chapter with the test results for an individual student or an entire class. This provides the teacher with specific page references for reteaching or enriching students who have failed or passed the grade-level objectives.

Features and Benefits

A minimum amount of data entry is necessary to produce detailed reports, reducing the initial program preparation time.
Scores can be entered for the entire class or individually, allowing for individualized schedules or absences on test days.
Reports provide specific page references for use in lesson plans, correlating to **Scott, Foresman Mathematics** program materials.
Suggested passing criteria for each objective can be changed, allowing the teacher to "customize" the program to fit classroom needs.

Reports (6)

Give specific page numbers in **Scott, Foresman Mathematics** program materials to provide enrichment and remediation for each student.
Display the suggested passing criteria for each objective.
Provide an item analysis for each test item.
Show up-to-date test scores which can be used for parent-teacher conferences or grade calculations.

Data Analyzer

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed to be used by school administrators, classroom teachers, counselors, or anyone who might wish to perform a statistical survey of school or district populations.

Capacities

Each pair of diskettes used with the **Data Analyzer*** application module can hold:

700 questionnaires — 100 questions
9 responses per question if data keyboard is used; 5 responses if **Optical Card Reader** and **Data Cards** are used
5 groups of respondents can be formed at one time

*in development

Contents

The **Data Analyzer** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Data Analyzer** application records, collates, and tabulates statistical surveys or questionnaires, using card or keyboard data entry.

Features and Benefits

Eliminates time-consuming tabulation and analysis of survey answers and calculation of statistics.
Special groups of respondents can be formed, based on responses to as many as 10 survey questions. Groups can then be combined to form even more specific subgroups.
Allows user to review and edit stored data quickly and easily, including survey questions and answers, and group names.
Compares different kinds of measurements.

Reports (6)

Computer-calculated statistics such as frequency, mean, standard deviation, and degrees of freedom.
Provide a matrix to use in comparing how groups of respondents answered specific questions.
Print T-tests for one group, comparing two survey questions, or T-tests comparing two independently sampled populations.
Provide an up-to-date data listing of all records that can be used to check for data entry errors.

Applications

Mark Reporter

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school administrators and other personnel who are responsible for keeping accurate and complete records of students' assignment scores and grades.

Capacities

Each diskette used with the **Mark Reporter*** application module can hold:

600 students
300 courses
18 courses per student

*in development

Contents

The **Mark Reporter** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Mark Reporter** application calculates grade point averages, grade distributions, and class ranks for several classes. It also produces incomplete and failure listings, honor roll listings, and progress reports formatted according to quarter/semester or trimester.

Features and Benefits

Allows personnel to delete the highest grade at the end of the school year, and automatically upgrades the remaining classes on the diskette.
Quickly calculates grade point averages, according to standards set by the school or district.
Produces progress reports in seconds, which can then be used to complete the report card form used by the school, or can be sent home to the parent as is.

Reports (9)

Provide rank, incomplete, and failure lists.
Print honor rolls and honor point summaries.
Provide a listing of students by grade, and a listing of those students who are missing final grades.
Print a comprehensive progress report which can be supplemented and used as a report card.

Applications

School Mailer

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school administrative personnel who must keep up-to-date student records and prepare mailings to parents, students, and staff.

Capacities

Each pair of diskettes used with the **School Mailer** application module can hold:

600 names and addresses
360 user-defined codes used in organizing information

Contents

The **School Mailer** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **School Mailer** application stores current student and staff information and prints a variety of rosters and mailing labels. The information can be organized according to the needs of your school or district.

Features and Benefits

User-defined codes can be used to organize data in a variety of ways—such as by club membership, special medication necessary, parents' marital status, counselor, or special programs.
Information can be located, updated, or deleted in seconds, saving time in manual filing.
Convenient reproducible forms are provided for collecting and entering student and staff information.

Reports (3 with 6 options)

Provide rosters of students or staff members sorted alphabetically by grade, sex, room, ZIP code, or optional code.
Print self-adhesive mailing labels addressed to student, parent, or staff member.
Automatically print all records for designated groups or individuals.

Applications

Student Data Recorder

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed for any school personnel who need to keep accurate, up-to-date files on all students.

Capacities

Each pair of diskettes used with the **Student Data Recorder** application module can hold:

600 student records
125 teacher names
9 counselor names

Contents

The **Student Data Recorder** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Student Data Recorder** application efficiently organizes all necessary information about a student—such as address, phone number, homeroom, and emergency contacts. This information can be organized in order to print student lists as well as identification labels.

Features and Benefits

Maintains records of special conditions—such as handicaps, financial assistance given to the family, transportation status, and service given by specialized personnel.
Can organize the information automatically with only a minimum of supervision by office personnel.
Prints clearly organized reports as well as identification labels, providing maximum use of the information entered.

Reports (7)

Provide several types of homeroom and counselor lists.
Display lists of students according to homeroom teacher, counselor, grade, special condition, and even bus number.
Provide immediate information regarding names and phone numbers in emergency situations.

Test Scorer

for use with the Texas Instruments 99/4A School Management System and the Scott, Foresman Optical Card Reader

Intended Market

This application is designed to be used by classroom teachers to aid in administering and grading tests, as well as assigning grading scales and calculating statistical information regarding individual students and the class as a whole.

Capacities

Each pair of diskettes used with the **Test Scorer** application module can hold:

40 students	100 questions per test
25 tests	5 responses per question

Contents

The **Test Scorer** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Test Scorer** application records, calculates, analyzes, and reports test scores using optically scanned student **Test Cards** and the **Scott, Foresman Optical Card Reader.**

Features and Benefits

Allows user to review and edit all stored data quickly and easily, including student names, test answers, and grading scales.
The user may assign marks or a criterion level (pass/fail).
Eliminates time-consuming grading of tests and calculating of scores.
Automatically alphabetizes student records or places them in rank order.

Reports (5)

Display a distribution of test scores, an aid in determining what kind of grading scale to assign to a test.
Provide computer-calculated statistics such as discrimination index, mean, median, standard deviation, and T-scores.
Show for each test, the number and percentage of items answered correctly, test scores (either marks or P/F), and individual responses to each test question.
Produce separate pages that can be distributed to individual students, showing his or her answers and grade, to be used as both a record of performance and to identify items missed and correct answers.

Salary Planner

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school administrative personnel, teacher associations, and any others involved in contract or salary negotiations.

Capacities

Each diskette used with the **Salary Planner** application module can hold:

1 personnel matrix
1 current pay schedule
8 proposed pay schedules

Contents

The **Salary Planner** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Salary Planner** application calculates and compares the total cost and percent increases of a current pay schedule and up to 8 proposed pay schedules. Each pay schedule may contain up to 20 steps of experience, and up to 11 lanes of degree status or other qualification status.

Features and Benefits

Produces cost estimates in seconds, resulting in quicker analysis and reaction to new proposals.
Lanes and steps can be increased individually or all at once, allowing for flexibility in altering schedules.
Schedules may contain up to 20 steps of experience and 11 lanes of degree status, providing for the needs of large as well as small school districts.

Reports (7)

Provide the current pay schedule and up to 8 proposed pay schedules.
Display the total cost of any proposed schedule.
Show the cost differences between successive lanes and steps.
Provide the dollar and percentage differences between what a teacher is earning under the base schedule and what that same teacher would earn under a proposed pay schedule in the following year.

Scheduling Assistant

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is designed primarily for school administrators and counselors, and others who are involved in developing class schedules and determining course priorities.

Capacities

Each pair of diskettes used with the **Scheduling Assistant*** application module can hold:

300 courses
600 student names
18 course requests per student

*in development

Contents

The **Scheduling Assistant** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Scheduling Assistant** application is designed to aid administrators and counselors in developing a class schedule. It provides information on course requests and conflicts to help facilitate an efficient schedule design.

Features and Benefits

Course requests can be deleted at the end of the school year to make room for the new information to be entered.
The highest grade on the diskettes can be deleted in order to prepare for a new school year, and the remaining grades will be updated automatically.
Reports on course conflicts and requests can be produced in seconds to allow for ease in scheduling.

Reports (6)

Provide student lists by grade, and student course requests by grade.
Print a course list and a course tally, showing how many students in each grade have chosen a particular course and what priority they have given it.
Provide a conflict summary and a request summary, both of which will highlight potential scheduling problems.

Property Manager

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school district, school, or college department administrators to maintain current records on moveable equipment. Audio-visual or athletic department directors might find it particularly useful.

Capacities

Each pair of diskettes used with the **Property Manager** application module can hold:

999 units/groups of property
3000 locations
maximum class cost of almost $10 billion

Contents

The **Property Manager** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Property Manager** application is useful in recording the location, condition, and cost of all types of property from overhead projectors to pencil sharpeners. It is extremely helpful in taking inventories, as it can print labels for each piece of property owned by your school or district.

Features and Benefits

Prints property labels which can be used as part of an inventory control system, or to keep track of items loaned from a learning center or library audio-visual room.
Organizes property individually or by groups, depending on which is most convenient.
Prints cost summaries, location records, and detailed property records, the last of which can be used as a master inventory list.

Reports (5)

Provide summary and detailed property records, as well as property records by location.
Print property cost summaries, which are useful in budget meetings.
Print property labels, used in inventory procedures or as part of a loan system.

Payroll Assistant

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school administrators and clerical personnel, and others who may be involved in payroll administration.

Capacities

Each pair of diskettes used with the **Payroll Assistant** application module can hold:

99 employees	$9.9 million gross payroll
3 pay controls per employee	20 deductions/pay period

Contents

The **Payroll Assistant** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Payroll Assistant** application keeps complete payroll information on each employee, and also prints paychecks. It must be used in conjunction with the **Personnel Data Recorder** application.

Features and Benefits

Prints paychecks for up to 99 employees in four paygroups.
Keeps accurate, easily accessible records of accumulated earnings and taxes.
Automatically calculates up to 3 pay controls and 5 voluntary deductions and/or benefits per employee.

Reports (6)

Produces paychecks.
Provides cumulative fiscal and calendar reports.
Prints payroll audits for each pay period.
Shows cumulative totals audits for gross wages, deductions, and net earnings for all employees.
Gives wage distributions by payroll account code.

Personnel Data Recorder

for use with the Texas Instruments 99/4A School Management System

Intended Market

This application is to be used by school administrative and clerical personnel, and others who are involved in keeping detailed records of district personnel.

Capacities

Each diskette used with the **Personnel Data Recorder** application module can hold:

99 employees
annual payroll of $99 million
5 voluntary deductions/benefits
6 retirement plans

Contents

The **Personnel Data Recorder** application module
One package of 5 blank 5¼-inch diskettes
One user's reference manual

Application Summary

The **Personnel Data Recorder** application records all identification, employment, and certification data for up to 99 employees per diskette. It is used in conjunction with the **Payroll Assistant** application to keep complete personnel and payroll files, and to print payroll checks.

Features and Benefits

Produces a "Payroll Data" report for each employee that shows basic data controlling earnings and deductions. This report can also be produced as a blank form and used to facilitate entering of information for the first time.

Stores up to four paygroups (employees who are paid on the same schedule or in the same way) on each diskette.

Keeps individual payroll records of base pay, tax rate information, and FICA and retirement payments from both employee and employer.

Reports (7)

Print permanent employee records.
Produce staff rosters, seniority lists, and personnel directories.
Produce a personnel matrix (used in conjunction with **Payroll Assistant** as a data-entry form).
Print a complete payroll information report for each employee.
