Interactive Table of Contents

By clicking on the Go To Icon next to each chapter heading, you will be given instant access. Click on the Table of Contents Icon found at the bottom of each page to return to this page and Exit will whisk you to the Finder. Browsing is also possible by using the window arrow keys at the bottom of each page.

Busted! — A little bit of fun fiction spawned from the multitude of "Help! I'm addicted to Maelstrom" letters we receive.

Rumourcide — So you have just heard that Ambrosia Software will be handling LucasArt's port of Rebel Assault© for Macintosh? This column will tell you just how wrong you are. Who knows, we may even admit to the occasional piece of scuttlebutt as well. Another very heavily reader interactive column, send in the information and we will confirm or deny.

Cheryl — We try our best to simplify animation, documentation and registration. How could we of gone so wrong with enunciation?

Shareware In Jeopardy — Current legislation in both the House of Representatives & the Senate threatens the viability of shareware (I wish we could joke about this one).

Hints & Tricks — This is where we divulge strategy, hints and shortcuts used in a wide variety of Ambrosia's programs. Border Patrol ace Second Lieutenant   Ed "DAMAGE" Ota shares some valuable Maelstrom tips.

Eek A Bug! —   Eighty percent of our technical support time is spent answering twenty percent of the questions. Here is an opportunity for Cajun to go over the most commonly asked questions. For veteran Ambrosia fans and other power users, Cajun will also report on strange and exotic bugs not usually encountered and what to do should you come across one of them (Lie down and play dead until it goes away!)

Kudos & Criticism — We get a lot of general comments in two months. This section is designed to let us showcase positive feedback and respond to negative comments. We value your opinion of our software and customer service, so let us know how we are doing. Come see what your fellow users are saying about us.

Software Showcase — This will be our chance to go beyond standard product descriptions and answer some often asked questions. Besides standard functions, you will also be able to find out when it first was released, how long it took to develop and what prompted the idea. This issue we will take a closer look at Chiral 1.0.0, Ambrosia's puzzling new

entertainment release.

Classifieds — An easy way for our readers to advertise hardware and software they would like to part with. Individuals submitting classified ads will not be charged for this international exposure. Please include all necessary contact information. This is our first issue, so the only "bargains" are those offered by office staff.

Product List — An up to date comprehensive list and description of Ambrosia Software products. Are you using the latest version? Check here to see if you need a free upgrade. While you are at it, check out all of Ambrosia's other shareware & freeware.
