

Click here to select a drive. When you click “Jump” this drive will be searched for a folder that begins with your enquiry. The drive from which this program was run is automatically selected.

Enter your enquiry here. When you click “Jump” the selected drive will be searched for a folder that begins with your enquiry. If a folder is found it is opened.

Select the drives that you want to scan.

Check this option if you want to open a folder in Explorer.

Check this option if you want to automatically close the folder you are jumping from.

Check this option if you want the enquiry box to be filled with the last search on a drive.

As you use your computer the arrangement of folders on your drives will probably change. Check this option if you want to be reminded to re-scan a drive after a given number of days.

Enter the number of days between re-scan reminders.

When checked all folders that match your enquiry are shown. This allows you to select the correct folder to open.

When checked any folders below those listed are ignored when the drive is next scanned. This is especially useful if you never want to open a folder in your Start Menu.

Lists the folders that should be ignored when a drive is scanned. Only folders that are below those listed are ignored.

Adds to the list of folders that should be ignored. All folders below those added are also ignored. The associated drive(s) must be re-scanned for new additions to be ignored.

Removes a folder from the list of folders that should be ignored. The associated drive(s) must be re-scanned before deleted folders are included again.
