

## **Version 1.0**

- First Released Version

## **Version 1.0.1**

- Fixed Several OUTRAGEOUS problems, well they weren't really even noticeable, just needed something to write about!

## **Version 1.0.2**

- Fixed Cursor from switching back into the watch under System 7 Finder.
- Now you can shoot the menu bar under System 7 Finder.
- Mac LC sound problem fixed.
- Dual monitor problem should be fixed.. If anyone wants to donate a second monitor, we will make sure it works!

**If you Locate problems please either fax, write, or call us.**

**We want to solve the problems!**
