Description

Sassy font is a handwriting type font that is way cool for writing letters to people, or just for a display face. I have used them for concert posters and "Rave" events.

The Font was created with FontMonger, Freehand, and Adobe Streamline. Special thanks should go to Dyann T. since it is her handwriting that this font is based on! Thanks Dy!

Installing Sassy

To install Sassy, you need to drop the file "Sassy" into your system folder. DO NOT CHANGE THE NAME OF THE FONT.

For System 7.1 users just drop both the "Sassy.bmap" and the "SassyRegPla" Files in your system folder. The finder will prompt you whether or not to add them to your Fonts folder, click OK. Restart the machine, and you are all set!

For those of you using System 6.0.x, use Apple Computer's Font/DA Mover to install the screen font versions of Sassy into your system file in the usual manner (these screen fonts are in the file "Sassy.bmap")

Copyright & Distribution Information

Sassy is copyright 1993 by Scott K. Yoshinaga. All rights reserved.

This font is "schoolware". It is not public domain. Please help me pay my way through college! I hear from various sources that sharware doesn't work. PLEASE PROVE THEM WRONG! If you use my font please, please pay for it!

Sassy works fine on my Macintosh. It may not on yours. No warranties are implied, and Sassy may not be suitable for any of your purposes.

The possessor of Sassy is granted permission to use the font on a single printer for a period of one month. At the end of the month, the possessor must either register as a purchaser of the font (as discussed below), or must cease using the font.

Possessors of Sassy may provide copies of this font, along with all related files, to any user willing to accept the terms of this agreement. This font may be distributed either by floppy disk (or similar magnetic medium) or by electronic means (such as via modem). **Sassy may not be sold.** Fees can be charged in association with Sassy, however, such as by users' groups for duplicating fees, commercial services for downloading time, etc.

I interpret the sale of Sassy on commercially prepared “public domain disks” as a sale of Sassy against my expressed instructions. There are severe penalties for selling copyrighted works in such a manner without the permission of the author. If your organization wishes to license Sassy for sale you may reach me as described below.

If a user chooses to keep and use Sassy for more than one month, a fee of \$10 for the font is due me (at the address below). This fee entitles the registrant to use Sassy as he or she sees fit, so long as it is not used on more than one printer at any given time. This registration fee can be waived if Sassy is simply maintained on a disk (or other medium) for archival or redistribution purposes (i.e., a users' group librarian doesn't necessarily have to pay the fee, nor would a telecommunication service such as CompuServe).

Any questions or payments (U.S. checks or equivalent only, please) can be directed to me at the address below. When registering, please include your name and address, and please tell me where you obtained Sassy. Thanks!
