

## Mac OS X

### **Array 1.0b Beta**

**zero K, [aaron@mediumk.com](mailto:aaron@mediumk.com),**

**<http://www.mediumk.com/array/macosex.html>**

Array is an easy to use animation program. If you know the children's toy Lite Brite, where you poke transparent colored pegs through a backlit screen, Array is the same idea using multiple screens to create an animation. You color points on a sequence of frames. There are various functions to manipulate the points. You can save and reload your animation. There are 4 samples included. Requires Mac OS X.

### **ASM 1.1.1 Freeware**

**Frank Vercruesse, [frank@vercruesse.de](mailto:frank@vercruesse.de), <http://asm.vercruesse.de/>**

ASM (an acronym for Application Switcher Menu) is a small utility that adds a system-wide menu to the right side of the menu bar. This menu lists all of your open applications, so you can easily switch between them. Mac OS X.

### **BookTracker X 1.0.1 Shareware**

**Wickedly Simple Software, [feedback@wickedlysimple.com](mailto:feedback@wickedlysimple.com),**

**<http://www.wickedlysimple.com/>**

BookTracker is an easy to use way of keeping track of books that you own, have read or have listened to. Because of BookTracker's flexibility, it is a great tool for both collectors who need to record lots of data and for the book enthusiast who just needs the basics. It includes fields for such information as title, author, copyright date, purchase price, location, and when the book was first and last read. There are also fields to track whom you have lent books to and when it was lent. In addition, there is a free format field that lets you to enter any other information that you wish. BookTracker also allows you to place your books in an unlimited number of groups that you create yourself. You can also choose the layout of your booklist, showing the fields that are most important to you. The booklist can be sorted by any of the fields that you have chosen. There is also a filtering function that quickly displays specific titles or authors. BookTracker's printing functionality will print your customized booklist including the current sort and filter. Mac OS X.

### **ColorBevelButton Plugin 1.1**

**Split Software, [Tech@SplitSW.com](mailto:Tech@SplitSW.com), <http://www.splitsw.com/>**

ColorBevelButton Plugin (formerly known as cColorBevelButton) is a highly powerful bevelbutton replacement plugin control for REALbasic. It has every feature that normal bevelbuttons have including icons, text and icon alignments, text styles, menus, bevel sizes, behaviors, etc. In addition, you can set the color of the text, button, and menu popuparrow, enable/disable menu items, and much, much, more! Mac OS X, REALbasic.

### **Crosswordz X 1.0 Shareware**

**SOL Robots, [cortis@mac.com](mailto:cortis@mac.com), <http://homepage.mac.com/solrobots/>**

Type clue and answer pairs and Crosswordz will build you a puzzle. Constrain the puzzle to whatever size rectangle you wish. Save and Re-open crossword puzzles. Print puzzles and print answers. Mac OS X.

### **DMG Maker 1.0.6 Freeware**

**Mike Vannorsdel, [mikevann@kagi.com](mailto:mikevann@kagi.com),  
<http://www.users.qwest.net/~mvannorsdel/>**

DMG Maker is a simple front end for creating disk images (.dmg or .img). Mac OS X.

### **Double X 2.0.3 Freeware**

**PCV enr, [pcv@pcv-soft.com](mailto:pcv@pcv-soft.com), <http://www.pcv-soft.com/>**

DOUBLE is a solitary game, inspired by the old Chinese game called "Mah-jongg". Its purpose is to be educational, intellectually stimulating and fun for the whole family. Requires mac OS 8.1 with CarbonLib or Mac OS X.

### **DropInfo X 1.1 Freeware**

**Ken Melton, [kmelton@iwvisp.com](mailto:kmelton@iwvisp.com), <http://www1.iwvisp.com/kmelton/>**

Dropping an alias on DropInfo.app's Window results in the information about the alias. Dropping an alias on DropInfo.app's icon will result in information about the file that the alias refers. Carbonized for Mac OSX.

### **DVolume X 1.2 Shareware**

**Stas Pietrucha, [stas@mac.com](mailto:stas@mac.com), <http://homepage.mac.com/stas/>**

DVolume is a simple Dockling, much like the Sound Control Strip in OS 9. Allows you to set the System Volume and the Alert Volume from the Dock. Mac OS X.

### **ExpireIt! X 1.0b6 Beta**

**DigitalCrowd, [cs@digitalcrowd.com](mailto:cs@digitalcrowd.com), <http://www.expireit.com/>**

Works with your primary mail account, allowing you to issue an unlimited number of disposable email addresses that are delivered directly to you. You have the ability to track these emails, expire them, or even renew them easily through the ExpireIt! application. Great for using with newsgroups, messageboards, online contests, orders, and more. The first 5 expiring addresses are free. Additional addresses can be obtained in packages for a minimal cost. Mac OS X.

### **Eyes X 1.1.1 Freeware**

**Breic, [breic@mac.com](mailto:breic@mac.com), <http://homepage.mac.com/breic/>**

A pair of eyes tracks your cursor around the screen. Put it in your dock, in your menubar, on your desktop, anywhere! Highly customizable. Mac OS X.

### **FileMaker Pro 5.5 X Trial**

### **FileMaker Inc., <http://www.filemaker.com/>**

This high-quality software gives you the power to organize, share, and gain value from your information - from the desktop to the Web. Easily access and utilize information, driven by templates, and built around relational databases. Manage assets or customers, track important projects, share databases across your network or intranet, and more. Requires Mac OS X.

### **GEDitCOM Carbon 3.0b6**

**GEDitCOM, [support@geditcom.com](mailto:support@geditcom.com), <http://www.geditcom.com/>**

GEDitCOM is the customizable genealogy application for the Macintosh for editing and viewing GEDCOM genealogy files. Requires PPC, Mac OS 8.1 - Mac OS X.

### **Goldberg X 2.1.2 Freeware**

**Opus Software, [opus.software@bluewin.ch](mailto:opus.software@bluewin.ch), <http://www.opus.plugin.ch/shareware/>**

The application Goldberg is an images and movies viewer with some image editing capabilities such the QuickTime Effects, rotations (fixed and arbitrary), free zooming, selecting, cropping and printing. Goldberg can read several image file formats as PICT, Photoshop, JPEG, TIFF, FlashPix, GIF, PNG, Targa, BMP, SGI files and also QuickTime movie files. Goldberg supports saving and exporting image as PICT, Photoshop, JPEG and TIFF, PNG, Targa, BMP, SGI and qtif (QuickTime Image Format) files. Requires Mac OS 8.6-9.1.

### **GraphicConverter 4.0.7**

**Thorsten Lemke, [lemkesoft@aol.com](mailto:lemkesoft@aol.com), <http://www.lemkesoft.de>**

This all-purpose image editing program can open and save images in just about any graphics format. It also features high-end editing tools for graphic manipulation, as well as support for Photoshop plugins. It also offers batch-conversion capabilities, a slide show window, can import a truckload of file formats, and export a bunch too. This is the latest version. Carbonized for Mac OS X.

### **Harmony Carbon Install**

**Myriad Software, [info@myriad-online.com](mailto:info@myriad-online.com), <http://www.myriad-online.com/>**

For musicians with a hole in their pocketbook, this fab program allows you to become a one-man (or woman) band without owning a single instrument. Use standard notation to enter your melodies and an automatic accompaniment can be generated to your tune, or create your own accompaniment. It features a complete digital instrument base, digital sound editor, MIDI support, tablature and chord diagrams, a karaoke function, and more. Carbonized Version.

### **Health Tracker OS X 2.0.1**

**Black Cat Systems, [info@blackcatsystems.com](mailto:info@blackcatsystems.com),**

**<http://www.blackcatsystems.com>**

Health Tracker is a simple yet powerful program which helps you keep track of and graph any health related measurement. For example, if you are diabetic you could track your blood glucose levels. For weight loss, you could track your weight, measurements for various body parts, or your % body fat. Or, if you keep track of your blood pressure, you could use Health Tracker for that. Health Tracker also keeps track of your rate of losses or gains for each measurement, and evaluates your time to goal (if a goal is entered) based on that rate, which is valuable if you are using it to track weight losses or gains. The more information entered, the more accurate the program becomes in it's estimates. Requires Mac OS 8.6 with CarbonLib or Mac OS X.

**Jared Cocoa Freeware**

**Freeverse Software, [support@freeverse.com](mailto:support@freeverse.com),  
<http://www.freeverse.com/>**

You love him. Admit it. And now he's Carbonized! Experience the mesmerizingly dulcet crooning of your Atonal Amigo, Jared. If you miss the old Jared, you can still see him in his old, aliased state. One of MacAddicts all time best pieces of freeware. Mac OS X.

**LiveJournal X 1.41 Freeware**

**Warped Communications, Inc., <http://planetcryo.com/>**

You can update your online journal at livejournal.com with this new Mac OS X cocoa application.

**MacTracker X 1.0.2 Freeware**

**Ian Page, [mactracker@powersurfr.com](mailto:mactracker@powersurfr.com),  
<http://plaza.powersurfr.com/mactracker/>**

Mactracker provides detailed information on every Mac ever made, including items such as processor speed, memory, and expansion options. Also included is information on Apple monitors plus inkjet and laser printers. Mactracker also sports a built-in update engine to insure the database is always up-to-date. Requires Mac OS X.

**Melody Carbon Install**

**Myriad Software, [info@myriad-online.com](mailto:info@myriad-online.com), <http://www.myriad-online.com/>**

This awesome program keeps getting better and is perfect for those of you who own no musical or MIDI gear whatsoever and want to make music-or even for those who do. It integrates a digital sound database with music notation, allowing you to easily create, play, and print compositions using layers of a variety of instruments. It allows MIDI output, and features a digital effects processor (reverb, flange, chorus, wah, overdrive, and more), multiple undos, and much more. It also allows you to export in MP3 format, add drum staves, incorporate a "Humanize" tool, add multi-instrument staves, record and edit sounds, or add your own sounds (AIFF, WAV, MOD, MIDI) and use

them as instruments. Wow! Carbonized for Mac OS X.

### **Midius ProjectPlanner 1.4**

**Arctaedius.com, micke@kagi.com, <http://www.arctaedius.com/>**

This program will allow you to manage simple business projects using industry-standard Gantt charts to track time scales, human resource needs, expenditures, and dependencies. 68k and PPC compatible running Mac OS 7.1 or later.

### **Muter 1.0 Freeware**

**Cyril Godefroy, [cgodefroy@mac.com](mailto:cgodefroy@mac.com),  
<http://homepage.mac.com/cgodefroy/>**

Muter is a very simple Volume Dockling, which intends to stay simple. It provides 6 levels of sound for you to play with. And if you don't like it, you can always change the code. Mac OS X.

### **MYOB AE MacOSX Installer**

**MYOB, <http://www.myob.com>**

MYOB AccountEdge is the ideal accounting and business management solution for small businesses operating on the Macintosh because it's the easiest, friendliest way to maintain accurate accounts, process sales and purchases, track your money and your inventory, process payroll, track your time, and automate customer and vendor relationships. This demo is the U.S. version. Visit <http://www.myob.com> for Non-U.S. versions of Account Edge. Requires PowerMac or equivalent with 32 MB RAM, 40MB Hard Disk space, average of 35MB additional HD space for each data file maintained with MYOB AccountEdge, 800x600 screen resolution, Mac OS 8.6 to OS X.

### **NemoNemo 1.0 Shareware**

**Michelin's Software, [michelin@mac.com](mailto:michelin@mac.com),  
<http://homepage.mac.com/michelin/>**

NemoNemo is Simple board Game. Simple..but Fun~! You must find Mines and Check using combination horizontal number and vertical number. mac OS 8.6 or higher, Mac OS X 10.

### **OmniGraffle 1.01 Demo**

**Omni Development, Inc., [info@omnigroup.com](mailto:info@omnigroup.com),  
<http://www.omnigroup.com>**

OmniGraffle helps you draw beautiful diagrams, family trees, flow charts, org charts, layouts, and other directed or non-directed graphs. If you want to organize anything graphically using boxes and lines, OmniGraffle is your tool. Mac OS X.

### **OmniOutliner 1.2b1 Beta**

**Omni Development, Inc., [info@omnigroup.com](mailto:info@omnigroup.com),  
<http://www.omnigroup.com>**

OmniOutliner is our tool for outlining and organizing thoughts, tasks, project components, and so on. Its simple and easy-to-use interface make it a very handy companion for tasks ranging from "Things To Do, Today" to software project planning. Mac OS X.

### **OmniWeb 4.0 Shareware**

**Omni Development, Inc., [info@omnigroup.com](mailto:info@omnigroup.com),  
<http://www.omnigroup.com>**

OmniWeb is a full-featured native web browser for Mac OS X. Highly multi-threaded and written using Apple's advanced Cocoa frameworks, OmniWeb is designed to provide you with the best user experience you'll find in a web browser. Mac OS X.

### **OpenGL Plugin 1.1.1 Freeware**

**Doug Holton, [doug.holton@mac.com](mailto:doug.holton@mac.com),  
<http://homepage.mac.com/doug.holton/>**

This free plugin enables you to use OpenGL 3D graphics in Realbasic. It wraps virtually all OpenGL 1.2.1 functions in addition to GLUT functions. It is a low level wrapper, making it easier to port to and from C and java (GL4Java) sample code. Features special classes and routines for loading Wavefront OBJ models, PNG textures, selection and picking, etc. This version adds more properties for controlling the renderer setup (vertical refresh frequency, pixeldepth, VRAM, texture RAM), and is more compatible with OS X and 32bit screen resolutions. Mac OS 8.5 with CarbonLib - Mac OS X. OpenGL, REALbasic 2.0 or higher.

### **PixNewsMacFREE X 1.0.0**

**TechSono Engineering, Inc., [techsono@techsono.com](mailto:techsono@techsono.com),  
<http://www.techsono.com/>**

PixNewsMacFREE for MacOS X (and OS 9) is totally free product. All that you need to do is spend two minutes entering your news server and newsgroups. Then with a simple click the Start button, you'll be downloading tons of images. PPC version.

### **Plasma Tunnel Screensaver 1.2.1**

**Fritz of Dojo, [info@fruitz-of-dojode.de](mailto:info@fruitz-of-dojode.de), <http://www.fritz-of-dojode.de/>**  
Zone out with this OpenGL-based screensaver for Mac OS X.

### **REALbasic Carbon 3.1**

**REAL Software, [jason@realsoftware.com](mailto:jason@realsoftware.com),  
<http://www.realsoftware.com>**

If you're looking to create cool looking applications but don't want to learn confusing C++ or Java, REALbasic is definitely the way to go. This object-oriented developmental program features a visual interface builder for easy construction of windows and menus, and provides easy to understand syntax to get your creations up and running quickly. In fact, our own Tour interface

was completely built using it. Thanks guys! This latest version creates apps for MacOS, Mac OSX, and Windows (ugh!).

### **RSIDock 1.2 Freeware**

**Fraser Speirs, [fraser@speirs.org](mailto:fraser@speirs.org), <http://www.speirs.org/>**

A docklet to remind you to take breaks regularly, and to force you to do it. RSIDock lets you choose a work period and a rest period, and will forcibly lock you out of your machine after your work period is over. I wrote this to counteract my own obsessive hacking, but you may find it useful

### **Stone Studio 01.04.24 Demo**

**Stone Studio, [info@stone.com](mailto:info@stone.com), <http://www.stone.com>**

Stone Studio includes native Mac OS X applications to do graphic design with page layout and web publishing features, manage digital photos, track time and bill clients, and produce PDF from PostScript files.

### **Vortex Next Generation X 1.0.3**

**Feline Entertainment, [felinegames@mac.com](mailto:felinegames@mac.com), <http://homepage.mac.com/felinegames/>**

Vortex Next Generation is the latest thrill ride for lovers of the breakout genre of games. Probably best described as a cross between Arkanoid and Tempest, Vortex NG breaks the "paddle and walls" barrier by allowing the paddle to rotate 360 degrees around the "blocks." Along with a slew of other features, it also supports both local and networked cooperative multiplayer - something sorely lacking in other breakout-styled games. Requires PPC, OpenGL v.1.1.1 or better, DrawSprockets 1.4 or better, Input Sprockets v.1.4 or better, 50 MB Hard Disk space, 14 MB RAM, OpenGL Compatible 3D Accelerator card recommended, High Speed Internet for online multiplayer. This version is for Mac OS X.

### **X-Assist 0.5 Freeware**

**Peter Li, [pli@ozemail.com.au](mailto:pli@ozemail.com.au), <http://members.ozemail.com.au/~pli/>**

This simple application brings back useful features like OS 9 windowing mechanism back to OS X (where all windows are switched back when a window is clicked on, instead of just the window being clicked on, like in OS X). It also has support for an Application Menu, customizable user defined menus (like in Apple Menu), and a plugin mechanism to support 3rd party plugins (MP3 player and Volume control plugins included).

### **XTools 1.03 Demo**

**Tenon Intersystems, [info@tenon.com](mailto:info@tenon.com), <http://www.tenon.com/>**

Xtools is a full implementation of the X Windows system running on Mac OS X. Based on X11R6.4, Xtools inherits the clean, fast, stable, and portable codebase from Xfree86. Integration with the Aqua environment is enabled by building the X server on top of Cocoa and QuickDraw, providing a rootless X windows display while still retaining the ability to use native applications.

Mac OS X.
