iBank ©

Intuitive money management

iBank is a feature rich, yet easy to use personal financial manager.   It features QIF and QFX (OFX file format) import, memorized transactions, scheduled transactions, auto-fill, custom reporting and searching.   iBank will also synchronize with projects from iWork.

iBank is shareware.   The version you download has all of the features of a registered version, except that it will only allow for 25 transactions in any account.   After you register, you will be allowed an unlimited number of transactions.

System Requirements

iBank runs only on Mac OS X 10.2 or higher

Some Features

- Syncs with iWork (www.iggsoftware.com/iwork/)
- Scheduled transactions
- Auto-fill transactions
- Memorized transactions
- Memorized categories
- Graphical and statistical reporting
- Go ahead, check it out, more features await…

New in 1.1

- Sorting of transactions
- Scheduled transactions 4 week option
- Fixed small bug with QIF importing when fields had semi-colons
- Checks for scheduled transactions every 24 hours, as opposed to on launch
- Sub-tran values can be positive even if transaction is negative

•Can begin editing a transaction by typing command-e
•Print reports
•Auto-detect negative amounts for sub-transactions
•Add new scheduled transaction automatically causes the edit sheet to come down
•Option to backup when quitting
•Export accounts or selected transactions as QIF
•"Sync" preferences changed to "Advanced"
•Reports:include selected categories instead of ignore
•Searching greatly improved
•Fixed a few other bugs

New in 1.0.4

•Fixed bug where typing in check wouldn't set transaction type to a check
•Fixed bug where "next check #" wouldn't localize
•Transactions can now handle larger numbers
•Fixed a few other small bugs

New in 1.0.3

•Major speed improvements when tabbing through fields
•Can now tab through an entire transaction
•Import window now has an "account" column
•Can't delete reconciled transactions
•Warning is displayed when deleting transactions with the delete key
•Default transaction type for credit card is "charge"
•Default transaction type for savings is "deposit"
•Fixed bug where balance would be displayed incorrectly sometimes
•Fixed some other minor bugs

New in 1.0.2

•improved QIF import
•fixed bugs dealing with scheduled transaction
•fixed bug where new transactions wouldn't always be expanded
•trail period allows for 75 transactions
•fixed bug where reporting wouldn't subtract sub-transactions from a transaction's total
•added reconciled and non-reconciled amount fields in the account info drawer

New in 1.0.1

- improved QIF and QFX import
- imported transaction window now resembles main transaction window
- checking is spelled "chequing" for non-US users
- minor improvements to graphical reports
- fixed several bugs with scheduled transactions

Known Issues

- cutting and pasting a transfer transaction will break its link to its corresponding transaction
