

# **FoxTrot Personal Search™ Version 1**

FoxTrot Personal Search<sup>™</sup> is a brand new application delivering the fastest, most focused and precise way to find data in your files. Based on CTM Development's revolutionary FoxTrot search engine - used in more than 41 countries and 24 languages by users of CTM's PowerMail - FoxTrot Personal Search brings high performance document retrieval and indexing to your most important files. For users of Mac OS X 10.4 FoxTrot Personal Search extends Spotlight in several ways. Users of Mac OS X 10.3 and 10.2 get with FoxTrot Personal Search the first truly useful find-by-content solution.

FoxTrot Personal Search Version 1 is now available at www.foxtrot.ch with unlimited search capabilities and index updates running for 60 days.

## **Features**

### • In-context display of found terms

FoxTrot Personal Search indexes file contents and metadata (file name, author, title and more). Instead of merely showing which files contain your keywords, FoxTrot Personal Search highlights these terms in a preview of the document itself.

You can navigate to next and previous occurences, jump to a particular hit and and select text, all without needing to launch or switch to another application.

FoxTrot displays full PDFs, word processing documents and pictures; it even plays found QuickTime movies, mp3 files and more.

Where /Users/jmi/Documents/former/Microsoft f/ Size 395 KB Created Saturday, November 6, 1999 Kind HTML document Modified Saturday, November 6, 1999 Apple does not license the Mac OS separately from its PC hardware, however, and the package of hardware and software comprising an Apple PC system is priced substantially higher than the average price of an Intel-compatible PC system.

• Dynamic categorization In order to "zero in" on the documents which really matter, FoxTrot lets you narrow the number of hits by clicking on several categories, which are dynamically generated based on the information and content of found files. This advanced process, derived from scientific investigation

techniques, lets you successively tag hits by file kind, age or parent folder. Dynamic categorization is a unique FoxTrot feature.

## • Flexible relevance ranking

Typical searches yield too many results: FoxTrot Personal Search's exclusive ranking mechanism weighs each search result, and displays most relevant documents first. If you're overwhelmed by the number of matches, a slider setting will repeat the search with a more discriminating eye.

## • Wildcards, exclusions and more

Searches are performed on full words by default; they can be made to include:

- words "beginning with" given characters
- all words in a search string
- at least one of the words
- an exact phrase or portion of sentence
- any term except

as well as complex search patterns combining several criteria.

## **Benefits**

#### • Mac OS X 10.2.8\* to 10.3.9\*\* users

FoxTrot Personal Search delivers an ultra-fast and precise find-by-content solution for their most important files, at a fraction of the cost and without the hassle of moving to Mac OS X 10.4 (Tiger). If you are a Mac OS X 10.2 or 10.3 user and plan to move to Mac OS X 10.4 mainly because of Spotlight, think twice and try FoxTrot Personal Search first.

\* Indexing on X 10.2 supports all file names as well as content in PDF, rtf rich text, Unicode and plain text formats.

**\*\*** Indexing on X 10.2 supports all file names as well as content in PDF, HTML, Word .doc, rtf rich text, Unicode and plain text formats.

#### • Mac OS X 10.4.x users

In addition to the above, FoxTrot Personal Search extends Spotlight by delivering a vast array of additional search possibilities, while supporting all the file types translated by the Spotlight importer plug-ins (including metadata indexing). The built-in document preview additionnaly offers enhanced PDF display and navigation.

## Pricing

FoxTrot Personal Search Version 1 single-user licenses are available at 29 Euro (approximately: 35 US\$ depending on exchange rates) from www.foxtrot.ch.

5-user packs cost only 99 Euro.

For company or site licensing, kindly contact us at: ctm-sales@ctmdev.com.

## What Users Say

"Having used FoxTrot search capabilities within Power-Mail for two years, I'm delighted to see these now available for the rest of my data. In fact, I was so thrilled at the announcement that I paid for my copy before the software was available - and haven't regretted since." Marco Osti, Italy (customer #000001)

"...In addition to providing an outstanding text based email program, CTM provides excellent technical support to supplement its user's help message exchange group. I'm pleased to be among those who use FoxTrot and PowerMail daily." Nicholas Keck, California

"FoxTrot Personal Search really brings a new dimension to managing relevant files on my PowerBook. I previously had to come up with file names and complex folder structures just be able to find information; thanks to FoxTrot Personal Search, I now store thousands of documents of various types in a single folder and instantly find exactly what I had been looking for." G. Christen, Zürich Switzerland

# **Other FoxTrot Products**

#### • For Windows users

FoxTrot Personal Search for Windows is currently under development. If you have specific needs unmet by current offerings, describe them in an e-mail to ctminfo@ctmdev.com (fear no spam from us)in order to be included in an early test phase.

#### • For enterprise networks and workgroups

Cross-platform, client-server implementations of Fox-Trot are in design and will scale from small workgroups to multi-processor enterprise servers and security policies. Please contact ctm-info@ctmdev.com.

#### • For software developers

Developers wishing to include fast find-by-content to their Windows, Linux, Unix or Mac OS application can license the FoxTrot core engine SDK for inclusion into their products. Please contact ctm-info@ctmdev.com for details.

## • For Mac OS X users

Check out PowerMail Version 5 < www.ctmdev.com>, a unique e-mail client constructed around the FoxTrot core search capabilities. PowerMail is widely recognized as one of the best programs for processing e-mail (including spam filtering) and managing mail archives.
