Frequently Asked Questions About The StickyBrain Installer

1. Why does the installer ask for a password?
2. What files get installed and where?
3. How do I uninstall StickyBrain?

1. Why does the installer ask for an administrator password?

The StickyBrain installer asks for an administrator password so it can install the following components into the main Library folder:

- OpenBase database system
- ChronosNotes Conduit

For information on what administrator password to use see:

http://docs.info.apple.com/article.html?artnum=75187

2. What files get installed and where?

The following is a complete list of files that are installed by the StickyBrain installer:

- **StickyBrain.** This is the main StickyBrain application. The StickyBrain application will be installed into a folder named "StickyBrain" which will be installed in your main Applications folder: /Applications/StickyBrain
- **Chronos/StickyBrain.** This folder stores pictures, textures, and other related files and is installed into the "Application Support" folder of your home Library folder: ~/Library/Application Support/Chronos/StickyBrain
- **ChronosNotesCM.plugin.** This is the StickyBrain contextual menu plugin file and is installed into the "Contextual Menu Items" folder of the "Application Support" folder of your home Library: ~/Library/Contextual Menu Items/ChronosNotesCM.plugin
- **ChronosNotesService.** This is a helper application for StickyBrain. The ChronosNotesService application is installed into the "Services" folder of your home Library folder: ~/Library/Services/ChronosNotesService
- **ChronosNotes Conduit.** This is the conduit that synchronizes notes between StickyBrain and a Palm handheld. The ChronosNotes Conduit is installed in the Conduits folder (the installer will ask you if you'd like it installed): /Library/Application Support/Palm HotSync/Conduits
- **OpenBase.** This is the database engine StickyBrain uses to store your notes. The installer places files in several locations:
  - /Library/OpenBase
  - /Library/StartupItems/OpenBase
  - /Library/Frameworks/OpenBase...framework
  - /Library/Java/Extensions/OpenBaseJDBC.jar
  - /Applications/OpenBase

3. How do I uninstall StickyBrain?

StickyBrain and its related files can be uninstalled using the StickyBrain Installer. Double-click the installer and choose "Uninstall" from the "Easy Install" pop-up menu

and follow the on-screen prompts.
