

## Graphics & Multimedia

### November 2006

#### **Image Tricks 2.3** *trial*

BeLight Software, <http://www.belightsoft.com>

**Requirements: Mac OS 10.4 or later**

Edit pictures using Tiger Core Image filters and generate images with mathematical algorithms.

#### **iStopMotion 1.10.1** *demo*

Boinx, [info@boinx.com](mailto:info@boinx.com), <http://www.istopmotion.com>

**Requirements: Mac OS 10.3 or later, QuickTime 6.4 or later**

iStopMotion is the ideal supplement for your digital hub. Used by educators, professional and amateur filmmakers all over the world to create astonishing work, iStopMotion is the tool of choice for stop-motion animation (aka claymation) and time-lapse recording.

#### **LineForm 1.1** *demo*

Tribar Software, <http://www.tribarsw.net>

**Requirements: Mac OS 10.3.9 or later**

Lineform is a completely new drawing program. Lineform is the ideal tool for posters, diagrams, and drawings. Powerful features combine with a simple interface to make your drawing great.

#### **PatternPrint 1 for Illustrator** *demo*

Graphic Xtras, <http://www.graphicxtras.com>

**Requirements: Mac OS 10.1 or later, Adobe Illustrator CS or later**

Create millions of great color-pattern designs with this Adobe Illustrator plug-in. PatternPrint uses the pattern swatches in Illustrator's Swatches palette to combine two patterns (different or the same) to create stunning and unique texture-pattern effects.

#### **PhotoPresenter 2.5.6** *demo*

Arizona, <http://www.arizona-software.ch>

**Requirements: Mac OS 10.4 or later**

Present all your pictures and movies quickly and easily with PhotoPresenter. Choose your preferred slideshow style among several themes, and view any image and movie, either from your iPhoto library or from anywhere else, such as from a CD.

#### **PhotoReviewer 2.1** *shareware*

Stick Software, <http://www.sticksoftware.com>

**Requirements: Mac OS 10.4 or later**

PhotoReviewer is an image-handling utility for Mac users who juggle a

lot of photos. If you have a digital camera, it's not uncommon to have hundreds or even thousands of images coming into your inbox. You need to rename them, toss the bad ones, sort the good ones, email thumbnails to friends, and so on and so on. You need an app that can help you with your photo workflow: PhotoReviewer.

### **PhotoZoom Pro 2.1** *trial*

BenVista, <http://www.benvista.com>

**Requirements: Mac OS 10.3 or later**

PhotoZoom Pro 2 is based on S-Spline XL: a renewed and improved version of our patented, self-adjusting, many-times-awarded image-enlarging S-Spline interpolation technology. As we did with S-Spline, our S-Spline XL technology again introduces a revolutionary breakthrough in digital image enlargement. It is able to render sharp, crisp, clear image magnifications, perfectly focused, yet without the jagged edges, loss of detail, or lack of photo-realism that normally come with enlarging images.

### **Shoebox 1.6.1** *trial*

KavaSoft, <http://www.kavasoft.com>

**Requirements: Mac OS 10.2.5 or later**

Shoebox organizes digital photos by content. Photos are added to categories, which are like virtual folders for dates, people, places, and things. Shoebox learns what's in each photo, and helps you quickly find just the photos that you're looking for.

### **Swift Publisher 1.3** *trial*

BeLight Software, <http://www.belightsoft.com>

**Requirements: Mac OS 10.3 or later**

Swift Publisher makes desktop publishing fun, easy and intuitive. Choose one of ready-made templates, use a set of editing tools to control transparency, tiling, apply masks and fills, crop images, and enjoy the result. Want to share your stunning documents? Using Mac OS X 10.4 (Tiger) capabilities, you can make adjustable export to PDF, and also export to TIFF and JPG.

### **Ultimate Productivity Action Pack 1.0** *trial*

Automated Workflows, <http://www.automatedworkflows.com>

**Requirements: Mac OS 10.4 or later**

This Automator action pack contains a set of Automated Workflows and LLC's Automator actions for use with a variety of applications including InDesign, Photoshop, QuarkXPress, and more.
