

Productivity

November 2006

Curio 3.2.1 *trial*

Zengobi, <http://www.zengobi.com>

Requirements: Mac OS 10.3.9 or later

Curio is a brainstorming and project-management application -- a truly flexible and powerful environment which promotes visual thinking for gathering and shaping your ideas while managing all the notes and documents associated with your project.

EnzymeX 3.1 *freeware*

Mekentosj, <http://www.mekentosj.com>

Requirements: Mac OS 10.3 or later

EnzymeX is a program for molecular biologists, developed to help you determine which restriction enzymes you should use to cut your DNA of interest. It now is a complete DNA sequence analysis and editing program, which contains powerful and unique features and is above all user-friendly.

Graph Paper Maker 1.1.0 *freeware*

Black Cat Systems Releases, csmolinski@erols.com,

<http://www.blackcatsystems.com>

Requirements: Mac OS 10.2 or later

Graph Paper Maker lets you create your own custom sheets of graph paper. You have complete control over the graph characteristics, including independent X and Y axis settings for linear or log scale, selection from a dozen standard paper sizes (or custom-create your own), PDF output, and your choice of line colors and weights.

iClip lite 2 *freeware*

Inventive, <http://www.inventive.us>

Requirements: Mac OS 10.4 or later

iClip lite is a multiple clipboard and scrapbook widget designed to improve your efficiency and productivity for most tasks you do on your Mac. It enables you to quickly store and retrieve snippets of information like text, pictures, Internet addresses and more in its multiple "clip bins."

iUnit 3.3 *shareware*

Black Cat Systems, <http://www.blackcatsystems.com>

Requirements: Mac OS 10.2 or later

iUnit is a unit conversion programs. You can convert between 1,545 different units quickly and easily. iUnit also displays the values of 91

physical constants.

Keep It Together 1.2.2 *trial*

Reinvented Software, info@reinventedsoftware.com,
<http://www.reinventedsoftware.com>

Requirements: Mac OS 10.4 or later

Keep It Together has a different take on traditional organizers, focusing on making storage and retrieval effortless rather than require everything be organized into complicated hierarchies -- but KIT has a few tricks up its sleeve there, too. Files can be color-coded with categories and sorted into groups; unlike folders, these work like iTunes playlists so that a file can exist in more than one group at a time. KIT's smart groups will do all the hard work of staying organized for you.

MacJournal 4.0.4 *trial*

Mariner Software, <http://www.marinersoftware.com>

Requirements: Mac OS 10.3.5 or later

Thanks to a new, underlying blogging and podcasting architecture, journaling just got a lot more interesting. Easily create a personal journal with MacJournal's simple-to-use interface with two-level security (password protection and AES-256 encryption). With MacJournal 4 you can now record audio entries for your journal or even podcast them. If blogging is more your style, MacJournal 4 lets you publish your work as a blog to any of the popular blogging services, including your .Mac account.

Mellel 2.1 *demo*

RedleX, <http://www.redlers.com>

Requirements: Mac OS 10.3 or later

Mellel is a leading word processor for Mac OS X, designed to serve scholars, creative and technical writers, multilingual word processors, and anyone who needs an agile, feature-rich, and reliable word processor.

Montage 1.0 *trial*

Mariner Software, <http://www.marinersoftware.com>

Requirements: Mac OS 10.3.9 or later

Montage makes it easy to create, edit, and manage screenplays on your Mac. From the ability to import Final Draft documents, to using custom, preformatted templates for film, TV, radio, and theater, Montage guides the first-time screenwriter and the seasoned veteran from start to finish.

Mori *trial*

Hog Bay Software, jesse@hogbaysoftware.com,
<http://www.hogbaysoftware.com>

Requirements: Mac OS 10.4 or later

Mori is a digital notebook that makes it easy to record and organize your thoughts. Unlike the alternatives, Mori doesn't box you into one way of thinking. Instead, Mori's simple and flexible design puts you in charge of your information.

OmniGraffle 4.1.2 *trial*

The Omni Group, info@omnigroup.com, <http://www.omnigroup.com>

Requirements: Mac OS 10.3 or later

Move your whiteboard to your Mac. OmniGraffle helps you draw beautiful diagrams, family trees, flow charts, org charts, layouts, and other directed or nondirected graphs. If you want to organize anything graphically using boxes and lines, OmniGraffle is your tool.

OmniOutliner 3.6.1 *demo*

The Omni Group, info@omnigroup.com, <http://www.omnigroup.com>

Requirements: Mac OS 10.3.9 or later

OmniOutliner has just what you need for outlining and organizing information. It's perfect for note taking, to-do lists, school projects, budgeting, project management, and much more. OmniOutliner lets you set up a hierarchy of main headings and subpoints that can be expanded and collapsed as desired, and create multiple columns related to each topic. Other features include smart checkboxes, customizable pop-up lists, and an innovative styles system.

PDFPen 2.4 *demo*

SmileOnMyMac Software, <http://www.smileonmymac.com>

Requirements: Mac OS 10.2.5 or later

Fill out PDF forms and edit PDFs easily with PDFpen. Split, combine, reorder, sign and augment PDFs with text, image overlays, and watermarks.

SQLite Manager 2.1.2 *trial*

SQLabs, marco@sqlabs.net, <http://www.sqlabs.net>

Requirements: Mac OS 10.2.8 or later

SQLiteManager is a next-generation GUI database manager for sqlite databases that combines an easy-to-use interface with advanced features. SQLiteManager allows you to open and work with sqlite 2.x, sqlite 3.x, in-memory databases, and REALSQL Server databases. It allows you to create and browse tables, views, triggers, and indexes. It also enables you to insert, delete, and updates records in an

intuitive way, and supports arbitrary SQL commands.

TaskTime4 4.1.9 *trial*

To The Point software, tfindlay@nethop.net,
<http://www.ttpsoftware.com>

Requirements: Mac OS 10.3 or later

TaskTime4 provides a straightforward method of tracking time spent on jobs you do for your clients. It can generate personalized invoices that can be emailed, printed, and saved to disk. Other important features include: project status tracking, Address Book integration for adding clients, linking of related resources to projects for easy reference, project expenses tracking, the ability to bill for flat-rate items, scheduled and manual data backup, minimizing of project windows to small floating time controllers, and much more.

TextExpander 1.4.1 *demo*

SmileOnMyMac, info@smileonmymac.com,
<http://www.smileonmymac.com>

Requirements: Mac OS 10.4 or later

TextExpander is a customizable typing-timesaver tool that lets you define abbreviations for frequently used text strings and images, and which has been updated to expand the choice of delimiter characters that trigger snippet expansion. The options for import-file formats have also been expanded and include comma- and tab-delimited text files.

TextMate 1.5.3 *trial*

Macromates, <http://www.macromates.com>

Requirements: Mac OS 10.3.9 or later

TextMate brings Apple's approach to operating systems into the world of text editors. By bridging Unix underpinnings and GUI, TextMate cherry-picks the best of both worlds to the benefit of expert scripters and novice users alike.

Typinator 1.4.1 *shareware*

Ergonis Software, popchar@ergonis.com, <http://www.ergonis.com>

Requirements: Mac OS 10.3.9 or later

Typinator speeds repetitive typing tasks and eliminates manually introduced errors. To set up an often-used text or image in Typinator, you simply define an abbreviation along with its replacement text or image. When you enter the abbreviation in any application, Typinator automatically expands it.

WriteRoom 1.0 *freeware*

Hog Bay Software, <http://www.hogbaysoftware.com>

Requirements: Mac OS 10.4 or later

WriteRoom is a full-screen, distraction-free writing environment. Unlike standard word processors that focus on features, WriteRoom is simply about you and your text.
