

4.1.9

- fixed text wrap on invoice message
- now possible to select and delete multiple sessions
- added font and font size menus to invoice window
- fixed line spacing problem with session notes, global messages and special messages in invoices
- fixed a problem occurring when commas were used in place of decimals in expense or flat rate items
- scrollwheel support added to invoice window
- fixed a bug that occurred if status names were edited
- added preference option to automatically set a project's status to "Invoice Sent" when an invoice is emailed (also sets the Invoice Sent status date to the current date)
- added preference option to restore default window positions
