

DE SOTO AREA SCHOOL DISTRICT

720

SAFETY PROGRAM

The De Soto Area School District Board of Education believes that safety education and accident prevention are important, and that the physical well-being of every student, employee and visitor shall be a primary concern of the District.

A positive attitude towards accident prevention should be fostered in the schools by all staff. All school personnel should understand and accept responsibility for the safety of all persons coming into their areas.

The responsibility for developing the total safety program shall be delegated to a staff person who shall act as the safety coordinator and shall be directly accountable to the District Administrator in the performance of his/her duties. This person shall be responsible for the promotion and development of an accident prevention and safety education program for students and staff.

A school safety plan shall be developed and be in effect in each District school to provide as safe an environment as possible for students, employees and citizens while they are present on school premises or participating in school-sponsored activities.

The District Administrator will execute this policy.
