

## Call Waiting

If you have call waiting on your phone line, you will probably lose your connection to America Online if a call comes in while you are on America Online. We recommend that you temporarily disable call waiting when you are signed on to America Online by checking the box below. If the code we have provided is not right for your area, highlight it and type in the correct one. If you are not sure of the correct code in your area, look in the front section of your local phone book, under Call Waiting.

Make sure there is a comma following the code.
