

Projected Sales by Region

LA

Wherever there's gridlock, there are instant dollars to be made. The HeloCar market doesn't get any better than the land of the San Diego Freeway.

The MidWest

Cities like Chicago, Denver and Des Moines are having their share of bumper-to-bumper-to-bumper. Look for HeloCar sales to soar within five years.

Texas

Dallas, Houston and San Antonio all look promising. We're considering putting the first HeloCar plant in this region so the bumper stickers can read "Built in Texas by Texans."

New York

A unique opportunity confronts us in this region. Not only is there more than enough traffic to warrant a HeloCar purchase, there are thousands of parking lots (building tops) on which to park those shiny new HeloCars.

The SouthEast

Atlanta and especially Miami are prime markets. We feel the rent-a-car business will speed up sales as the HeloCar will become the most popular method for tourists to go Key hopping.
