## **Editing: Add Data**

Select the appropriate Platform and Info. Enter the Cheat Information in the Cheat Data Field, by typing in the data or by Importing the data. Use the Clear Button if text from a previously looked up cheat is still in the Data Field. Next, enter the name of the game in the field under the Game List Box. Finally, click on the Add button. If adding many cheats, you probably want to wait until the final deletion before Updating the Game List Box, since updating takes a few seconds.

## **Editing: Delete Data**

Look up the Cheat Information to Delete. Note, which cheat you would like to delete. Cheats are given a Record Number within the Data Field. Respond, Yes or No whether you want to delete the cheat information. Respond, whether you want to reload the Game List Box at this time. If deleting many cheats, you probably want to wait until the final deletion before Updating the Game List Box, since updating takes a few seconds.

## **Editing: Clear Data**

Simply clears the Cheat Data Field of data. This command is used to quickly remove Cheat Data, when preparing to add new cheats.

## **Importing Data: Text File**

Allows loading of Text files as Cheat Information.

## **Importing Data: Fanatic Update**

Allows for easy importing of Game Fanatic Cheat Data Updates.

## **Importing Data: Friends Fanatic Data**

This Function will import Game Fanatic Cheat Data from a friends Game Fanatic program.  
The data imported will only be data that the user added.

## **Printing: Printing Data**

Print out a copy of the current cheat.
