

Simplifying HP supplies compatibility

HP Supplies Compatibility Chart – Fall 2004

The science behind brilliant printing.

From the printers and All-in-Ones you use to print your photos and documents, to the print cartridges, papers and films that are at the heart of your printing system, every component is as important as the next.

Our ink systems are capable of producing over 72.9 million colour combinations. Our photo papers consist of six different layers, each with its own specific job to do. And our printers and All-in-Ones are designed to bring the very best out of these supplies.

This is the way we design all our products. By ensuring that they work together, we ensure that you benefit from consistently high quality performance, every time you print.
