1.2 legal_stuff

1) Legal Stuff

1.1) Disclaimer

Stat is provided "AS IS", WITHOUT ANY WARRANTY to its quality, performance or fitness for a particular purpose. In no event shall the author be liable or responsible to the user

or any other person, for any kind of damage caused by the use of this software.

1.2) Conditions of Use and Distribution

Stat is MessageWare, if you like and use it send me a message (Internet or Fido). Feel free to include complaints or suggestions.

Stat may be freely distributed provided:

1. The files are ALL left intact and unmodified.
2. No charge is made for Stat (other than a reasonable copy charge)
3. Stat is not packaged as a part of a commercial product without prior written consent.
4. Stat may not be uploaded to any electronic service that claims a copyright to it's files and programs.

1.3) System Requirements and Limitations

Stat requires AmigaDOS V2.04 or higher.

1.3 system_desc

2) System Description

Stat was written when I found that my old reliable Stat from the Kramden Utilities blew up big time on A4000/040s. Since I could not live without it, I wrote a replacement.

Stat is an extension of C:Status. It will list currently loaded CLIs, Tasks, Libraries, Fonts.... See Command Line for a complete list.

1.4 startup

3) Command Line

USAGE: Stat [NOANSI] [ALL] [CLI] [DEVS] [FONTS] [LIBS] [PORTS] [RESOURCES] [TASKS]

or to put it another way...

Stat N=NOANSI/S,A=ALL/S,C=CLI/S,D=DEVS/S,F=FONTS/S,L=LIBS/S,
P=PORTS/S,R=RESOURCES/S,T=TASKS/S

Only the first letter of each keyword is required. All arguments are optional. All lists are sorted by Address. The default report is CLI.

NOANSI - Disables ANSI colour for column headers.
ALL - Displays all of the following lists.
CLI - Current CLIs.
DEVS - All devices in memory.
FONTS - All Fonts in memory.
LIBS - All Libraries in memory.
PORTS - All active message ports.
RESOURCES - All Resources in memory.
TASKS - All task and processes.

I guess that's it. Enjoy!

1.5 installation

4) Installation

Copy Stat to somewhere convenient that's in your Path. Then copy this doc file where ever you keep your docs.

That's it.

1.6 history

5) Stat History

V1.15 - First public release.

V36.1 - Added NOANSI keyword. Optimized a bit. Re-enabled CTRL C checking. Fixed bug in copying task address. Updated the docs a bit. Changed version to reflect minimum OS required.

V36.2 - Sorted all lists by Address. I didn't notice it behavior in the original Kramden Utilities. Thanks to Fred Schuchman for pointing this out.

Optimized a bit (12088 -> 8644).
