1.2 IntuiCookie Hypertext Manual - Introduction

Introduction

IntuiCookie is a program that displays fortune cookies.

The major advantage of IntuiCookie is that it uses Intuition to show a Cookie : it opens an requester and waits until you click on "Continue". This is very useful if, for example, you wish to copy IntuiCookie to your WBStartup.

IntuiCookie comes with 875 built-in cookies, data files are currently not supported. ->Future

1.3 IntuiCookie Hypertext Manual - Copyright

Copyright

IntuiCookie is Public Domain.

This version is Copyright ©1995 Christian Kemp.

I occasionally deleted the source some months ago (yes, IntuiCookie is that old), but if you want it, just wait for an improved version. ->Future

Additional "Copyright"

The cookies were found on the Aminet3 CD (/text/misc/fortunes).

They were uploaded to the Aminet by wloske@cip.e-technik.uni-erlangen.de.

Disclaimer

IntuiCookie has been tested and should be without bugs. It is in my WBStartup drawer for over six months now and no error occured during this time.

(Or as a lawyer would say : I cannot be made responsible for any kind of damage resulting from the direct or indirect usage of IntuiCookie.)

1.4 IntuiCookie Hypertext Manual - Requirements

Requirements

IntuiCookie requires at least Kickstart/Workbench 2.04.

1.5 IntuiCookie Hypertext Manual - Contact Address

Contact address

Send long letters, bug reports (?), used A4000/060's, money, etc. to:

Kemp Christian

52, BD Patton

L-2316 Luxembourg

- Europe -

Sorry, only snailmail, I haven't got access to e-mail.

1.6 IntuiCookie Hypertext Manual - Usage

Usage

Using IntuiCookie is really easy! Start it by clicking on its icon, or alternatively enter its name in a Shell.

A requester with a random cookie will appear. Click on "Continue" to close the requester.

To install IntuiCookie in your WBStartup simply drag its icon in the SYS:WBStartup drawer.

1.7 IntuiCookie Hypertext Manual - Future

Future

The following features may be included in future versions:

(if I get some nice letters to motivate me :-)

- Locale-support for OS2.1+ (has anyone got German or French cookies?)

- IntuiCookie will support data files.

- And, of course, your suggestions!

1.8 IntuiCookie Hypertext Manual - Outro

Outro

Now, for some useless blarb!

IntuiCookie was written on an A1200 with Kickstart/Workbench 3.0, a 250 Meg 2.5" HD, DKB 1240 accelerator with 68EC030/40MHz, 68882/50MHz and 4 Meg of RAM, BSC CD1200 (Tandem1200) with Mitsumi CD-ROM.

IntuiCookie was written in C.

As you may have noticed, IntuiCookies is an old program. It was written in early 1995 (1st January to be exact), but I was always to bored to write a doc for it and release it. Thus the >6 month delay.
