

Mind you don't ~~overwork~~
- Patience - and the stop - practical.

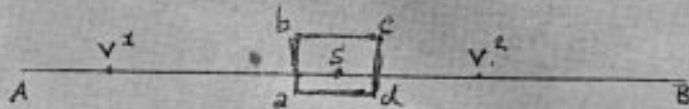

Brackbush,
Cousinston, Northamptonshire.

18th June

Dear Randal

I did not half enough
praise the drawings you
sent me. - in fact I could
not see them, they were so
rolled out of effect for had
them flattened and find
them of immense interest and
value.

Just note this much at once of
perspective.

Let AB be the Horizon -
The line drawn at it is over it

in your picture is the line or
level of your sight

S. the point of direct sight
is always to be in the middle
of your picture - from laterally
(a b c d the picture, in my
figure)

But V. 1. and V. 2.
(Vanishing points 1, and
Vanishing points 2) may
be any where in your
picture or out of it
- accordy to ~~your~~ the
position of the object
