REASSIST (Real Estate Assistant) will extract data and message data that you have captured to your hard drive and out put it to a comma delimited file. You can then use the data in a spreadsheet, data base or word processor for mail merge purposes.

Unzip the file REASSIST.ZIP to a temporary directory on your hard disk or to a floppy drive.
In Windows 3.x click File and then Run and type Drive Path Setup such as (a:setup) or (c:\directory\setup) substituting the drive letter and directory name you used to unzip the file to.
In Windows 95 click My Computer then Control Panel then Add/Remove Programs if you unzipped the file to a floppy drive Windows 95 will find the (setup.exe) or if you unzipped the file to a directory use Browse to find the directory and click on the (setup.exe).
