MIDI JukeBox

MIDI JukeBox allows you to select and play multiple MIDI files.   Files can be selected with the Open command, by using the File Manager's drag-and-drop feature, or by associating all .MID files with MIDI JukeBox.   See Selecting Files for further details.

Files can be played once or in a continuous loop.

MIDI JukeBox requires Microsoft Windows 3.1 or later and a compatible MIDI output device.   MIDI JukeBox supports the SoundBlaster Pro.

Selecting Files

Before files can be played they must be selected.   Files can be selected in three different ways:

1.   Using the Add Songs command.

2.   Dragging one or more files from the File Manager and dropping them into MIDI JukeBox

3.   If you associate all .MID files with MIDI JukeBox, whenever you double-click a .MID file in the File Manager, MIDI JukeBox will be automatically started with the specified file opened.   To associate all .MID files with MIDI JukeBox, go to the File Manager.   Select (single-click) a .MID file, type Alt, F, A.   Then enter MIDI JukeBox's path in the Associate With box (for example, C:\MIDIJB\MIDIJB.EXE).
