

Winlist - Version 1.0

Introduction

Winlist is a program for MS Windows Version 3.1. You can drag and drop a file on winlist and it will start Vernon D.Buerg's list program with the file you dropped.

Distribution

Winlist 1.0 is freeware, NOT public domain software. You may use it, give copies of the entire package to anyone, or delete it. You may not sell it or claim that you wrote it.

Requirements

Winlist requires MS Windows Version 3.1
Vernon D.Buerg's list program. Available on America OnLine.

Installation

1. Put winlist.exe in any directory.
2. The directory should be part of your PATH.
If not winlist will display an Error Message.
To correct make sure directory is in your PATH
3. Start winlist any way you like.

Disclaimer

I have made every attempt to ensure that this program works correctly. Much as I would like to I cannot guarantee that it is bug free. I accept no responsibility for loss or damages financial, or other caused through the use of this program.
