

This document authorizes you to include the shareware program included on this disk in your catalog, library, or bulletin board, under the following conditions:

- 1 - You may NOT remove or alter ANY of the files included on this disk.
- 2 - You MAY add your own files to your distribution disk so long as these files do not contradict or conflict with the files already provided.
- 3 - You MAY sell disks containing copies of this program provided you do not imply to your customers that the software is free.
- 4 - If your distribution method is by bulletin board then you may NOT unarchive the self-extracting file (FLAGSARC.EXE) before using your own archiving method, since the installation procedure included with the program is designed around this self-extracting file.
- 5 - If your distribution method is by disk then you should NOT further archive any of the files for this program.
- 6 - If you are a non-U.S.A. distributor, then you are NOT authorized to translate any of the documentation for this program UNLESS you clearly indicate that there is NO non-English version of the program available from WYNDWARE.

If you did not receive this disk directly from WYNDWARE, then please contact us personally to be sure that you have the most recent version available.

A detailed description of the program follows:

FLAGS - version 1993

Recommended Zip Name: FLAGS93.ZIP

Short Description: Educational - Shows 700 Flags

Description: The flags of the nations of the world are powerful symbols, representing the history, beliefs, and hopes of the people of each country. Because of this, flags become useful tools for understanding and appreciating the various cultures which make up our world. This program displays full-color representations of over 700 different flags: flags of every independent nation in the world, plus hundreds of historical, regional, naval, and personal flags. The flags may be viewed individually, or the program may be set to exhibit a parade of all the flags. There is also a flag quiz to test your knowledge of the various flags.

New Features: Over 30 changes have been made to national flags, including the addition of the former Yugoslav and Soviet republics. Other new flags have been added, and the program's interface has been improved.

System Requirements: Flags requires a computer with at least 512K RAM, operating with PC or MS DOS 3.0 or greater, and a VGA, EGA or CGA monitor. Two floppy drives or a hard disk are recommended.

Disk Files: README.DOC - Displays information on using the disk
FLAGS.DOC - Basic instruction guide
INSTALL.EXE - Creates a working copy of Flags
VENDOR.DOC - This information file for vendors
FLAGSARC.EXE - Self-extracting file which contains:

- FLAGS.EXE - Flags program file
- FLAGS.OVR - Flags program overlay file
- FNTNS.DTA - Information on nations
- FINFO.DTA - Help and information file
