Positioning:

Magic and technology collide in a post-apocalyptic adventure!
Experience a new era in Tactical Role Playing in this first ever Rifts video game.

Marketing Summary:

Hundreds of years in the future, a nuclear holocaust has destroyed countless human lives, releasing massive waves of psychic energy. These magical energies surge across the Earth, creating tears in the fabric of space and time called RIFTS.

Through the RIFTS, magical and monstrous creatures from other worlds invade our planet, reshaping the landscape into something mutable and fantastic.

You and your companions must struggle to survive in a world where super-science and the supernatural collide; on an Earth where cyborgs and chemically enhanced super-humans clash with vampires and demons from unknown realms.

* Elemental Fusionist

A brand new character class created for N-Gage's Rifts: Promise Of Power. This character has since crossed 'back' to the pen-and-paper gaming world and will be featured in Palladium Books' Rifts 15th year anniversary book, the Rifts Ultimate Edition. Available in August 2005.

Elemental Fusionist - Close association with ley lines has made magic energy a part of the Elemental Fusionist. Two conflicting forces of nature are present within their bodies (e.g. Fire and Water, Earth and Air); thus they may seem schizophrenic as they strive to create balance between the two energies. In addition to resistance to elements and increased strength and endurance, Elemental Fusionists have the power to unleash the energies within their bodies in order to cast spells.
