### **UBI SOFT ENTERTAINMENT PRESENTS ITS ONLINE MULTI-PLAYER GAME SERVICE**

Ubi Soft is going online with it's own internet multi-player service. This time though, it will be a universal gaming service that will offer many games starting with the fast-pace motorcycle racing extravaganza, Redline Racer.

``We are thrilled to introduce the new Game Service`` says GS team leader. ``We think it is one of the most easy-to-use multi-player software on the market today. Ubi Soft developers have worked hard on bringing you the fastest gaming on the NET and our lead designer, has looked up every little detail to make the use of the software an enjoyable one. ``

Contests, tournaments, and special events will take place on the Game Service. Meet and play against killer players with an attitude on many upcoming games, like Speed Buster and Chaos, so get ready for the GS ride.
