Black Dog Cribbage

Version 1.0c,

Copyright (c) 1993, 1994 by Rob Wilson, proprietor, Black Dog Software Revision date of this package: March 6, 1994

License and Warranty

This program is distributed as shareware. It isn't free. If you continue to use it, you are required to register it with Black Dog Software. (The program won't stop working if you don't register it -- I'm relying on the honor system). The registration fee is \$15, for which you will receive the latest copy of the program, and a license to use it. Please review the program's online help information to learn more about registering Black Dog Cribbage.

For License and Warranty information, please see the online help table of contents, topic "Disclaimer / License Agreement".

Installation Instructions

To install Black Dog Cribbage on your system, use the Windows Program Manager "File | Run" command to execute the Black Dog Cribbage "Setup" program (setup.exe). The Setup program will copy the necessary files to your hard drive (if you haven't already done so), create a "Black Dog Software" application group in Windows, and create the Black Dog Cribbage icons.

- 1) From the Windows Program Manager menu, select "File", then "Run...".
- 2a) If you're installing from a diskette, insert the diskette, type "a:setup" on the command line, and press ENTER.
- 2b) If you've already copied the software to your hard drive, enter "c:\path\SETUP.EXE" on the command line. (Replace the c:\path with the drive and path you copied the software to). Since you have already copied the files to your hard drive, Setup will not copy the files. Click "OK" when warned that "no files will be copied".
- 3) Follow the instructions displayed by the Setup program. If you're not sure how to respond to any of the prompts, choose the default response by just pressing the ENTER key.

Files contained in this package

The following files should all be present:

BBS.TXT a short description of this program for use on BBS's.

CRIB.EXE the executable program. CRIB.HLP the Windows Help file.

README.WRI this file.

REGISTER.WRI a registration form you can print and complete to register this

program.

SETUP.EXE the Setup program which installs Black Dog Cribbage. SETUP.INI configuration information used by the Setup program.

Installation Notes

If you use 256 color video drivers on your system, you may find that this program runs very slowly. If this is the case, you may need to obtain updated Windows video drivers for your video card. I found that this game ran terribly slow when using the older (1990) 256 color video driver for my ATI card, yet ran fine with the 16 color video driver installed. I installed more recent (1992) 256 color video drivers, and the difference in speed of this game and other programs was incredible. If you have problems running this game (or other programs) in 256 color mode, you may want to check with your video card vendor on the availability of updated Windows video drivers.

Revision History

This section summarizes all change activity related to the Black Dog Cribbage package to date.

Date February 22, 1994 February 27, 1994	Version 1.0 1.0a	Release or Modification - Initial release of Version 1.0 Minor revisions to help file text Corrected problem with registration screen Help button Added Setup program, revised installation instructions in Readme.wri Added "Single Click Plays Card" option (customer request).
March 2, 1994	1.0b	 Corrected problem with "Go" marker overwriting the "Fifteen 2" and other markers, making it appear that the "Fifteen 2" or other points did not get counted. Changed "Quick Play" option to not cut immediately after Human has discarded both cards to the crib. Added CompuServe online registration procedure to Help file "registration" topic. Revised "Single Click Plays Card" logic so that "click to continue" will not select a card to play if a card happens to be under the cursor. Renamed the option to "Point and Click". Updated Help file with relevant info.
March 6, 1994	1.0c	- Corrected problem where a "Go" for the human would sometimes be counted as two points instead of one Added RCO (Registered Customers Only) command to display statistics: points won, games won, etc.
