Hansen Software's E-mail 3D Tic Tac Toe
Version 1.3

Brief Description
Hansen Software introduces a new way to play games. Designed specifically for two people to play by E-mail, moves are automated by the cutting and pasting of E-mail text to the Windows clipboard. This particular game is of the classic, Three-Dimensional Tic Tac Toe.

New with this version:
Fixes a problem when opening the Help file by pressing "F1" (it would attempt to open the V1.1 Help file, instead of V1.2).

System Requirements
Requires Windows 3.1 (or Windows `95, or OS/2 Warp w/ Windows), and "VBRUN300.DLL".

Any computer capable of running Windows 3.1, is suitable for this program.

Registration
Prior to registration, the entire program is completely functional, except that player names may not be entered ("generic" names are used instead). The registration fee is $7.00 US.

Installation
(For help with these steps, see the Windows and/or DOS manual)

1) Create a new directory.

2) Copy all of the files into the new directory. The files required are:
> **HS3DT13.EXE**
> **HS3DT13.HLP**
> **COMMDLG.DLL**
> **CMDIALOG.VBX**
> **THREED.VBX**
> **VBRUN300.DLL** (*not* included in this ".ZIP" package)

3) Run "HS3DT13.EXE" and/or add it as a new "program item".

If upgrading from a previous version, merely copy all of the files into your existing E-mail 3DTTT directory (overwriting existing files), then add HS3DT13.EXE as a new program item, or modify the properties of your existing icon.
