GT LEGENDS

The ultimate historic racing simulation!

The unmistakable body of a Porsche 906, the goose bump provoking sound of a Ford Mustang and the sophisticated skills required of the driver of a Corvette Stingray are synonymous with the motor sports of the 60s and 70s. An era in the course of which some of the most exclusive racing cars of all times were designed and the uphill struggle for points required great driving skills of the pilots. Equipped with the official licence of the FIA GTC '65, FIA TC '65 and FIA GTC-TC '76 respectively, this year, 10TACLE STUDIOS and developer SimBin will recreate the period of great racing adventures by introducing "GT LEGENDS".

Gentlemen start your engines!

Over 90 of the most legendary GT and touring cars of the past generations, like the Austin Mini Cooper S, the Ford Capri or the Mercedes 300 SL will be available in the Cup Challenge to compete against each other on the most famous European racing tracks. Only the best drivers will stand a chance and can afford to ensure all cars for their team. Numerous different game types as well as five levels of difficulty promise a high degree of long-term motivation for both beginners and pros. With a new engine, improved graphics and an extended list of features, "GT LEGENDS" continues the big success of the current racing game reference title "GTR – FIA GT Racing Game", and is once again sure to provide high authenticity, a detailed presentation and thrilling entertainment behind the steering wheel of an untamed racing beast.
