

**PRESS RELEASE**

**Nokia announces *Operation Shadow* for the N-Gage™ mobile game deck.**

December 8, 2003 – Nokia today announced *Operation Shadow*, its second own published title for the N-Gage game deck. *Operation Shadow* is a war themed 3D action adventure that immerses gamers into the world of heavy combat action, lightning strikes and the latest military equipment. With multiplayer support for up to 4 players via Bluetooth wireless technology, *Operation Shadow* allows for fast-paced and action-packed competitive game play.

“We are thrilled to announce Nokia’s second own published game title,” said Pasi Pölönen, Director of Game Publishing, Entertainment and Media Business Unit, Nokia Mobile Phones. “*Operation Shadow* is a great example of how Nokia titles will be known for their innovative use of the mobile multiplayer features of the N-Gage platform. Imagine competing on the death match battlefield, forming a team with your friends and taking each other on. Each player’s team can exploit the tactical advantages of the various vehicles as they battle for supremacy and bragging rights.”

As well as fighting on foot, aspiring heroes can choose from a selection of vehicles to fight against the enemy including, helicopters, tanks and hummers. Players will be able to use multiple vehicles in every mission. Thanks to the game’s developed AI, enemies will fight with increasing sophistication, taking cover and working together to attack and defend, as players progress through the game.

*Operation Shadow* is expected to be available on the N-Gage game deck in the first half of 2004. *Operation Shadow* is being developed by Torus Games, a leading game developer based in Melbourne, Australia.

“We are delighted to be working with Nokia on *Operation Shadow*,” said Bill McIntosh, Managing Director of Torus Games. “The N-Gage game deck has the technical capabilities to push the boundaries of mobile gaming to a new and exciting level.”

**About N-Gage**

The N-Gage game deck is an innovative mobile device that is creating an entirely new market for the games industry. Built for active and hardcore gamers, the N-Gage platform is the first mobile and connected game deck to feature online high-quality 3D multiplayer gameplay over Bluetooth wireless technology and GPRS. The N-Gage device also offers unique online games services as well as a comprehensive and growing games catalogue from the leading game publishers. Nokia is the world leader in mobile communications.
