Alien

Hello and welcome to my Alien Desktop Theme for use with Windows 95 and Microsoft Plus! (Or similar "themes" program).

Since you're reading this, you've already opened the zip file. To unzip, use WinZip 6.X to unzip to C:\ (if that is the letter of the drive your Program Files\ Plus!\Themes folder is on)

This Theme was made using all the available utilities on my web site if you have any problems with the sounds maybe it is because you do not have the Net Show helper plugin installed.

I only use the best available material and try to keep the theme to the lowest possible size which is difficult.I hope you enjoy this theme.

It comes complete with startup and shutdown screens.
