Hello, and thanks for downloading the StarTrek Desktop Theme!
The good thing about this Theme is that you don't need to have Microsoft Plus! for the installation.
Included in this **ReadMe.doc** file is the instructions on how to accomplish the task.
You may want to print it out now to help you, and perhaps have it as a reference for future installations similar to this one.

Preparation:
Start by unzipping all of the files into a temporary folder such as *c:\temp*.

Sound Configuration:
> Add the sound files to the *c:\windows\media* directory. Then refer the sound files through the
> **Sounds** section in the **Control**
> **Panel**. Once you have configured the sounds, click the **Save As** button and save it under a name such as "My Own" and click
> the **OK** button.

* To start the new sound configuration settings click on the **Apply** button in the **Sounds Properties**
window.

Startup & Shutdown Screens:
NOTE: If you want to keep the previous *logos.sys* and *logow.sys* files back them up before doing the next installation.

> Copy the *logo.sys* file to the *c:* directory.
> Copy the *logos.sys* and *logow.sys* files to the *c:\windows* directory.
> When asked if you want to replace the files click the **Yes To All** button.

* The new screens will be initialized when you reboot your computer.

Wallpaper:
> Copy the *ambridge.bmp* file to the *c:\windows* directory.
> Click on **Display** in **Control Pannel**. The **Display Properties** window will show the **Background**
> **display** menu . Choose the wallpaper file in the **Pattern display** box.
> Click the **OK** button.

Cursors:
> Copy all of the **.ani* files into the *c:\windows\cursors* directory.
> Click on **Control Pannel**, and double click on the **Mouse** icon. Click on the **Pointers** bar.

> To configure each one:
> 1. Click on the **Browse** button.
> 2. Goto the *c:\windows\cursors* directory, select the appropriate cursor.
> 3. Click on the **Open** button.

Repeat steps 1 through 3 for each cursor. When finished, click the **Save As** button. Save it under a name such as "My Own" and click the **OK** button.

* To apply the new cursor configuration settings click on the **Apply** button in the **Mouse Properties** window.

<u>Finishing Up</u>:
When you have completed setting up the Theme you will be able to safely delete the files in your temporary directory.
