

AMUG DISK LIBRARY CHECKLIST

This checklist was made to keep track of the AMUG disks that I already had complete copies of, the ones I had reviewed and stripped the junk from, and others that I wanted to copy in the future.

It works well when printed out and filled in by pencil, but can be kept as a MacDraw file with the boxes representing AMUG disks filled by patterns. Each box can be selected individually and filled with a code you like.

There is a lot of really good software on the AMUG disks, but often stuff that doesn't justify space on a disk. The list allows you to know which disks you already previewed and saved stuff from.

Hope it is helpful.
