This document contains the results of timing tests conducted using ColorView version 0.97 on four different computer systems. The JPEG file used for these tests is PALACE.JPG, which is included with ColorView 0.97. The times are in minutes and seconds, and indicate the time from selecting the file to a complete display of the image.

There are two columns in each table, representing the times measured in ColorView '386 and ColorView '286 respectively. Each column contains two numbers: one obtained by running ColorView without the Conserve Memory option, and the other with the Conserve Memory option enabled. 'Aborted' indicates that the system was unable to allocate enough memory to process the image using the selected options.
