

**SAS/TOOLKIT**<sup>®</sup> software is a tool that allows users to write their own SAS procedures, functions, formats and informats — provides support for FORTRAN, PL/I, IBM 370 Assembly Language and C using the SAS/C compiler for MVS and CMS users. VMS users can write in PL/I, FORTRAN and C. SAS/TOOLKIT software allows users to extend the capabilities of the SAS System by allowing them to write their own special procedures, proprietary routines for accessing internally developed data bases or special libraries of routines.
